## PREFACE

THE economic and political condition of the world at the end of the first quarter of 1932 is, to say the least, disappointing. To account for the present state of affairs is no part of the business of the STATESMAN'S YEAR-BOOK, but it most certainly is its purpose faithfully to reflect these conditions. This the YEAR-BOOK claims to do. The information under each country has been revised and brought up-to-date; the Census returns for 1930 and 1931 have been collected and the further results which have become available will be found under the appropriate headings; in order to indicate more clearly the trend of the trade of the United Kingdom with all other countries, re-export figures have been added to the table under every country summarizing its trade with the United Kingdom. The Introductory Tables in this volume are on the same lines as those in last year's issue, carrying the statistics to a later date.

To friends all over the world the Editor desires to express his warmest thanks for co-operation which he values very highly.

## XII.—THE LEAGUE OF NATIONS.

*Secretary-General.*—Sir James Eric Drummond, K.C.M.G., C.B.

The League of Nations is an association of States which have pledged themselves, through signing the Covenant (*i.e.*, the constitution of the League) [For the text of the Covenant, see THE STATESMAN'S YEAR-BOOK for 1921, page xxviii], not to go to war before submitting their disputes with each other or States not members of the League to arbitration or enquiry and a delay of from three to nine months. Furthermore, any State violating this pledge is automatically in a state of outlawry with the other States, which are bound to sever all economic and political relations with the defaulting member. The States Members of the League have pledged themselves to co-operate over a wide range of economic, social, humanitarian and labour questions.

The League of Nations formally came into existence on January 10, 1920, through the coming into force at that date of the Treaty of Versailles. The two official languages of the League are English and French. The seat of the League is Geneva, Switzerland.

<sup>1</sup> Made declarations putting the protection of their national minorities under League auspices as a condition of their entry into the League.

<sup>2</sup> Brazil on June 12, 1926, and Spain on September 8, 1926, announced their withdrawal from the League; according to Art. 1, par. 3, of the Covenant, the notice of withdrawal only comes into force two years after it has been given. On March 22, 1928, Spain resolved to continue a member of the League. Brazil's withdrawal became effective on June 12, 1928.

The delegation of the Argentine Republic did not attend the second Assembly and withdrew from the first Assembly upon the latter's decision to refer the amendment to Article 1 of the Covenant proposed by the Argentine, for study by a committee that was to report to the second Assembly. The Argentine Government has not given notice of an intention to leave the League, and appears to regard itself as in a state of suspended or passive membership, to continue until some measure regarded as a satisfactory equivalent to the amendment proposed by the Argentine has been adopted by the League.

The following 9 States are not members of the League:—United States, Brazil (see above), the Union of Soviet Socialist Republics, Turkey, Egypt, Ecuador, Afghanistan, Costa Rica, and the Hejaz and other Arab States. Costa Rica became a member of the League on December 16, 1920, but on December 24, 1924, she gave notice of her intention to withdraw, on the ground of the expense involved. The notice became effective on December 24, 1926. She has since announced to the League her intention to bring the

question of her return before the Constitutional Congress. Egypt is to apply for admission on the ratification of the treaty settling the 'reserved issues' between herself and Great Britain.

## II. THE ORGANS OF THE LEAGUE.

The primary organs of the League are :—

1. The Council.
2. The Assembly.
3. The Secretariat.
4. The International Labour Organisation.
5. The Permanent Court of International Justice (at the Hague).

### 1. THE COUNCIL.

The Council was originally composed of four permanent Members (the British Empire, France, Italy, and Japan) and four non-permanent Members to be elected every year by a majority of the Assembly. The first non-permanent Members, appointed by the Peace Conference and named in the Covenant before the first Assembly met, were Belgium, Brazil, Greece, and Spain. With the approval of the majority of the Assembly, the Council may appoint new permanent and non-permanent Members. At the Assembly of September 1926, Germany was admitted to the League and given a permanent seat on the Council. At the same time the number of non-permanent seats, already increased to six in 1922, was further increased to nine, the period of office to be three years. In order to institute the new system of rotation, three were elected for one year, three for two years, and three for three years, so that at all subsequent Assemblies three members retire instead of nine at once. In 1928 (Sept.) China, Colombia, and Holland were replaced by Spain, Persia, and Venezuela. Spain was specially accorded the privilege of re-eligibility on the expiration of her three years period of office. Poland was accorded the same privilege on her election for three years in 1926, and was re-elected in 1929. Belgium and China both failed to get the necessary majority required for re-eligibility. Any Member of the League not represented on the Council shall be invited to send a representative to sit on it at any meetings at which matters especially affecting it are being discussed. A similar invitation may be extended to States not Members of the League.

The Council meets on the 3rd Monday in January, the 2nd Monday in May, and just before and after the Assembly in September.

At its session of January, 1932, the Council was composed as follows

#### PERMANENT MEMBERS.

British Empire—The Right Hon. Sir John Simon, Secretary of State for Foreign Affairs.

France—M. Paul Boncour.

Germany—Herr von Weizsäcker.

Italy—Signor Grandi, Minister of Foreign Affairs.

Japan—M. Sato.

#### NON-PERMANENT MEMBERS.

China—M. Yen.

Guatemala—M. Matos.

Irish Free State—Mr. Sean Lester.

Norway—M. Braadland.

Panama—M. Garay.

Peru—M. Barreto.

Poland—M. Zaleski, Minister of Foreign Affairs.

Spain—M. de Zulueta.

Venezuela—M. Zulueta, Minister in Paris.

Yugoslavia—M. Marinkovitch, Minister of Foreign Affairs.

### 2. THE ASSEMBLY.

Every State Member of the League is entitled to be represented by a delegation to the Assembly composed of not more than three delegates and three substitute delegates, but it has only one vote. It meets at the seat of the League (Geneva) on the first Monday in September. It may meet at other places than Geneva, but hitherto it has never done so; extraordinary sessions may be called to deal with urgent matters.

The President is elected at the first meeting of the session, and holds office for the duration of the session.

The Assembly divides itself into the following six principal committees, on each of which every State Member of the League has the right to be represented by one delegate :

- I. Juridical.
- II. Technical Organisations.
- III. Disarmament.
- IV. Budget and Staff.
- V. Social Questions.
- VI. Political Questions and admission of new Members.

The decisions of the Assembly must be voted unanimously, except where the Covenant or the Peace Treaties provide otherwise. As a general principle decisions on questions of procedure are voted by majority or in some cases by a two-thirds majority.

### 3. THE SECRETARIAT.

The Secretariat is a permanent organ composed of the Secretary-General and a number of officials selected from among citizens of all Member States and from the United States of America. The Secretary-General, appointed by the Peace Conference (see Annex to the Covenant), is the Hon. Sir James Eric Drummond, K.C.M.G., C.B., British Foreign Office Official; hereafter the Secretary-General will be appointed by the Council with the approval of the majority of the Assembly. The other officials are appointed by the Secretary-General with the approval of the Council.

The Under-Secretaries-General are :—

- M. J. Avenol, former French Inspector-General of Finance (Deputy Secretary-General);
- Marchese Paulucci di Calboli Barone, former Italian Minister Plenipotentiary;
- Herr A. Dufour-Féronce, former German Councillor of Embassy;
- M. Yotaro Sugimura, former Japanese Minister Plenipotentiary.

### 4. THE INTERNATIONAL LABOUR ORGANISATION. [See below.]

### 5. PERMANENT COURT OF INTERNATIONAL JUSTICE.

The revised Statutes adopted at the 10th Assembly provide for 15 judges for the Court, and stipulate that the Court shall remain permanently in Session except for such holidays as it may decide. The judges are elected jointly by the Council and the Assembly of the League for a term of 9 years.

The Secondary Organs of the League are :—

#### (a) The Technical Organisations.

1. *Economic and Financial.*
2. *Health.*
3. *Transit.*

#### (b) Advisory Commissions.

1. *Military, Naval and Air Commission.*
2. *Commission for Reduction of Armaments.*
3. *Mandates Commission.*
4. *Opium Commission.*
5. *Social Commission.*

#### (c) International Institutes.

1. *Institute of Intellectual Co-operation. (Paris.)*
2. *Institute of Private Law. (Rome.)*
3. *International Educational Cinematographic Institute. (Rome.)*

#### (d) Administrative Organisations.

1. *Saar Governing Commission.*
2. *High Commissioner for the Free City of Danzig.*

## V. MANDATES.

The African and Pacific possessions of Germany and certain territories of the Ottoman Empire were ceded by these countries at the end of the war to the Allied and Associated Powers. The latter had inserted an article (Art. 22) in the Covenant of the League according to which the inhabitants of these territories should be put under the tutelage of "advanced nations who by reason of their resources, their experience, or their geographical position, can best undertake this responsibility." These nations should act as mandatories of the League, and exercise their powers on behalf of the League. They should act on the principle that the well-being and development of the peoples under their tutelage formed a "sacred trust of civilisation," and should render the Council an annual report on the territory committed to their charge.

Article 22 furthermore divides the mandated territories into three classes, according to the degree of civilisation of their inhabitants, economic and geographic circumstances, and so forth. Class A is composed of the communities detached from the Ottoman Empire, declared to have "reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone."

Class B, consisting of the former German colonies in Central and East Africa, should be administered by the Mandatory under conditions which will "guarantee freedom of conscience or religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military or naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other members of the League."

Class C (German South-West Africa and Pacific Islands possessions) is composed of territories which, owing to sparseness of population, small size, remoteness from centres of civilisation, or geographical contiguity to the territory of the Mandatory Power, "can best be administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population."

The Supreme Council, as the organ of the Allied and Associated Powers, allocated the mandates for the territories ceded by Germany and Turkey, subject to the approval of the Council of the League. The mandates and mandatory powers, as determined by the Supreme Council, are:—

*A Mandates.*—Mesopotamia (now the Kingdom of Iraq) and Palestine, attributed to Great Britain. Syria (including Lebanon), attributed to France.

*B Mandates.*—Togoland and Cameroon, attributed in part to Great Britain and in part to France.

The North-Western portion of former German East Africa, attributed to Belgium.

The remainder of former German East Africa (now Tanganyika Colony), attributed to Great Britain.

*C Mandates.*—Former German South Pacific possessions (except Nauru and Samoa), attributed to Australia.

Samoa, attributed to New Zealand, and Nauru, attributed to the British Empire and administered by Australia, New Zealand, and Great Britain.

Former German North Pacific possessions (Yap, etc.), attributed to Japan.

Former German South-West Africa, attributed to the Union of South Africa.

## VI. INTERNATIONAL LABOUR ORGANISATION.

The International Labour Organisation was constituted by Part XIII of the Treaty of Versailles, as an autonomous organisation of the League of Nations. Its object is the establishment of social justice since "the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries." Membership of the League of Nations carries with it membership of the Organisation. The Organisation consists of the International Labour Conference, which meets at least once a year, and the International Labour Office, controlled by a Governing Body. The Conference and the Governing Body are composed of representatives of Government, employers and workmen. The Director of the International Labour Office is M. Albert Thomas (France). The decisions of the Conference take the form of Draft Conventions or Recommendations, which each State is required by the Treaty to submit to the authorities within whose competence the matter lies for the enactment of legislation or other action. If a Draft Convention obtains the assent of the competent authorities, the Member must communicate the formal ratification of it to the Secretary-General of the League of Nations. If the competent authority does not consent, no further obligation rests on the Member. The Members report annually to the International Labour Office on the measures which they have taken to give effect to the Con-

## MANCHURIA.

On February 18, 1932, the Manchurian Free State, comprising the four North-Eastern Provinces of China, was proclaimed at Mukden.

The name of the newly established State is to be Manchow-kuo (State of the Manchus) and the title of the Sovereign Chih-Cheng (Administrator).

With the establishment of the new State in Manchuria the Chinese era of Min-kuo (Republic) was abolished; the era name of Tah-Tung (Great Unity) was adopted instead.

The Administrator is to be recommended and elected by the people and is to reign under the constitutional system. The Constitution is to be adopted in the future based upon the will of the people. The government by the Administrator is a temporary form of government pending the establishment of such Constitution.

On March 9, 1932, Mr. Henry P'u, the former Emperor of China, was installed at Changchun, the new capital, as Chief Executive of the new State.

By March 31, 1932, the new State had not received *de jure* recognition.

THE British Empire consists of:—

- I. GREAT BRITAIN AND NORTHERN IRELAND, CHANNEL ISLANDS, AND ISLE OF MAN.
- II. THE IRISH FREE STATE, INDIA, THE DOMINIONS, COLONIES, PROTECTORATES, AND DEPENDENCIES.

## Reigning King and Emperor.

**George V.**, born June 3, 1865, son of King Edward VII. and Queen Alexandra, eldest daughter of King Christian IX., of Denmark; married July 6, 1893, to *Victoria Mary*, born May 26, 1867, daughter of the late Duke of Teck; succeeded to the crown on the death of his father, May 6, 1910.

### *Living Children of the King.*

I. *Edward* Albert, Prince of Wales, Duke of Cornwall, Duke of Rothesay, Heir-apparent, born June 23, 1894.

II. Prince *Albert* Frederick, Duke of York, born December 14, 1895; married Lady Elizabeth Bowes-Lyon, April 26, 1923. Offspring: Elizabeth Alexandra Mary, April 21, 1926; Margaret Rose, August 21, 1930.

III. Princess Victoria Alexandra Alice *Mary*, Princess Royal, born April 25, 1897; married Viscount Lascelles (now the 6th Earl of Harewood), K.G., D.S.O., February 28, 1922. Offspring:—George Henry Hubert, February 7, 1923; Gerald David, August 21, 1924.

IV. Prince *Henry* William, born March 31, 1900; created Baron Culloden, Earl of Ulster and Duke of Gloucester, on March 31, 1928.

V. Prince *George* Edward, born December 20, 1902.

### *Living Sisters of the King.*

I. Princess *Victoria* Alexandra, born July 6, 1868.

II. Princess *Maud* Charlotte, born November 26, 1869; married July 22, 1896, to Charles, Prince of Denmark, now King Haakon VII. of Norway. Offspring:—Olav, Crown Prince of Norway, born July 2, 1903.

### *Living Brother and Sisters of the late King.*

I. Princess *Louise*, born March 18, 1848; married March 21, 1871, to John, Marquis of Lorne, who became Duke of Argyll, April 24, 1900, and died May 2, 1914.

II. Prince *Arthur*, Duke of Connaught, born May 1, 1850; married March 13, 1879, to Princess Louise of Prussia, born July 25, 1860, died March 14, 1917. Living offspring:—(1) Arthur, born Jan. 18, 1883, married Alexandra Victoria, Duchess of Fife, October 15, 1913; (2) Patricia, born March 17, 1886, married February 27, 1919, Hon. Alexander R. M. Ramsay, D.S.O., R.N.

III. Princess *Beatrice*, born April 14, 1857; married July 23, 1885, to Prince Henry (died January 20, 1896), third son of Prince Alexander of Hesse. Living offspring:—(1) Alexander Albert, born Nov. 23, 1886, married Lady Irene Denison; (2) Victoria Eugénie, born Oct. 24, 1887, married May 31, 1906, to Alfonso XIII., King of Spain.

The King's legal title rests on the statute of 12 and 13 Will. III. c. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being

Protestants.' By Act of Parliament, 1927, the title of the King is declared to be 'George V., by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India.' By proclamation of July 17, 1917, the Royal family became known as the House and Family of Windsor.

By Letters Patent of November 30, 1917, the titles of Royal Highness and Prince or Princess are (except for existing titles) to be restricted to the Sovereign's children, the children of the Sovereign's sons, and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the Royal household by the settlement of the Civil List soon after the commencement of each reign. (For historical details, see YEAR-BOOK for 1908, p. 5.) By Act of 10 Ed. VII. and 1 Geo. V. c. 28 (August 3, 1910), the Civil List of the King, after the usual surrender of hereditary revenues, is fixed at 470,000*l.*, of which 110,000*l.* is appropriated to the privy purse of the King and Queen, 125,800*l.* for salaries of the Royal household and retired allowances, 193,000*l.* for household expenses, 20,000*l.* for works, 13,200*l.* for alms and bounty, and 8,000*l.* remains unappropriated. In September, 1931, the King decided, in view of the financial position of the country, to reduce His Majesty's Civil List by 50,000*l.* while the emergency lasts. The same Civil List Act of 1910 also provides for an annuity of 70,000*l.* to Queen Mary in the event of her surviving the King. Should the Prince of Wales marry, the Princess of Wales will receive an annuity of 10,000*l.*, and should she survive the Prince of Wales, this annuity will be raised to one of 30,000*l.* Further, there is to be paid to trustees for the benefit of the King's children (other than the Duke of Cornwall) an annual sum of 10,000*l.* in respect of each son (other than the Duke of Cornwall) who attains the age of 21 years, and a further annual sum of 15,000*l.* in respect of each such son who marries, and an annuity of 6,000*l.* in respect of each daughter who attains the age of 21 or marries. The First Commissioner of the Treasury, the Chancellor of the Exchequer, and the Keeper of the King's Privy Purse are appointed the Royal Trustees under this Act. The King has paid to him the revenues of the Duchy of Lancaster, the payments made therefrom in 1929 being 62,000*l.* for His Majesty's use.

On the Consolidated Fund are charged likewise the following sums allowed to members of the royal family:—25,000*l.* a year to the Duke of Connaught; 6,000*l.* to H.R.H. Helena Augusta Victoria (Princess Christian); 6,000*l.* to Princess Louise, Duchess of Argyll; 6,000*l.* to H.R.H. Beatrice Mary Victoria Feodore; and 6,000*l.* to each of the late King's daughters.

The Heir Apparent has an income from the revenues of the Duchy of Cornwall, the payment in 1927 on his account being 72,917*l.*

## GREAT BRITAIN AND NORTHERN IRELAND.

### Constitution and Government.

#### I. IMPERIAL AND CENTRAL.

The supreme legislative power of the British Empire is vested in Parliament. Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least twenty days previous to its assembling.

Since 1914 the sittings of Parliament have been interrupted only by comparatively short intervals. Every session must end with a prorogation, and all Bills which have not been passed during the session then lapse. A dissolution may occur by the will of the sovereign, or, as is most usual, during the recess, by proclamation, or finally by lapse of time, the statutory limit of the duration of any Parliament being five years.

Under the Parliament Act, 1911 (1 and 2 Geo. V, ch. 13), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment, may become law without their concurrence on the royal assent being signified. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the House of Commons in three successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the royal assent being signified, provided that two years have elapsed between the second reading in the first session of the House of Commons and the third reading in the third session. All Bills coming under this Act must reach the House of Lords at least one month before the end of the session. Finally, the Parliament Act limited the maximum duration of Parliament to five years.

The present form of Parliament, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the fourteenth century.

The House of Lords consists of peers who hold their seats—(i) by hereditary right; (ii) by creation of the sovereign; (iii) by virtue of office—Law Lords, and English archbishops (2) and bishops (24); (iv) by election for life—Irish peers (28); (v) by election for duration of Parliament—Scottish peers (16). The full house would consist of about 740 members, but the voting strength is about 720.

The House of Commons consists of members representing County, Borough, and University constituencies. No one under 21 years of age can be a member of Parliament. Clergymen of the Church of England, ministers of the Church of Scotland, and Roman Catholic clergymen are disqualified from sitting as members; Government contractors, and sheriffs, and returning officers for the localities for which they act, are also among those disqualified. No English or Scottish peer can be elected to the House of Commons, but non-representative Irish peers are eligible. Under the Parliament (Qualification of Women) Act, 1918, women are also eligible, and the first woman member took her seat in December, 1919.

In August, 1911, by resolution of the House of Commons, provision was first made for the payment of a salary of 400*l.* per year to members, other than those already in receipt of salaries as officers of the House, as Ministers, or as officers of His Majesty's household. Payment began as from April 1, 1911. This provision does not extend to the House of Lords.

Under the Representation of the People (Equal Franchise) Act, 1928, the qualifications for the franchise are the same for men and women. Electors, for inclusion in the register must be of full age (twenty-one years), and

have resided, or occupied business premises of an annual value of not less than ten pounds, in the same parliamentary borough or county, or one contiguous thereto, for the qualifying period of three months ending on December 1, 1928, and in Scotland, on December 15, 1928. There is also a University franchise, to be qualified for which a person must be twenty-one years of age, and must have taken a degree, or in the case of a woman, have fulfilled the conditions which would entitle a man to a degree.

Every registered elector is entitled to vote at an election, but no person may vote at a general election for more than two constituencies, for one of which there must be a residential qualification. The second vote must rest on a different qualification, and each vote must be recorded in a different constituency.

Disqualified for registration are (among others) peers, infants, aliens, bankrupts, lunatics and idiots. Receipt of poor relief or other alms does not count as a disqualification.

Two registers of electors must be prepared each year, one in the spring, and the other in the autumn, except in Ireland, where only one is required; and the authorised expenses are met by local and State funds in equal parts. University registers may be made up as the governing bodies decide, and a registration fee not exceeding 1*l.* may be charged.

In university constituencies returning two or more members the elections must be according to the principle of proportional representation, each elector having one transferable vote. At a general election all polls must be held on the same day, except in the case of Orkney and Shetland, and of university elections. Provision is made for absent electors to vote, in certain cases by proxy.

Under the same Act the seats in Great Britain were redistributed on the basis of one member of the House of Commons for every 70,000 of the population. By a separate Act, redistribution in Ireland was made on the basis of one for every 43,000 of the population. The total membership of the House of Commons was thereby raised from 670 (as established in 1885) to 707. In 1922 the number was reduced to 615 (including 13 from Northern Ireland), owing to the establishment of separate parliaments in Ireland.

The electorate in 1930, in England and Wales, numbered 25,730,507 (12,101,108 males, 13,629,399 females). Under the provisions of the Representation of the People Act, 1928, it is estimated that about 5,000,000 new voters were added to the register in 1929.

The following is a table of the duration of Parliaments called since the accession of King Edward VII. (for heads of the Administrations see p. 8).

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, whose existence is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitu-

tionally recognised, and special precedence accorded to the holder, in 1905. No salary is attached to the office of Prime Minister, as such, and it is usually held in conjunction with some other high office of State, generally that of First Lord of the Treasury. His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

The present Government (appointed Nov. 5, 1931) consists of the following members :

(a) THE CABINET.

1. *Prime Minister, First Lord of the Treasury, and Leader of the House of Commons.*—Right Hon. J. Ramsay MacDonald, born 1866. Prime Minister, First Lord of the Treasury, Foreign Secretary, 1924 and 1929. Present appointment, 1931.

## II. LOCAL GOVERNMENT.

*England and Wales*.—In each county the Crown is represented by H.M. Lieutenant. There is also a sheriff, who represents the executive of the Crown, an under-sheriff, a clerk of the peace and a clerk of the County Council, coroners, who are appointed and paid by the County Councils, and other officers. The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with some of the graver offences—are in the hands of the magistrates.

For the purposes of local government England and Wales are divided primarily into sixty-two administrative counties, including the county of London, and eighty-three County Boroughs. The counties are administered by the justices and by a popularly-elected Council, called a County Council, who co-opt a prescribed number of aldermen, either from their own body or from outside it. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The jurisdiction of the County Councils covers the administration of higher and (outside certain Boroughs and Urban Districts) elementary education; maintenance of main roads and bridges; work in relation to agriculture (diseases of animals, destructive insects and pests, land drainage, fertilisers and feeding

stuffs, small holdings and allotments); provision of mental hospitals and other public health work (schemes for treatment of tuberculosis and venereal diseases, for maternity and child welfare, and for the welfare of the blind; accommodation and care of mental defectives; prevention of pollution of rivers; and supervision of milk and other food supplies). The control of the county police is vested in a standing joint committee composed of equal numbers of magistrates and of members of the County Council. The Metropolitan police are, however, under the control of the Home Secretary.

Secondly, the administrative counties, with the exception of the County of London, are subdivided into 'County Districts' which are either 'Urban Districts' or 'Rural Districts.' Generally speaking, an urban district comprises a town or a small area more or less densely populated, and a rural district takes in several country parishes. County District Councils administer the Public Health and Highway Acts, and exercise powers under the Housing Acts. Urban Authorities may also take over the maintenance and repair of main roads from County Councils; provide burial grounds, allotments, baths and washhouses, libraries, open spaces, museums, isolation hospitals, &c.; establish and manage trading services (gas, electricity, water, trams, &c.). Councils of Boroughs which had over 10,000, and of Urban Districts which had over 20,000 people in 1901 are also usually the local authorities for elementary education. Rural District Councils may also make arrangements for an adequate water supply; and exercise any 'urban powers' conferred on them by the Minister of Health.

Under the Local Government Act, 1929, the functions of the Poor Law authorities are transferred to county and county borough councils. These functions include the organisation and management of indoor and outdoor relief, responsibility for collection of fundamental vital statistics and responsibility for the provision, maintenance and management of all public institutions for the cure of diseases. Provision is also made under the Act to secure for every county district council the services of a medical officer of health. Industrial and freight-transport hereditaments are derated to the extent of three-fourths and agricultural lands are completely derated. The Act provides for the abolition of most of the assigned revenue grants, of the grants under the Agricultural Rates Acts, and of the percentage grants paid in respect of health services and certain roads. In place of these a grant comprising the equivalent of the total loss to local authorities both of rates and of grants under the Act, together with a substantial amount of new money, will be distributed as a "block grant" fixed for five years at a time on a basis of local need and ascertained by means of a formula. To avoid the difficulties created by a sudden change in the revenues of local authorities the allocation of grant will not be entirely by the formula until 1947.

The main central authority in London is the County Council, created by the Local Government Act of 1888. It has considerable powers in regard to public health, housing, bridges and ferries, asylums, street improvements, parks, main drainage, fire brigade, sanitary control, education, and numerous other matters. It is also the tramway authority for the county. The City Corporation has powers respecting sanitation, police, bridges, justice, &c., in the City of London. London comprises the ancient city with an area of one square mile, and an area of 118 square miles beyond the city, which is divided into 28 metropolitan boroughs, under the London Government Act, 1899, each with a mayor, aldermen, and councillors (women are eligible). The Councils have powers in regard to public health, highways, rating, housing, education, &c., but they are not municipal boroughs in the

statutory sense as in the rest of the Kingdom. The County Council has certain powers of control over them.

In all incorporated towns, local business is administered by a municipal Corporation. There are two kinds of municipal boroughs, County Boroughs and Non-County Boroughs. A number of the latter are small boroughs of special and generally ancient jurisdiction. Most of the County Boroughs and a number of the Non-County Boroughs have a separate Court of Quarter Sessions. The County Boroughs are outside the jurisdiction of the County Councils. A municipal Corporation consists of the mayor, aldermen, and burgesses, and acts through a Council elected by the burgesses—practically by the ratepayers. The councillors serve for three years (women are eligible), one-third retiring annually; the aldermen are elected by the Council, and the mayor, who serves for one year, also by the Council. A Town Council as an Urban Authority is invested with all the normal powers of an Urban District Council; and in addition certain powers, such as making byelaws or maintaining a separate police force, are conferred either upon all Town Councils or upon Councils of towns of certain sizes, or complying with other conditions, in virtue of their status as Councils of incorporated towns.

*Scotland.*—A Local Government Act was passed for Scotland in 1889 and followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply, the Justices and Road Trustees were either wholly or in part transferred to County Councils, which took over their duties and responsibilities in 1890. By the Local Government (Scotland) Act, 1894, a Local Government Board for Scotland was constituted, consisting of the Secretary for Scotland as President, the Solicitor-General for Scotland, the Under-Secretary for Scotland and three other members nominated by the Crown. The latter Act provided that a Parish Council should be established in every parish to take the place of the Parochial Boards. Their principal function is the administration of the Poor Laws, and in addition they exercise powers, similar to those of the Parish Councils in England. There were 869 civil parishes in 1921. The powers and duties of the Local Government Board were by the Scottish Board of Health Act, 1919, transferred to the Scottish Board of Health, constituted as in that Act provided. Municipal bodies exist in the towns of Scotland, as in those of England. Each burgh has a Town Council consisting of a Provost or Lord Provost, Bailies and Councillors. The Provost is the head of the Scottish municipality and holds office for three years. Bailies are selected by the Councillors from among their own number; they act as magistrates and sit as such in police courts. There are in Scotland three principal kinds of burghs, numbering altogether 201 (1921 census): (1) Royal Burghs, *i.e.* burghs created by a Charter of the Crown; (2) Parliamentary Burghs, which possess statutory constitutions almost identical with those of the Royal Burghs; (3) Police Burghs, constituted under a general Police Act. All burghs of whatever class have new Town Councils and their administration is regulated by the Burgh Police (Scotland) and Town Councils (Scotland) Acts or corresponding local Acts. The Local Government (Scotland) Bill, 1929, makes many drastic changes in the local government machinery so as to bring it in line as far as possible with that set up for England and Wales. The new units of local government are the county councils and burghs with a population of over 20,000. Only the four great cities are Poor Law authorities and parish councils are abolished.

<sup>2</sup> Preliminary figures.

The municipal and parliamentary City of London, coinciding with the registration City of London, has an area of 675 acres. The registration County of London (the London for purposes of the Census, the registration of births, deaths, and marriages, and for poor law purposes), coinciding with the administrative county, has an area of 74,850 acres, and nearly coincides with the collective area of the London parliamentary boroughs. The population of registration London, of the 'Outer Ring,' and of 'Greater London' (the area covered by the City and Metropolitan police), was:—

	1901	1911	1921	1931 <sup>2</sup>
Registration London.	4,536,267	4,521,685	4,484,523	4,396,821

## Religion.

### 1. England and Wales.

The Established Church of England is Protestant Episcopal. Civil disabilities on account of religion do not attach to any class of British subjects. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from March 31, 1920, and

Wales was formed into a separate Archbishopric. Property belonging to the Church in Wales, and a sum of 1,000,000*l.* provided by Parliament, were assigned to a temporary body not exceeding three persons, called the Welsh Commissioners, for distribution to a body representing the Church (called the Representative Body), and to certain other authorities including the University of Wales.

The King is by law the supreme governor of the Church in England, possessing the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The King, and the First Lord of the Treasury in his name, also appoint to such deaneries, prebendaries, and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 3 archbishops (at the head of the three 'provinces' of Canterbury, York and Wales) and 46 bishops, and 29 suffragan bishops in England and Wales. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his province he exercises archiepiscopal jurisdiction. Under the bishops are 32 deans and 110 archdeacons. Under the Church of England Assembly (Powers) Act, 1919, there is a National Assembly, called 'the Church Assembly,' in England, consisting of a House of Bishops, a House of Clergy, and a House of Laymen, which has power to legislate regarding Church matters. The first two Houses consist of the Convocations of Canterbury and York, which in turn consist of the bishops (forming an Upper House), archdeacons, and deans, and a certain number of proctors, as the representatives of the inferior clergy (forming the Lower House). The House of Laymen is elected by the lay members of the Diocesan Conference. Parochial affairs are managed by a Parochial Church Meeting and Church Council. Every measure passed by the Church Assembly must be submitted to an Ecclesiastical Committee, consisting of fifteen members of the House of Lords nominated by the Lord Chancellor, and fifteen members of the House of Commons nominated by the Speaker. This Committee reports on each measure to Parliament, and the measure becomes law if each House of Parliament passes a resolution to that effect.

The number of civil parishes (districts for which a separate poor rate is or can be made) at the census of 1911 was 14,614. These, however, in most cases, do not coincide with ecclesiastical parishes, which have, from the civil point of view, lost their old importance. Of such parishes there were (1929) 13,299, inclusive of the Isle of Man and the Channel Islands, but excluding Wales. Each parish has its church, presided over by an incumbent or minister, who must be in priest's orders, and who is known as rector, vicar, or perpetual curate, according to his relation to the temporalities of his parish. Private persons possess the right of presentation to about 7,000 benefices; the patronage of the others belongs mainly to the King, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In 1930 there were about 12,807 beneficed clergy, and 4,135 assistant curacies. Voluntary offerings raised and administered parochially amounted in 1930 to 5,619,928*l.*, exclusive of very large sums contributed to central and diocesan societies and institutions and administered by such organisations.

Of 36,196 churches and chapels registered for the solemnisation of marriage at the end of 1929, 16,377 belonged to the Established Church and the Church in Wales and 19,819 to other religious denominations. Of the marriages celebrated in 1929, 56·2 per cent. were in the Established Church and the Church in Wales, 6·0 per cent. in the Roman Catholic Church, 11·4 per cent. were Nonconformist marriages, 0·0 per cent. were Quaker

marriages, 0·7 per cent. Jewish, and 25·7 per cent. civil marriages in a Registrar's Office.

The following is a summary of recent statistics of certain churches in England and Wales, Channel Islands, and Isle of Man :—

The Unitarians have about 350 places of worship, the Catholic Apostolic Church over 80, the New Jerusalem Church about 75. The Salvation Army, a religious body with a semi-military organisation, carries on both spiritual and social work at home and abroad, and had (December, 1928) about 35,074 officers and *employees*, 15,163 corps and outposts, and 252,912 local officers; their places of worship in the United Kingdom have about 560,339 sittings. There are about 300,000 Jews in the United Kingdom with about 200 synagogues.

Roman Catholics in England and Wales are estimated at 2,206,244 in 1930. There were (1928) four archbishops (of whom one is a cardinal), fourteen bishops, and one bishop-auxiliary; about 4,000 priests (not all officiating); and over 1,900 churches, chapels, and stations.

## 2. Scotland.

The Church of Scotland (established in 1560 and confirmed in 1688) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session, consisting of the minister, and of several laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries. The supreme court is the General Assembly, which now consists of over 1,730 members, partly clerical and partly lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being represented by a Lord High Commissioner, appointed by the King on the nomination of the Government of the day), and sits for ten days. Any matters not decided during this period may be left to a Commission.

On October 2, 1929, the Church of Scotland and the United Free Church were reunited and the two bodies met in Edinburgh as one, known as the General Assembly of the Church of Scotland. The United Church had, in Scotland, on December 31, 1931, 2,720 congregations, 1,280,620 members, besides adherents; 3,758 Sunday schools, with 47,796 teachers and 366,115 scholars in attendance. The Church courts are the General Assembly, 14 synods, 66 presbyteries in Scotland, 3 in England and 3 on the Continent, in addition to presbyteries in India and elsewhere in the British Colonies or Dependencies, and 18 foreign mission presbyteries. Income in 1931 was 1,792,587*l*. The Church has Divinity Faculties in the four Scottish Universities of Edinburgh, Glasgow, Aberdeen and St. Andrews, and also Theological Colleges in the three first named cities, with 37 professors and lecturers. The United Church's foreign mission agents (including natives) exceed 9,000, and income 700,000*l*. There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists, and Unitarians. The Episcopal Church in Scotland had in 1930, 7 bishoprics, 415 churches and missions, 336 clergy, and 60,056 communicants.

The Roman Catholic Church had in Scotland (1930) two archbishops, four bishops, 638 priests; about 450 churches, chapels, and stations, and about 600,000 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1929 was: Established, 47·0 per cent.; United Free, 17·8; Roman Catholic, 11·9; Episcopal, 2·8; others, 6·8; irregular, 12·6.

## Education.

### *University Education.*

In *England* the highest education is given at the ancient universities of Oxford and Cambridge, the former having 22 colleges and 3 private halls, and the latter 17 colleges and 1 hall; the university of Durham, with a college of medicine and of science at Newcastle; the university of London, with 2 Incorporated Colleges, 34 "Schools," and 28 Institutions giving instruction in 8 faculties; the Victoria University (Manchester), the Birmingham University, the Liverpool University, the Leeds University, the Sheffield University, the Bristol University, and the University of Reading, which started in 1860 as a college for art classes. There are also University Colleges at Exeter, 69 lecturers, &c., 576 students, 1931-32; Nottingham (founded 1881), 115 lecturers, and 943 students, 1931-32; Southampton (founded 1850), 68 lecturers, &c., 650 students, 1931-32; Leicester (opened in 1923), 28 lecturers, &c., 173 students, 1931-32. A University College was founded at Hull in 1928 with 63 lecturers and tutors, and 140 intramural and 2,088 extra-mural students in 1931-32. There are special Agricultural Colleges at Carlisle, Cirencester, Glasgow, Newport (Shropshire), Kingston-on-Soar (Derby), Wye (Kent), Uckfield (Sussex), and Ripley (Surrey). The university of *Wales* has 4 colleges (Cardiff, 99 lecturers, 1,220 students; Aberystwyth, 96 lecturers, 782 students; Bangor, 95 lecturers, &c., 588 students; and Swansea, 53 lecturers, &c., 591 students). In *Scotland* there are 4 universities, viz., at St. Andrews, Glasgow, Aberdeen, Edinburgh. The Carnegie Trust, founded in 1901 with a capital of 2,000,000*l*., has an annual income of 100,000*l*., of which half is devoted to the equipment and expansion of the Scottish Universities and half to assisting students. The following table gives the approximate number of professors, lecturers, &c., and students of the Universities for 1931-1932. (The dates of foundation are given in brackets.)

<sup>1</sup> Comprising 347 University Professors and Readers, and 822 'Recognised Teachers.'

<sup>2</sup> Undergraduates (1930-31).

<sup>3</sup> Internal students. In addition there are 7,056 external students, i.e., matriculated students who have not taken a degree nor been registered as internal students, and 11,330 University Extension Students.

<sup>4</sup> Includes evening students.

At most of the Universities and University Colleges women students are admitted on equal terms with men. There are, however, several colleges exclusively for female Students:—Bedford (65 teachers, &c., 678 students), Royal Holloway (26 teachers, 210 students) and Westfield Colleges (22 teachers, &c., 156 students) in London; Newnham (10 teachers, &c., 278 students) and Girton (13 teachers, &c., 256 students) Colleges in Cambridge; Lady Margaret Hall (12 teachers, &c., 140 students), Somerville College (9 teachers, &c., 147 students), St. Hugh's College (8 tutors, 150 students), St. Hilda's College (10 teachers, 117 students), in Oxford. The Society of Oxford Home-Students numbered 13 teachers and 224 students in 1931. Women were first admitted to membership of Oxford University, and to take degrees, in October, 1920.

#### *Secondary and Technical Education, &c.*

*England and Wales.*—The latest available statistics for secondary schools are as follows:

	Total Efficient Schools	Schools on Grant List	Total Pupils in Efficient Schools			Full-Time Teachers. (Grant List)
			Boys	Girls	Total	
1927-8	1,786	1,329	238,951	210,819	449,800	20,102

1930-31	1,957	1,367	263,526	229,052	492,578	21,694

Included among the grant-receiving schools on March 31, 1931, were 720 Council Schools, 87 Roman Catholic Schools, 458 Foundation and other schools, and 102 Welsh Intermediate Schools. On October 1, 1931, there were 228 preparatory schools not on the grant list, with 16,647 pupils.

In the year ending July 31, 1931, there were 57 larger Technical Institutes for advanced courses with 6,390 full-time students, and 167 Day Technical Institutes with 27,819 students. In addition there were 5,156 evening schools giving part-time technical and other instruction to 905,786 students, and 59 separate Day Continuation Schools with 20,656 students. Among other institutions providing technical, commercial and other instruction were 177 junior technical and housewifery schools with 21,066 students, and 6 nautical schools with 977 students. There was in 1930-31 a total of 229 Schools of Art with 58,700 students. In the same year there were 111 training institutions for teachers with 19,484 students (988 as teachers of domestic subjects).

The number of students receiving instruction in full-time courses of higher education for blind, deaf, defective and epileptic students during 1929-30 was 2,052, and of these 1,645 were blind. There were also two schools providing secondary education for blind children (43 boys and 37 girls).

The total net expenditure by local authorities on higher education in 1929-30 was 16,135,480*l.*, and for 1930-31 is estimated at 17,560,353*l.*

*Scotland.*—In 1931 there were 251 secondary schools (207 with primary or preparatory departments) with a total accommodation of 188,712; the average number of scholars on the registers being 155,389 (81,388 post primary). The number of students attending Central Institutions in 1930-31 was 8,044 day students and 11,778 evening students. Centres for Continuation Classes numbered 1,050 in 1930-31 with a total attendance of 174,791 students. The number of teachers in secondary schools at March 31, 1931, was 6,571, including 4,061 University Graduates. In 1931-32 there were 1,891 students training for the Teacher's General Certificate, including 1,035 graduates, in 4 training centres and 3 training colleges.

#### *Elementary Education.*

*England and Wales.*—In the year 1930-31 the number of schools (public elementary, special, nursery, and certified efficient) for elementary education was 21,577. In 1931 there were 9,698 Council schools with accommodation for 4,643,478 pupils, and 11,169<sup>1</sup> voluntary schools with accommodation for 2,519,189 pupils; total ordinary public elementary schools 20,869, with accommodation for 7,162,667 pupils. The average attendance for the year 1930-31 at these schools was 4,930,076. The number of scholars on the registers in 1931 was: 158,427 aged under 5; 4,348,829 aged 5 and under 12; 1,007,145 aged 12 and over. The number of teachers, 1930-31, was 168,934 (43,538 men and 125,396 women), of whom 126,245 were certificated, 30,632 were uncertificated and 7,270 were supplementary.

There were 607 'special' schools in 1930-31, comprising 81 for the blind, with accommodation for 4,732 pupils; 50 for the deaf, with accommodation for 4,711 pupils; 171 for the mentally defective, accommodation 16,644; 299 for the physically defective, accommodation 26,090; and 6 for epileptic children with accommodation for 609 pupils. There were also 56 Poor Law schools, 44 nursery schools and 308 play centres.

The number of meals provided free in 1930-31 for necessitous children was 27,584,398 as compared with 23,542,527 in 1929-30, and the total number of children in public elementary schools who were medically examined in 1930 was 2,739,297, and there were 1,897,320 re-inspections.

The total number of school clinics on March 31, 1931, was 1,741 (1,649 in 1930). There were 2,282 medical officers, 741 dentists and 5,485 nurses employed for whole or part time.

The total net expenditure of local authorities for elementary education in 1930-31 was 64,919,634*l.*, and for 1931-32 is estimated at 64,258,708*l.*

*Scotland.*—In 1930-31 there were 2,924 Primary Schools with an accommodation of 867,506 scholars; average number on the registers was 656,899, and the average attendance was 594,066.

On July 31, 1931, there were 30 special day schools, 10 residential schools and special classes attached to 55 ordinary schools, and the number of defective children under instruction was 9,417 (5,675 in 1919), of which 5,490 were physically defective and 3,927 were mentally defective. There were also 3 residential schools for blind children, 5 for deaf mutes and 2 for both combined. The total number of children under instruction was 991 (320 blind and 671 deaf mutes). On June 30, 1931, there were 23

<sup>1</sup> Including 9,677 Church of England schools and 1,177 Roman Catholic schools.

reformatory and industrial schools with a total of 1,577 boys and girls, excluding 126 voluntary scholars.

As at March 31, 1931, there were 19,455 recognised certificated primary school teachers, including 4,704 University Graduates.

The total ordinary expenditure of Education authorities during 1929-30 was 12,477,633*l.*, including 8,409,620*l.* on account of salaries and retiring allowances of teachers. Expenditure from Parliamentary grants for Education in Scotland amounted to 6,403,762*l.* in 1929-30.

## Justice and Crime.

### " England and Wales.

The Supreme Court of Judicature is the ultimate authority in most cases, civil and criminal, in England and Wales, and in others, where there is an appeal to the House of Lords, the penultimate. It exercises its power through the High Court of Justice, the Courts of Appeal, and (in a sense) a variety of subordinate local courts. The principal courts having criminal jurisdiction are the petty sessional courts, the general or quarter sessions, the courts of oyer and terminer and gaol delivery, more popularly known as 'assizes,' and the Central Criminal Court, which is the Assize Court for London in the widest sense, including 'the City' and other neighbouring counties, and is also the Quarter Sessions for the City. Two or more justices of the peace, the Lord Mayor or any alderman of the City of London, or any stipendiary magistrate, sitting in a court house, constitute a petty sessional court. The courts of quarter sessions are held four times a year by the justices of the county. Two justices constitute a court, but usually a larger number attend. Women may be justices. Certain cities and boroughs have a court of quarter sessions, with similar jurisdiction to that of the county justices in quarter sessions, in which the recorder of the borough is the judge. The assize courts are constituted by Judges of the High Court (or in some cases by King's Counsel having His Majesty's special commission). These go on circuit twice or four times a year, visiting every county in turn, and hearing and determining all civil cases entered for trial and all criminal cases presented by the Grand Jury of the County or Riding, city or borough. Except in cases of treason when the trial is 'at bar' before the Lord Chief Justice and two or more judges of the King's Bench Division, criminal cases are tried by a jury, and the jury, subject to the direction of the Judge on points of law, are the sole judges of the facts of the case. Women serve on juries. The sessions of the Central Criminal Court are held at least twelve times a year and more often if necessary. The Recorder and the Common Serjeant, and, if the number of the prisoners makes it necessary, the judge of the City of London Court, sit on the first two days, after which they are joined by one or more of the judges of the High Court on the rota, for whom capital and certain other cases are reserved. Criminal cases of special importance or complexity arising in any part of the country may, by direction of at least two High Court judges, be brought for trial in the King's Bench Division. A petty sessional court deals summarily with minor offences, some of which are practically civil and can be reviewed by the judges. All offences are usually investigated by a petty sessional court before being tried at the sessions or the assizes, but with the consent of the accused, justices can dispose of many felonies. To every sessions, assize, and to every sitting of the Central Criminal Court, the sheriff summons a number of the chief inhabitants of the approximate district, of whom not less than 12 and not more than 23 are sworn and constitute a grand jury which examines the bill of indictment against the accused person, hears the evidence of witnesses

for the prosecution, and if it thinks a *prima facie* case for trial is made out, endorses the bill 'a true bill,' which is then tried by the petit jury. All criminal trials, except those which come before a court of summary jurisdiction or the House of Lords, take place before a judge and such a jury (twelve persons). Appeal is allowed in criminal cases: (i.) on a point of law; (ii.) on a question of fact, or other sufficient ground if the judge certifies the case as fit for appeal, or the Court of Criminal Appeal grants leave to appeal; and (iii.) against the sentence (if not fixed by law) with the leave of the Court of Criminal Appeal. This Court can reverse, amend, or affirm the judgment: in a few cases its decision may be reconsidered by the House of Lords. The only other method of securing the revision of a sentence is through the Royal prerogative, exercised on the advice of the Home Secretary, by which a sentence can be modified or annulled. No man can be tried again for the same crime after a petit jury has found him 'not guilty.' Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a minister, a member of the Cabinet, ex-officio president of the House of Lords, and goes out with the ministry), the Lord Chief Justice, the Lords of Appeal in Ordinary, who sit in the House of Lords and on the Judicial Committee of the Privy Council, and the Lords Justices of Appeal who sit in the Court of Appeal, are appointed on the recommendation of the Prime Minister, and all the other judges on the recommendation of the Lord Chancellor.

The courts chiefly having jurisdiction in civil cases are the modern County Courts, created in 1846, Assizes, and the High Court, Quarter Sessions and old local courts also have this jurisdiction to a certain extent.

The authorised strength of the police force in England and Wales on September 29, 1931, was 58,656 (including 20,142 Metropolitan police). Total Police Expenditure in England and Wales for 1929-30 was 20,801,092*l*.

### Scotland.

The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges of the Court of Session, and sits more or less frequently, as the number of cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, deforcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted; and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

The Court of Session exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

The police force in Scotland at the end of 1928 had an authorised strength of 6,607. The estimated expenditure on police was 866,443*l*. for 1929-30, and 1,066,011*l*. for 1930-31.

## National Insurance. Pensions.

Under the National Health Insurance Act 1924, the Unemployment Insurance Acts 1920-25, the Old Age Pensions Act 1908-24, and the Widows, Orphans and Old Age Contributory Pensions Act 1925, provision is made for insurance against loss of health, for prevention and cure of sickness, compulsory insurance against unemployment, and pensions for widows and orphans and aged persons.

*National Health Insurance.*—This is administered by the Ministry of Health in England and Wales, and the Department of Health for Scotland in Scotland; by specially constituted authorities, Approved Societies, including friendly societies and Insurance Committees and trade unions.

Subject to specific exceptions, persons who are compulsorily brought under the National Health Insurance Act, known as *employed contributors*, comprise all persons of the age of 16 years or over who are employed under contract of service, written or implied, whether by time or piece. Aliens are subject to compulsory insurance equally with British subjects. Among persons

excluded are those employed in non-manual labour at a rate of remuneration exceeding £250 a year. Insured persons who are not members of an approved society must, within a certain time, become *deposit contributors*; their benefits are limited. Certain persons not compulsorily insured may become *voluntary contributors*. The rates of contributions are given below. The ordinary benefits are (a) free medical treatment; (b) payments during sickness (not exceeding 26 weeks), amounting to 15s. a week for men and 12s. for women, after 104 contributions; 9s. (men), 7s. 6d. (women) after 26 contributions; (c) disablement benefit after 26 weeks sickness benefit, 7s. 6d. a week; (d) maternity benefit of 40s. payable to wife on confinement. Approved societies may also give additional benefits. Deposit contributors receive sickness and disablement benefits at rates slightly less than the above.

The National Health Scheme covered about 17 million persons in England in 1931. The total expenditure on benefits for England and Wales was estimated for 1931 at 27,800,000*l.*, including 9,000,000*l.* for medical benefit. The number of persons entitled to benefits was 15,182,100 in 1930. The cost of administration was 4,778,000*l.* in 1931.

*Widows, Orphans and Old Age Pensions.*—Provision is made in the Widows', Orphans' and Old Age Contributory Pensions Acts of 1925 and 1929 for a contributory pensions scheme under which pensions are provided for widows, children and elderly persons. This scheme is interlocked with the National Health Insurance Scheme, and in general, an inclusive weekly insurance contribution is payable for both services together. Subject to certain conditions, the following pensions are payable, free from any restriction as to means:—*Widows' pensions* of 10s. a week to the widows of insured men, together with allowances for children at 5s. a week for the eldest and 3s. for younger children. The children's allowances continue payable up to age 14 (or so long as school instruction continues but not beyond 31st July following the 16th birthday). On remarriage, the widow's pension of 10s. ceases but children's allowances continue. The widow of a man who died or reached the age of 70 before the scheme began on January 4, 1926, but who would have been insured for pensions purposes had the Acts been in operation earlier may receive a similar pension when she reaches the age of 55. *Orphans' pensions* are 7s. 6*d.* a week, the period of the continuance being the same as for children's allowances. *Contributory old age pensions* of 10s. a week at age 65 for insured persons, including wives of insured men who have themselves qualified.

Widows and contributory old age pensions normally continue to age 70 and are then replaced by pensions under the Old Age Pensions Acts, 1908 to 1924, free from the means and other restrictions which those Acts impose.

The normal weekly contribution for National Health and Pensions Insurance is 1s. 6*d.* for men and 1s. 1*d.* for women, of which 9*d.* and 6*d.* respectively may ordinarily be recovered from the worker. In the case of workers aged over 65 contributions of 9*d.* (men) and 7*d.* (women) are paid by the employer only.

The total amount paid in Great Britain in respect of widows' and orphans' pensions for the year ending March 31, 1931, was approximately 16,848,000*l.*; the beneficiaries were 619,119 widows and 313,902 children (including orphans). The total number and cost of pensions awarded under the contributory old age pensions scheme (persons between ages 65 and 70) for the year ending March 31, 1931, was 637,879 (16,398,000*l.*). The total number of non-contributory old-age pensions paid in 1929–30 was 926,735*l.*

*Unemployment Insurance.*—This is administered by the Ministry of Labour through the Employment Exchanges, Trade Unions, and by certain associations of employed persons. The scheme is compulsory in its operation,

and substantially all persons covered by the Health Insurance Scheme are insured against unemployment. Domestic servants and persons employed in agriculture are among those excepted. The minimum insurable age is 16 years. Certain employees of Government Departments, public and local authorities, railways and public utility undertakings, and persons with rights under statutory superannuation schemes are also exempted where the Ministry of Labour certifies that they are employed under conditions which make the national insurance unnecessary.

The contributions are: men (aged 21 but under 65), 10*d.* a week from employer, 10*d.* from employee; women (over 21 but under 65), 9*d.* a week from employer, 9*d.* from employee; young men (18 to 21), 9*d.* from employer and 9*d.* from employee; young women (18 to 21), 8*d.* from employer, 8*d.* from employee; boys (16 to 18), 5*d.* from employer, 5*d.* from employee; girls (16 to 18), 4½*d.* from employer, 4½*d.* from employee. The State contributes in addition an amount equivalent to one-half of the joint contributions of the employer and employee. Contributions in the case of exempt persons and persons aged 65 and over are payable by employer only. From April 1, 1929, the Exchequer bears the whole cost of benefit paid to claimants who do not satisfy the full 'contributions' conditions, but who satisfy the 'transitional' conditions. Under the Unemployment Insurance (National Economy) Order, 1931, the standard rates of benefit are: (over 21 and under 65), men 15*s.* 3*d.* per week, women 13*s.* 6*d.* per week; (between 18 and 21) young men 12*s.* 6*d.* per week, young women 10*s.* 9*d.* per week; (between 17 and 18), boys 8*s.* per week, girls 6*s.* 9½*d.* per week; (under 17), boys 5*s.* 6*d.*, girls 4*s.* 6*d.* per week, subject to certain conditions. There are additional benefits for certain classes of dependents: 8*s.* a week for adults and 2*s.* a week for each child.

Contributions from employers and employed persons in the United Kingdom under the unemployment insurance scheme amounted in the year 1931-32 to 33,700,000*l.* Payments for benefit amounted in 1931-32 to 74,700,000*l.* (direct), and 5,450,000*l.* (indirect). Transitional payments and cost of administration for 1930-31 was 32,300,000*l.* The estimated number of workpeople insured under the Unemployment Insurance Acts in Great Britain was 12,770,000 in July, 1931.

*War Pensions.*—The number of war pensions or allowances in payment as at March 31, 1931, was 1,265,500 approximately, and the total expenditure of the Ministry of Pensions for 1931-32 was 50,039,000*l.*, and estimated expenditure for 1932-33 is 47,243,800*l.* (inclusive of administration expenses).

1930-31	121,735	152,135	83,093	20,335	840	255,339	67,657

<sup>1</sup> The principal items included in these branches of revenue are shown on pages 32-3 above. The excise receipts include receipts from Motor Vehicle Duties.

*Income Tax.*—The gross amount of income brought under the review of the Inland Revenue Department in the year ended April 5, 1930, in Gt. Britain and Northern Ireland, was 3,183,476,146*l.*; in 1930-31 it was estimated to be approximately 3,160,000,000*l.* The income on which tax was actually received in 1929-30, after allowing for exemptions and reliefs, was 1,347,406,709*l.*, and the estimated amount for 1930-31 was 1,300,000,000*l.* The estimated number of incomes in Great Britain and Northern Ireland above the effective exemption limit in 1930-31 was 4,950,000: the number actually chargeable with tax was estimated at 2,200,000.

Prior to April 6, 1915, incomes not exceeding 160*l.* were exempt from Income Tax, and from April, 1915, to April, 1920, incomes not exceeding 130*l.* were exempt. The graduation of the tax on incomes in excess of these limits was effected by means of differential rates and by various abatements and reliefs (for wife, children, etc.) granted in the lower ranges of incomes only.

Under the new system of graduation introduced by the Finance Act, 1920, personal allowances of 135*l.* assessable income (= 150*l.* earned income) for unmarried persons and 225*l.* (= 250*l.* earned income) for married persons, and allowances for children, dependent relatives, etc., were granted to all taxpayers irrespective of the amount of their total income. The effect of the increase in the earned income relief (from one-tenth to one-sixth) by the Finance Act, 1925, was to increase the personal allowances, in the case of *earned incomes*, to 162*l.* and 270*l.* respectively. The Finance (No. 2) Act, 1931, reduced the personal allowances, in terms of assessable income, to 100*l.* for unmarried persons, and 150*l.* for married persons. At the same time the earned income relief was increased to one-fifth, so that in the case of earned income the allowances became 125*l.* and 187*l.* 10*s.* respectively. Tax is charged (1931-32)<sup>1</sup> on the first 175*l.* of taxable income at half of the standard rate, and on the remainder at the standard rate of tax, which has varied as follows:—

1923-24 and 1924-25 . . .	4 <i>s.</i> 6 <i>d.</i> in the £.
1925-26 to 1929-30 . . .	4 <i>s.</i> „
1930-31 . . .	4 <i>s.</i> 6 <i>d.</i> „
1931-32 . . .	5 <i>s.</i> „

The gross income brought under review in 1929-30 was distributed as follows :—

<sup>1</sup> From 1920-21 to 1929-30, tax was charged on the first 225*l.* at half the standard rate. For 1930-31 tax was charged on the first 250*l.* at four-ninths of the standard rate.

The gross income from the ownership of lands and houses in 1929-30 was distributed as follows :—

—	England	Scotland	N. Ireland	Gt. Britain and N. Ireland
	£	£	£	£
Lands, etc. . . . .	41,700,000	6,200,000	2,000,000	49,900,000
Houses, etc. . . . .	336,978,287	32,468,987	2,940,413	372,387,687

*Super-tax.*—Super-tax (now called Sur-tax) is payable by persons with incomes exceeding 2,000*l.* per year (prior to 1914-15, 5,000*l.* per year; from 1914-15 to 1917-18, 3,000*l.* per year, and in 1918-19 and 1919-20, 2,500*l.* per year).

As part of a general scheme for the simplification of the Income Tax, the Finance Act, 1927, merged the Super-tax into one tax with the Income Tax having the same basis of assessment and payable, under the name of Sur-tax, as a deferred instalment of Income Tax on the 1st January in the year following the year of assessment. The Sur-tax was payable for the first time in respect of the year 1928-29 on January 1, 1930. Net receipt from Sur-tax in 1930-31, was 67,657,195*l.*

*Local Taxation Grant.*—In accordance with various Acts passed between 1888 and 1911, there are paid out of the Consolidated Fund to the Local Taxation Accounts of England and Scotland, sums equivalent to the proceeds (in some cases, of the year 1908-9, and in other cases of the current year) of certain excise licence duties, part of the beer and spirit duties, and part of the probate and estate duties. Certain other grants are also payable.

The total payments made to the Local Taxation Account for England and Wales in 1930-31 was 326,736*l.*, including 265,821*l.* in relief of rates and 49,799*l.* under the Agricultural Rates Act, 1923. Scotland received a total of 30,898*l.*

It was estimated that national taxation per head of population amounted in 1930-31 to 16*l.* 6*s.* 5*d.* (14*l.* 15*s.* 10*d.* in 1929-30). In 1930-31 direct taxation amounted to 462,781,000*l.*, and indirect taxation to 240,907,000*l.*

### III. NATIONAL DEBT.

Borrowing by the State on the security of taxes was practised in Norman times, but the National Debt really dates from the time of William III. The acknowledged debt in 1689 was about 664,000*l.*, on which the annual charge for interest and management was only 40,000*l.* At various subsequent dates the amounts were as follows (including the Irish debt throughout):—

Year	Debt <sup>1</sup> Million £	Annual charge, includ- ing annuities		Annuities only (included in pre- vious column)

<sup>1</sup> These amounts do not include the capital value of terminable annuities.

<sup>2</sup> Including 1,110,453,600*l.* owing to other countries.

<sup>3</sup> Including Interest, Management and New Sinking Fund.

The following statement shows the total amount of the Gross Liabilities and the Assets of the State on March 31, 1931:—

Liabilities:	Million £	Million £
Funded Debt	1,425.0	
Estimated Capital Liability of Terminable Annuities	12.0

The amount of debt provision issued in 1930-31 for interest and management was 293,169,569*l.*

The net decrease in the aggregate gross liabilities of the State in 1930-31 was 13,311,239*l.*

<sup>1</sup> Excluding advances from votes of credit to Dominions, Allied Powers, &c., and other war assets. The amount of loans remaining unpaid at March 31, 1931, was: loans owing by Allies, 2,133.8 million; Colonies, 114.5 million; loans for relief and reconstruction, 29.3 million; other debts, 4.6 million; total 2,282.8 million.

#### IV. LOCAL TAXATION.

The estimated rates collected by local authorities in 1931-32 are:—England and Wales 148,000,000*l.*, Scotland, 16,915,000*l.* For 1930-31 the amounts collected were England and Wales, 149,000,000*l.*, Scotland, 18,152,000*l.* Exchequer contributions to local revenues amounted in 1930-31 to 39,340,000*l.* for England and Wales, and 4,147,362*l.* for Scotland. Grants to rating authorities issued from the Exchequer amounted to 1,000,000*l.* for Scotland.

The approximate allocation of amounts raised by rates and Exchequer grant during 1928-29 and 1929-30 was as follows:—

	England and Wales		Scotland		Total	
	1928-29	1929-30	1928-29	1929-30	1928-29	1929-30

Totals . .	166,250	168,500	21,918	21,563	188,168	190,068

In England and Wales the average amount of the rates per pound of assessable value was 6s. 8½d. in 1913-14, 11s. 7d. in 1930-31, and 11s. 1½d. in 1931-32.

The aggregate net debt of the County of London on March 31, 1930, amounted to 149,007,484l. (144,967,164l. in 1929). The proposed rate for 1932-33 is 6s. 6½d. The estimated total of expenditure for 1932-33 is 6,824,955l., and the estimated gross expenditure on rate accounts is 29,219,009l.

## Defence.

The Committee of Imperial Defence is responsible for the co-ordination of naval, military, and air policy. Of this Committee the Prime Minister is *ex-officio* President, and he has power to call for the attendance at its meetings of any naval or military officers, or of other persons, with administrative experience, whether they are in official positions or not. The usual members are the Secretaries of State for Foreign Affairs, for War and Air, the Colonies, India, the Chancellor of the Exchequer, the First Lord of the Admiralty, the First Sea Lord, the Chief of the Imperial General Staff, the Chief of the Air Staff, Directors of the Intelligence Departments of the War Office and the Admiralty. During 1923 a Cabinet Committee inquired into the co-ordination of the policy and administration of defence. As the result of its report a standing sub-committee of the Committee of Imperial Defence has been appointed, with a Cabinet Minister as Chairman, the heads of the three services and representatives of the Foreign Office and Treasury as members, for the purpose of correlating defensive policy. Three further sub-committees have since been appointed, one composed of the Chiefs of Staff of the three services of Navy, Army and Air, to furnish the Cabinet or the main committee with expert advice on problems of defence, the second sub-committee deals with man-power, and the third, the principal supply officers' sub-committee, with the provision of munitions and supplies in time of war. At the beginning of 1927 an Imperial Defence College was founded to educate selected officers of the three services in working together in the solution of problems of Imperial Defence and to carry out detailed studies for the main committee.

## I. ARMY.

The land forces of the United Kingdom consist of the Regular Army, the Territorial Army, and the Reserve Forces. The British troops of the Regular Army serve both at home and overseas and are commonly referred to as the British Army in contradistinction to the Indian Army or Native Army, and to the Local Forces in certain British Colonies and Dependencies, the personnel of which is native with a proportion of British officers.

The Regular Army, whether at home or abroad, except India, is paid for by the Imperial Exchequer (although certain Dominions pay contri-

butions towards its upkeep); India pays a contribution towards the cost of troops at home owing to these serving as a *dépôt* for the regular troops in India. The Imperial Exchequer pays for Indian and Colonial troops serving outside their own countries. The Territorial Army serves only at home in peace time, but as the supreme position of the British Navy in Home Waters has practically eliminated all risk of invasion, members of the Territorial Army are now asked to accept liability for service overseas in time of war, subject to the consent of Parliament. The rank and file for both Regular Army and Territorial Army are obtained by voluntary enlistment. The Reserve Forces consist of the Army Reserve, the Supplementary Reserve of Officers and the Supplementary Reserve, the Militia and the Channel Islands and Colonial Militia, and the Territorial Reserve. The Army Reserve is composed of men who have completed their period of colour service with the Regular Army; its strength on January 1, 1932, was 124,509. The Supplementary Reserve of Officers and the Supplementary Reserve were created in August 1924, with establishments of 2,489 and 20,639 respectively, for the purpose of supplying officers and technicians to the army on mobilisation. The strength of the Supplementary Reserve on January 1, 1932, was 17,485. The Militia, which is intended to serve as a supply source to the Regular Army after the Army Reserve is exhausted, is in process of reconstruction. The Channel Islands and Colonial Militia consist of the Channel Islands Militia, the Malta Militia, the Bermuda Militia, and the Isle of Man Volunteers. The Territorial Reserve is in process of formation.

Service is for 12 years, with permission to extend to 21 years in certain circumstances. Of the original 12 years, from 3 to 9 are spent 'with the colours,' i.e., on permanent service, and the remainder of the time in the Army Reserve; the majority of the men serve for 7 years with the colours and 5 years in the Army Reserve, which is the rule for infantry other than the Foot Guards. Men enlist between 18 and 25 years of age.

For purposes of training and command the fighting troops are for the most part organised in divisions, which consist of 3 infantry brigades, divisional artillery and engineers, together with the necessary auxiliary services. The cavalry is organised in brigades. The infantry brigades are composed of 4 battalions, the cavalry brigades of 3 regiments. The organisation of the Territorial Army is analogous to that of the Regular Army, and it consists of 14 divisions, composed of infantry, artillery, engineers, and auxiliary services, and of the mounted brigades, chiefly composed of yeomanry. During 1931 further progress was made in the process of mechanising the Army. The experimental mechanised brigades, composed of artillery, infantry and tanks carried out extensive tests. New establishments increased considerably the number of machine guns with infantry and cavalry, and provided infantry with anti-tank guns.

For purposes of command Great Britain is divided up into six 'commands' and the London and Northern Ireland Districts. The commands are (1) Aldershot, of very limited area, (2) Eastern, including the eastern and southern counties, (3) Northern, including the northern midlands and north-eastern counties, (4) Scottish, (5) Southern, including the southern midlands and south-western counties, (6) Western, including Wales, Lancashire and north-western counties. These commands (except the Aldershot command) are divided up into Territorial Recruiting districts for the Regular Army. The Eastern, Northern, Scottish, Southern, and Western commands and the London District each include from 1 to 4 Territorial mounted brigades, and 2 or 3 Territorial divisions. There are normally two Regular divisions in the Aldershot, one Regular division

in the Eastern, one in the Southern command and one in the Northern command. At the head of each command is a general officer (styled the General-Officer Commanding-in-Chief). He is assisted by a general-officer of lower rank who is responsible for questions of administration apart from training and defence questions.

The land forces are administered by an Army Council which is composed of the Secretary of State for War, who is its President; the heads of the departments into which the War Office is primarily divided, and the permanent Secretary of the War Office. The Territorial Army is to a large extent administered by County Associations over which the War Office merely maintains a general control as regards expenditure.

The principal military educational establishments are the Royal Military Academy, educating youths to be officers in the artillery and the engineers, the Royal Military College whence officers are obtained for cavalry and infantry, the Senior Officers' School, which trains officers for command, and the Staff College, which trains officers for the staff. The Officers' Training Corps in two divisions representing respectively the universities and public schools, is intended to provide officers for the Territorial Army, and for the Regular Army on expansion.

The estimated expenditure for the army for the year 1932-33 amounted (March, 1932) to 36,488,000*l*.

The total personnel charged to British votes for 1931-32 was 139,961, of whom 137,737 were British troops, 2,224 were Colonial and Native Indian troops. There were in India 58,111 British troops, so that the total establishment of the Regular Army in 1932-33 was  $139,961 + 58,111 = 196,027$ . The strength of the Territorial Force on March 1, 1932, was 6,899 officers and 124,830 other ranks.

The distribution of Regular troops, except in India, was as follows:

Home . . . . .	110,368

## II. NAVY.

The British Navy is a permanent establishment, governed by the Board of Admiralty. The First Lord of the Admiralty is the Cabinet Minister responsible for the Navy.

The duties of the Admiralty are grouped under the two headings of Operations and Maintenance. The First Sea Lord and Chief of the Naval Staff and the Deputy Chief of the Naval Staff, have charge and direction of the Operations Division. This Division is concerned with Naval policy and the general direction of operations, war operations in Home waters and elsewhere, strategy, tactics, the development and use of material, including types of vessels and weapons, and with trade protection and anti-

submarine considerations. The four members of the Board who are in charge of the Maintenance Division are the Second Sea Lord and Chief of the Personnel; the Third Sea Lord and Controller of the Navy; the Fourth Sea Lord and Chief of Supplies and Transport; and the Civil Lord. The Parliamentary Secretary and the Permanent Secretary are concerned with Finance and Admiralty business.

The Washington Treaty of 1922, which relates to the British Navy and the Navies of the United States, France, Italy, and Japan, is concerned mainly with capital ships, defining for each Power what her replacement tonnage shall be, and fixing the maximum displacement of such ships at 35,000 tons, and their heaviest armaments at the 16 in. gun.

By the London Treaty of 1930 it was agreed to defer replacement of capital ships until after 1936. In the meantime, certain ships were to be discarded without replacement. In the British fleet, the ships so discarded include four battleships (*Benbow*, *Emperor of India*, *Iron Duke*, *Marlborough*) and the battle cruiser *Tiger*. Though withdrawn from the effective list, the *Iron Duke*, which it will be recalled was flagship of the Grand Fleet at Jutland, will be disarmed and retained for use as a gunnery training ship.

Cruisers, which the Washington Treaty had restricted to a standard displacement of 10,000 tons and guns not above 8 inches in calibre, are dealt with in Part III of the Treaty, to which only the British Empire, the United States and Japan subscribed. Definite limits are assigned to the cruiser tonnage which may be maintained by these three countries during 1931-36 in two categories, (a) cruisers armed with guns of more than 6·1 inch calibre, and (b) those armed with guns of 6·1 inch calibre or less. Destroyer and submarine tonnage, which had remained unaffected by the Washington Treaty, is also restricted by the same section of the Treaty. In the period 1931-36, each of the three fleets concerned is allowed 52,700 tons of submarines.

Washington Treaty restrictions concerning aircraft carriers remain in force, but the construction of any such vessels of 10,000 tons or less displacement mounting a gun above 6·1 inch calibre is forbidden to all five of the signatory powers.

Under the 1929-30 Estimates there are building or completing for the British Navy one 7,000 ton cruiser (*Leander*), one flotilla leader (*Kempfenfelt*), 4 destroyers (*Crusader*, *Comet*, *Crescent*, *Cygnets*), 3 submarines (*Thames*, *Sturgeon*, *Swordfish*).

Under the 1930-31 Estimates there are under construction 3 cruisers of 7,000 tons (*Neptune*, *Orion*, *Achilles*), 1 flotilla leader (*Duncan*), 8 destroyers (*Defender*, *Daring*, *Diamond*, *Delight*, *Dainty*, *Diana*, *Duchess*, *Decoy*), 3 submarines (*Porpoise*, *Seahorse*, *Starfish*), 4 sloops (*Dundee*, *Falmouth*, *Milford*, *Weston-super-Mare*), and 1 netlayer (*Guardian*).

Under the 1931-32 Estimates there are to be laid down in September and October, 1932, 2 cruisers of 7,000 tons (*Amphion*, *Ajax*), 1 of 5,000 tons (*Arethusa*), 1 flotilla leader, 8 destroyers, 4 sloops, 3 submarines, 1 river gunboat, 1 mining tender, and 1 gate vessel for boom defence.

New construction voted in the 1932 Estimates is practically a repeat of the above, with the substitution of a destroyer depot ship for the mining tender.

The Navy Estimates amounted to 55,865,000*l.* for 1929-30; for 1930-31 to 51,605,000*l.* net; and for 1931-32 to 50,476,300*l.* net.

The number of officers, seamen and marines borne on January 1, 1914, was 144,871. The estimates for 1931-32 provide for a total personnel of 91,410. In four years personnel has been reduced by 10,000 officers and men.

## SUMMARY OF THE BRITISH FLEET.

With the disappearance from the lists of all capital ships armed with guns of less than 15 inch calibre, the general tendency is to classify them as pre-Jutland and post-Jutland types. Of the last-named the only representatives at present are the *Nelson* and *Rodney*, though the *Hood* embodies in her design certain modifications based on war experience.

The following summary of the more important units will illustrate the present position.

Class.	Completed by end of		
	1929	1930	1931
Battleships and Battle Cruisers . . . . .	20	19	15
Cruisers . . . . .	54	54	52
Aircraft Carriers and Tenders . . . . .	7	7	7
Flotilla leaders and Destroyers . . . . .	150	149	150
Submarines . . . . .	53	61	52

Ships and vessels of the Dominions are included in the above table and in the following paragraph. See notes following the ship lists.

Of the 37 monitors which existed in 1919, three still survive. There are 11 seagoing depôt and repair ships, 31 sloops, 28 minesweepers (mostly laid up in reserve), 13 surveying vessels, and a large number of smaller craft, such as gunboats, patrol boats, drifters and trawlers.

In the following tables the ships are grouped in classes according to type. The dates of the Naval Estimates under which they were sanctioned are given in certain cases, but, with reference to the capital ships affected by the Washington and London Treaties, the years are substituted in which they are due for replacement if desired.

The destroyers of the post-war Fleet are of the following classes: flotilla leaders, 1330–1800 tons, 34–36·5 knots, 14 (including 1 Australian); R class, 900 tons, 10; S class, 930–1075 tons, 41 (including 5 Australian and 2 Canadian); V class, 1300–1325 tons, 26; W class, 1300–1350 tons, 37; A class (1173–1330 tons), 12 (including 2 Canadian); B class (1330 tons), 8; total number, 148.

The submarines are of six successive classes. H class (410 tons surface displacement) 14; L class (760–845 tons), 18; X class (2425 tons) 1; O class (1311–1475 tons), 9; P class (1475 tons), 5; R class (1475 tons), 4; total number, 51.

*Dominion Navies.*—When Admiral of the Fleet Earl Jellicoe made a tour of the Dominions with the object of arriving at an understanding with the Governments on the naval defence of the Empire, his report to the Government of Australia emphasized the desirability of the Commonwealth becoming self-contained in regard to shipbuilding and the manufacture of guns, mountings,

explosives, and aircraft, but no action of much importance has been taken on the proposals. The Imperial Cabinet (July, 1921) left on record its view that co-operation among the constituent parts of the Empire was necessary, but that the details must be left to the Dominion Parliaments. So far the only one of Lord Jellicoe's main recommendations to be carried into effect has been the reorganisation of the Royal Indian Marine on a naval basis. Its strength at present is limited to 4 sloops, 2 patrol vessels, 8 trawlers, and 2 surveying vessels.

The Royal Australian Navy, in addition to the 4 cruisers and 1 aircraft tender named in the list above, has 1 flotilla leader, 5 destroyers of the S class, 3 sloops, and a few other vessels.

The New Zealand Navy, in addition to the *Diomedé* and *Dunedin*, has the obsolete light cruiser *Philomel* as a training ship, and a mine-sweeping trawler for instructional purposes.

The Royal Canadian Navy has 3 mine-sweeping trawlers, 2 destroyers of the A class (*Skeena* and *Saguenay*), which were delivered from England in 1930-31, and 2 older destroyers of the 'S' type (*Champlain* and *Vancouver*).

The South African Navy has 2 mine-sweeping trawlers and a surveying vessel.

Newfoundland has a transport built in 1925, the *Caribou*, which is employed under the Finance and Customs Department.

### III. AIR FORCE.

In May, 1912, the Royal Flying Corps first came into existence. On January 2, 1918, an Air Ministry was formed, and the control of the Royal Air Force was vested in an Air Council analogous to the Army Council. The Air Minister was given the status of a Secretary of State and became President of the Council. In April, 1918, the naval and military wings were amalgamated, under the Ministry of the Air, as the Royal Air Force.

The Force consists of the Royal Air Force, the Air Force Reserve, the Air Force Special Reserve, the Auxiliary Air Force, and the Territorial Air Force. The establishment of the Royal Air Force for the year 1931-32 is 82,000 exclusive of those serving in India, who are paid for by the Government of India. In January, 1932, the strength of the Air Force Reserve was 1,229 officers and 8,704 other ranks, of the Special Reserve 43 officers and 376 other ranks, of the Auxiliary Air Force 124 officers and 802 other ranks. During 1922 the Air Ministry took over control of Iraq and Palestine, and in January 1928 of Aden.

The Air Force is organised into commands as follows:—

I. United Kingdom: (a) Inland Area, (b) Coastal Area, (c) Irish Wing, (d) Cranwell, (e) Halton.

II. Overseas: (a) Middle East Area, (b) Iraq, (c) India, (d) Mediterranean, (e) Palestine.

Areas are subdivided into groups and wings, a certain number of squadrons being allotted to each group or wing. Squadrons are subdivided into flights. In March 1932 the establishment of the Royal Air Force was 88½ squadrons, 75½ of which were regular squadrons and 8 Special Reserve or Auxiliary Air Force squadrons, while 5 are organised on a cadre basis. Each squadron is of 12 aeroplanes. 40 squadrons were in Great Britain and 22 abroad, while 28 flights, the equivalent of 13½ squadrons, were provided for the fleet air arm. During 1923 a scheme for the expansion of the Air Force primarily for Home Defence was sanctioned. This scheme provides for an establishment of 52 squadrons for home defence, 39 of these being squadrons of the Royal Air Force, 6 being non-regular squadrons formed from the Auxiliary Air Force, and 7 being formed of the Special Reserve.

During 1932 29 regular and 8 Auxiliary Air Force squadrons and 5 cadre squadrons will have been formed for Home Defence. In November 1924 an Air Officer, commanding-in-chief Air Defences of Great Britain, was appointed to organise and command the Air Forces allotted for Home Defence. These are now divided into 3 sub-commands: the Fighting Area, with headquarters at Uxbridge; the Wessex Bombing Area, with headquarters at Andover, and the Special Reserve and Auxiliary Air Force.

The chief educational establishments of the Air Force are the Cadet College at Cranwell and the Staff College at Andover. The chief training dépôt is at Halton. There are also 3 flying training schools, 1 central flying school, and schools of gunnery, ballooning, army co-operation, photography and wireless.

The net Air Estimates for 1932-33 amounted to 17,400,000*l*.

For 1932-33 the net sum allotted to Civil Aviation was 473,000*l*. The air routes maintained were London-Manchester, London-Amsterdam, London-Brussels-Cologne, London-Paris and Cairo-Karachi. In January, 1932, a London-Cape Town service was opened. Owing to the disaster to the airship R101, which was destroyed with all on board on its first flight to India, experiments on airships are in abeyance.

<sup>1</sup> Figures for Scotland relate only to beans harvested as corn.

The production of meat in Great Britain in 1923-24 was estimated at 1,023,000 tons ; of milk, 1,350 million gallons. The value of produce sold off

the farms in 1923 (excluding produce consumed in farmers' households) was estimated at 258,750,000*l.*, namely: farm crops, 54,000,000*l.*; live stock, 95,000,000*l.*; dairy produce, 79,000,000*l.*; wool, 4,250,000*l.*; poultry and eggs, 13,500,000*l.*; miscellaneous crops, 13,000,000*l.*

For the quantities of cereals and live stock imported, see under *Commerce*.

In *England and Wales*, the Ministry of Agriculture make grants for, and, to some extent, supervise vocational education and scientific research in agriculture. The Board of Agriculture for *Scotland* dispenses certain grants for the development and improvement of agriculture, including agricultural education and research, in that country. Grants are also made, in respect of agricultural education and research, from the Development Fund set up by the Development and Road Improvement Acts, 1909, and, as regards research, from the Empire Marketing Fund. In 1930–31, the grant voted to the Development Fund was 625,000*l.*

The metals obtainable from the ores produced in 1930 were:—Copper, 48 tons, value 2,852*l.*; iron, 3,604,442 tons, 14,245,100*l.*; lead, 19,289 tons, 348,729*l.*; silver, 40,955 oz., 3,018*l.*; tin, 2,488 tons, 353,182*l.*; zinc, 505 tons, 8,368*l.*; total value, 14,961,249*l.*

The total number of persons (including clerks and salaried persons) ordinarily employed at all mines in Great Britain under the Coal and Metalliferous Mines Regulation Acts during 1930 was 956,859. The number of mines at work was 2,638; 756,361 persons (males) worked underground, and 196,438 males and 4,060 females (including clerks and salaried persons) above ground. The number employed at quarries under the Quarries Act was 76,665, of whom 47,928 worked inside the quarries, and 28,737 outside. The number of quarries at work was 5,179.

Professor H. S. Jevons estimated the resources of British coal in 1915, within 4,000 feet of the surface, at 197,000 million tons.

<sup>1</sup> Provisional figures.

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance, and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. This is ascertained from the declaration made by the importers, and is checked by the expert knowledge available in the Customs Department, with the help of current price-lists and market reports. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the United Kingdom, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

**Internal Communications.****I. RAILWAYS, TRAMWAYS, AVIATION AND HIGHWAYS.**

Under the Railways Act, 1921, the railways of Great Britain are grouped, as from January 1, 1923, into four systems, namely: London, Midland and Scottish (7,464 miles); London and North-Eastern (6,464 miles); Great Western (3,765 miles); Southern (2,129 miles); total, 19,822 miles of route.

The following table gives the latest railway statistics available for Great Britain:—

Year	Length of road open at end of year	Paid up Capital (including nominal additions)	Number of Passengers originating (excluding season-ticket holders) <sup>1</sup>	Weight of goods and mineral traffic originating	Railway & Ancillary Businesses	
					Gross receipts. <sup>2</sup>	Expenditure. <sup>3</sup>

1930 . . .	24,403	1,209.1	1,217.2	304.3	208.9	170.8

<sup>1</sup> The equivalent number of annual tickets representing season ticket holders in 1928 was 784,560, in 1929 was 781,000, and in 1930 was 779,000.

<sup>2</sup> The gross receipts from railway working only in 1929 were 195,409,523L. gross, 44,089,559L. net, and in 1930, 184,836,382L. gross, 37,240,698L. net.

<sup>3</sup> The expenditure on railway working was in 1929, 151,319,964L.; 1930, 147,595,684L.

<sup>4</sup> Owing to revision in the form and method of compilation of accounts the figures for 1927, 1928, 1929 and 1930 are not comparable with those of previous years.

The net receipts on Railway and Ancillary businesses in 1930 were 33,044,598L. (45,071,208L. in 1929).

The gross receipts of the four large railway systems in 1931 was 156,284,000L. (170,698,000L. in 1930).

*Tramways.*—In 1930 there were in Great Britain 2,323 miles of tramways and light railways open for public traffic. The paid-up capital amounted to 107,394,000*l.*, gross receipts 26,769,000*l.*, working expenses 21,156,000*l.*, and net receipts 5,613,000*l.* The total number of passengers carried in 1930 was 4,613,527,000.

*Civil Aviation.*—In 1930 the number of aircraft miles flown was 1,437,000; number of passengers carried, 25,094; weight of cargo, 848 tons.

*Highways.*—The public highways in Great Britain in December 1930 had a total length of 177,256 miles. (England and Wales, 151,807 miles; Scotland, 25,449 miles.)

## II.—CANALS AND NAVIGATIONS

The total length of canals in the United Kingdom in 1905 was 4,673 miles, of which 3,641 miles were in England and Wales, 184 in Scotland, and 848 in Ireland.

The total tonnages originating on the principal canals<sup>1</sup> in Great Britain in 1930 were: Railway-owned canals, 1,693,905 tons; other than railway-owned, 11,541,879 tons, including Birmingham, 3,160,291 tons, Grand Junction, 1,376,723 tons, Leeds and Liverpool, 1,511,323 tons, and Bridgewater, 1,089,257 tons, Aire and Calder, 2,393,965 tons. Tonnage carried on the River Thames (above Teddington) was 372,808.

There is a scheme for modernisation of the Grand Union Canal. Work is in progress on the branch from Napton (Warwick) to Birmingham, a distance of 24 miles. The canal is to be made suitable for motor-driven barges of large size.

Manchester, fourth port in the United Kingdom, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35½ miles in length, 30 ft. in depth to Stanlow Oil Dock, thence to Manchester it is 28 ft. deep. The bottom width of the canal is not less than 120 ft. except for ½ mile near Latchford, where it is 90 ft. The maximum width of the locks is 65 ft., with the exception of the entrance lock, which is 80 feet wide. The canal is in direct communication with all the principal railway systems and barge canals of the Kingdom. The total issued capital of the Company at December 31, 1931, was 20,010,200*l.* The gross revenue of the canal in 1931, including the Bridgewater department and the railways, amounted to 1,763,483*l.*, and the net revenue, including miscellaneous receipts, to 643,244*l.* (701,676*l.* in 1930). The traffic receipts in 1931 amounted to 1,276,110*l.* The merchandise traffic paying toll in 1931 amounted to 5,898,289 tons.

## III.—POST, TELEGRAPHS AND TELEPHONES.

(Great Britain and Northern Ireland.)

Number of Post Offices at March 31, 1931, 22,710, besides about 50,000 trade and pillar letter boxes; staff employed January 1932, 231,169 persons (177,540 males, 53,629 females).

The telegraphs were transferred to the State on February 5, 1870. On March 31, 1931, the mileage of Post Office wires used for telegraph purposes was 320,589 miles. The total mileage of Post Office wires, *i.e.*, telegraph, telephone, and spare wires, was 9,404,439. Of this total, 1,357,754 miles were aerial, 8,029,108 underground, and 17,577 submarine.

The total number of telegraph offices open on March 31, 1931 (including Railway and Cable Companies' Offices, *etc.*, which transact public telegraph business), was 12,564. On February 1, 1932, there were 24 Post Office wireless stations in operation, and several "stand-by" stations for emergency purposes.

All telephone exchanges deal with trunk telephone business, but on March 31, 1931, there were 19 exchanges which dealt only with trunk work. On that date there were 16,917 Inland trunk and 111 International circuits (including 4 transatlantic, 1 Australian and 1 South American channels); the mileage of Post Office wires used therein was 1,112,128 miles. The London local exchange system had 150 exchanges, 6,872 call offices (including 2,301 kiosks), 2,857,414 miles of working wire and 712,493 telephones. The Provincial local exchange system had 4,717 exchanges, 27,746 call offices (including 7,954 kiosks), 4,180,910 miles of working wire and 1,269,679 telephones. The approximate number of originated effective calls in 1930-31 was 1,870 millions (586 millions in London). For private wires, the rentals in 1930-31 amounted to 574,000*l.*

The income and expenditure of the Post Office as shown in the Commercial Accounts was as follows :—

In 1913, the number of depositors was 1,912,820; the total Cash due to depositors, 68,548,000*l*., and the face value of Stock, 2,795,000*l*.

### Money, Weights, and Measures.

The sovereign weighs 123·274 grains, or 7·98805 grammes, ·91666 (or eleven-twelfths) fine, and consequently it contains 113·001 grains or 7·3224 grammes of fine gold. The shilling weighs 87·27 grains or 5·6552 grammes, and down to 1920 was ·925 (or thirty-seven-fortieths) fine, thus containing 80·727 grains or 5·231 grammes of fine silver, but under the Coinage Act, 1920, the fineness was reduced to ·500 (one half). Bronze coins consist of a mixture of copper, tin, and zinc. The penny weighs 145·83 grains, or 9·45 grammes. The standard of value is gold. Silver is legal tender up to 40 shillings; bronze up to 12*d*., but farthings only up to 6*d*.. Bank of England notes are legal tender in England and Wales, except at the Bank itself (3 and 4 Will. 4, cap. 98). Under the Currency and Bank Notes Act, 1928, the Bank was empowered to issue 1*l*. and 10*s*. notes, which became legal tender for all payments. Under the Gold Standard Act, 1925, the issue of gold coin is suspended but bullion may be purchased at the price of 3*l*. 17*s*. 10½*d*. per ounce troy of gold of the fineness prescribed for gold coin by the Coinage Act, 1870. The note circulation at March 9, 1932, was: 395,801,751*l*., of which 41,326,751*l*. was held by the Bank of England and 354,475,000*l*. was in the hands of the public.

Standard units are: of length the standard *yard*, of weight the standard *pound* of 7,000 grains (the pound troy having 5,760 grains), of capacity the standard *gallon* containing 10 pounds avoirdupois of distilled water at 62° F., the barometer at 30 inches. On these units all other legal weights and measures are based.

## NORTHERN IRELAND.

### Constitution.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922 (13 Geo. V. Ch. 2, Session 2), a separate parliament and executive government were established for Northern Ireland, which comprises the parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone, and the parliamentary boroughs of Belfast and Londonderry. The Parliament consists of a Senate of 2 *ex-officio* and 24 elected persons and a House of Commons of 52 elected members. An allowance for expenses is made in the case of those members of both Houses who are not in receipt of salaries as members of the Government or as officers of Parliament, amounting to (a) 1*l.* 16*s.* a day to members of the Senate for attendance at meetings of the Senate or committees, but the total allowance to each may not exceed 72*l.* in any one year, unless under a declaration of insufficiency of means when an additional 100*l.* per annum is paid irrespective of attendance, and to (b) 170*l.* a year to members of the House of Commons. The Parliament has power to legislate for its own area except in regard to (1) matters of Imperial concern (the Crown, making of peace or war, military, naval, and air forces, treaties, titles of honour, treason, naturalisation, domicile, external trade, submarine cables, wireless telegraphy, aerial navigation, lighthouses, etc., coinage, etc., trade marks, etc.), and (2) certain matters 'reserved' to the Imperial Parliament (postal service, Post Office and Trustee savings banks, designs for stamps, registration of deeds, land purchase). The executive power is vested in the Governor on behalf of His Majesty the King: he holds office for six years and is advised by ministers responsible to Parliament. Senators hold office for a fixed term of years: the House of Commons is to continue for five years, unless sooner dissolved. The qualifications for membership of the Parliament are similar to those for membership of the Imperial House of Commons. Power was given to the Northern Ireland Parliament by the Act of 1920 to alter the qualification and registration of electors, the election laws and the distribution of Parliamentary representation after June 1924. This power was exercised by the passing—(a) of the Representation of the People Act (Northern Ireland), 1928, whereby the franchise was conferred upon women upon the same terms as it had hitherto been enjoyed by men; and (b) of the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, whereby the system of Proportional Representation, under which the Parliaments which met in 1921 and in 1925 had been elected, was abolished, and Parliamentary Representation, except for the constituency of Queen's University of Belfast, was based upon single-member constituencies.

Northern Ireland continues to return 13 members to the Imperial House of Commons.

An Act of the Imperial Parliament, passed in 1928, modified certain restrictions placed on the powers of the Northern Irish Parliament by the Act of 1920, principally by extending the powers of the latter Parliament to legislate on matters relating to trade in live stock and agricultural produce to consolidate branches of the statute law enacted by the Imperial Parliament whose general subject matter is within the jurisdiction.

The legislative and administrative powers relating to Railways, Fisheries, and the Contagious Diseases of Animals were, under the Ireland (Confirmation of Agreement) Act, 1925, transferred to, and became, as from April 1, 1926, powers of the Parliament and Government of Northern Ireland.

The Northern Irish Parliament met for the first time in June, 1921. At the election in May, 1929, there were returned 37 Unionists, 11 Nationalists, 8 Independent Unionists, 1 Labour.

*Governor.*—The Duke of Abercorn, appointed for a term of 6 years from December 8, 1922; the appointment was extended on March 23, 1928, for a further term of 6 years from December 8, 1928. Salary, 8,000*l.* per year, payable from Imperial Revenues (2,000*l.* being recoverable from Northern Ireland Revenues).

The Ministry is composed as follows:—

*Prime Minister.*—Rt. Hon. Viscount *Craigavon* (salary, 2,720*l.*).

*Finance.*—Rt. Hon. H. M. *Pollock* (salary, 1,700*l.*).

*Home Affairs.*—Rt. Hon. Sir R. *Dawson Bates* (salary, 1,700*l.*).

*Labour.*—Rt. Hon. J. M. *Andrews* (salary, 1,700*l.*).

*Education.*—Rt. Hon. Viscount *Charlemont* (salary, 1,700*l.*).

*Agriculture.*—Rt. Hon. Sir E. M. *Archdale, Bart.* (salary, 1,700*l.*).

*Commerce.*—Rt. Hon. J. *Milne Barbour*.

The usual channel of communication between the Government of Northern Ireland and the Imperial Government is the Home Office.

### Local Government.

In the two chief cities, the County Boroughs of Belfast and Londonderry, local administration is vested in Corporations, who are responsible for roads, public health, rating, housing, lighting, etc.

In each of the six counties there is a County Council responsible for the construction and maintenance of roads and other public works, collection of rates, supervision of the arrangements for dealing with tuberculosis and special diseases; also of lunatic asylums, county infirmaries and county fever hospitals.

The counties are divided into thirty-two rural districts, in each of which is a Rural District Council, which is the sanitary authority for the district, and is also responsible for such matters as provision of labourers' cottages, burial grounds, etc. There are also under Municipal Government two Boroughs and thirty Urban Districts, as well as three towns which are not Urban Districts.

The administration of poor relief and dispensary medical relief is vested in Boards of Guardians, which, in the majority of cases, are the Rural District Councils, but in a few cases their area extends over two Rural Districts.

### Area and Population.

A census of Northern Ireland was taken on April 18, 1926. The area and population of the country at that date were as follows:—

Counties and County Boroughs.	Area in statute acres (exclusive of water).	Males.	Females.	Total.
Antrim . . . . .	702,851	92,596	99,047	191,643

Northern Ireland . . . . .	3,351,444	608,088	648,473	1,256,561

The provisional estimated population of Northern Ireland at June 30, 1931, was 1,246,000.

Vital statistics for 4 years :—

Year	Marriages	Births	Deaths	Year	Marriages	Births	Deaths
1927	7,175	26,676	18,216	1929	7,426	25,410	19,822
1928	7,264	25,963	18,004	1930	7,547	25,879	17,148

### Religion.

The religious professions in Northern Ireland, as recorded at the census of 1926, were: Roman Catholics, 420,428; Presbyterians, 393,374; Protestant Episcopalians, 338,724; Methodists, 49,554; Other professions, 54,481; Total, 1,256,561.

### Education.

The following are the latest available statistics for the Academic year 1930-31 :—

*University*: The Queen's University of Belfast (founded in 1849 as a College of the Queen's University of Ireland, and reconstituted a separate University in 1909), 123 members on the Staff including Professors, Lecturers and Demonstrators, and 1,430 students in the session 1931-32. *Secondary Education*: 73 schools with 12,094 pupils. *Technical Instruction*: 58 technical schools and 65 other centres with approximately 23,900 students. *Elementary Education*: 1,893 public elementary schools with 201,683 pupils on rolls.

### Justice.

Under the Government of Ireland Act, 1920, a Supreme Court of Judicature of Northern Ireland has been established, consisting of the Court of Appeal in Northern Ireland and the High Court of Justice in Northern Ireland. An appeal lies direct, in certain conditions, from the former to the House of Lords.

A system of County or Civil Bill Courts deals with civil disputes generally where the sum at issue does not exceed 50*l.*, but possesses wider jurisdiction in certain cases. Courts of summary jurisdiction generally attended by permanent judicial officers—known as resident magistrates—determine summarily minor criminal and quasi-criminal cases and certain minor civil disputes. Some cases are tried by resident magistrates sitting alone.

The Police Force consists of (a) the Royal Ulster Constabulary, with a statutory maximum strength of 3,000; and (b) the Special Constabulary, a part-time force.

### Finance.

The bulk of the taxation of Northern Ireland is imposed and collected by the Imperial authorities, who make certain deductions and remit the balance to the Northern Irish Exchequer. The exact share of the latter in the proceeds of such taxation is determined by the Joint Exchequer Board, a special body consisting of one representative of the Imperial Treasury, one of the Northern Irish Treasury, and a chairman appointed by the King. The deductions made by the Treasury represent a contribution towards Imperial liabilities and expenditure, and the net cost to the Imperial Exchequer of Northern Irish services 'reserved' to the Imperial Parliament. During

recent years the cost of these 'reserved' services, together with the Imperial contribution, has represented about 25 per cent. of the total expenditure of Northern Ireland, while the remaining 75 per cent. has represented the cost of administration in the Province, including education, widows and orphans, old age and blind persons' pensions, health and unemployment insurance, police, prisons, public works, agricultural development, commercial services, finance, etc. The Northern Irish Parliament has independent powers of taxation, except as regards customs duties, excise duties on articles manufactured and produced, excess profits duty, corporation profits tax, any tax on profits or a general tax on capital, or any tax substantially the same in character as any of these duties or taxes. It has no power to impose, charge or collect income tax, including super tax, but it can grant relief from these taxes to individuals resident and domiciled in Northern Ireland. The Northern Government also raises money, as required, by means of Ulster Savings Certificates and Treasury Bills, for the purpose of meeting temporary deficiencies of revenue and for advances to the Unemployment Fund. In October, 1925, a Government Loans Fund was established from which loans are made to local authorities and others for public utility services. This has been financed by issues amounting to 4,000,000*l.* Ulster Loans 4½% Stock, 1945-1975, and 2,000,000*l.* Ulster Loans 5% Stock, 1950-60.

The revenue accruing to the Northern Irish Exchequer and the expenditure for four years was as follows:—

	1929-30 <sup>1</sup>	1930-31 <sup>1</sup> (estimated)	1931-32 <sup>1</sup> (estimated)	1932-33 <sup>1</sup> (estimated)

The yield in 1930 was (in tons): oats, 277,136; potatoes, 856,435; turnips, 753,060; flax, 5,363; hay, 835,912.

The livestock as at June, 1931, was: cattle, 680,428; sheep, 793,257; pigs, 285,569; goats, 44,981; horses used in agriculture, 86,485; mules and jennets, 224; asses, 7,775. Poultry in 1930 numbered 8,808,000.

There were 100,122 agricultural holdings exceeding one acre in area in 1930 in the hands of 98,826 separate occupiers.

*Mining.*—The mineral output in 1929 and 1930 for Northern Ireland was :—

	1929	1930		1929	1930
	Tons.	Tons.		Tons.	Tons.
Bauxite, Iron Ore and Lignite . . . . .	3,333	2,037	Gypsum . . . . .	1,430	190

			Diatomite . . . . .	4,207	3,604

The number of persons employed, inclusive of those employed at coal mines, was : 1929, 2,604 ; 1930, 2,559.

*Manufactures.*—The two principal industries are linen and ship-building, both centred in Belfast. The former provides employment for approximately 85,000 persons, excluding those engaged in growing the fibre ; 900,000 spindles, and 35,000 looms. The value of linens exported from the United Kingdom during 1930 was 7,444,669*l.*, practically the whole of which came from Northern Ireland. The Belfast shipyards employ approximately 11,000 persons, and possess an output capacity exceeding 250,000 tons a year. Other important manufactures are ropes and twines, tobacco, soaps, aerated waters, biscuits, spirits, hosiery and underwear.

### National Insurance.

*Sickness and Unemployment Insurance and Pensions.*—Schemes of compulsory insurance on similar lines to those in force in Great Britain are in operation in Northern Ireland, and make provision for benefits during unemployment and sickness, including medical attention, and for pensions to persons over 65 years of age and to widows and orphans.

A general outline of the provisions of these schemes is set out in the paragraph dealing with 'National Insurance' in Great Britain. The number of persons in Northern Ireland insured under the various schemes is approximately : Health Insurance and Contributory Pensions, 348,000 ; Unemployment Insurance, 266,000.

*Non-contributory Pensions.*—Old Age Pensions (non-contributory) and Blind Persons' Pensions are granted to individuals who are not eligible for Contributory Pensions provided they have reached the age of 70 (50 in case of blind persons), and comply with certain conditions as regards British nationality and residence in the U.K.

The number of persons in Northern Ireland in receipt of non-contributory Pensions is approximately 41,000.

### Communications.

The total first track railway mileage of Northern Ireland amounts to 754 miles. The area is also well served by inland waterways, and possesses 180 miles of canals. Total length of roads is 12,996 miles ; road budget for year ending March 31, 1932, was 1,500,000*l.*

**ISLE OF MAN.<sup>1</sup>**

The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the Crown; the Legislative Council, composed of the Lord Bishop of Sodor and Man, two Deemsters, the Attorney-General, two members appointed by the Governor, and four members elected by the House of Keys, total 11 members, including the Governor; and the House of Keys, a representative assembly of 24 members chosen on adult suffrage with six months residence for 5 years by the 6 'sheadings' or local sub-divisions, and the 4 municipalities. Women have the franchise as well as men. Number of voters 1930-31, 38,679. The island is not bound by Acts of the Imperial Parliament unless specially mentioned in them.

*Lieut.-Governor.*—Sir Claude H. A. Hill, K.C.S.I., C.I.E.

The population (census, 1931) numbered 49,338 (22,489 males, 26,849 females).

The principal towns are Douglas (population, census 1931, 19,329), Ramsey (4,198), Peel (2,476), Castletown (1,713). Births (1930), 667; deaths, 727. In 1931 there were 38 elementary schools, 35 being provided schools. The enrolled pupils numbered 5,638, and the average attendance 5,016. The gross expenditure of the Education Authority on elementary education for the year 1930-31 amounted to 69,854*l.* There are 4 secondary schools (912 registered pupils), and 7 evening institutes (487 registered pupils). The gross expenditure on higher education for 1930-31 was 27,228*l.* In 1929 the police force numbered 65; in the year 1928 there were 816 persons convicted.

Revenue is derived mostly from Customs. In 1930-31 the revenue amounted to 405,036*l.*; and expenditure to 397,006*l.*

The principal agricultural produce of the island consists of oats, barley, turnips and potatoes, and grasses. The total area of the island, excluding water, is 140,986 acres; the total area of arable land in 1931 was 79,001 acres and of permanent grass, 31,067 acres. The total acreage under corn crops in 1931 was 17,123 acres, including 14,984 under oats, 264 under wheat, and 605 under barley or bere. There were also 5,611 acres under turnips and swedes, 1,692 under potatoes, and 34,441 under clover, sainfoin and grasses under rotation. The number of agricultural holdings in 1931 was 1,821. The live stock in 1931 consisted of 3,417 horses; 19,477 cattle; 91,153 sheep; and 4,172 pigs. Total value of minerals raised in 1923, 47,496*l.* Persons employed in mining numbered 414. In 1929 there were belonging to the Isle of Man 104 fishing boats.

The registered shipping (1930) comprised 6 sailing vessels (531 gross and 340 net tons) and 37 steamers (30,245 gross and 12,380 net tons) and 21 motor vessels (646 gross and 448 net tons); total tonnage 13,168 net tons. The tonnage of vessels arrived at ports of the island in 1930 was 1,068,308 tons (964,787 tons coastwise), and departed 1,066,134 net tons (989,490 tons coastwise). The railways have a length of 46½ miles, and there are 25 miles of electric railway.

**CHANNEL ISLANDS.<sup>1</sup>**

The Channel Islands are situated off the north-west coast of France, and are the only portions of the 'Dukedom of Normandy' now belonging to England, to which they have been attached since the Conquest. The islands are administered according to their own laws and customs. Jersey has a separate legal existence; it is administered by a Lieutenant-Governor appointed by the Crown, and a Bailiff also appointed by the Crown. The Lieutenant-

Governor has a veto on certain forms of legislation. He and the Crown officers may address the States but not vote. The qualification for a vote is the possession of a minimum value of 80*l.* real or 120*l.* personal property. The Royal Court consists of a tribunal of first instance and an appeal court. The States for deliberation and legislation consist of 12 Jurats, 12 rectors, 12 constables (who are the mayors of the parishes), 17 deputies, and 2 Crown officers. Guernsey, Alderney, and Sark are under one Lieutenant-Governor, but Guernsey and Alderney have a government of their own, and Sark is a dependency of Guernsey and under its jurisdiction. On May 10, 1905, a law was passed for the Island of Guernsey requiring the approval of the Lieut.-Governor and of the Royal Court of the Island previously to the acquisition, or leasing, or occupation of immovable property by aliens or alien companies, registration and liability to local rates, &c., being also provided for. The Channel Islands are not bound by Acts of the Imperial Parliament unless specially named in them.

## INDIA, THE DOMINIONS, COLONIES, PROTECTORATES, AND DEPENDENCIES OF THE BRITISH EMPIRE.

In the following pages the various sections of the British Empire outside Gt. Britain and Northern Ireland are arranged in alphabetical order under the divisions of the world to which they belong:—1. Europe; 2. Asia; 3. Africa; 4. America; 5. Australasia and Oceania.

The term 'Dominion' is used officially as a convenient abbreviation of the complete designation 'self-governing Dominion.' The Dominions are Australia, Canada, Irish Free State, Newfoundland, New Zealand, and South Africa.

The Imperial Conference of 1926 defined the Dominions as 'autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations.' The Conference further laid down that, as a consequence of this equality of status, the Governor-General of a Dominion 'is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain,' and that 'it is the right of the Government of each Dominion to advise the Crown in all matters relating to its own affairs.' The Conference also recognised certain treaty-making rights as appertaining to the Dominions.

On December 11, 1931, the Statute of Westminster, which by legal enactment recognises the status of the Dominions, defined at the Imperial Conference of 1926, became law. The Dominions had in their turn also passed the Statute of Westminster in 1931.

The term 'Colony' is an abbreviation of the official designation 'Colony not possessing responsible Government,' and includes all such Colonies whether or not they possess an elective Legislature, but does not include Protectorates or Protected States. The term 'Crown Colonies' is properly applicable only to those Colonies in which the Crown retains control of legislation.

Under the recent Peace Treaties certain ex-German and ex-Turkish territories are administered by parts of the British Empire under mandates approved by the League of Nations. These territories include Samoa, New Guinea, Iraq, Palestine, and parts of the former German Colonies in Africa.

Up to July, 1925, all sections of the British Empire outside of Great Britain and Ireland were dealt with by the Colonial Office. In that month a new Secretaryship of State, for Dominion Affairs, was created, and as a result the Dominions Office was set up, to take over from the Colonial Office business connected with the self-governing Dominions, the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate, and Swaziland), including business relating to the Imperial Conference.

The Colonial Office now deals with the administrative work of the Colonies, Protectorates, and Mandated Territories other than those for which the Dominions Office is responsible. It contains seven Departments—the West Indian, Far Eastern, Ceylon and Mauritius, East African, Tanganyika and Somaliland, Nigeria, Gold Coast and Mediterranean—dealing with the affairs of various groups of Dependencies; a Middle Eastern Division, which was established in March, 1921, to conduct business relating to Iraq, Palestine, Aden, and Arab areas under British influence; and a General Department, which is concerned with correspondence of a general and miscellaneous character including questions of promotion, postal, telegraph, and copyright matters, international conventions and commercial treaties, Letters Patent and Commissions, etc.

## EUROPE.

### THE IRISH FREE STATE (SAORSTAT EIREANN).

AN Act was passed in 1920 under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Ulster Unionists accepted this scheme, and the Northern Parliament was duly elected on May 24, 1921, and opened by the King in person in the following June. The rest of Ireland, however, having proclaimed a Republic in January 1919 refused to work the Act. On December 6, 1921, a Treaty was signed with the British Government which was embodied in the Irish Free State (Agreement) Act, 1922. The Treaty contains the following provisions among others :—

Ireland to have the same constitutional status 'in the community of nations known as the British Empire' as the Self-Governing Dominions, and to be called the Irish Free State.

Its position in relation to the Imperial Parliament and Government to be that of the Dominion of Canada, and the representative of the Crown in Ireland to be appointed in like manner as the Governor-General of Canada.

The Irish Free State to undertake its own coastal defence, the defence by sea of Great Britain and Ireland being undertaken by the Imperial forces: these provisions to be reviewed at the expiration of five years. The Free State to afford, in time of 'war or strained relations' with other powers, such harbour and other facilities as the British Government may require. The establishments of the Irish defence force not to exceed such proportion to the British military establishment as the population of Ireland bears to the population of Great Britain.

The ports of Great Britain and of Ireland to be freely open to the ships of 'the other country' on payment of the customary dues.

By the Treaty 'Northern Ireland' was given the option of continuing its separate existence under the Act of 1920, subject to the award of a 'Boundary Commission.' On December 3, 1925, the British Government and the two Irish Governments signed an agreement by the terms of which the partition of 1920 continues in force as determined in that Act, the Boundary Commission being discharged from the duty of delivering an Award.

By the same agreement the provisions of the Treaty relating to a Council of Ireland and that stipulating the liability of the Irish Free State for a share of the National Debt of the United Kingdom were cancelled.

### Constitution.

Under the Treaty a Provisional Government was constituted on January 14, 1922, to carry on for a period not exceeding twelve months from the date of the Treaty (December 6, 1921). In September 1922 the Provisional Parliament met as a Constituent Assembly to adopt a Constitution for the Irish Free State. The Constitution was passed by the Provisional Parliament on October 25, enacted by the British Parliament on December 5 (*see* the Irish Free State Constitution Act, 1922 [Session 2], 13 Geo. V. ch. 1), and on December 6, 1922, came into effect by Royal Proclamation.

The Constitution declares the Irish Free State to be a co-equal member of the Community of Nations forming the British Commonwealth of Nations, and that 'all powers of Government, and all authority, legislative, executive, and judicial, in Ireland are derived from the people of Ireland.' Every person domiciled within the area of the Free State on December 6, 1922, who was

born in Ireland, or either of whose parents was born in Ireland, or who had been ordinarily resident within the area of the Free State for at least seven years, automatically became a citizen of the new State unless he or she elected not to accept such citizenship. The Irish language is declared to be the national language, but English is equally recognized as an official language. Liberty of person and the dwelling of the citizen are inviolable. There is to be no endowment of any religion. Freedom of conscience and the free profession and practice of religion are guaranteed to each citizen, as well as the right of free expression of opinion and the right to assemble peacefully and to form associations or unions for purposes not opposed to public morality. Elementary education is free.

The Legislature, known as the Oireachtas, consists of the King, a Chamber of Deputies (Dáil Eireann), and a Senate (Seanad Eireann). There must be at least one Session each year. Provision is made for payment of members. Legislative authority in respect of money Bills is reserved to the Chamber alone, but the Senate may make recommendations. Every Bill (other than a money Bill) initiated in and passed by the Chamber of Deputies is sent to the Senate, and if amended there the Chamber shall consider the amendments. An elaborate machinery of procedure is established by the Constitution (Amendment No. 13) Act, 1928, to prevent the exercise of a veto by the Senate or a protracted deadlock between the Senate and the Chamber.

The Representative of the Crown signifies the King's assent to Bills passed or deemed to have been passed by both Houses of the Oireachtas. He cannot signify or withhold such assent, or reserve a Bill for the signification of the King's pleasure save upon the advice of the Executive Council.

Two articles, namely Articles 47 and 48, containing respectively provisions relating to a Referendum of the people and the initiation of proposals for legislation by the people have been removed from the Constitution by the Constitution (Amendment No. 10) Act, 1928.

Amendments of the Constitution may be made within sixteen years from the date of the coming into operation of the Constitution by ordinary legislation passed for the purpose.

All members of the Oireachtas must take the prescribed oath of allegiance to the Constitution.

Citizens of 21 years of age or over, without distinction of sex, who comply with the prevailing electoral laws, can vote for members of Dáil Eireann; each voter has only one vote, and voting is by secret ballot.

Every citizen of 21 years of age or over, not otherwise disqualified, is eligible for election to Dáil Eireann. Election is upon principles of Proportional Representation. The number of Deputies is fixed on a popular basis, and is at present 153. Each of the Universities existing in the year 1922 (the year in which the Constitution was enacted) is entitled to elect three Deputies. The General Election is to be held on the same day throughout the country, and Dáil Eireann, unless the Oireachtas is sooner dissolved, continues for 'six years or such shorter period as may be fixed by legislation.' The period fixed by legislation is at present five years.

The Senate consists of 60 members. The first Senate consisted of 30 members elected by Dáil Eireann, and 30 nominated by the President of the Executive Council. Of the latter, 15 hold office for 12 years and 15 hold office for 6 years. In 1925 an election was held to elect 19 members in accordance with Articles 32 and 34 of the Constitution.

To be eligible for membership a citizen must be at least 30 years of age and eligible for election to Dáil Eireann. The members must be citizens who 'have done honour to the nation by reason of useful public service' or who represent important aspects of the nation's life. The term of office of a

member of Seanad Éireann is normally nine years. One-third of the members retire every three years, and their places are filled by an election 'at which the electors are the members of Dáil Éireann and the members of Seanad Éireann voting together on principles of proportional representation.' A panel of candidates is prepared before each election in the manner prescribed by law.

A person may not be a member of both Houses.

The executive consists of a Council of not more than twelve nor less than five ministers. They are responsible to the Dáil, and must include the President and Vice-President of the Council, and the Minister for Finance. The President of the Council, the Vice-President of the Council, the Minister in charge of the Department of Finance, and the other members of the Executive Council must be members of the Dáil, save that one of such other members may be a member of the Senate. The President is nominated by the Dáil. He nominates the Vice-President and other members of the Council, who must be approved by the Dáil. Every minister may speak in the Dáil and Senate.

The Chairman of the Dáil (Ceann Comhairle) receives a salary of 1,700*l.* a year; the Deputy-Chairman 1,000*l.*, the Chairman of the Senate (Cathaoirleach) receives 1,200*l.* and the Deputy-Chairman 750*l.* a year; members, except ministers and officials, 30*l.* a month, and free first-class railway facilities between Dublin and their constituencies. Ministers receive a salary of 1,700*l.* a year, and the President a salary of 2,500*l.* a year.

The representative of the King is the Governor-General of the Irish Free State (Saorstát Éireann).

The Free State Parliament met for the first time, as such, on December 6, 1922. At the Election held on February 21, 1932, the state of the parties was: Fianna Fáil, 72; Cumann na nGaedheal, 56; Labour, 7; Farmers, 4; Independent, 13; 1 vacancy; Total, 153. The Ceann Comhairle (Speaker) is not required by law to vacate his seat at a General Election.

*Governor-General.*—James McNeill, appointed December 16, 1927; formally installed February 1, 1928. Salary, 10,000*l.*

The Executive Council, appointed March 9, 1932, is as follows:—

*President and Minister for External Affairs.*—Éamon de Valéra (Éamon de Valera).

*Vice-President and Minister for Local Government and Public Health.*—Seán T. Ó Ceallaigh (Sean T. O'Kelly).

*Minister for Lands and Fisheries.*—Pádraig Ruithléis (Patrick Rutledge).

*Attorney-General.*—Conchubhar Alasdair MagUídhir (Conor Alexander Maguire, K.C.).

*Ceann Chomairle (Speaker).*—Proinsias Ó Fáthaigh (Frank Fahy).

### Local Government.

The Irish Free State is divided into twenty-seven administrative counties and four county boroughs governed by councils which, with a few exceptions,

are elected triennially. The county councils administer county affairs generally, can hold property, levy rates, borrow money and must meet the demands of other authorities, such as the boards of health and public assistance and mental hospital committees, whom they are required by law to subsidise. The county borough council possesses with certain exceptions the powers of a county council, and is also a sanitary authority under the Public Health Acts.

The administrative counties include the urban county districts which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to public health, housing, libraries, maternity, and child welfare, etc., and is the sole rating authority within its area. There are sixty-five urban sanitary districts, comprising the four county boroughs, six municipal boroughs, two towns constituted under special Acts and fifty-three towns under the Towns Improvement Act, 1854. There are twenty-three towns constituted under the Towns Improvement Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers and can levy a limited rate. There are, therefore, altogether eighty-eight areas under municipal government.

An enlarged rural sanitary district, called the county health district, was created by the Local Government Act, 1925. This district generally extends over the county with the urban districts excluded. The county council performs its duties as a health authority through a board composed of ten members of the council, and is required to appoint a county medical officer of health for the effective administration of the sanitary code.

The health authority is also, with certain exceptions, the public assistance authority, and is called the board of health and public assistance. Public assistance is organised on a county basis; the poor law unions within each county have been amalgamated, boards of guardians have been abolished and workhouses closed as such. County homes have been established for the aged and infirm and chronic invalids, and county and district hospitals for the sick. Home assistance has become the normal method of poor relief. Old age pensions are a charge on State funds, but local authorities assist in the administration. The insane poor are under the care of statutory committees of the county and county borough councils who maintain nineteen mental hospitals. Industrial and reformatory schools are managed by religious communities, but maintained principally out of capitation grants from State and Local funds. Religious communities and voluntary associations also maintain schools for the deaf and dumb, the blind, the mentally deficient and other afflicted classes which local authorities have power to utilise and subsidise.

Under special powers given to the Minister for Local Government and Public Health a number of local authorities have been superseded by paid commissioners or managers whose terms of office are limited.

The county boroughs of Dublin and Cork, and the borough of Dun Laoghaire, have a system of government which combines an elected council with a manager. These councils have certain specified functions, including the making of a rate, raising loans, and making bye-laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for a contribution towards travelling expenses.

Elections to public bodies are held according to the principle of

proportional representation. The franchise extends practically to all persons of either sex who are of full age and have during a qualifying period occupied as owners or tenants any land or premises in the area, except premises let as furnished lodgings. Any married woman of 30 years or over residing with her husband in premises in respect of which the husband is entitled to be registered as a local government elector is also qualified for the franchise. Women are eligible for election as members of all local government bodies in the same manner and on the same conditions as men. Five members of the Dublin County Borough Council of 35 are elected by the commercial electors.

In order to abolish patronage and to ensure that only qualified persons are appointed to local offices a central body called the Local Appointments Commissioners is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, to professional and technical offices and to other prescribed offices. Before making an appointment to a prescribed office which cannot be filled by promotion the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners select persons for appointment by means of competitive examinations or by the machinery of selection committees.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. The central authority appoints official contractors after obtaining competitive tenders. Lists of contractors are published periodically, and local authorities are then in a position to obtain their requirements directly from contractors at list prices.

The expenditure of local authorities is met mainly by receipts from rates levied on the annual value of rateable property and from government subventions. The rates collected (1927-28) amounted to 4,907,957*l.* The government grants amounted to 3,766,341*l.*

<sup>1</sup> Exclusive of larger rivers, lakes and tideways.

The Local Government (Dublin) Act, 1930, constituting the City of Dublin and the borough of Dun Laoghaire, came into operation on October 14, 1930. The new city includes the former County Borough of Dublin, the former urban districts of Pembroke, and Rathmines and Rathgar, together with the rural areas scheduled in the Act. The population of the new area of the City of Dublin, according to the census of 1926, was 405,126.

The following are the births, deaths and marriages registered in the Irish Free State for 3 years:—

**Education.**—*Elementary Education.*—Elementary Education is free and is given in the National Schools, which are under local managers, but are subject to the control of the Department of Education.

Since the establishment of the Saorstát the Irish language has been included as an essential part of the curriculum for all National Schools, and special courses in Irish have been held each year from 1922 to 1928 inclusive. Approximately 9,624 teachers have already qualified to teach the language. The use of Irish as a medium of instruction in the schools has also largely increased.

The latest statistics available show that the number of schools in operation is 5,401. The number of pupils enrolled in the schools is 504,427; the percentage average daily attendance is 83·4; the number of teachers of all classes is approximately 13,622.

There are five State-aided Training Colleges. The number of qualified teachers who issued from the Colleges in 1929–30 was 317.

The estimated State expenditure on Elementary Education for the year 1931–32 is 3,638,051*l.*, excluding the cost of administration.

*Secondary Education.*—The Secondary or Intermediate Schools are under private control and are conducted in many cases by Religious Orders; all schools receiving grants from the State are open to inspection by inspectors of the Education Department. The number of recognised Secondary Schools during the school year 1929–30 was 294, and the number of pupils between the ages of 12 and 20 years in attendance was 27,645. A new scheme of Secondary Education was introduced at the beginning of the school year 1924–25, under which the schools are allowed considerable freedom in drawing up their programmes, and the grants paid to the schools are reckoned on a capitation basis. Estimated total expenditure for 1931–32, 340,425*l.*, excluding the cost of administration.

*Technical Education.*—Technical Schools are established in all the cities and in the principal towns. These schools are controlled by the local authorities, and are maintained partly by the rates and partly by State Grants. Estimated total expenditure for Technical Education for 1931–32 is 213,641*l.* (State grants), excluding the cost of administration, and 99,401*l.* (rates).

*University Education* is given at the University of Dublin (Trinity College), founded in 1591, and at the National University of Ireland, founded in Dublin in 1909. The latter has three constituent colleges, namely, the University Colleges of Cork, Galway, and Dublin. The numbers of professors, &c. and students, in 1931–32, were as follows:—

Universities.	Professors, Lecturers and Assistants	Students.
Trinity College, Dublin . . . . .	112	1,455
University College, Cork . . . . .	80	645

### Justice.

Justice is administered by Courts set up by the Courts of Justice Act, 1924, pursuant to the Constitution. They consist of a Supreme Court, a High Court, a Court of Criminal Appeal, a Central Criminal Court, a Circuit Court and a District Court.

The Supreme Court, which consists of the Chief Justice (who is ex-

*officio* an additional Judge of the High Court) and two other Judges, has appellate jurisdiction from all decisions of the High Court. The High Court, which consists of a President (who is *ex-officio* an additional Judge of the Supreme Court of Appeal) and five ordinary Judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The Court of Criminal Appeal consists of the Chief Justice or some other Judge of the Supreme Court and two ordinary Judges of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial Judge that the case is a fit one for appeal, or, in case such certificate is refused, where the Court itself, on appeal from such refusal, grants leave. Where leave to appeal is granted, the appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the Court to hear further evidence or to refer any matter back for report by the trial Judge. The decisions of the Court of Criminal Appeal are final, unless that Court or the Attorney-General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court of Appeal. The Central Criminal Court consists of a Judge of the High Court, to whom is assigned, for the time being, the duty of acting as such Court. It is held at such times and in such places as the President of the High Court may direct, and at it are tried criminal cases which are outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court.

The Saorstát is divided into eight Circuits, each of which is presided over by a Judge of the Circuit Court. There are also two 'unattached' or additional Circuit Judges who assist in the various Circuits as required. The jurisdiction of this Court in civil proceedings is limited as to amount, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters, it has jurisdiction in all cases save murder, attempt to murder, conspiracy to murder, high treason, treason felony, treasonable conspiracy or piracy.

The District Court consists of thirty-three Justices of the District Court and three Assistant Justices. Three of such Justices are assigned to the Dublin Metropolitan area; the remainder of the country is divided into thirty districts, to each of which a Justice of the District Court is assigned. The District Court is a Court of summary jurisdiction with a small civil jurisdiction—in contract cases up to 25*l.*, and in cases of tort, with certain exceptions, up to 10*l.*

All Judges and Justices of the District Court are appointed by the Governor-General on the advice of the Executive Council.

## Defence.

Article 46 of the Constitution of the Irish Free State enacts that the exclusive right to the raising, maintenance and control of the armed forces in the Irish Free State is vested solely in the Oireachtas. The Executive Council is authorised by the Defence Forces (Temporary Provisions) Acts, 1923, as continued annually, to raise, train, equip, arm, pay and maintain an armed force consisting of such number of officers and men of the Regular Forces and the Reserve as may from time to time be provided by the Oireachtas.

The command in chief of, and all executive and administrative powers in relation to, the forces is by the Acts mentioned vested in the Executive Council and exercised through and in the name of the Minister for Defence. A Council of Defence is constituted by the 'Ministers and Secretaries Act, 1924' to assist the Minister for Defence in the administration of the business of his Department. It consists of the Minister (Chairman), a Civil Member (a member of Dáil Éireann), and three military members, each responsible for so much of the work of the Department as may be assigned to him by the Minister, being the Chief of Staff, the Adjutant-General and the Quartermaster-General, the Secretary of the Department acting as Secretary.

Enlistment is voluntary. The terms of engagement are:—With the exception of small classes (*e.g.* School of Music, etc.), 2 years in Army Service and 10 years in the Reserve; short term enlistments are for 3 months in Army Service and 6 years in the Reserve.

The Irish Free State is divided into nine military districts: the Curragh, Dublin, Dundalk, Cork, Waterford, Limerick, Athlone, Galway and Sligo Military Districts. As a temporary measure, one District Commander and Staff may be detailed to administer two or more Military Districts. The District Commanders at Dublin, Curragh and Cork at present administer

the whole area. The Infantry is organised in five regular battalions with seven Reserve Units. The remaining services include Air, Artillery, Armoured Car, Engineer, Signal, Military Police, Medical, Supply and Transport and Ordnance Services, a School of Music, and a Military College. In addition to the above, there are also a Chaplain's Department and an Army Nursing Service.

The strength provided for (1931-32) is 508 commissioned officers and 5,700 non-commissioned officers and men with a Reserve Force of 230 officers and 8,550 non-commissioned officers and men ; a Volunteer Reserve of 26 officers and 777 non-commissioned officers and men, and a Universities Officers' Training Corps of 450 Cadets. The Reserve consists of officers of the Forces who have retired therefrom and have been commissioned in the Reserve and non-commissioned officers and men who, having served in the Forces, have been transferred to the Reserve on expiration of Army Service. Reservists may be called out for training for a period not exceeding 30 days in any year, or, at any time, in aid of the civil power or in a national emergency. The Air Force consists of 163 of all ranks with 24 aeroplanes.

*Coastal Defence.*—Pending the Free State being in a position to undertake her own coastal defence, the coastal defence is, by arrangement, undertaken by Great Britain.

The estimated total expenditure for the financial year ending March, 1931, is 1,203,049l.

## Production.

*Agriculture.*—General distribution of surface (in acres) in 1930 : crops and pasture, 11,835,726 ; woods and plantations, 239,454 ; other land, including grazed mountain, 4,949,301 ; total, 17,024,481.

Exported . . . . .	28,400,000
Increases in stocks . . . . .	1,717,000
	<b>£64,757,000</b>

The more important items of output were:—Horses, 1,234,000*l.*; cattle and calves, 13,809,000*l.*; milk and cream, consumed or exported as such, 3,473,000*l.*; butter, 9,845,000*l.*; sheep and lambs, 2,858,000*l.*; pigs, 9,074,000*l.*; poultry, 2,327,000*l.*; eggs, 6,690,000*l.*; potatoes, 3,786,000*l.*; turf, 5,938,000*l.*

*Fisheries.*—The fishing industry represents a considerable factor in the national economy. The numbers of vessels, men, and boys engaged in fishing in the year 1930 were: 11 steam, 335 motor, 1,007 sail, and 2,081 row boats; total 3,434 vessels; men and boys, 12,055.

The quantities and values of fish landed during 1930 were: demersal fish, 77,366 cwts., value 107,965*l.*; pelagic fish, 164,331 cwts., value 67,814*l.*; shell fish, value 72,897*l.*

The inland fisheries are a very important national asset, providing some of the finest salmon and trout fishing in the world. There are also lakes of a total area of some 400 square miles containing considerable quantities of coarse fish available for capture. The quantity and value of the salmon captured in 1927 were 1,580 tons and 259,400*l.* respectively.

The census of Industrial production for 1929 gives the following details of the gross value of output for the principal industries (figures in brackets are the gross values minus cost of materials, including fuel, light, and power):—grain milling, 7,577,782*l.* (758,537*l.*); bread, flour confectionery, biscuits, 4,559,969*l.* (1,967,997*l.*); butter, cheese, margarine, 8,205,738*l.* (841,159*l.*); bacon curing, 5,955,995*l.* (563,956*l.*); brewing, 6,928,979*l.* (5,214,376*l.*); tobacco, 5,215,746*l.* (1,278,291*l.*); clothing and millinery, 1,345,977*l.* (587,981*l.*); sugar confectionery, jam-making, 1,172,415*l.* (483,340*l.*); woollen and worsted, 855,615*l.* (328,831*l.*); malting, 558,281*l.* (260,056*l.*).

## MALTA.

*Governor and Commander-in-Chief*.—General Sir David Campbell, K.C.B., A.D.C., appointed June 27, 1931.

*Lieut.-Governor*.—Harry Charles Luke, C.M.G.

Malta was held in turn by Phoenicians, Greeks, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 it was joined to Sicily until 1530, when it was handed over to the Knights of St. John, who ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the Island was subsequently blockaded by the British Fleet, aided by the Maltese, from 1798 to 1800, and with the free will of the Maltese was finally annexed to the British Crown by the Treaty of Paris in 1814. It is one of the most important ports of call in the world, and is the base and resort for repair and refitment of the British fleet in the Mediterranean.

**Constitution**.—Under the Malta Constitution Letters Patent, 1921, there is an elected Legislature to control local affairs, consisting of a Senate (partly nominated) of 17 members, and a Legislative Assembly of 32 elected members. Elections are on a proportional representation basis.

*Head of the Ministry and Minister for Police and Justice*.—The Lord Strickland of Sizergh, G.C.M.G., LL.B., Count della Catena.

*Minister for Public Health and Treasury*.—Prof. Robert V. Galea, L.S.A.

*Minister for Public Instruction*.—Sir A. Bartolo, LL.D., B.Lit., F.R.Hist.S.

*Minister for Posts*.—R. Hamilton.

*Minister for Industry and Commerce*.—Walter Salomone.

*Minister for Public Works*.—Edwin P. Vassallo, A.C.E.

*Minister for Agriculture and Fisheries*.—A. P. Montano, A.C.E.

Certain matters, including control of Naval, Military and Air Forces, Imperial interests, external trade, coinage, emigration, treaties, and relations with foreign States, are styled 'Reserved Matters,' and are under the Constitution dealt with by the Imperial side of the dyarchy, namely by the Governor, assisted by the Nominated Council. The Nominated Council consists of the Lieutenant-Governor, the Legal Adviser, and a senior officer of the Navy, Army and Air Force.

The Executive Council consists of the Governor sitting with the Ministry. There is also a Privy Council, consisting of the Governor and the Executive and the Nominated Councils sitting jointly.

General Elections had been due to be held in the summer of 1930, but in May of that year the Bishops of Malta and Gozo issued a Pastoral Letter prohibiting their flocks, under pain of committing a grave sin, from voting for

Constitutionalist candidates. The British Government, regarding this pronouncement as incompatible with the freedom of the electorate, cancelled the elections and temporarily suspended the Constitution (June 26, 1930), maintaining the existing Ministry in office, but in an advisory capacity only, the administration of the country reverting, during this period, to the Crown Colony form of Government. In 1931 a Royal Commission was appointed by the British Government to visit Malta and to consider the existing political situation in the Island. The Commission recommended that the Constitution should be restored, and this was agreed to by the British Government on March 2, 1932.

The English language, as the official language of the British Empire, and the Italian language, as the established language of record of the Courts of Law, are the official languages of Malta. The English language is the official language of administration, and all official records and public documents and all notices of general public importance or interest issued by the Malta Government are in that language, without prejudice, however, to the use of Italian as a second official language of administration accompanying the British text in such records, documents and notices in so far as may be found desirable and convenient. Both languages are recognized as equal languages of culture in the University, in Secondary Schools and in the higher classes of Elementary Schools, as subjects of study. The Maltese language, which is the language of general intercourse in the Islands, is the language of instruction in the lower standards of the Elementary Schools, and is one of the languages recognized in Parliament and in the Courts of Law.

**Area and Population.**—Malta is 17·4 miles long; area, 95 square miles; and the neighbouring island, Gozo, 26 square miles; total area (with Comino), 122 square miles. ## ASIA.

### ADEN, PERIM, SOKOTRA, AND KURIA MURIA ISLANDS.

Aden is a volcanic peninsula on the Arabian coast, about 100 miles east of Bab-el-Mandeb. It forms an important bunkering station on the highway to the East, and is fortified. The settlement includes Little Aden, a peninsula very similar to Aden itself, and the settlement and town of Shaikh Othmán on the mainland, with the villages of Imad and Hiswa.

In April, 1905, after demarcation of the frontier, Ottoman and British Commissioners signed an agreement which determines the boundary of the hinterland from Sheikh Murad on the Red Sea to Bana river, and thence north-east to the great Desert. By the Anglo-Turkish Convention of 1914, the boundary was prolonged through the desert to a point on the coast opposite Bahrein in the Persian Gulf. The territories of the Imam of San'ā now march with the border-line demarcated by a Mixed Commission (Anglo-Turkish) in 1902-4. The Settlement also includes the island of Perim at the entrance to the Red Sea, and is subject to the Bombay Government. The Government is administered by a Resident and Commander-in-Chief with four assistants. By an Order in Council, August 15, 1929, the superintendence, direction and control of the military government of Aden and its dependencies are transferred from the Viceroy of India to the Resident and Commander-in-Chief at Aden.

*Resident and Commander-in-Chief.*—Lieut.-Colonel B. R. Reilly, C.I.E., O.B.E. Appointed April 18, 1931.

Area 75 square miles; including the Protectorate about 9,000 square miles; of Perim, 5 square miles. Population of Aden and Perim in 1931, 50,809 (31,657 males and 19,152 females), against 54,923 in 1921.

The only Government revenue is from duties on liquor, opium, and salt, and from income tax, court fees and judicial fines; local taxes go to the Aden Settlement Fund. There is a Port Trust. The total receipts during the year 1930-31 amounted to Rs. 62,83,078, and the expenditure to Rs. 62,52,619. Imports (1930-31), by sea, Rs. 5,46,47,795; by land, Rs. 18,17,663; treasure (sea and land), Rs. 61,06,543; total imports,

Rs. 6,25,71,901 (total, 1929-30, Rs. 7,98,87,639). Chief imports: Fuel oil, petrol, kerosene, cotton piece goods, grain, hides and skins, tobacco, coal, coffee, sugar, fruits, vegetables and other provisions. Exports, by sea, Rs. 3,70,58,784; by land, Rs. 13,93,222; treasure (sea and land), Rs. 46,74,835; total exports, Rs. 4,31,26,841 (total, 1929-30, Rs. 6,03,47,197). Chief exports: Salt, coffee, gums, hides and skins, cotton goods, tobacco, grains, provisions and sugar. These statistics are exclusive of government stores and treasure. In 1930-31, 1,577 merchant vessels of 5,805,529 tons (net) entered the port of Aden, of which 805 were British; in the same year 1,090 country (local) craft of 32,036 tons entered. At Perim 352 vessels entered, of which 12 were Government vessels. Aden itself produces little, its chief industries being the manufacture of salt and cigarettes. The trade is largely a transshipment one, and is divided into foreign, Indian, and inland. There is a branch of the National Bank of India, Limited, and there is also one firm of private bankers.

The island of **Sokotra** (Hadibu *alias* Taharida) off the coast of Africa is under British protection, and the **Kuria Muria** islands, off the coast of Arabia, are attached to Aden. Area of former, 1,382 square miles. Population about 12,000, mostly pastoral and migratory inland, fishing on the coast. Religion, at one time Christian, Mohammedan since the end of the 17th century. The island came under British protection in 1876, by treaty with the Sultan. Chief products, dates and various gums; sheep, cattle, and goats are plentiful; butter is exported. The Kuria Muria Islands, five in number, were ceded by the Sultan of Muskat for the purpose of landing the Red Sea cable.

## BAHRAIN ISLANDS.

The Bahrain islands form an archipelago in the Persian Gulf 20 miles off al Hasa on the Arabian coast. Bahrain, the largest island, is 27 miles long and 10 miles wide. About a twentieth part of its area is cultivated. Other islands are Maharaq, to the north-east of Bahrain, 4 miles long and  $\frac{1}{2}$  mile wide; Sitra, to the east, 3 miles long and 1 mile wide; Nebi Saleh, about 2 miles in circumference, and several uninhabited islets. The islands are low lying, the highest ground being a hill in the centre of Bahrain 400 feet high.

The Ruling Family, the Al Khalifa, came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The present chief, Sir Isa bin Ali al Khalifa, K.C.I.E., became the Ruling Shaikh in 1869. In 1923, owing to his advanced age, he handed over the active conduct of affairs to his eldest son and heir-apparent, Shaikh Hamad bin Isa al Khalifa, C.S.I. The Ruler is in treaty relations with the Government of India, who are represented by a Political Agent.

The total population is estimated at about 120,000, of which three-quarters are the original inhabitants of the islands, of the Shia sect, the

remainder, including the Ruling Family, being Sunnis. The Sunnis live mainly in the towns of Manama and Maharaq. There is a wealthy Persian community in Manama and a number of Indian merchants.

Manama, the capital and commercial centre, extends for  $1\frac{1}{2}$  miles along the shore. Manama contains two hospitals, schools, a branch of the Eastern Bank, Post Office, wireless station, and the official residence of the Ruler. Wide roads connect the various quarters of the town. There is a municipal council in Manama and also in the town of Maharaq, on the adjacent island. The two islands are connected by a service of motor launches, which also ply to the mainland. The population of Manama is about 25,000 and that of Maharaq is about the same. There is a community of some 20 Europeans in Manama, including members of the Dutch Reformed Church Mission. Water in the two towns is supplied by artesian wells and nearly 200 fresh-water springs on the various islands are used for irrigation. Motor traffic is in use and roads exist between the towns and villages, which number about 100. An electric power station has been installed at Manama; the power is carried over on a causeway to Maharaq.

In the centre of Bahrain island there are many thousands of ancient tumuli whose origin is still uncertain.

Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf. Over 500 boats and 15,000 divers from Bahrain are engaged in fishing during four months of the summer. During the season Bahrain is visited by numerous arab and continental pearl buyers from Europe. Other industries are: boat-building, manufacture of sailcloth and reed mats, date cultivation and breeding of particularly fine white donkeys.

The greater part of the trade of Nejd and Hassa passes through Bahrain. The revenue of the State is obtained from the 5 per cent. *ad valorem* Customs Duty.

In 1927, the total imports amounted to Rs. 132,27,060; and exports to Rs. 83,58,825. The chief imports were: rice, Rs. 50,77,240; wheat, Rs. 3,51,710; wheat flour, Rs. 4,24,980; sugar, Rs. 14,15,910; loaf sugar, Rs. 7,33,980; coffee, Rs. 14,91,070; piecegoods, Rs. 29,89,330; tea, Rs. 3,13,650; ghee, Rs. 4,29,190. The chief exports were: rice, Rs. 22,32,885; wheat, Rs. 1,80,270; wheat flour, Rs. 100,720; sugar, Rs. 7,73,200; loaf sugar, Rs. 579,430; coffee, Rs. 4,27,730; piecegoods, Rs. 16,76,340; tea, 2,70,550; ghee, Rs. 58,400; pearls, Rs. 20,59,800.

There is a weekly mail service from India and a bi-weekly service to India. Import of arms and ammunition is subject to special permission.

The principal coins in use are Indian rupees, but Austrian (Maria Theresa) dollars (worth 1s. 11d.) and Turkish liras (worth about 18s.) are current. The measures employed are: dhara (= 19 inches). The weights are: roba (4 lbs.); maund (56 lbs.) and ruffa (560 lbs.).

**BORNEO (BRITISH).**

**British North Borneo.**—*Governor.*—A. F. Richards (February, 1930).

British North Borneo occupies the northern part of the island of Borneo. The interior is mountainous, Mount Kinabalu being 13,455 feet high.

Area, about 31,106 square miles, with a coast-line of over 900 miles. Population (1921 census) 257,804, consisting mainly of Mohammedan settlers on the coast and aboriginal tribes inland. The Europeans numbered 533; Eurasians, 213; Chinese, 37,856; Malays, 20,263. The number of natives was 197,058. The most numerous are the Dusuns, 112,287; the Muruts, 37,447; and the Bajaus, 33,070. Chief towns, Sandakan (population 11,936), on the east coast, and Jesselton, on the west coast.

The territory is under the jurisdiction of the British North Borneo Company, being held under grants from the Sultans of Brunei and Sulu (Royal Charter in 1881). It is administered by a Governor (appointed with the approval of the Secretary of State) in Borneo, and a Court of Directors in London, appointed under the Charter. On May 12, 1886, the British Government proclaimed a formal protectorate over the State of North Borneo. In 1898 certain border lands were acquired from the Sultan of Brunei, and more recently certain inland territories have been occupied. For administrative purposes the whole country is divided into four Residencies, which are sub-divided into Districts. In December 1904, an area of about 200 square miles was transferred to Sarawak in exchange for rights over coal mines on Brunei Bay.

There are Protestant and Catholic missions. The laws are based on the Indian Penal, Criminal, and Civil Procedure Codes, and local Ordinances. There is an Imam's Court for Mohammedan law. Native and Indian constabulary, 800 men under European officers.

A railway, 127 miles, runs from Jesselton on Gaya Bay to Melalap in the interior, with a branch from Beaufort to Weston on Brunei Bay. There is communication by telegraphy, telephone, and wireless telegraphy.

At Jesselton and Sandakan there are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China, and the Bank of Taiwan. A State Bank has been established, with Head Office in Sandakan and a branch at Jesselton.

The Government issues its own copper coinage (cents and half-cents); nickel coinage of 1, 2½ and 5 cents, and silver coinage of 25 cents; also notes of one, five, ten, and twenty-five dollars, and of 25 and 50 cents. Accounts are kept in dollar currency.

**Brunei.**—In 1888 the neighbouring territories on the north-west coast of Borneo, Brunei and Sarawak, were placed under British protection. On January 2, 1906, by treaty, the Sultan of Brunei handed over the general administration of his State to a British Resident. The present Sultan Ahmed Tajudin Akhazul Khairi Wad-din is a minor, and succeeded to the throne on the death of his father in September 1924. The Pengiran Bendahara and Pengiran Pemancha were appointed Joint Regents during his minority. The Sultan receives an allowance of 1,400*l.* a year from State funds, and his two principal ministers 700*l.* a year each. Area about 2,500 square miles, and population, 1931 Census, 30,162 (Europeans, 60; Malays and Bornean races, 26,917; Chinese, 2,683; Indians, 379; others, 43). The chief town is Brunei (pop. 12,000). The old town is built over the water on the Brunei river, and a new town has developed on the mainland since 1910. There were ten vernacular schools in 1930, with 688 pupils. Police force, 1930, 1 Chief Inspector, and 61 non-commissioned officers and men. The climate is hot and moist, with cool nights. Average annual rainfall is a little over 100 inches. The native industries in Brunei town include boat building, cloth weaving, brass foundries, and manufacture of silver ware. The principal products are cutch (mangrove extract), rubber, jelutong, and sago. Most of the interior is under jungle, comprising numerous kinds of serviceable timber. Oil has been found in commercial quantity at Seria on the coast and the field is being explored and developed.

Revenue 1930, 38,858*l.* (Customs, 15,269*l.*, monopolies, 6,180*l.*, licences, 2,012*l.*; lands and forests, 8,469*l.*, cession moneys, 1,773*l.*); expenditure, 44,287*l.* Public debt, Dec. 31, 1930, 46,783*l.*

*British Resident.*—P. A. B. McKerron, M.C.S.

**Sarawak.**—Area about 50,000 square miles, coast line 500 miles, many rivers navigable. The government of part of the present territory was obtained in 1842 by Sir James Brooke from the Sultan of Brunei. Various accessions

were made between 1861 and 1905. Under an agreement of 1888 Sarawak is recognised as an independent State under the protection of Great Britain. The present Rajah, H. H. Sir Charles Vyner Brooke, G. C. M. G. appointed May 17, 1917. Population estimated at about 475,000, Malays, Dyaks, Kayans, Kenyahs, and Muruts, with Chinese and other settlers. The chief towns are the capital, Kuching, about 23 miles inland, on the Sarawak River, Sibü, 60 miles up the Rejang River, which is navigable by large steamers, and Miri, the headquarters of the Sarawak Oilfields, Ltd. At Kuching are Church of England and Catholic missions with schools. The revenue is derived chiefly from Customs, the Govt. opium monopoly, gambling, arrack and pawn farms, royalty on oil, land revenue, timber royalty, exemption tax payable by Malays, and from Dyak and Kayan revenue. The revenue in 1930 was 5,562,034 dollars; expenditure, 7,089,923 dollars. Public debt, *nil*. Coal exists in large quantities, and a syndicate has been formed for developing the coal fields at Selantik. A considerable oil field is being developed at Miri and Bakong in the Baram district. Foreign trade, 1930: imports, 16,421,592 dollars; exports, 24,894,762 dollars. The chief exports (1930) included (in dollars) sago flour, 960,998; pepper, 978,395; plantation rubber, 4,061,414; gutta jelutong, 871,539; gutta percha, 940; cutch, 478,619; benzine, 8,828,772; kerosene, 1,412,609; liquid oil fuel, 2,955,581; crude oil, 1,243,644; fish, 218,260; damar, 79,266; rattans, 26,595. The trade is mostly with Singapore. Shipping entered and cleared in the foreign trade, 1930, 1,590,416 tons. There are military and police forces, consisting of about 1,000 men, principally Dyaks and Malays, under British army officers. Round Kuching are about 45 miles of roads, besides bridle paths. There are 30 post offices. The Government offices have a telephone system extending over Kuching and Upper Sarawak, and there is communication by wireless with Singapore, &c. There are also wireless stations at Kuching, Kuching (6th mile), Miri, Sibü, Sadong, Lundu, Mukah, Simanggang, Bintulu, Binatang, Kapit, Limbang, Baram, Saratok, Matu, Belangian, Tatau, Lawas, Rejang and Kanowit. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams are sent by wireless from Singapore.

Sarawak and Straits Settlements currency, 1 dollar = 2s. 4d.

There is a Special Commissioner for Sarawak as well as a Government Agent in England whose offices are at Millbank House, Westminster, London, S.W. 1. There is also a Sarawak Pilgrim Officer at Jeddah.

## CEYLON.

### Constitution and Government, &c.

Ceylon, the ancient Taprobane (Tamraparni, the island of 'dusky leaves'), is an island in the Indian Ocean, by the south of India, lying between 5° 55' and 9° 50' N. lat., and 79° 42' and 81° 53' E. long. Its area is 25,832 square miles.

In 1505 the Portuguese formed settlements on the west and south, which were taken from them about the middle of the next century by the Dutch. In 1796 the British Government annexed the foreign settlements to the Presidency of Madras; in 1802 Ceylon was separated from India and formed into a Crown colony.

According to the terms of the Constitution established in 1833, modified on various occasions, and now embodied in the Order in Council dated March 20, 1931, the administration is in the hands of a Governor, aided by a State Council which deals with administrative as well as legislative matters and therefore sits in executive as well as legislative session; the control of departments is decentralised and the old Colonial Secretariat is replaced by groups of departments in charge of ten Ministers, of whom seven are elected members of the Council, the remaining three, called Officers of State, being the Chief (formerly Colonial) Secretary, the Legal Secretary, and the Financial Secretary. In the administration of his departments each of the seven elected Ministers is associated with a Standing Executive Committee of the State Council; communal representation has been abolished; and the territorial franchise, which was limited to adult males possessing certain literary and property qualifications, has been extended—subject to certain specified qualifications—to adults of both sexes. The State Council is now composed of 46 members elected on a territorial basis, with 8 Nominated Unofficial Members, and the 3 Officers of State. Of the 50 electoral districts the 4 in Jaffna Revenue District remain unrepresented, as no candidates came forward for election.

*Governor.*—Sir Graeme Thomson, G.C.M.G., K.C.B. (appointed December 1, 1930). Salary 8,000*l.* (including entertainment allowance of 1,500*l.*).

*Colonial Secretary.*—Sir Bernard H. Bourdillon, K.B.E., C.M.G.

For purposes of general administration, the island is divided into nine provinces, presided over by Government Agents, with assistants and subordinate head men. There are three municipalities, with eight Urban District Councils and fourteen local boards, mainly for sanitary purposes.

### Area and Population.

The population of Ceylon (exclusive of the military and the shipping) at the partial Census held on February 26, 1931, showed an increase of 17·97 per cent. since 1921. The distribution by Provinces, and the average number of persons per square mile in each Province, are shown in the following table:—

Provinces	Area: English sq. miles	Population, 1931		Provinces	Area: English sq. miles	Population, 1931

The population on the principal estates, mainly consisting of immigrant Tamils from Southern India, numbered, at the census of 1931, 790,376, and

formed 13·05 per cent. of the total population. The Indian Tamils on Estates numbered 692,540.

Marriages registered, 1930, 25,505<sup>1</sup>; births registered, 205,106 (104,838 males and 100,768 females); deaths registered, 133,708 (66,907 males and 66,801 females).

The urban population is 13·2 per cent. of the total population. The principal towns and their population (exclusive of the military, shipping, and estates), according to the census of 1931, are :—Colombo, 284,155 ; Galle, 38,424 ; Jaffna, 45,708 ; Kandy, 36,541.

### Religion and Education.

At the census of 1921 the numbers of adherents to the principal religions were :—Buddhists, 2,769,805 ; Hindus, 982,073 ; Muslims, 302,532 ; Christians, 443,400, exclusive of the military and the shipping.

Buddhism was introduced from India in the third century B.C., and is still the religion of the majority of the inhabitants, especially in the southern part of the island. It is (unlike Buddhism in Tibet, China, and Japan) materialistic and atheistic, and in popular usage has a large admixture of the doctrines and practices of popular Hinduism and of the aboriginal wild tribes.

Education is free in vernacular schools, but fees are charged in English schools.

The number of vernacular schools in 1930 was : Government schools, 1,387 (attendance, 138,149 boys and 71,813 girls) ; Aided schools, 2,147 (attendance, 150,429 boys and 108,801 girls) ; Unaided schools, 1,227 (attendance, 21,578 boys and 9,060 girls). There were also 326 English and Bilingual schools, attended by 54,443 boys and 17,964 girls.

The total sum spent by Government on vernacular education in 1929–30 was 8,252,970 rupees.

The Royal College and the Government Training College with the English school attached to it are Government institutions. The other English schools are grant-in-aid schools ; the total grants to which in 1929–30 amounted to 1,798,357 rupees. A University College opened in January, 1921, has (1929–30) 338 students on the roll. Technical education is given in the 'Technical Schools' (643 students in 1930). There are 75 industrial schools.

### Justice, Crime, and Pauperism.

The law is Roman-Dutch, modified by colonial ordinances. Kandyan Law is to a certain extent in force in the Kandyan Provinces, and special systems of personal law are recognised for the Muslim community, and for the Tamils of the Jaffna District. The criminal law has been codified on the principle of the Indian Penal Code. There are a Supreme Court, police courts and courts of requests, and district courts, intermediate between the latter and the Supreme Court. Village councils deal with petty offences. In 1930 the number of cases instituted in the police courts and municipal magistrates' courts was 138,451. Offences against the Penal Code dealt with during the year 1930 numbered 19,073 ; of these, the number disposed of by the courts as true cases was 13,070, and the convictions 5,213<sup>2</sup> ; 18,309 convicted persons were sent to prison. Police force, December 31, 1930, 3,134 of all ranks.

<sup>1</sup> This is exclusive of Muslim marriages, which are seldom registered.

<sup>2</sup> For cognizable offences exclusive of theft cases under Rs. 20 and simple assault cases.

There is no poor law, though a few old persons receive a charitable allowance from the Government varying from Rs. 1 to Rs. 12·50 each per mensem.

### Defence.

In normal times Ceylon pays three-fourths of the cost of the Imperial garrison. At present the defence of the Island is almost entirely in the hands of local troops.

### Production and Industry.

The area of the Island is 16,212,400 acres, of which it is estimated that about 3,200,000 acres are under cultivation, and about 456,000 acres pasture land. The approximate areas under the principal products in 1930 were: paddy, 800,000 acres; other grain, 105,000 acres; cacao, 34,000 acres; cinnamon, 26,000 acres; tea, 457,000 acres; coconuts, 1,100,000 acres; rubber, 534,000 acres. In 1930, the exports of tea were 243 million lbs., of which nearly 154 million lbs. were sent to the United Kingdom and 16,809,000 to the U.S.A. The exports of desiccated coconuts were 705,000 cwts., copra, 1,813,000 cwts., and coconut-oil, 764,000 cwts. In the same year, 170,946,000 lbs. of rubber were exported, of which 39,087,000 lbs. went to the United Kingdom and 105,709,000 lbs. to the United States of America. In 1930, 12,818 acres of crown land were granted and sold by the Revenue Officers. The live stock in 1930 was reported to amount to 1,300 horses, 1,660,000 horned cattle, 57,000 sheep, 45,000 swine, and 181,000 goats. There is a Government Dairy, possessing over 300 head of cattle. There were

52 plumbago mines working at end of 1930. The exports of plumbago in 1930 were 174,000 cwts. Other minerals, such as gold, thorium, and monazite, exist, but, except the last-named, so far have not been found in quantities of commercial importance. There are some hundreds of small-gem quarries, from which sapphires, rubies, moonstones, catseyes, and other gems are obtained. Ceylonese manufactures, which are at present of very minor importance, are weaving, basket work, tortoise-shell boxes, &c., earthenwares, jewellery, metal work, lacquer work, carving, &c. Manufactures on any large scale are confined to the products of agriculture, such as the production of coconut oil. In 1930 there were about 2,000 tea, rubber and cacao factories, 1,000 cinnamon, citronella, coconut, fibre, oil, &c., factories, 20 saw mills, and 40 aerated water, ice, &c., factories.

### Commerce.

The values of the imports and exports for six years are given in the following table (Rate of Conversion: 1£ = Rs. 15):—

## CYPRUS.

*Governor.*—Sir Ronald Storrs, K.C.M.G., C.B.E. Salary, 3,600*l.*, of which amount 600*l.* is payable to the officer from time to time administering the Government.

*Colonial Secretary.*—H. Henniker-Heaton, C.M.G. Salary, 1,400*l.*

**Constitution and Government.**—Cyprus' is 40 miles from the coast of Asia Minor and 60 from the coast of Syria. At a very early date important Greek and Phœnician colonies were established in Cyprus, and later it formed part of the Persian and Roman Empires. Its government frequently changed hands until 1571, when the Turks conquered the island from the Venetians, and retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, June 4, 1878. On the outbreak of hostilities with Turkey on November 5, 1914, the island was annexed. On May 1, 1925, the Island was given the status of a colony by Letters Patent, and the High Commissioner became Governor. There was an Executive Council, consisting of the Colonial Secretary, the Attorney-General, the Treasurer, and the Chief Commandant of Police, with three locally resident additional members. On November 13, 1931, under Letters Patent, the Legislative Council ceased to exist, and power to make laws was granted to the Governor-in-Council. Municipal corporations exist in the principal towns, elected practically by all resident householders and ratepayers. Since December 1, 1931, the appointment of the mukhtars (headsman) of villages has been vested in the Governor.

**Area and Population.**—Area 3,584 square miles. Population at 1931 Census :—Moslems (Ottoman Turks), 64,224 ; Christians (Orthodox of the Autocephalous Church of Cyprus under the Orthodox Archbishop of Cyprus and three Bishops ; Maronites under a Uniat Archbishop of Cyprus, who resides in the Lebanon ; Armenians under an Armenian Archbishop residing in Cyprus ; and Anglicans under the Archdeacon for Cyprus and the Bishop in Jerusalem), 283,550 ; others, 158 ; total, 347,932. Population at 1921 Census : 310,715 ; at 1911 Census : 274,108. Inhabitants per square mile, 97.00. Births registered 1930, 11,080 ; deaths, 5,649.

The principal towns are Nicosia (the capital), 18,579 ; Larnaca, 9,765 ; Limasol, 13,302 ; Famagusta and Varosha, 6,980 ; Paphos and Ktema, 4,117 ; Kyrenia, 1,910. There are six administrative districts named after these towns.

**Education.**—The system of elementary education is designed so that each race has its own schools. Besides elementary schools there were in 1930 4 Gymnasiums, a commercial Lyceum, 7 Greek high schools for boys and 3 high schools for girls, a Priests' Training School, and two Moslem high

schools, one for boys and one for girls. Total number of elementary schools in 1930, 990 (701 Greek-Christian, 268 Moslem, 7 Armenian, 7 Maronite, 5 Latin, and 2 Jewish); teachers, 1,404 in elementary schools, of whom 974 were Greek-Orthodox, 343 Moslem, and 80 of other denominations. Total enrolment in elementary schools, 49,586, comprising 8,834 Moslem, 39,415 Greek-Orthodox, 625 Armenian, 232 Maronites, 466 Latins, and 14 Jews. The Government contributed (1930) 104,824*l.* to education. Total expenditure on elementary and secondary education, 156,795*l.* State aided private education is provided in the English school, Nicosia (195 boys), and the American Academy, Larnaca (246 boys). There are 3 weekly newspapers in Turkish and 19 in Greek and 3 in Armenian.

Languages spoken are a local dialect of Modern Greek; Osmanli Turkish by Moslems; English and French by educated classes. English is becoming more and more widely spoken.

**Justice.**—The law courts have been reconstituted by an Order in Council of 1927, which divided the Colony into three judicial districts, viz., Nicosia-Kyrenia, Famagusta-Larnaca, and Limassol-Paphos. There now are: (1) a supreme court of civil and criminal appeal, with original civil jurisdiction in disputed claims of 300*l.* and over, patents and admiralty actions, and election petitions; (2) three assize courts, having unlimited criminal jurisdiction; (3) three district courts, having, subject to (1) above, an unlimited civil jurisdiction; (4) magisterial courts with summary jurisdiction; (5) three assistant district judges' courts. In all the courts Cypriot (Christian and Moslem) judges take part. There are also three *Sheri* Courts, for Moslems only, which administer the Moslem *Sheri* or ecclesiastical law, and a *Sheri* Tribunal of Appeal. In the year 1930 the number of offences was 38,367, and the number of persons committed to prison was 9,651. Strength of police force, December 31, 1929, 25 officers and 827 men; total, 852.

**Finance.**—The revenue and expenditure for five years, exclusive of Grant-in-Aid, and share of the Turkish debt charge, were:—

## HONG KONG.

### Constitution and Government.

THE Crown Colony of Hong Kong was ceded by China to Great Britain in January, 1841; the cession was confirmed by the treaty of Nanking, in August, 1842; and the charter bears date April 5, 1843. Hong Kong is the great centre for British commerce with China and Japan, and a military and naval station of first-class importance.

The administration is in the hands of a Governor, aided by an Executive Council, composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, and the Director of Public Works (the last being a special appointment), and three unofficial members. There is also a Legislative Council, presided over by the Governor, and composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, the Director of Public Works,

the Inspector-General of Police, the Harbour Master, and the Director of Medical and Sanitary Services (the last four being special appointments), and eight unofficial members, viz., six nominated by the Crown (three of whom are Chinese), one nominated by the Chamber of Commerce, and one by the Justices of the Peace.

*Governor*—Sir William Peel, K.C.M.G., K.B.E. Appointed February, 1930. Salary 7,000*l.*, including 2,200*l.* allowance.

*Colonial Secretary*—W. T. Southorn, C.M.G.

### Area and Population.

Hong Kong is situated at the mouth of the Canton River, about 90 miles south of Canton. The island is an irregular and broken ridge, stretching nearly east and west about 11 miles, its breadth from 2 to 5 miles, and its area rather more than 32 square miles; separated from the mainland by a narrow strait, the Lyeemoon Pass, about half a mile in width. The opposite peninsula of Kowloon, on the mainland, was ceded to Great Britain by treaty in Oct. 1860, and now forms part of Hong Kong. The city of Victoria extends for upwards of five miles along the southern shore of the beautiful harbour. By a convention signed at Peking on June 9, 1898, there was leased to Great Britain for 99 years a portion of Chinese territory mainly agricultural, together with the waters of Mirs Bay and Deep Bay and the island of Lan-tao. Its area is about 356 square miles, including islands, with about 94,000 inhabitants, exclusively Chinese. Area of Old Kowloon is 3 square miles. Large areas have also recently been reclaimed at Kowloon Bay, Wanchai, and North Point. Total area of colony, 391 square miles.

The population of Hong Kong, excluding the Military and Naval establishments, according to the 1931 census returns was as follows:—Non-Chinese civil population, 19,369; Chinese civil population: City of Victoria (including Peak), 358,351; villages of Hong Kong, 41,156; Kowloon (including New Kowloon), 255,095; New Territories (land), 97,781; population afloat, 68,721; total Chinese population, 821,104; total civil population, 840,473.

The registered births and deaths for five years were as follows:—

Year	Births	Deaths	Births per 1,000 <sup>1</sup>	Deaths per 1,000 <sup>1</sup>
1926 . . .	4,041	12,516	4·5	15·90
1927 . . .	7,500	14,761	8·4	16·50
1928 . . .	9,309	14,757	9·5	15·1
1929 . . .	10,223	17,565	9·8	16·8
1930 . . .	11,134	19,260	9·7	14·2

<sup>1</sup> Birth and death rates are calculated only on the population of Hong Kong and Kowloon, there being no jurisdiction by the sanitary authorities over the New Territories (except New Kowloon).

In 1927 the number of Chinese emigrants was 285,593, and the number of immigrants 181,100; in 1928, 257,162 and 187,847, in 1929, 227,523 and 185,390 and in 1930, 188,900 and 223,136 respectively.

### Education.

Education is not compulsory, but all schools are State-inspected, and required to maintain a certain standard of efficiency. There are 5 Government schools, including 1 first-class secondary school, for children of British

parentage, with an average attendance of 368 (1930), and 13 Government schools for Chinese boys and two for Chinese girls, with a total average attendance of 3,747. There is one school for Indians, with an average attendance of 126 (1930). There are also numerous schools in receipt of grants. The total number of pupils in all schools in 1930 was 62,297. The total expenditure on education in 1930 was 1,459,876 dollars, net.

The Hong Kong University in 1930 had 366 students, of whom 40 were women. The majority of the students are Chinese. The University is a residential teaching University with six halls of residence.

### Justice and Crime.

There are a Supreme Court, the second court or Court of Summary Jurisdiction, and a third court or Appeal Court, three police magistrates' courts, and a marine magistrate's court. In 1930, 2,334 were committed to Victoria gaol for criminal offences; in 1929, 2,056. The daily average of prisoners in gaol was 1,075 in 1929, and 1,175 in 1930. There is a police force in the colony numbering (1930) 2,047 men, of whom 271 are Europeans, 750 Indians, and 1,026 Chinese.

### Finance.

The public revenue and expenditure of the colony were as follows in recent years. The dollar of Hong Kong is of variable value; for 1927 it is here taken at 2s. 0d., 1928, 2s. 0½d., 1929, 1s. 11d.; 1930, 1s. 4½d.

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1927	2,134,453	2,084,506	1929	2,257,303	2,106,728
1928	2,496,839	2,123,024	1930	\$27,818,473	\$28,119,646

The revenue is derived chiefly from land-taxes, licences, quarry rent, liquor, tobacco and motor-spirit duties, and an opium monopoly.

Public debt, 341,800£, raised in 1887 and 1893 for public works. Another loan, 1,143,933£ in Inscribed Stock at 3½ per cent., was raised in 1906 for purposes of railway construction, also a 6 per cent. Public Works (1927) Loan of 5,000,000 dollars was authorised. On December 31, 1930, the balance of assets over liabilities was 9,361,679 dollars.

### Defence.

The military expenditure for 1930 was 3,957,611 dollars. The Defence Corps cost 93,842 dollars for 1930. Hong Kong is the headquarters of the China Squadron.

### Industry, Commerce, Shipping, and Communications.

The chief industries are sugar refining, ship-building and repairing, rope-making, tin refining, tobacco manufacture, the manufacture of cement, and the manufacture of knit goods. Deep-sea fishing is important, especially for the New Territories.

The commerce of Hong Kong is chiefly with Great Britain, India and Ceylon, Australia, United States, China, Japan, Indo-China, and Siam. Hong Kong is a free port (except as regards the importation of intoxicating liquor, tobacco and motor-spirit). Principal articles of trade are sugar and flour, rice, cotton yarn and thread, and cotton and woollen piece goods, silk and silk piece goods, hemp, leather, tin, wolframite, mild

steel, bulk and case oil (kerosene), oils and fats, peanuts, Chinese medicines, fertilisers, fish and fishery products, tea, coal, cement, condensed milk, matches.

The trade of Hong Kong and the United Kingdom (Board of Trade returns) for five years is given as follows:—

—	1927	1928	1929	1930	1931 <sup>1</sup>
Imports (consignments) into Gt. Britain from Hong Kong . . . . .	£ 477,203	£ 481,206	£ 488,924	£ 422,490	£ 405,304
Exports of British Pro- duce to Hong Kong . . .	4,909,904	5,472,229	6,162,007	4,354,270	4,485,340
Exports of Foreign and Colonial produce . . .	90,557	97,526	114,016	95,132	59,281

<sup>1</sup> Provisional figures.

Imports, 1930, into Hong Kong from British Empire (excluding Great Britain), 2,904,271l.; exports to British Empire (excluding Great Britain), 3,294,679l.; imports from foreign countries, 30,914,478l.; exports to foreign countries, 25,732,314l.

In 1930, 49,609 vessels (including 21,235 junks and 6,326 steamships under 60 tons), representing altogether 40,511,650 tons, entered and cleared in the foreign trade. Of these, 4,721 with a tonnage of 11,357,605 were British ocean-going steamers.

There is an electric tramway of 9½ miles, and a cable tramway connecting The Peak district with the lower levels of Victoria. There is a 4' 8½" gauge Government railway on the mainland, connecting Kowloon with Canton, of which 22 miles are in British territory and 89 miles in Chinese. The receipts for the British section in 1930 were \$973,128, and operating expenses \$340,022. The line was opened to traffic on October 1, 1910.

There were 21 post offices in Hong Kong in 1930; revenue (1930) postal, 942,935 dollars; telegraphic, 441,547 dollars; expenditure, postal, 448,156 dollars; telegraphic, 228,244 dollars (salaries, wages, etc., 135,305 dollars). Telegraph lines, including cables, in 1930, 227 miles; telephone wires, excluding military lines, 63,358 miles. There is a wireless telegraph service under the control of the Public Works Department, besides a military and naval wireless station.

### Money, Weights, and Measures.

The British banking institutions in the Colony are the Hong Kong and Shanghai Banking Corporation, whose head office is at Hong Kong, the Chartered Bank of India, Australia and China, the Mercantile Bank of India, Ltd., and the P. & O. Banking Corporation, Ltd. Note circulation of the three former banks, end of 1930, 127,469,371 dollars. There are also several Chinese and foreign banks.

The currency of the Colony consists of the notes of the above-mentioned banks, and of British, Hong Kong, and Mexican dollars, besides subsidiary coins. The British dollar is of 416 grains of silver 900 fine, as compared with 417.74 grains of 902.7 fineness of the Mexican dollar.

Subsidiary coins are 50 cent pieces (209.52 grains 800 fine), 20 cent pieces (83.81 grains 800 fine), 10 cent pieces (41.90 grains 800 fine), 5 cent pieces (20.95 grains 800 fine), and 1 cent copper pieces of 115.75 grains of copper or mixed metal.

Weights and Measures are :

The <i>Tael</i> . . . . .	=	1½ oz. avoirdupois.
„ <i>Picul</i> . . . . .	=	133½ lbs.
„ <i>Catty</i> . . . . .	=	1½ „ „
„ <i>Chek</i> . . . . .	=	14½ inches.
„ <i>Cheung</i> . . . . .	=	12½ feet.

Besides the above weights and measures of China, those of Great Britain are in general use in the Colony.

## INDIA AND DEPENDENCIES.

INDIA, as defined by Parliament (52 and 53 Vict. c. 63, s. 18), comprises all that part of the great Indian Peninsula which is directly or indirectly under British rule or protection. In a popular sense it includes also certain countries such as Nepal, which are beyond that area, but whose relations with India are a concern of the Foreign and Political Department of the Government, whose envoy resides in the country concerned. These countries will be found included in the third part of the YEAR-BOOK among Foreign Countries. The term British India includes only the districts subject to British law, and does not include Indian States. The term is so used, unless otherwise stated, in the tables, &c., that follow.

### Government and Constitution.

The present form of government of the Indian Empire is established by various Parliamentary Statutes which are now consolidated in the Government of India Act, 1915, as amended by the Government of India (Amendment) Act, 1916, the Government of India Act, 1919, the Government of India (Leave of Absence) Act, 1924, the Government of India (Aden) Act, 1929, and other amending Acts of no great intrinsic importance. All the territories originally under the government of the East India Company are vested in His Majesty, and all its powers are exercised in his name. Under the Royal Titles Act, 1876, the King of Great Britain and Ireland has the additional title of Emperor of India.

It is the declared policy of Parliament, as stated in the preamble of the Act of 1919, implementing the Declaration of August 20, 1917, to provide for 'the increasing association of Indians in every branch of the

administration and the gradual development of self-governing institutions with a view to the progressive realisation of responsible government in British India as an integral part of the British Empire.' The Royal Statutory Commission was appointed on November 8, 1927, with The Rt. Hon. Sir John Simon, K.C.V.O., K.C., as Chairman. It made two visits to India in 1928-29, and its report was published in June 1930.

In October, 1929, it was agreed between the Commission and H.M.G. that the Commission's terms of reference covered consideration of the relations of the Indian States with British India, and that after the Commission had reported a tripartite conference of representatives of the British Government, British India and the Indian States should be held to formulate proposals for the new Constitution of India. The decision to hold this Conference was announced by the Viceroy in India in a Gazette Extraordinary on October 31, 1929, together with the statement that 'it is implicit in the Declaration of 1917 that the natural issue of India's constitutional progress, as there contemplated, is the attainment of Dominion Status.' The Conference met in London on November 12, 1930.

*Government in England.*—The administration of the Indian Empire in England is entrusted to a Secretary of State for India, assisted by a Council of not less than eight and not more than twelve members, appointed for five years by the Secretary of State. At least one-half of the members must be persons who have served or resided ten years in India, and have not left India more than five years previous to their appointment. No member can sit in Parliament. The duties of the Council, which has no initiative authority, are to conduct the business transacted in the United Kingdom in relation to the government of India. Subject to the Government of India Act and rules made thereunder, the expenditure of the revenues of India, both in India and elsewhere, is subject to the control of the Secretary of State in Council, and no appropriation can be made without the concurrence of a majority of votes of the Council. The Secretary of State regulates the transaction of business.

In exercise of the power given by the Government of India Act, a High Commissioner for India in the United Kingdom was in 1920 appointed to act as agent of the Governor-General of India in Council, and on behalf of provincial governments in prescribed cases, and to conduct any business assigned to him by the Secretary of State in Council.

The salary of the Secretary of State, and the cost of the India Office for other than agency services are borne by the British, and not, as formerly, by the Indian Exchequer.

*Central Indian Government.*—The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, often styled the Government of India. The Governor-General, or Viceroy (so called since 1858), is appointed by the Crown, and usually holds office for five years. The Capital of India and the seat of government were moved from Calcutta to Delhi in 1912, the latter being formed into a separate territory under a Chief Commissioner. The creation of the new Capital at New Delhi was completed in December 1929 by the entry of the Viceroy into his new residence 'The Viceroy's House,' planned by Sir Edwin Lutyens, R.A. The formal opening took place in February 1931. The summer seat of the Government is at Simla [April to October].

*Viceroy and Governor-General of India.*—His Excellency the Rt. Hon. the Earl of Willingdon, G.C.S.I., G.C.M.G., G.C.I.E., G.B.E. (April, 1931). Salary, Rs. 2,56,000 a year.

There is an Indian Legislature consisting of the Governor-General and two Chambers, the Council of State and the Legislative Assembly (opened 1921). The Council of State consists of 60 members, of whom 33 are elected and 27 nominated; not more than 20 may be officials; but not more than 17 officials are at present (1929) nominated. The Legislative Assembly contains 145 members, 41 nominated, of whom 26 are to be official members, and 104 elected. The life of the Council of State is five years, and of the Assembly three years, but dissolution may occur sooner, or the period may be specially extended by the Governor-General. Joint sittings of the two Chambers may be held for the settlement of differences between them. The Legislative Assembly was presided over for the first four years by a President appointed by the Governor-General; thereafter he is to be elected. This Legislature has power, subject to certain restrictions, to make laws for all persons within British India, for all British subjects within other parts of India, and for all native Indian subjects of the King in any part of the world. The Governor-General, with the assent of His Majesty signified, after copies of the proposed enactment have been laid before both Houses of the British Parliament, may enact measures essential for the safety, tranquillity, or interests of British India or any part thereof, against the wish of the Council or Assembly.

The Members of the Governor-General's Executive Council are appointed by the Crown; three must have had ten years' service in India, and one must be a barrister or pleader of not less than ten years' standing. They have charge of the following Portfolios :—

*Home*.—Mr. Harry Graham Haig, C.S.I., C.I.E., I.C.S. (Dec. 11, 1931).

*Finance*.—Sir George Schuster, K.C.M.G., C.B.E., M.C. (November, 1928).

*Education, Health and Lands*.—Khan Bahadur Mian, Sir Fazl-i-Hussain, K.C.I.E., Kt. (April 1930).

*Law*.—Sir Brojendra Lal Mitter, Kt., Barrister-at-Law (December, 1928).

*Railways and Commerce*.—Sir George Rainy, K.C.S.I., K.C.I.E., I.C.S. (April, 1927).

*Industries and Labour*.—Sir Frank Noyce, I.C.S. (April 1, 1932).

The salary of each member is Rs. 80,000 a year.

The *Foreign and Political* Department is directly under the Governor-General. The Commander-in-Chief is also the *Army* Member of the Executive Council. At the head of each Department (except the Railway Department

which is under the Chief Commissioner of Railways) is one of the Secretaries of the Government of India.

British India is now divided into fifteen administrations. Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the Punjab, Burma, Bihar and Orissa, the Central Provinces and Berar, and Assam are each under a *Governor*; and the N.W. Frontier Province, Ajmer-Merwara, Coorg, Baluchistan, Delhi, and Andaman and Nicobar Islands are each under a *Chief Commissioner* as far as British territory is concerned. Detailed information regarding the British Provinces will be found at p. 146.

*High Commissioner for India in the United Kingdom.*—Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.F., C.B.E. (appointed 1931), India House, Aldwych, London.

*Provincial Government.*—According to the Government of India Act, 1919, which came into operation in December, 1920, and January, 1921, the various functions of government are classified as Central and Provincial subjects, the latter being practically definitely committed to the Provincial Governments, while for purposes of convenience certain Central subjects, such as the collection of income tax, may be dealt with by the Provincial Governments as the agents of the Central Government. The Governor-General in Council retains unimpaired powers of control over the Provincial Governments in their administration of 'reserved' subjects, but in 'transferred' subjects is only competent to intervene where it is necessary to safeguard Central subjects or to decide questions where two or more Provinces are concerned, or to safeguard the due exercise and performance of any powers and duties possessed by or imposed on the Governor-General in Council in regard to the High Commissioner, to the raising of loans by local Governments, or under rules made by the Secretary of State in Council. The list of subjects transferred to Indian Ministers, with certain reservations, includes local self-government, medical administration, public health and sanitation, education, public works, agriculture, fisheries, co-operative societies, excise, registration, development of industries, adulteration, weights and measures, and religious and charitable endowments. Certain sources of revenue are definitely allocated to the Provinces, which are required to contribute to the Central Government certain annual sums which are to be the first charge on their revenues.

The Provincial Governments are based upon a scheme of dyarchy, or dualised form of government, and consist of the Governor-in-Council and the Governor acting with Ministers. The Ministers, who are elected members of the Legislative Council, have charge of certain Departments of Government known as 'transferred subjects,' while others, the 'reserved subjects,' are administered by the Governor-in-Council. Thus each side has its share in the conduct of the Government, with responsibility for its own work, while co-ordination is achieved by the influence of the Governor, who is associated with both sections.

The Governor's Executive Council consists of not more than four members, to be appointed by the Crown, one being qualified by twelve years' public service in India. The Legislative Council contains not more than 20 per cent. of official members and at least 70 per cent. (in Burma 60 per cent.) elected members, and, in addition to its legislative functions, votes all expenditure, subject to certain specified exceptions and to the power of the Local Government to incur expenditure, on reserved subjects without the Council's assent if the Governor certifies such expenditure to be necessary. The normal duration of the Legislative Council is three years, but it may be dissolved sooner by the Governor, or its term specially extended for one year. The Ministers are appointed by the Governor to administer the

transferred subjects, and are not to be officials. The Governor may not be a member of the Legislative Council, but may address the Council.

The Provinces to which this new form of government has been applied are Bengal, Madras, Bombay, Bihar and Orissa, United Provinces, Punjab, Central Provinces, Coorg, Assam and Burma. The minimum number of members in each Legislative Council is: Madras, 118; Bombay, 111; Bengal, 125; United Provinces, 118; Punjab, 83; Bihar and Orissa, 98; Central Provinces, 70; Coorg, 17; Assam, 53; Burma, 92. The numbers may be increased. There are 7·8 million voters out of the population of 247 millions in British India, including Burma. In Madras, Bombay, Bengal, United Provinces, Punjab, Central Provinces, Assam, Burma, and Bihar and Orissa the franchise has been extended to women; and women are eligible as candidates for the Madras, Bombay, United Provinces, Central Provinces, and Punjab Councils and for these constituencies in the Legislative Assembly.

The provinces are usually formed into divisions under Commissioners, and then divided into districts, which are the units of administration. At the head of each district is an executive officer (collector and magistrate, or deputy-commissioner), who has entire control of the district, subject to the control of his official superior. Subordinate to the magistrate (in most districts) there are a joint magistrate, an assistant-magistrate, and one or more deputy-collectors and other officials. There are 273 of such districts in British India.

*Government of Indian States.*—The control which the Supreme Government exercises over the Indian States varies considerably in degree; but they are all governed by the Indian Princes, ministers, or councils. The Princes have no right to make war or peace, or to send ambassadors to each other or to external States; they maintain military forces within certain limits; the sanction of the Government of India is required before Europeans of certain classes can be employed; and the Supreme Government can exercise control in case of misgovernment. Within these limits the more important Princes are autonomous in their own territories. Some, but not all of them, make fixed annual payments to the Supreme Government. The number of Ruling Princes and Chiefs having a salute of guns is 119, and of States and Estates without a salute, 441. The total area is 598,138 square miles, with a population of nearly 70 millions.

In 1921 a Chamber of Princes was established as a permanent consultative body to discuss matters relating to affairs of Imperial or common concern. In 1929 a committee under the chairmanship of Sir Harcourt Butler reported on the relations between the Paramount Power and the Indian States. Action on its recommendations is under consideration.

*Chancellor (1930).*—H.H. the Maharaja of Patiala.

#### LOCAL SELF-GOVERNMENT.

There were at the end of 1928-29, 776 municipalities, with a population of 19 millions. The total number of members of the municipal bodies was 12,732, of whom 11,862 were non-official. The municipal bodies have the care and lighting of the roads, water supply, drainage, sanitation, medical relief, vaccination, and education, particularly primary education; they impose taxes, enact bye-laws, make improvements, and spend money, with the sanction of the Provincial Government. Their aggregate income in 1928-29 was Rs. 17,36,15,532, exclusive of loans, sales of securities, and other extraordinary receipts amounting to Rs. 15,74,92,092. The aggregate expenditure was Rs. 18,90,78,579, excluding extraordinary and debt expenditure of Rs. 14,94,00,903. By the Local Self-Government Acts

# 118 THE BRITISH EMPIRE:—INDIA AND DEPENDENCIES

of 1883-84, the elective principle was introduced, in a large or small measure, all over India; and has since been further extended by recent legislation. In all larger towns, and in many of the smaller towns, the majority of members of committees are elected by the ratepayers; everywhere the majority of town committees consists of Indians, and in many committees all the members are Indians. In many municipalities women have the right to vote, and in a few they are eligible for election. For rural tracts, except in Burma, there were 787 district and sub-district Boards or Councils, and 460 Union Panchayats in Madras, with 21,244 members in 1928-29, 15,833 being elected. These Boards are in charge of roads, district schools, markets, public health institutions, &c. Their aggregate income in 1928-29 was Rs. 15,98,21,655, and expenditure Rs. 16,39,29,861.

## 124 THE BRITISH EMPIRE:—INDIA AND DEPENDENCIES

The persons with a knowledge of English numbered 2·5 millions.

Educational institutions in India are of two classes:—(a) those in which the course of study conforms to the standards prescribed by the Department of Public Instruction or by the Universities or Boards of Secondary and Intermediate Education, and either undergo inspection by the Department, or regularly present pupils at the public examinations held by the Department Universities or the Boards. These institutions are called 'Recognised,' but may be under public or private management. (b) Those that do not fulfil these conditions. These are called 'Unrecognised.' As regards recognised institutions, the system of education operates, in general, through (i) the Primary Schools, which aim at teaching, through the vernacular languages, reading, writing, and other elementary knowledge; (ii) the Secondary Schools, in which the instruction does not go beyond the matriculation or school-leaving certificate standard. The schools are divided into English or vernacular, and also into high and middle schools; (iii) the Intermediate Colleges; and (iv) the Colleges. The colleges are affiliated to eight federal universities—Calcutta (1857), Madras (1857), Bombay (1857), Punjab (1882), Patna (1917), Nagpur (1923), Andhra (1926), and Agra (1927). There are also six unitary teaching and residential universities—Allahabad (1887), Lucknow (1920), Rangoon (1920), Dacca (1921), Delhi (1922), and Annamalai (1929); two denominational universities—the Hindu University at Benares (1916), and the Muslim University at Aligarh (1920); and two universities in Indian States—Mysore (1916) and Hyderabad (Osmania) (1918). In some provinces, secondary or secondary and intermediate education is controlled by Boards. The number of Boards operating in 1929–30 was six.

There are in addition, various institutions of a special character, such as technical schools teaching arts and industries, engineering, &c.; law schools; medical schools and colleges; and training colleges and normal schools for the training of teachers, schools for adults, defectives, criminal and hill tribes, labourers and factory children; and reformatory schools for juvenile offenders.

The following table gives the number of institutions and scholars in 1929–30 in British India, including Ajmer-Merwara, British Baluchistan, the Civil and Military Station of Bangalore, and the administered areas in Indian States:—

\* Boards of Secondary or Intermediate Education in British India are not included in this table.

There were in 1929-30 in British India 226,832 'recognised' institutions with 11,898,602 scholars, and 34,114 'unrecognised' with 616,524 scholars.

The following was the educational expenditure for recognised institutions in recent years from fees, provincial resources, local rates, municipal funds, endowments, etc. :—

Year	Rs.	Year	Rs.
1924-25	20,87,02,222	1927-28	25,82,78,819
1925-26	22,77,83,531	1928-29	27,07,32,253
1926-27	24,58,47,572	1929-30	27,42,73,266

A system of State Scholarships exists by which it is possible for a boy to pass from the village school to the University. There are also State Scholarships, awarded by local Governments and the Government of India, to enable the holders to study in the United Kingdom for two or more years.

During 1929-30 the following newspapers and periodicals were published : in Madras, 309 ; Bombay, 314 ; Bengal, 663 ; United Provinces, 626 ; Punjab, 425 ; Burma, 161 ; Bihar and Orissa, 138 ; Central Provinces and Berar, 55 ; Assam, 43 ; Delhi, 88 ; N.W.F.P., 13. The percentage of newspapers and weekly and monthly publications published in various languages is as follows :—English, 17·8 ; Urdu, 23·2 ; Gurmukhi, 2·2 ; Hindi, 14·7 ; Bengali, 13·8 ; Tamil, 3·9 ; Assamese, 0·34 ; Gujarati, 2·5 ; Orya, 0·89 ; Marhati, 4·2 ; Kanarese, 0·92 ; Sindhi, 1·4 ; Telugu, 1·5 ; others, 12·05. The number of printing presses was 5,919 ; and 2,332 books in English or other European languages and 14,815 in Indian languages were published.

### Justice and Crime.

The Presidencies of Madras, Bombay, and Bengal, and also the Province of Agra, the province of Bihar and Orissa, the province of the Punjab and the Province of Burma, have each a supreme high court, with 14, 10, 16, 12, 11, 14 and 11 judges, respectively, in 1931. There is appeal to the Privy Council in England. Oudh has a chief court. The Central Provinces and Berar, North-West Frontier Province, Coorg, Sind, and Chota Nagpur have judicial commissioners. For Assam the high court of Calcutta is the highest judicial authority. Below these courts are, for criminal cases, Courts of Session, and below these, Courts of Magistrates (first, second, and third class). The inferior civil courts are determined by special acts or regulations in each province. The most extensive system consists of the sessions judge acting as a 'District Judge' ; subordinate judges ; and below them 'Munsifs.' There are also numerous special courts to try small causes. Side by side with the civil courts there are revenue courts, presided over by officers charged with the duty of settling and collecting the land revenue. The number of civil suits instituted in 1929 was 2,435,323, and of persons under trial in criminal cases 2,398,549.

Nearly all the civil judges, and the great majority of the magistrates, in the courts of original jurisdiction are Indians ; in Bengal, Madras, and Bombay the proportion of Indians in the appellate court is considerable.

The civil police in 1929 were 198,610 in strength, varying from 4·2 per 10,000 of the population in Bihar and Orissa to 25·6 per 10,000 in the North-West Frontier Province.

<sup>1</sup> Since the introduction of the Reforms from April 1, 1921, definite sources of revenue are now allocated to Provincial Governments. Hence the accounts and estimates of the Government of India now embrace only the transactions of the Central Government. Provincial Governments used to pay annual contributions to the Central Government. The contributions in the first year were Rs. 983 lakhs. These were reduced to Rs. 608 lakhs in 1926-27. In 1927-28 there was a permanent remission of 350 lakhs, and a non-recurring remission of the balance Rs. 258 lakhs. There was complete and final remission of Provincial contributions from 1928-29.

<sup>1</sup> Exclusive of Portion of Land Revenue due to irrigation.

<sup>2</sup> The salt duty was raised in 1923, and reduced to previous level in 1924.

<sup>3</sup> The Excise revenue is derived from intoxicating liquors, hemp drugs, and opium consumed in the country. The bulk of the revenue comes from spirits. The excise systems and rates of duty vary from province to province.

<sup>4</sup> Liquors, oils, motor cars and cycles, sugar, tobacco, cotton manufactures, metals (including silver bullion, coin, etc.), manufactured articles and articles of food and drink are the chief items from which the customs revenue is derived. Under this head are also included the proceeds of export duties on rice, on jute (imposed in 1916), on tea (imposed in 1916, abolished in 1927), and on hides (imposed in 1919); and of excise duties on motor spirit (imposed in 1917), on silver (imposed in March, 1930), and on kerosene (imposed in 1922). The import of silver bullion and coin except under licence was prohibited in July, 1917, but the prohibition was withdrawn during 1920-21.

<sup>5</sup> Includes the proceeds of a super-tax imposed in 1917.

<sup>6</sup> The figures from 1925-26 to 1926-27 have been converted at the rate of Rs.10 to the £, and those from 1927-28 at the rate of Rs.13½ to the £.

<sup>7</sup> Includes the proceeds of an excess profits duty imposed in April, 1919.

<sup>8</sup> Estimates.

**Land Revenue.**—This is levied according to an assessment on estates or holdings. In the greater part of Bengal, and Bihar and Orissa, about one-fourth of Madras, and some districts of the United Provinces of Agra and Oudh, the assessment was fixed permanently at the end of the 18th century; while it is fixed periodically at intervals of from twelve to forty years over the rest of India. For details as to the nature of the different tenures of land that prevail in India see the YEAR-BOOK for 1886, p. 799. See also under AGRICULTURE.

## 128 THE BRITISH EMPIRE:—INDIA AND DEPENDENCIES

The land revenue was contributed in 1930-31 (revised estimate) as follows:—

Administrations	Rs.	Administrations	Rs.
India, General . . . . .	7,55,000	Punjab . . . . .	2,69,43,000
Baluchistan . . . . .	8,76,000	Burma . . . . .	4,24,000

United Provinces of Agra and Oudh . . . . .	6,47,99,000	Coorg . . . . .	8,45,000

*Opium.*—In British territory the cultivation of the poppy for the production of opium is practically confined to the United Provinces, and the area under cultivation in that Province is being gradually reduced. Opium is also grown in many of the Indian States of Central and Northern India. The question of suppressing poppy cultivation in these States has been investigated by a Committee, which started work in November, 1927. After giving careful consideration to the report submitted by the Committee, the Government of India have formulated a scheme which forms at present the basis of negotiations with the States. Public auctions at Calcutta were discontinued from April 1926. Export to China was prohibited in 1913; and in June 1926 the Government of India decided to reduce progressively exports of opium from India, except for strictly medical and scientific purposes, so as to extinguish them altogether at the end of 1935. The maximum for each country is fixed, and a reduction of 10 per cent. of the 1926 exports is made each year.

*Army Expenditure.*—The net expenditure in recent years on military services is given as follows:—

Year ended March 31	—	Year ended March 31	—
	Rs. Crores		Rs. Crores
1925	55.63	1929	55.10
1926	56.00	1930	55.10
1927	55.97	1981	54.80
1928	54.79	1982 (Estimates)	52.00

*Debt.*—On March 31, 1981, out of a total debt of 1,160.41 crores (sterling portion converted at 1s. 6d. = R. 1), 788.30 crores were productive in railways, telegraphs and irrigation; 193.91 crores were unproductive; 29.06 crores on account of cash, bullion and securities held on Treasury account; and 149.14 crores were incurred on behalf of Provincial Governments.

*Finance of Separate Governments, and Local Finance.*—The revenue and expenditure of each Government, Central and Provincial, in 1930-31 (revised estimates) were as follows:—

Government	Revenue	Expenditure
	Rs.	Rs.
India, Central . . . . .	1,23,48,61,000	1,86,12,03,000
Madras . . . . .	17,24,61,000	17,61,00,100
Bombay . . . . .	14,88,44,000	15,80,90,000

Burma . . . . .	10,70,93,000	11,83,99,000
Shan States Federation . . . . .	66,91,000	55,88,000
Bihar and Orissa . . . . .	5,42,51,000	6,13,57,000
Central Provinces . . . . .	4,99,73,000	5,21,62,000
Assam . . . . .	2,62,23,000	2,79,24,000
Coorg . . . . .	12,48,000	15,60,000

*Local Funds.*—The above excludes the revenue and expenditure of municipalities and of district and local boards. The income of the former is

derived mainly from rates, octroi, taxes on houses, lands, vehicles and animals, tolls, and assessed taxes; and of the latter from cesses on land. The gross income for 1928-29 of all municipalities was Rs.33,11,07,624. The gross expenditure was Rs.33,14,79,482. The income of district and local boards was Rs.15,98,21,655, and the expenditure Rs.16,39,29,861.

### Defence.

The defence forces of India consist of units of the Royal Air Force, units of the British Regular Army, the Indian Army, the Auxiliary and Territorial Forces, the Indian Army Reserve and the Indian State Forces. With the exception of the last, these forces are administered by the Air Vice-Marshal and the headquarters staff of the Army in India respectively, under the supreme control of the Commander-in-Chief, who is the Army-Member of the Viceroy's Executive Council. The military forces are organised into the Northern, Southern, Eastern and Western Commands, and the Burma Independent district; each Command contains a number of districts and independent brigades. The garrison of Aden was transferred in 1927 from the Indian to the Home Command.

The British regular forces in India are paid by the Indian exchequer. They are organised in brigades and divisions with the Indian Army, the normal proportion being 1 British battalion to 3 Indian. There are 19½ Indian Pack Batteries. The personnel of the remaining batteries of Horse, Field and Garrison Artillery is, wholly British except for a proportion of Indian drivers. The Tank Corps and Royal Air Force are wholly British.

The Auxiliary Force, organised under the Indian Auxiliary Force Act, 1920, is confined to persons of British extraction. Enrolment is voluntary, but entails periodical training extending to 64 hours annually for infantry and 80 hours for other arms. The force, which comprises all arms, is liable to be called out or embodied for local service within strictly defined limits, and acts as a second line to the permanent garrison of India. Its strength in 1931 was 30,200.

The Indian Territorial Force was brought into existence in 1920, and is organised on the lines of a militia, with an annual training of 28 days. It is intended to form a second line to the regular Indian Army in time of war, the whole of its personnel being liable to general service. Its strength in 1930 was 18 provincial, 4 urban, and 11 university training corps units. Strength, 15,400.

The Army in India Reserve has been recently constituted, in 2 classes: class A, of men who have completed from 5 to 7 years' army service with less than 15 years' combined service; class B, of men up to 15 years' combined service. Strength in 1931 was 36,000.

The Indian State Forces are raised and maintained by Indian States, and are trained under the supervision of British officers, who act in an advisory capacity. Strength, in 1931, about 50,000.

The composition of the forces in India was, in 1931, except for Indian State Forces, as follows:—

	Cavalry Regiments	R.H.A. Batteries	R.F.A. Batteries	Medium Batteries	Pack Batteries	S. & M. Field Troops	S. & M. Field Companies	Infantry Battalions	Pioneer Battalions	Armoured Car Companies
British	5	4	44	9	6	—	—	45	—	—

## AUXILIARY AND TERRITORIAL FORCES.

Auxiliary Force . . . . .	10	21	4	17	25	7	4	—
Territorial Force . . . . .	—	—	—	—	22	—	—	11

The strength of the British army in India in 1931 was 59,773, and of the Indian Army 168,660. The Field Army is organised in 4 divisions and 5 cavalry brigades.

The supply and transport services are provided by the Indian Army Service Corps. The medical services of the British troops are provided by the Royal Army Medical Corps, and those of the Indian Army by the Indian Medical Service.

There are units of the Indian Army serving in Iraq, Palestine, and Colonial stations. These are paid by the British exchequer.

The 7th Light Cavalry, the 16th Light Cavalry, the 2/1st Madras Pioneers, the 4/19th Hyderabad Regt., the 5th Royal Battrn. 5th Mahratta Light Infantry, the 1/7th Rajput Regt., the 1/14th Punjab Regt., and the 2/1st Punjab Regt. have been selected for Indianisation. Ten Indian gentlemen are now nominated annually to the Royal Military College, Sandhurst, to enable them to qualify for commissions in the Indian Army. The preliminary education is given at the Prince of Wales' Royal Indian Military College at Dehra Dun. Plans for the creation of an Indian Sandhurst are in preparation.

The Royal Air Force in India comprises 6 squadrons organised in 3 wings of 2 squadrons each; the Aircraft Depot and Aircraft Parks are directly under R.A.F. Headquarters, India. Its establishment is 260 officers and 1,912 British and 148 Indian other ranks. The military estimates for 1931-32 amounted to 52 crores of rupees.

The Government of India has decided to complete the reconstruction of the Royal Indian Marine in accordance with the recommendations of the Departmental Committee of 1925, but the force will not have the right to be called the Royal Indian Navy. It has now, however, become a combatant force serving under conditions similar to those originally proposed for the Royal Indian Navy. At present the seagoing units of the R.I.M. comprise the 4 sloops *Hindustan* (completed 1930), *Cornwallis*, *Clive* and *Lawrence*, 2 surveying vessels and 2 patrol vessels.

### Agriculture and Industry.

*Agriculture, Land Tenure, &c.*—The chief industry of India has always been agriculture. The total number of the population supported by agriculture, including forestry and raising of livestock, was, according to the census of 1921, a little more than 229 millions out of a total population of 318 millions. In most of the provinces there is a Department of Land Records, and in every province a Department of Agriculture. There are staffs of experts in the provinces; an Imperial staff of experts with a fully equipped central station, Research Institute and College for post graduate training of private students and of those who have completed the Agricultural Course in provincial colleges; a Civil Veterinary Department for the prevention and cure of cattle diseases; an Imperial Institute for veterinary

research for the preparation of sera and antitoxins, and an Imperial Institute of Animal Husbandry and Dairying. Following the recommendations made by the Royal Commission on Agriculture, an Imperial Council of Agricultural Research has been established by the Government of India with the object of promoting, guiding and co-ordinating agriculture and veterinary research throughout India. Improved varieties of crops have been introduced in over 12 million acres, the average increased value of the produce being over Rs. 14 crores.

In provinces where the *zamindari* tenure prevails (*i.e.*, where single proprietors or proprietary brotherhoods possess large estates of several hundreds or thousands of acres), the State land revenue is assessed at an aliquot part (usually about one half) of the ascertained or assumed rental. The revenue is payable on each estate as a whole, the assessment remaining unchanged for the period of settlement. In the greater part of Bengal, and Bihar and Orissa, and in parts of the United Provinces and Madras the settlement is a permanent one and not liable to revision. In provinces where the *raiyatwari* (or *ryotwari*) tenure prevails (*i.e.*, where each petty proprietor holds directly from the State, as a rule cultivates his own land, and has no landlord between himself and the Government), the revenue is separately assessed on each petty holding, and land revenue becomes payable at once (or after a short term of grace in the case of uncleared lands) on all extensions of cultivation. The *raiyatwari* proprietor may throw up his holding, or any portion of it, at the beginning of any year after reasonable notice, whereas the *zamindar* or large proprietor engages to pay the revenue assessed upon him throughout the term of the settlement.

The following table shows in 1927-28 the latest available returns of the land surveyed under the two types of tenure, and the land revenue assessed:—

<sup>2</sup> Subject to revision.

The net area actually sown in British India in 1929-30 was 228,160,535 acres.

Of the total area under irrigation in 1929-30, 26,727,540 acres were irrigated by canals; 6,298,155 acres by tanks; 12,702,146 acres by wells; and 5,282,285 acres by other sources. The average area irrigated by Government Works rose from 27,973,000 acres in 1925-28 to 30,687,000 acres in 1928-29. The net return on capital outlay was 5·4 per cent. in 1928-29.

*Livestock Census*, in British India (exclusive of Baluchistan), 1929-30: oxen, 122,985,000; buffaloes, 31,645,000; sheep, 25,540,000; goats, 35,943,000; horses and ponies, 1,701,000; mules, 75,000; donkeys, 1,380,000; camels, 526,000.

*Forests*.—The lands under the direct control of the State Forest Department are classified as 'Reserved Forests' (forests intended to be permanently maintained for the supply of timber, &c., or for the protection of water supply, &c.), 'Protected Forests,' and 'Unclassed' forest land. The following table shows the extent of these areas in 1929-30:—

## 134 THE BRITISH EMPIRE:—INDIA AND DEPENDENCIES

The net revenue from the State forests in 1928-29 was about Rs. 2,27,47,874.

*Industries.*—The most important indigenous industry, after agriculture, is the weaving of cotton cloths. Other important indigenous industries are silk rearing and weaving, shawl and carpet weaving, wood-carving and metal-working. One of the most important industries connected with agriculture is the tea industry, the average number of persons employed being about 930,500. The area under tea in 1929 was about 788,800 acres, distributed as follows: Assam, 429,600; Bengal, 195,300; Bihar and Orissa, 4,100; United Provinces, 6,000; Punjab, 9,700; Madras, 66,900; Coorg, 400; Tripura (Bengal), 7,900; Travancore, 65,400; Mysore, 3,200; and the Cochin State, 300. The production was, in 1929, 433 million lb. The exports of Indian tea from British India (including the State of Travancore) in 1930-31 were: to United Kingdom, 299,437,000 lb.; Canada, 10,176,000 lb.; United States, 9,899,000 lb.; Persia, 4,291,000 lb.; and to Australasia, 4,899,000 lb. The total exports were 359,784,000 lb. in 1928-29; 377,142,000 lb. in 1929-30; and 356,918,000 lb. in 1930-31.

Some statistics for 1929 of mills, factories, &c., subject to the Indian Factories Act, are given as follows for British India (*excluding* Indian States and Government factories).

The railways open on March 31, 1931, included 31,489 miles of Imperial State lines and 6,267 miles of Indian State lines. There were 579 miles of new railway lines opened in 1930-31.

The gauges of the Indian railways in 1930-31 were: (1) The Standard, or 5ft. 6in. (20,802 miles); (2) The Metre, or 3ft. 3½in. (17,440 miles); and (3) The Special gauges of 2ft. 6in. and 2ft. (4,039 miles).

The total capital at charge on Railways to the end of 1930-31, including lines under construction and survey, &c., was Rs. 8,698,066,000. From 1924-25 Railway Finance has been separated from the general finances of Government. The Delhi-Umballa-Kalka Railway was purchased by the State in April, 1926, and the Southern Punjab Railway on January 1, 1930.

Passengers carried in 1930-31, 575,826,500; aggregate tonnage of goods and live stock, 110,643,000; gross earnings on railways, Rs. 106.57 crores; working expenses, Rs. 76.49 crores; net earnings, Rs. 30.08 crores; average return on the capital at charge 4.70 per cent. The net loss to the State, after meeting all charges for interest, &c., was Rs. 4.18 crores approximately. The railway staff at the close of 1930-31 numbered 4,799 Europeans and 776,331 Indians; total, 781,130.

India and Ceylon are connected by rail and steamer ferry combined, the steamers plying between Dhanushkodi Point on Rameswaram Island and Talaimannar in Ceylon.

## II. POSTS, TELEGRAPHS, AND TELEPHONES.

On March 31, 1931, there were 24,175 post-offices and 63,503 letter-boxes

In the year 1930-31, the number of letters, post-cards, and money-orders passing through the post-offices was 1,124,067,000; of newspapers 84,192,000; of parcels 16,564,000; and of packets 114,020,000; being a total of 1,338,843,000.

There were 13,444 telegraph offices in India on March 31, 1931. Statistics of the Government telegraphs for 1930-31 :—Miles of wire, 573,452; miles of line, 106,544; receipts, Rs. 2.46 crores; charges, Rs. 2.55 crores; paid messages, 18,115,379.

The number of wireless stations maintained and worked by the Indian Posts and Telegraphs Department was 27 on March 31, 1931, of which six were coast stations available for general public correspondence with ships at sea, and the remainder were inland stations. Five of these stations provided regular communication with aeroplanes in connection with Air Services. Two of the coast stations and four others were equipped with direction-finding installations.

The telephone system is in the hands of the Indian Posts and Telegraph Department, but telephone exchanges have been established in Calcutta, Madras, Bombay, Ahmedabad, Karachi, Rangoon, and Moulmein, by private companies, under licences from the Government. On March 31, 1931, there were 24 telephone exchanges, with 34,919 connections, established by the licensed companies, and 296 exchanges with 21,975 connections established by the Department.

## Money and Credit.

The value of money coined at the Calcutta and Bombay Mints in five years was as follows :—

Year ended March 31	Silver	Nickel	Copper	Bronze	Total
	Rs.	Rs.	Rs.	Rs.	Rs.
1927	50,49,435	28,92,326	—	7,21,909	86,63,670

A branch of the Royal Mint was established at Bombay at the end of 1917, but since April, 1919, the Branch Mint has been closed.

In August, 1926, the Royal Commission on Indian Currency and Finance submitted their report, including the recommendation of the stabilisation of

the rupee at a rate corresponding to an exchange rate of 1s. 6d. (gold). In March 1927, the Indian Currency Act made this stabilization statutory.

Since 1900, rupees have been coined as required to meet public demands. The entire profit accruing to Government on the coinage up to March 31, 1907, and during the year 1912-13, and half such profit for the years 1907-08 and 1908-09 were placed to the credit of a separate fund termed the Gold Standard Reserve, with the object of ensuring the stability of the currency policy of Government. The net profits arising from rupee coinage as well as from the investment of the Reserve were credited to the Reserve up to 1922-23 when it reached the limit of 40,000,000*l.*, at which figure the Reserve is being maintained at present. There has been no coinage from purchased silver since 1921-22; therefore no profit accrued from this source since that year.

Notes of the values of one, two-and-a-half, five, ten, fifty, hundred, five hundred, and thousand rupees are legal tender throughout British India. The total value of notes in circulation on March 31, 1931, including the notes held in Government treasuries and the Head Offices of the Imperial Bank of India, was Rs. 160,84,35,732.

*Banks.*—The following table shows the 'Capital,' 'Reserve,' 'Public and other Deposits,' at the Imperial Bank of India on Dec. 31 of three years :—

## BRITISH PROVINCES.

Information concerning the Provinces in British India is given below, in alphabetical order.

## AJMER-MERWARA.

An agency subordinate to the factory at Surat was established at Ajmer early in the 17th century. The British received the tract by cession after the Pindari War in 1818. This small province of Ajmer-Merwara consists of one district with three sub-divisions, Ajmer, Kekri, and Merwara, with an area of 2,711 sq. miles and a population of 560,576 (provisional figures of the 1931 census). The administration is under a Chief Commissioner, who in the capacity of Agent to the Governor-General in Rajputana resides at Mount Abu. The local administration is under a Commissioner. The city of Ajmer has a population of 119,305. The income of the province was Rs. 18·6 lakhs in 1928-29, and the expenditure Rs. 32·05 lakhs. In 1929 there were 13,186 scholars in 203 recognised educational institutions for males; and 2,472 in 38 similar institutions for females. The Government College at Ajmer had 168 students in 1929.

*Chief Commissioner.*—The Hon. Sir Leonard W. Reynolds, K.C.I.E., C.S.I., M.C., I.C.S. (appointed March 14, 1927); salary, Rs. 48,000 per year.

## ANDAMAN AND NICOBAR ISLANDS.

The **Andaman Islands** lie in the Bay of Bengal, 120 miles from Cape Negrais in Burma, the nearest point on the mainland. Five large islands closely grouped together are called the Great Andaman, and to the south is the island of Little Andaman. There are some 200 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. The total area is 2,508 square miles. The Great Andaman group is about 219 miles long and, at the widest, 32 miles broad. The group, densely wooded, contains many valuable trees, the best known of which is the *padouk* or Andaman red-wood. The islands possess a number of harbours and safe anchorages, notably Port Blair, Port Cornwallis, and Bonington, the last being most favourably situated for forest trade. The aborigines, 786 (414 males and 372 females) in 1921, live in small groups over the islands; some are savages of a low Negrito type. The total population of the Andaman Islands in 1921 was 17,814 (15,551 males and 2,263 females). In 1929-30 the forest receipts amounted to Rs. 23,67,076. The coconut, rubber, Manila hemp, and Bahamas aloe are successfully cultivated. In 1930 there were 10,864 head of cattle and 4,005 goats. There is wireless telegraphy with Burma. A mail steamer connects Port Blair with Calcutta, Rangoon, and Madras. The islands have been used since 1858 by the Government of India as a penal settlement for life and long-term convicts, but the practice is being discontinued, the island being left to develop on free lines. The settlement possesses about 72,363 acres of cleared land. There were, in 1929, 6,985 convicts (including 183 women) in the place, of whom 6,688 (including 179 women) were on ticket-of-leave in the settlement supporting themselves. The Andaman Islands are under the Government of India, and the Officer in Charge is the Chief Commissioner. The Civil, Military and convict population of Port Blair in 1929 was 15,962.

The **Nicobar Islands** are situated to the South of the Andamans, 75 miles from Little Andaman. The British formally took possession in 1869. There are twenty-one islands, nine uninhabited; total area, 635 square miles. The islands are usually divided into three groups, Southern, Central, and Northern, the chief islands in each being respectively, Great Nicobar, Camorta with Nankauri, and Car Nicobar. There is a fine land-locked harbour between the islands of Camorta and Nankauri, known as Nankauri Harbour. The Nicobarese inhabitants numbered 9,272 (5,242 males and 4,030 females) in 1921. The islanders are known to have pursued the coconut trade for at least 1,500 years. The coconut production is estimated at 15 million nuts per annum, of which some 8 million are sold by barter and exported in small native craft and Chinese junks in the form of copra. The Government is represented by a permanent Assistant Commissioner at Car Nicobar and a Tahsildar at Nankauri. The islands are attached to the Chief Commissionership of the Andamans and Nicobars.

*Chief Commissioner at Port Blair.*—G. Worsley, Esq., O.B.E., I.C.S.: salary, Rs. 36,000 per year.

## ASSAM.

**Constitution and Government.**—Assam first became a British Protectorate at the close of the first Burmese War in 1826. In 1832 Cachar was annexed: in 1835 the Jaintia Hills were included in the East India Company's dominions, and in 1839 Upper Assam was annexed to Bengal. In 1874 Assam was detached from the Administration of the Lieut.-Governor of Bengal, and made a separate Chief Commissionership. On the partition of Bengal in 1905, it was united to the Eastern Districts of Bengal under a Lieut.-Governor. From 1912 the Chief Commissionership of Assam was revived; and from 1921 a Governorship was created. There are two Members (one an Indian) of the Governor's Executive Council for 'reserved' subjects, and two Indian Ministers for the 'transferred' subjects. The Legislative Council consists of 53 Members, 39 elected, and 14 nominated and *ex-officio* (not more than 7 may be officials). For the purposes of administration there are two Commissionerships with 12 Districts and 2 frontier tracts. There are 19 Local Boards; and there are 17 Municipalities and 8 Town Committees. The territories comprising the hill districts (except the Shillong municipality and cantonment in the Khasi and Jaintia Hills district), the frontier tracts, the Mikir Hills (in Nowgong and Sibsagar), and the North Cachar Hills (in Cachar), are declared 'backward tracts.'

*Governor.*—H. E. Sir Michael Keane, K.C.S.I., C.I.E., I.C.S.; appointed November 1931; salary Rs. 66,000 per year.

**Area, Population and Religion.**—The plains districts, the hill districts and the administered portions of the frontier tracts, exclusive of the State of Manipur and the Khasi States, which are not British territory, cover an area of 55,114 square miles, with a population of 8,622,251 in British territory. Of these, 57 per cent. are Hindus, 32 per cent. are Muslims, and 8 per cent. follow tribal religions. The capital is Shillong. Manipur State with an area of 8,620 square miles and a population of

445,606, and the Khasi States, consisting of 25 chieftainships of various degrees of importance, with an area of 3,600 square miles and a population of 180,000, are under the political control of the Assam government.

**Instruction.**—There were two Art Colleges, affiliated to the Calcutta University, with 1,189 students in 1929–30; also the Farle Law College, at Gahuati, founded in 1914, with 76 students on its roll. The number of secondary schools for boys was 387 with 59,364 pupils: primary schools for boys numbered 5,153, with 245,448 pupils. The number of girls at school was 56,566. There were 3,312 pupils in 103 Tea Garden schools of 'A' and 'B' classes.

**Justice and Crime.**—The Province (Manipur State and the hill and frontier areas excepted) is under the jurisdiction of the High Court of Calcutta. For criminal work there were, in 1929, 2 Sessions Judges and 97 other Officers. In 1929, 29,148 criminal cases were brought to trial, and 44,034 civil suits were instituted. The Assam Rifles, with 5 Battalions—formerly known as the Military Police—supply garrisons for the frontier. There is a civil Police Force of 4,328 under an Inspector-General.

**Finance.**—The gross revenue for 1929–30 was 277 lakhs of rupees, to which Land Revenue contributed 121 lakhs, Excise 66 lakhs, Forests 85 lakhs, and Stamps 20 lakhs. The total expenditure in 1929–30 was 333 lakhs. General Administration cost 29 lakhs, Education 33 lakhs, Police 29 lakhs, Land Revenue Administration 21 lakhs, and Forests 23 lakhs. The contribution formerly paid by the Local Government was completely remitted by the Central Government during 1928–29.

**Production and Industry.**—The cultivation and manufacture of tea is the principal industry in Assam. Agriculture employs nearly 89 per cent. of the population. Silk-weaving and Cotton-weaving are the most important of the Home Industries. At the end of 1929 there were 993 Tea Gardens with 429,605 acres under tea. The area of tea plucked in 1929 was 398,992 acres; the total out-turn was 258 million lbs., and the daily average number of persons employed was 557,484. All-India statistics regarding the tea industry are given on p. 132. In 1929–30 there were 6,147 sq. miles of reserved forests. In 1930, 46,810,567 gallons of crude oil were extracted from the oil fields of the province.

**Commerce and Communications.**—In 1929–30 there were 757·87 miles of metalled roads, 7,371 miles of unmetalled roads, and 2,189·3 miles of bridle roads. The open mileage of railways was 1,264 miles.

## BALUCHISTAN.

**Government.**—After the Afghán War, 1878–81, the districts of Pishin, Shorárúd, Duki, Sibi, and Sháhrig were assigned to the British and in November, 1887, were formally constituted as British Balúchistán. In 1883, the districts of Quetta and Bolán were made over by the Khán to the British on an annual quit-rent of Rs. 25,000 and Rs. 30,000 respectively. In 1886, the Bori valley, in which is now the cantonment of Loralai, was occupied. In 1887, the Khetrán country, now known as the Bárkhán tahsil, was

brought under British control ; in 1889 British authority was established in the Zhob valley and Kákar Khurásán ; in 1896 Chágai and Western Sinjáni were included in administered territory ; in 1899, the Nuskhi Niabat was made over by the Khán of Kalát on an annual quit-rent of Rs. 9,000 ; and in 1903 the Nasirábád tahsil was acquired from the Khán on an annual quit-rent of Rs. 117,500. The area of British and administered territory, including tribal areas, is 54,228 sq. miles, and the population (1931) 463,508. The chief town is Quetta, with a population (1931) of 60,272 (town proper 34,881, and cantonment 25,391). It is the only municipality. The head of the civil administration is the Agent to the Governor-General and Chief Commissioner in Balúchistán. The area under his direct administration is divided as follows : Quetta-Pishín, Sibi, Zhob, Loralai, Chágai districts and Bolán Sub-division. The revenue administration of the Province is entrusted to an officer who is styled the Revenue and Judicial Commissioner.

Regular troops are cantoned at Quetta, Chaman, Fort Sandeman, and Loralai, and detachments are stationed at different places, principally in the Zhob and Loralai Districts, for the preservation of law and order. There is also a police force, supplemented by levies. The Indian Staff College was opened in Quetta in 1907.

*Agent to the Governor-General and Chief Commissioner in Balúchistán.*—Hon. Mr. A. N. L. Cater, C.I.E., I.C.S. : salary, Rs. 48,000 per year.

**Area and Population.**—Area, 134,638 square miles ; population (1931 census), 868,617. The main divisions are : (1) British Balúchistán proper, with an area of about 9,096 square miles, consisting of tracts assigned to the British Government by treaty in 1879 ; (2) Agency Territories, with an area of about 45,132 square miles, composed of tracts which have from time to time been acquired by lease, or otherwise brought under control, and placed directly under British officers ; and (3) the States of Kalát and Las Bela, with an area of about 80,410 sq. miles, the former consisting of a confederation of tribes under the Khán of Kalát, and stretching westwards to Persia, while the latter occupies the alluvial valley between the Pab and Hálá ranges from the sea to Bela.

**Religion and Education.**—The religion of the population is either Musalman, in general of the Sunni sect, or Hindu. The Musalmans numbered (1931 census) 799,194 ; Hindus, 52,580 ; Christians, 8,059 ; Sikhs, 8,425 ; others, 359. At the close of 1929–30 there were 107 public schools and 210 private schools, of which 8 and 2 respectively are girls' schools. There are also 2 European schools for boys and girls. Of the 9,915 pupils 1,762 were girls.

**Justice.**—Almost all cases in which local men are concerned are referred to 'councils of elders' (locally called *jirga*) for settlement along the well-tried lines of the ancient customary and tribal law.

**Finance.**—In the directly administered territory the chief items of revenue are : Taxes on income, land revenue, excise and stamps. In some places the land revenue is levied in money in accordance with a fixed assessment, but generally it is levied in kind. The revenue from all sources in 1930–31 was Rs. 21·80 lakhs ; and the expenditure Rs. 109·82 lakhs.

**Production and Industry.**—The country consists largely of barren mountains, deserts and stony plains ; its climate is subject to the extremes of heat and cold, and the rainfall is uncertain and scanty. The agricultural products are wheat, barley, millet, lucerne, rice, maize, and potatoes ; while

grapes, apricots, peaches, apples, and melons are grown in abundance. Panjgur in Mekran is famous for its dates.

**Commerce and Communications.**—Registration of trade was discontinued from April, 1925. There are 809 miles of motor-roads (continuously maintained), 1,549 miles of motor tracks (put in order as required), and 163 miles of pack-tracks (cleared when required), and 846 miles of broad gauge and 174 miles of narrow gauge railway.

The North-Western railway, gauge 5ft. 6in., enters Balúchistán near Jhatpat and crosses the Kachhi plain to Sibi, where it bifurcates, one branch going by Harnai and the other by Quetta, and reunites at Bostán, whence the line runs to Chaman. There is a line of railway to Nushki 82½ miles long, and an extension from Nushki up to Duzdap on the Persian border, and also a short narrow gauge line from Khanai to Fort Sandeman, a distance of about 174 miles.

There is a complete and frequent postal service in British and administered territory, extending to Kalát and through Duzdap to Seistan and Meshed.

A network of telegraph wires covers the north-eastern portion of the Province and extends to Kalát, and westwards *via* Nushki to Killá Robát, where it connects with the Indo-European system, while a further line connects India with Persia and Europe, *via* Las Bela, Panjgur, and Nok Kundi.

## BENGAL PRESIDENCY.

**Constitution and Government.**—The British first came to the shores of Bengal in 1633, when the first factories were established. A new centre of trade was fixed by Job Charnock at Calcutta in 1690. In 1699 Bengal was constituted a separate Presidency, and there were Presidents and Governors of Fort William from 1700 to 1774, the last being Warren Hastings. There were Governors-General of Fort William from 1774 to 1834. In 1834 the Bengal Presidency was divided into two Presidencies, 'Agra' and 'Fort William in Bengal.' In 1854 the Government of Bengal was entrusted to a Lieutenant-Governor, the offices of Governor-General of India and Governor of Bengal having previously been united in one person. In 1874 the Bengal Province was reduced to Bengal proper, Bihar and Orissa. In 1905 a portion of Bengal proper together with Assam went to form a new Province, Eastern Bengal and Assam. In 1910 the Government of the remainder of Bengal with Bihar and Orissa was constituted into a Lieutenant-Governorship with an Executive Council consisting of three Members. A new Presidency of Bengal, reuniting all the Bengali-speaking districts, was established in 1912 under a Governor in Council (three Members). Finally, from 1921, in accordance with the Government of India Act of 1919, the administration consisted of the Governor with four Executive Councillors (two being Indians) for the 'reserved' subjects and of the Governor with three Indian Ministers for the 'transferred' subjects. The hot weather capital is Darjeeling. There is a Legislative Council of 140 Members consisting of 114 elected and 26 nominated and *ex-officio* Members (not more than 20 may be officials). For administrative purposes there are five divisions, under which there are 27 districts, exclusive of Calcutta. For the purposes of Local Self-Government there are 26 District Boards, all except two with non-official Chairmen; 82

Local Boards; and 2,217 smaller units called Union Boards. There are 115 Municipalities. The Calcutta Corporation was reconstituted by an Act of 1923 with a Mayor, Chief Executive Officer and other officials, all of whom are to be elected by the Corporation; there are 85 Councillors and 5 Aldermen.

*Governor.*—H.E. The Rt. Hon. Sir John Anderson, G.C.B.: appointed November, 1931: salary Rs. 120,000 per year.

**Area, Population and Religion.**—Bengal in its present form, as reconstituted in 1912, covers 82,277 square miles, of which 76,843 square miles are British territory. The population (1921) is 46·6 millions in British territory and 896,926 in two Indian States. Calcutta with its suburbs accounts for 1,132,246; the urban population of the remainder of the Province is only 4 per cent. of the whole. Howrah has a population of 195,301; and Dacca of 119,450. Mohammedans constitute 53·5 per cent., and Hindus 43·7 per cent. Of the 149,075 Christians, 22,730 were Europeans. Bengali is the mother tongue of 92 per cent. of the total population, though altogether 80 different languages are found spoken in Bengal.

**Education.**—Recognised Educational Institutions in 1926–27 numbered 58,833, and unrecognised 1,610. The number of pupils in all classes of Institutions was 2,343,380. The Calcutta University is both an affiliating and a teaching University, dating from 1857. Dacca University is a teaching University, founded in 1921. Art Colleges for males number 41 with 22,131 students; of these 9 were maintained by Government. There were 2,675 secondary schools for Indian boys. The primary schools for boys numbered 38,187. Of the total number of pupils in primary schools 53·3 per cent. were Muhammedans and 45·9 per cent. were Hindus. There were 98 Institutions for the training of teachers. There were 731 students in Engineering in 2 Institutions. There were 14,748 Institutions of all kinds for Indian girls. For children of Europeans and Anglo-Indians there were 62 Institutions.

**Justice and Crime.**—The High Court consists of a Chief Justice and 16 Judges. For Criminal and Civil justice there were in 1927 42 District and Sessions Judges (including Additional Judges). For Criminal justice there were 411 stipendiary and 635 honorary Magistrates, and for Civil justice 44 Subordinate Judges and 235 Munsifs (Civil Judges of the first instance). There were 295,039 criminal cases brought to trial in 1927; and outside Calcutta 588,164 civil suits were instituted. The Bengal Police has a strength of 24,325 under an Inspector-General. The Calcutta force is a separate force under a Commissioner of Police who is directly under Government.

**Finance.**—The Revenue (revised estimates) collected in 1927–28 was 1,077 lakhs of rupees. To this sum Stamps furnished the largest contribution, nearly 350 lakhs; next, Land Revenue, 315 lakhs, and then Excise, 224 lakhs. Registration fees gave 40 lakhs and Bengal Forests 34 lakhs. On the expenditure side the total was 1,103 lakhs. Police cost 188 lakhs, Education 138 lakhs, General Administration 119 lakhs, and Medical Department 55 lakhs. The administration of Justice cost 108 lakhs. Forests gave a surplus of income over expenditure of 17 lakhs. As a special measure, the annual contribution of 63 lakhs to the Central Government has been remitted for six years from 1922–23.

**Production and Industry.**—During the close of 1926 there were 1,234 registered factories of all kinds. There were 85 jute mills and a daily

average of 325,190 operatives. Cotton mills numbered 12 with 12,781 operatives. The Coal Mining Industry in Bengal had in 1926-27 209 mines, employing 43,506 operatives with an output of 5,137,688 tons. Seventy-seven per cent. of the population depend on agriculture.

**Commerce and Communications.**—The foreign trade of Bengal in 1927-28 amounted to 89 crores of rupees of Imports and 148 crores of Exports. Cotton goods accounted for 34·06 per cent. of the Imports. Of the Exports, jute manufactures and raw jute accounted for 62·2 per cent. The United Kingdom sent 55·9 per cent. of the Imports, and received 21·6 per cent. of the Exports.

In 1926-27 the length of metalled roads was 3,434 miles and of unmetalled roads 34,261 miles. Bengal possesses no less than 1,876 miles of navigable canals. The length of railways within the province on March 31, 1927, was 3,288 miles.

## BIHAR AND ORISSA.

**Constitution and Government.**—The Province, containing the three different ethnic areas, Bihar, Chota Nagpur and Orissa, was taken from the old Province of Bengal and constituted under a Lieut.-Governor in Council in 1912. After the Reforms Act of 1919, the administration was changed into a Governorship. For the 'reserved' subjects there is an Executive Council with two Members (one an Indian), and for the 'transferred' subjects two Indian Ministers. There is a Legislative Council of 103 Members, 76 elected and 27 nominated and *ex-officio* (of whom no more than 18 may be officials). For the purposes of administration there are 5 divisions, covering 21 districts.

**Governor.**—H.E. Sir James David Sifton, K.C.I.E., C.S.I., I.C.S., appointed November, 1931; salary Rs. 8,333.5.7 per month.

**Area, Population and Religion.**—The British territories cover 83,161 square miles, with a population (1921) of 34 millions. The Feudatory States of Orissa and Chota Nagpur attached to the Province of Bihar and Orissa have an area of 28,664 square miles and a population of 7,643,436. The three principal towns are Patna, the capital (119,976), Bhagalpur (68,873), and Gaya (67,562). The hot weather seat of the Government is at Ranchi. Hindus form the great majority of the population.

**Education.**—At the census of 1921 the proportion of literates was only 4·7 per cent. as compared with 7·5 for the rest of India. The percentage of Indian boys attending school reached 5·8 in 1929-30. The University of Patna constituted in 1917 is an affiliating University. A Board of Secondary Education was constituted in 1922. In 1929-30 there were 3,763 students in Arts and Science Colleges. There were 132,917 pupils in 856 secondary schools, and 902,545 pupils in 28,672 primary schools. There is a College for Engineering at Patna (Bihar) and a School at Cuttack (Orissa); also the Tirhut Technical Institute and the Ranchi Technical School.

**Justice and Crime.**—There is a High Court (constituted in 1916) at Patna with a Chief Justice and 8 Judges. On the Criminal side there are Sessions Judges, Stipendiary and Honorary Magistrates. For the administration of Civil Justice there are District Judges, Subordinate Judges, and Munsiffs (Courts of first instance). The Police Force is under an Inspector-General; there is one policeman to 2,367 of the population and to 5·8 square miles of the area of the Province, the combined proportion being less than in any other Province of India.

**Finance.**—The revenue (revised estimates) for the Bihar and Orissa Province in 1930–31 was Rs. 543 lakhs, including Rs. 150 lakhs from Excise, Rs. 183 lakhs from Land Revenue, Rs. 110 lakhs from Stamps, and nearly Rs. 9 lakhs from the Forest Department. The expenditure was Rs. 614 lakhs. The chief items were: Police Rs. 88 lakhs, Education Rs. 93 lakhs, and General Administration Rs. 76 lakhs. No contribution is required for the Central Government.

**Production and Industry.**—The Province is principally agricultural; 814 persons per mille depend on agriculture for their livelihood, and 963 per mille live in villages. The principal crop, rice, covers nearly half the cropped area; then come sugar-cane and maize. The area under indigo in Bihar was 4,800 acres in 1930. The principal coal area is in the Manbhum and Hazaribagh districts of Chota Nagpur. The total output was a little above 15 million tons out of 22·3 millions for the whole of India in 1929. The districts of Hazaribagh, Monghyr and Gaya form the most important source of mica in the world. In Singbhum are the Tata Iron and Steel Works at Jamshedpur, with a pay-roll of 30,000 employees, and an additional 16,000 engaged in collieries, mines and quarries. The reserved forests cover an area of 1,799 square miles. In 1930 there were 9,404 Co-operative Societies with a working capital of Rs. 5,88,89,304.

**Commerce and Communications.**—There was in 1924–25 a trans-frontier trade of 526 lakhs with Nepal, and a small maritime trade in Orissa. The total mileage in 1929–30 of metalled roads was 4,035 and of unmetalled roads 27,065. There are also 501 miles of navigable canals in Bihar and Orissa. The East Indian, Bengal and North-Western, Bengal Nagpur and Eastern Bengal Railways traverse the province. There are also 4 light railways with 149 miles.

## BOMBAY PRESIDENCY.

**Constitutional Government.**—The English obtained a factory at Surat in 1616. Bombay was acquired by the Portuguese in 1530, and given in 1661 to Charles II as part of the dowry of Catherine of Braganza. In 1668 the king granted the Island of Bombay to the East India Company for the small annual rent of £10; it was placed under the President of the factory at Surat. The headquarters of the Bombay Governor were transferred from Surat to Bombay in 1708. The early summer seat of Government is at Poona; for the hottest months the Governor resides at Mahableswar. The adminis-

tration is in the hands of the Governor and an Executive Council of four (of whom two are Indians) for the 'reserved' subjects, and of the Governor with three Indian Ministers (the Minister of Local Self-Government, the Minister of Education and the Minister of Agriculture) for the 'transferred' subjects. The Legislative Council consists of 114 Members, including the 4 Members of Council. There are 86 elected Members and 28 nominated and *ex-officio* Members, of whom not more than 16 may be officials; but the present (1931) number is 15 only. There are, in addition to Bombay City, 5 administrative Divisions—Northern, Central and Southern, Bombay Suburban, and Sind—under which are 27 Districts. In 1929–30 there were 154 Municipalities, 27 District Local Boards, and 222 Taluka Boards. The Commissioner in Sind has considerable independent powers. His headquarters is at Karachi.

*Governor.*—H.E. the Rt. Hon. Sir Frederick Sykes, P.C., G.C.I.E., G.B.E., K.C.B., C.M.G., appointed June 27, 1928. Salary Rs. 1,20,000 per year.

**Area, Population and Religion.**—The British Districts cover an area of 123,621 sq. miles; population (1931), nearly 21 millions, mainly Hindus. The Indian States in relation with the Bombay Presidency cover 28,562 sq. miles and have a population of 4 millions (p. 165). The Western India States (p. 171) are in relation with the Government of India. In Sind, the Mohammedans are in the majority. Parsis are only 0·43 per cent. of the population in British territory. The density varies from 71 per sq. mile in Sind to 48,996 in Bombay City. The chief languages are Sindi, Gujarati, Marathi, and in the South Kanarese. The principal towns are Bombay (1,157,851), Ahmedabad (274,007), Poona (163,100), Karachi (260,639), and Sholapur (135,632).

**Education.**—The Bombay University founded in 1857 is an affiliating University. Under the University are 18 Arts Colleges and 11 Professional Colleges, for Engineering, Medicine, Agriculture, Commerce, and Law. In 1929–30 the number of students in the Arts Colleges was 7,952, and in the Professional Colleges 2,814. Recognised and unrecognised Educational Institutions numbered, in 1929–30, 17,132 with 1,262,244 scholars. Secondary schools numbered 620 with 119,165 pupils, and primary schools 14,819 with 1,050,104 pupils. To the total expenditure on education Government contributed 52·0 per cent., local authorities 17·1 per cent., and fees 18·6 per cent.

**Justice and Crime.**—The High Court of Bombay has a Chief Justice and 9 Judges. In Sind there is the Court of the Judicial Commissioner. Criminal justice is administered by the High Court, the Sessions Judges and 991 Magistrates. The number of persons tried was 131,847 in the year 1929. The Stipendiary Police Force of 18,201 men is under an Inspector-General; but Bombay City is under the control of a Commissioner of Police who commands a force of 4,175 men. Outside of Bombay City the incidence of the Police Force is one to every 817 inhabitants.

**Finance.**—The estimated revenue of the Government of Bombay for 1930–32 is Rs. 1,589 lakhs, the chief contributions being Rs. 505 lakhs from Land Revenue, Rs. 312 lakhs from Excise, Rs. 157 lakhs from Stamps, and Rs. 71 lakhs from Forests. The estimated expenditure for 1931–32 is Rs. 1,582 lakhs. General Administration was estimated to cost Rs. 226 lakhs, Education Rs. 194 lakhs, and Police Rs. 224 lakhs. The contribution of the Bombay Government to the Central Government has now been

remitted. Under the head of Capital Expenditure Rs. 404 lakhs have been provided for the construction of Irrigation Works.

**Production and Industry.**—Sixty-four per cent. of the population are dependent on agriculture. The textile trade is dominant in production. The number of looms in 1930 in Bombay Island was 76,697, and in the rest of the Bombay Presidency 59,111. The number of factories of all kinds was 1,785 in 1930, and the number of operatives in all industries was 370,704, including 77,965 women and 4,389 children. There is a steady decline in the number of child operatives. There are 15,000 sq. miles of reserved forests.

**Irrigation.**—There are two spheres, the Deccan and Gujarat, and the Sind. The Lloyd Barrage at Sukkur is intended to supply the defect due to the low natural level of the Indus. This scheme provides for the irrigation of 500,000 more acres than the total cultivated area of Egypt; and the estimated cost is over £12,000,000. In Sind 3,574,500 acres were irrigated in 1929–30, and in the Deccan and Gujarat 246,036.

**Commerce and Communications.**—In 1929–30 Bombay had 9,466 miles of metalled roads and 17,879 miles of unmetalled roads. In 1929–30 the total length of railway open in the Bombay Presidency was 5,736 miles.

In January, 1928, the electrification of the suburban services to the North of Bombay was inaugurated, and is now extended to Poona.

The total foreign trade in 1929–30 was Rs. 177 crores, and the total coasting trade Rs. 62½ crores. Bombay had Rs. 101½ crores of Imports and Rs. 75½ crores of Exports; Karachi had Rs. 29 crores of Imports and Rs. 25 crores of Exports in 1929–30. India cotton to the extent of 476,645 tons left Bombay for abroad.

## BURMA.

**Constitution and Government.**—As far back as 1612 the East India Company had agents and factories at Syriam (near Rangoon), Prome and Ava. From 1796 there was a Resident at Rangoon. The first Burma War gave in 1826 Arakan and Tenasserim to the British; in 1852 Pegu was annexed by Lord Dalhousie; in 1862 the Provinces in Burma were amalgamated under a Chief Commissioner; and in 1886 Upper Burma was annexed. In 1897 the charge was changed to a Lieut.-Governorship. From 1923 the Province has been constituted a Governor's Province under the Government of India Act of 1919. In the hot weather season the Government moves from Rangoon to Maymyo. The Governor and two Members of the Executive Council (one a Burman) are in charge of the 'reserved' subjects, and the Governor and two non-official Ministers are in charge of the 'transferred' subjects. There are seven administrative Divisions, exclusive of the Shan States (four Lower Burma, three Upper Burma) under Commissioners, and under these again 88 Deputy Commissioners of Districts. The Northern and Southern Shan States, which form part of British India, are administered by their Chiefs

under the supervision of the Commissioner of the Federated Shan States. These groups were federated in 1922; and since 1923 there has been a Council of Chiefs. The Legislative Council of Burma consists of 103 Members, of whom 80 are elected and 23 nominated and *ex-officio*. No more than 14 may be officials.

*Governor*.—H.E. Sir Charles Alexander Innes, K.C.S.I., C.I.E., I.C.S.; appointed 1927: salary, Rs. 1,00,000 per year.

**Area, Population and Religion.**—The area of the Province is 262,732 sq. miles. Burma proper, inclusive of the Chin Hills and Kachin Hill Tracts, covers 184,102 sq. miles. The Shan States cover 62,305 sq. miles; and there are 16,325 sq. miles of unadministered territory. The total population (1931) was 14,667,146. The leading towns are Rangoon, the capital (400,415), and Mandalay (147,932). The proportion of religions per 1,000 in 1931 was: Buddhists, 843; Animists, 52; Hindus, 39; Mohammedans, 40; Christians, 23; and others, 3. The Burmans belong to the Tibetan group. Cultivation of various kinds supported 9,158,932.

**Education.**—The number of pupils in the 7,567 recognised colleges and schools was 545,401 in 1930–31; and 192,866 in the unrecognised institutions. Burma is the most literate Province in the Indian Empire; far ahead of India in primary education. Higher education is controlled by the University, Anglo-Vernacular and English schools by Government, and Vernacular education by Local Bodies. In almost every village there is a Buddhist monastery, where the three R's are taught. There were in 1930–31, 302,199 pupils in upper and lower primary schools, and 221,496 pupils attending 1,464 secondary schools of all kinds. The teaching University of Rangoon was constituted in 1920, with two Arts Colleges; and there is an Intermediate College at Mandalay. There have since been constituted a Medical College and a Teachers Training College as constituent colleges of the Rangoon University. There is also a Forest School at Pyawmana, an Agricultural College and Research Institute at Mandalay, and a Technical Institute and a Veterinary School at Insein (near Rangoon).

**Justice and Crime.**—There is a High Court at Rangoon (constituted 1922) for the control of the administration of Civil and Criminal Justice; there are a Chief Justice and 11 Judges. Besides Sessions Judges there were 602 Stipendiary Magistrates in 1928–29: 139,752 criminal cases were brought to trial in 1929. The number of civil suits instituted was 69,440 in 1929. There is a Civil Police Force of 13,725 officers and men under an Inspector-General; a Rangoon Town Force of 1,515 under a Commissioner of Police; and—the special feature of Burma—several battalions of Military Police, the strength of which is 10,600 men.

**Finance.**—The revenue receipts (revised estimates) of 1930–31 were Rs. 1,011 lakhs, to which Land Revenue contributed Rs. 536 lakhs, Forests Rs. 168 lakhs, Excise Rs. 109 lakhs, Stamps Rs. 62 lakhs, and Irrigation Rs. 26 lakhs. The expenditure charged to revenue (revised estimates) in 1930–31 totalled Rs. 1,109 lakhs, the largest item being Civil Works Rs. 232 lakhs; next, Police Rs. 159 lakhs; Education Rs. 110 lakhs; and General Administration Rs. 111 lakhs. There was no contribution to the Central Government by the Provincial Government in 1930–31. The net surplus from Forests was Rs. 89 lakhs.

**Production and Industry.**—The area of reserved Forests at the end of 1929–30 was 24,487 sq. miles. The out-turn of teak by lessees was 290,209 tons. In 1929 the output of tin was, in the Tenasserim area, 3,669 tons; of

tungsten ore, 1,060 tons; of silver, almost entirely from the mines of the Burma Corporation, Ltd., in the N. Shan States, 7,280,517 ounces. The total provincial output of petroleum (1929) was 253,400,524 gallons. The total number of factories of all kinds was 980 in 1930; and the total number of persons employed in factories was 98,701.

**Commerce and Communications.**—In 1929–30 the whole sea-borne trade of Burma was Rs. 109·9 crores. Customs duty realised Rs. 471·81 lakhs. The length of metalled roads was 1,741 miles, and there were 7,822 miles of unmetalled roads. Burma had also 60 miles of navigable canals. Its great river, the Irrawaddy, is navigable up to Bhamo, 900 miles from the sea; and its tributary, the Chindwin, is navigable for 300 miles. The railways of the Province were taken over by the Government of India in January 1929. The open mileage for the year 1930–31 was 2,057 miles.

## CENTRAL PROVINCES AND BERAR.

**Constitution and Government.**—From 1853 the territories of the Kingdom of Nagpur were declared by Lord Dalhousie to have lapsed to the Paramount Power, and were then administered as the Nagpur Province by a Commissioner under the Government of India. With some additions this area was constituted the Central Provinces in 1861. The seat of Government is at Nagpur, but in April and September for two periods of three months and one and a half months respectively, it is transferred to Pachmarhi. Owing to the bankruptcy of Berar and the debts owing to the British Government, a treaty with the Nizam of Hyderabad in 1853 allotted to the British certain districts known as the Hyderabad 'Assigned Districts' for the payment of the Hyderabad Contingent. In 1902 the rights of the Nizam over Berar were leased in perpetuity to the Government of India at an annual rental of Rs. 25 lakhs; and Berar was transferred to the administration of the Chief Commissioner of the Central Provinces. In 1920 a Governorship was created. Associated with the Governor are two Executive Councillors (one an Indian) for the 'reserved' subjects, and two Ministers for the 'transferred' subjects. There are five main administrative divisions with 22 districts, each under a Deputy Commissioner. All the Central Provinces are under a Political Agent. The Legislative Council of 73 has 55 elected Members and 18 nominated and *ex-officio* Members (not more than 10 may be officials). For Local Self-Government there are 18 District Councils and 2 Independent Local Boards in the Central Provinces, and 4 District Councils and one Independent Local Board in Berar; also 71 Municipalities.

**Governor.**—His Excellency Sir Montagu Butler, K.C.S.I., C.B., C.I.E., C.V.O., C.B.E.: appointed 1925: salary Rs. 72,000 per year.

**Area, Population and Religion.**—The British Districts of the Central Province have an area of 82,109 sq. miles and a population (1921) of

## 158 THE BRITISH EMPIRE:—CENTRAL PROVINCES, BERAR

10,837,444; Berar an area of 17,767 sq. miles and a population of 3,075,316; and the Feudatory States an area of 31,176 sq. miles and a population of 2,066,900. The urban population is only 90 per mille. The leading towns are: Nagpur, the capital, 145,193; and Jubbulpore, 108,793. The Hindus in 1921 numbered 13·1 millions (nearly five-sixths of the total population); the Animists 2·1 millions; Mohammedans 0·5 million; and Christians 0·07 million.

**Education.**—The Nagpur University was established in 1923: to this the Colleges at Nagpur, Jubbulpore and Amraoti are affiliated. There were 2,133 collegiate students in 1929–30. There is a High School Board for regulating and supervising high school education. There were 111,706 pupils in secondary schools in 1929–30. Under the head of primary education there were 4,181 recognised Institutions (with 295,126 pupils) for boys, and 374 similar Institutions (with 26,806 pupils) for girls. For Technical Education there is an Engineering School with 174 students at Nagpur. There are 46 pupils at the Rajkumar College, Raipur.

**Justice and Crime.**—The Court of the Judicial Commissioner at Nagpur, with a Judicial Commissioner and four Additional Judicial Commissioners, is the highest Criminal and Civil Court. There were in 1929 12 District and Sessions Judges, with 819 Magistrates for criminal cases, and 123 Subordinate Judges for civil cases. There were 48,175 criminal cases tried; and 144,313 civil suits were instituted.

**Finance.**—The revenue (revised estimates) for 1929–30 was Rs. 500 lakhs. Towards this total Land Revenue contributed Rs. 235 lakhs, Excise Rs. 96 lakhs, Stamp Duties Rs. 60 lakhs, and Forests Rs. 53 lakhs. On the expenditure side the total was Rs. 522 lakhs; General Administration cost Rs. 71 lakhs; next, Police Rs. 65 lakhs; Education Rs. 59 lakhs; Civil Works Rs. 75 lakhs; and Forests Rs. 40 lakhs. The contribution of Rs. 22 lakhs hitherto payable by the Provincial Government of the Central Provinces and Berar to the Central Government of India was remitted permanently with effect from the year 1928–29.

**Production and Industry.**—The Agricultural College at Nagpur had 101 students in 1928–29. The result of the distribution of improved seeds by the Department of Agriculture was an increased out-turn valued at about 112 lakhs. The area irrigated from State Works in 1928–29 was 410,219 acres. The number of Co-operative Societies of all kinds in 1928–29 was 3,954. Berar and the Western Districts of the Nagpur Provinces grow cotton. Nagpur is the centre of a cotton-spinning and weaving industry. The Forest Department controls 19,641 sq. miles of Forests: the Forests gave in 1928–29 a surplus of Rs. 13·9 lakhs. The coal output in 1928 was 882,331 tons, and the manganese output was 621,905 tons. There were 893 factories of all kinds, in 1929, with a daily average of 69,291 employees.

**Communications.**—In 1930–31 there were 5,130 miles of metalled roads, and 3,527 unmetalled. The railway mileage is 2,572, of which 1,734 miles are broad gauge and 838 narrow and metre gauge.

**COORG.**

This Province came under British control in 1834, when, at the wish of the inhabitants, the reigning Raja, a cruel tyrant, was deposed. At first there was a Superintendent of Coorg, acting under the Commissioner of Mysore and Coorg. In 1881 the Resident in Mysore became the Chief Commissioner of Coorg. The local Administrator is the Commissioner of Coorg at the capital, Mercara. A Legislative Council of 20 was created in 1924. The area is 1,582 sq. miles; and the population (1931) is 163,089. Kanarese is the chief language: Kodagu (Coorg language) is a dialect of old Kanarese. In 1931-32 the estimated revenue is Rs. 13·22 lakhs and the expenditure Rs. 14·58 lakhs. There were, in 1930, 757 boys in high schools and 8,223 in primary schools, and 257 girls in high schools and 751 in primary schools. There are 40,765 acres under coffee, and 8,900 tons were exported in 1929-30.

*Chief Commissioner.*—The Hon. Lieut.-Col. R. J. C. Burke, I.A.: salary, Rs. 48,000 per year.

Administration Report. Annual. Bangalore.

**DELHI.**

The Delhi Province, with an area of 585 sq. miles, was part of the Punjab Province before October 1912, when the enclave was created into a separate province under a Chief Commissioner. In 1915 a tract of land in the United Provinces comprising 65 villages was added to the Delhi Province, and is included in the above-mentioned area. The population is 636,246 (1931); the urban population in Delhi town itself is 365,883.

The revised estimate for the new capital is Rs. 1,606 lakhs: an expenditure of Rs. 1,570 lakhs was incurred up to 31st March, 1931. Accommodation is required for a population of about 66,000.

The University of Delhi, intended to be a unitary, teaching and residential institution, was founded in 1922. There are three Arts Colleges affiliated. There is also the All-India Lady Hardinge Medical College for the Medical Education of Indian Women (opened 1916). A Board of Secondary Education was established in 1926.

The revenue of the Province in 1930-31 (estimate) was Rs. 46 lakhs; and the expenditure (estimate) Rs. 48 lakhs.

*Chief Commissioner.*—The Hon'ble Sir John Thompson, K.C.I.E., K.C.S.I.: appointed August 8, 1928: salary, Rs. 36,000 per year.

*Chief Commissioner Elect.*—J. N. G. Johnson. (January 7, 1932.)

**MADRAS PRESIDENCY**

**Constitution and Government.**—The first trading establishment made by the British in the Madras Presidency was at Peddapali (now Nizampatam) in 1611 and then at Masulipatam. In 1639 the English were permitted to make a settlement at the place which is now Madras; and Fort St. George was founded. By 1801 the whole of the country from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule. The administration is now in the hands of the Governor in Council (four members, two being Indians) for 'reserved' subjects, and of the Governor

acting with three Indian Ministers for the 'transferred' subjects. The Legislative Council at present consists of 132 Members, of whom 98 are elected, and 34 nominated and *ex-officio*. The maximum number of officials is 23. There are 26 Districts each under a District Collector and Magistrate. Under the head of Local Self-Government there are 25 District Boards (under non-official Presidents), 81 Municipal Councils, and the Corporation of Madras. The summer capital is Ootacamund.

*Governor*.—His Excellency the Rt. Hon. Lieutenant-Colonel Sir George Frederick Stanley, G.C.I.E., C.M.G.; appointed October 26, 1929; salary Rs. 120,000 per year.

**Area, Population and Religion.**—Area, 142,260 sq. miles. There are also five Indian States which are separately described (p. 169). Population (1931), 46·7 millions. Principal languages, Tamil, Telugu, Malayalam and Kanarese. The first two account for 78 per cent. of the population. The principal towns are, Madras with 647,228 inhabitants, Madura with 182,007, Trichinopoly with 141,640, and Salem with 102,181. Hindus form 89 per cent., Mohammedans 7 per cent., Christians 3 per cent., and Animists 1 per cent.

**Education.**—There are three Universities, the Madras University, the Andhra University, and the Annamalai University. The first of these, founded in 1857, is an affiliating University and since 1923 has been discharging teaching functions to a limited extent. The Andhra University, founded in 1926, is mainly an affiliating body. The Annamalai University, founded in 1929, is the first attempt in South India at organising a unitary residential type of University. The number of Colleges affiliated to or recognised by the two affiliating Universities in 1929-30 was as follows:—Madras 55, of which 17 were maintained by Government; Andhra 19 (3 maintained by Government). On March 31, 1930, male Arts students numbered 12,375, and women Arts students numbered 543. Public educational institutions numbered 56,957, with 2,824,946 scholars. There were 50,453 public elementary and 526 secondary schools for Indian boys, and 5,298 elementary and 70 secondary schools for Indian girls. Public funds contributed 65 per cent. of the total expenditure on education in 1929-30.

**Justice and Crime.**—There is a High Court with a Chief Justice and 13 Judges. There were in 1929 in all 974 Criminal Courts; and 362,266 criminal cases were instituted in 1929. The Police Force in 1929 numbered 29,687, under an Inspector-General, while there was a force of 2,206 for Madras City. The total number of civil suits instituted was 546,008 in 1929.

**Finance.**—The revenue (revised estimates) of the Government of Madras was Rs. 1,776 lakhs in 1930-31, the chief contributions being Rs. 746 lakhs from Land Revenue, Rs. 526 lakhs from Excise, Rs. 237 lakhs from Stamps and Rs. 62 lakhs from Forests. The expenditure (revised estimates) in 1930-31 was Rs. 1,832 lakhs. General Administration accounted for Rs. 284 lakhs, Police for Rs. 180 lakhs, and Education for Rs. 302 lakhs. The contribution to the Central Government was completely and permanently remitted from 1928-29. The proportion of the expenditure in the 'transferred' departments to the total expenditure (excluding the contribution to the Central Government) was 44 per cent. in 1930-31.

**Production and Industry.**—Agriculture engages 71 per cent. of the population. There were in 1929-30, 23 cotton mills with 33,849 workers.

The total number of factories working in 1930 was 1,527 with 142,549 operatives. The Madras Government in 1929-30 treated at the Government Quinine Factory 536,200 lbs. of cinchona bark. The area irrigated in 1929-30 was 7,380,867 acres: productive irrigation works showed a return of 7·70 per cent. on the capital outlay. The output of timber by the Forest Department was 96,920 tons in 1929-30.

**Commerce and Communication.**—In 1929-30, Madras Presidency had 21,615 miles of metalled roads, and 11,496 miles of unmetalled roads, as well as 1,420 miles of navigable canals. There were 4,850 miles of railway, in addition to 136 miles of District Board lines. The imports of private merchandise under the head of Seaborne Foreign Trade were valued in 1928-29 at Rs. 27·59 crores, and the exports at over Rs. 46 crores. Trade to the United Kingdom represented 30 per cent. of the total trade of the Presidency. In 1928-29 the Madras Port accounted for 48·64 per cent. of the total trade; its imports and exports amounted to Rs. 52·02 crores in 1928-29. Cochin is the chief of the other ports.

### LACCADIVE ISLANDS.

(ATTACHED TO MADRAS PRESIDENCY.)

A group of 14 islands (9 inhabited), about 200 miles off the west of Malabar coast of the Madras Presidency. The northern portion is called the Amindivis and is attached to the collectorate of South Kánara, the remainder to the administrative district of Malabar. Population (1931 Census) 16,046 nearly all Mohammedans. The language is Malayalam, but the language in Minicoy, which is considerably to the south of the other islands, is Mahl. The staple products are coconut husk fibre (coir) and coconuts.

### NORTH-WEST FRONTIER PROVINCE.

In 1849 the territory on the frontier was annexed and placed under a Board of Administration at Lahore in the Punjab. The frontier districts were separated in 1901 from the Punjab under the name of the North-West Frontier Province: the districts are Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan. The British territory represents one-third of the whole area of 38,665 sq. miles under a Governor first appointed on March 3, 1932; the remaining area is tribal territory, partly under Political Agents, and partly under the political control of the Deputy Commissioners of the British districts. The British territory in the five districts has an area of 13,419 sq. miles and a population of 2,425,076 (1931). About 91 per cent. are Mohammedans. Peshawar, the capital, had in 1931 a population of 121,866. The hot weather capital is Nathia Gali. The chief language is Pashtu, an Iranian tongue with many Punjabi words. The chief Court is that of the Judicial Commissioner and Additional Judicial Commissioner; and there are three Sessions Judges. In 1929-30 the total number

of offences reported was 31,929. The total number of civil suits instituted was 20,236. The gross revenue in 1930-31 was Rs. 69·75 lakhs, of which Rs. 17·63 lakhs came from Land Revenue, and 9·45 lakhs from Stamps. The gross expenditure, 1930-31, was Rs. 869·08 lakhs, Rs. 30·02 lakhs being Political expenditure, Rs. 151·62 lakhs on Frontier Watch and Ward, Rs. 35·25 lakhs expenditure on Police, and Rs. 50·07 lakhs on Civil Works. In 1930-31 there were 847 recognised educational Institutions for males with 70,529 scholars, and 121 similar Institutions for females, with 10,564 scholars. The percentage of scholars to the total population is 5·59 for males and 1·02 for females. The expenditure on Education was Rs. 28·27 lakhs, of which 70·7 per cent. is from Government Funds. Wheat covered 37 per cent. of the acreage sown in 1929-30. The irrigated area in that year was 974,500 acres. The railway line through the Khyber, 27 miles long, with 34 tunnels, from Jamrud to the frontier of Afghanistan, was opened in November 1925.

*Chief Commissioner and Governor Designate* (March 3, 1932).—The Hon. Lieut.-Col. R. E. H. Griffith, C.I.E.: appointed 1931; salary, Rs. 66,000 per annum.

## PUNJAB.

**Government and Constitution.**—Punjab denotes the land of the five rivers, viz. Jhelum, Chenab, Ravi, Beas and Sutlej. British power in the Punjab began with the dissipation by the successors of Ranjit Singh of the power consolidated by him. In 1849 the country was annexed, and placed under a Board of Administration. In 1853 it was placed under a Chief Commissioner, and by 1859 the Punjab and the Delhi Territory constituted the charge of a Lieut.-Governor. The N.W. Frontier area was separated in 1901, and the Delhi enclave in 1911. In 1921 the administration was handed over to a Governor with an Executive Council of two Members (one an Indian) in charge of 'reserved' subjects, and the Governor with three Indian Ministers in charge of 'transferred' subjects. The Legislative Council consists of 94 Members, 2 *ex-officio*, 71 elected, and 21 nominated: of the latter not more than 14 may be officials. There are 29 districts grouped for administrative purposes under five Commissioners. The system of election has been introduced in the membership of all the District Boards, except Simla. There are 107 Municipalities. Lahore is the capital, but from May to October the Government Offices are transferred to Simla, where the Governor's residence is known as Barnes Court.

*Governor.*—H.E. Sir Geoffrey Fitzhervey de Montmorency, K.C.S.I., K.C.I.E., K.C.V.O., C.B.E.: appointed August 10, 1928: salary Rs. 1,00,000 per annum.

**Area, Population and Religion.**—The Punjab proper comprises an area of 99,863 sq. miles and has a population of 23·58 millions (1931). Its Indian States, 34 in number, have an area of 37,061 sq. miles with 4·91 million people. Of the population 56·5 per cent. is Mohammedan, 26·8 per cent. Hindu and 13 per cent. Sikh. The leading towns are: Lahore, the capital (429,747), Amritsar (264,840), Multan (119,457), Sialkot (100,973) and Rawalpindi (119,284).

**Education.**—The University of the Punjab was constituted as an examining University in 1882. It has always maintained an Oriental College and a Law College, also a Commerce College (1927); and since 1920 various departments of University teaching have been added. In 1929-30 there were 11,794 male students in Arts Colleges; in 1929-30 619,075 male scholars in secondary schools, and 369,832 male scholars in primary schools. The total expenditure on Education in 1929-30 was Rs. 315 lakhs, of which Rs. 178 lakhs were provided by Government Funds and Rs. 64 lakhs from fees.

**Justice and Crime.**—The Chief Court of two Judges created in 1866 was converted in 1919 into a High Court at Lahore, consisting of a Chief Justice and 12 Judges, including one inspecting judge who sits for six months in the year. There are 25 permanent District and Sessions Judges, and 3 others. In 1930 the number of criminal cases brought to trial was 130,606, and the number of civil suits instituted was 227,039. The Provincial Police Force of nearly 23,000 officers and men is under an Inspector-General.

**Finance.**—The revenue in 1930-31 was Rs. 1,169 lakhs, to which the receipts from Irrigation Works contributed the large proportion of Rs. 477 lakhs, Land Revenue Rs. 270 lakhs, Stamps Rs. 110 lakhs, and Excise Rs. 112 lakhs. The expenditure was Rs. 1,211 lakhs. The chief items of expenditure were: Education Rs. 172 lakhs, Police Rs. 130 lakhs, and General Administration Rs. 115 lakhs. The entire contribution of the Punjab to the Central Government was permanently remitted in 1928-29 by the Central Government. The net profit earned by the Irrigation Department has been —

	Lakhs		Lakhs
1923-24 . . .	Rs. 807	1927-28 . . .	Rs. 289
1924-25 . . .	Rs. 338	1928-29 . . .	Rs. 254
1925-26 . . .	Rs. 357	1929-30 . . .	Rs. 268
1926-27 . . .	Rs. 270		

**Production and Industry.**—Agriculture affords subsistence to 60·5 per cent. of the population. In 1931 there were 3,337,243 acres of Forests under the Forest Department. The total receipts of the Department from 1869-1931 amount to Rs. 1,009 lakhs, and the expenditure to Rs. 782 lakhs. The total surplus during this period was thus Rs. 227 lakhs. In 1930-31, there was a deficit of Rs. 4·19 lakhs owing to capital expenditure on irrigated plantations. There is a Punjab Arts and Crafts depot at Lahore which serves a dual purpose; the provision of art craftsmen with a market for their wares, and the improvement of design and workmanship. Next to agriculture, hand-loom weaving is the most important industry, both as regards the number of workers engaged and the value of the products: it is estimated that over 200,000 rely on weaving as their main occupation. Agricultural prosperity is mainly due to irrigation: the canal-irrigated area rose from 3 million acres in 1893 to 13 million acres in 1929-30.

The total number of factories registered under the Indian Factories Act is 640, which provide employment for 49,549 operatives.

**Commerce and Communications.**—The Punjab possesses an extensive system of railway communications. The route mileage (6,954 miles) on the N.W. Railway has been increased by the opening to public traffic of 133 miles of new lines during 1930-31, and in addition 269 miles of new

lines were under construction at the end of the year. The main source of wealth lies in the export of wheat and cotton. The wheat traffic to Karachi on the N.W. Railway fluctuates considerably. In 1930-31 the export of wheat was 193,000 tons; and of cotton, 188,000 tons. The passenger traffic on the N.W. Railway was 73·6 millions in 1930-31. There are about 4,000 miles of metalled roads and about 20,500 miles of unmetalled roads in the province, excluding village roads. Punjab has also 220 miles of navigable canals.

### UNITED PROVINCES OF AGRA AND OUDH.

This territory grew out of various cessions and acquisitions. In 1833 the then Bengal Presidency was divided into two parts, one of which became the Presidency of Agra. In 1835 the Agra area was styled the North-West Province and placed under a Lieut.-Governor. Oudh was annexed in 1856. The two provinces of Agra and Oudh were placed, in 1877, under one administrator, styled Lieut.-Governor of the North-West Province and Chief Commissioner of Oudh. In 1902 the name was changed to 'United Provinces of Agra and Oudh,' under a Lieut.-Governor, and the Lieut.-Governorship was altered to a Governorship in 1921. The administration of the 'reserved' subjects is in the hands of the Governor and an Executive Council of two Members, one of whom is an Indian; and the 'transferred' subjects are under the Governor with three Indian Ministers. The Legislative Council consists of 123 Members. There are 100 elected Members, and 23 nominated and *ex-officio* Members: of the latter not more than 16 may be officials. There are 10 administrative divisions, covering 48 districts, the average size of which is 2,000 square miles and the average population just under a million. The Municipalities in 1929-30 numbered 85, and the District Boards 48; of the former all but 4, and of the latter all are under non-official Chairmen. There are three Indian States, one of which, Benares, came into existence in 1911.

*Governor.*—His Excellency Sir William Malcolm Hailey, G.C.I.E., K.C.S.I., I.C.S.; appointed August 9, 1928; salary Rs. 120,000 a year.

*Area, Population and Religion.*—The area of the British districts is 106,248 square miles: population (1931) 48,408,763; 1,206,070 are in the 5,943 square miles of the three Indian States. The population is rural to the extent of 89·8 per cent. Lucknow (274,659 in 1931) is the largest city: but the second place is now taken by Cawnpore (243,755)

instead of Benares (205,315). Agra had in 1921 229,764, and Allahabad 183,914 inhabitants, Bareilly 144,031, Meerut 136,709, Moradabad 110,562. Hindus during the last decade have lost numbers to Christianity and Aryanism, but still cover 85 per cent. Mohammedans form 14 per cent.

**Education.**—The University of Allahabad, first constituted as an affiliating University in 1887, was recognized in 1921 as a unitary teaching and residential University: at the same time it exercised control over the affiliated colleges. Since July 1927 these colleges have been transferred to the new Agra University, which is a purely affiliating and examining University. The Benares Hindu University was constituted in 1916; Lucknow University in 1920; and the Aligarh Muslim University in 1920, all being unitary teaching and residential Universities. All four had 5,897 students in 1929–30. Government maintains an Engineering College at Roorkee, an Agricultural College at Cawnpore, and an Industrial School and a Medical College at Lucknow, besides three Training Colleges for English Teachers at Allahabad, Lucknow and Agra. Educational Institutions of all kinds numbered 26,186 in 1929–30. For secondary education there were 963 Institutions with 167,944 scholars; and for primary education 20,068 schools with 1,155,142 scholars. There were 2,155 institutions for Indian girls with 97,380 scholars. There was compulsory primary education in 36 Municipalities, Government supplying two-thirds of the extra cost involved. The percentage of scholars to the population is 5·8 for males and 0·69 for females. Government contributed 57 per cent. of the total cost of education in 1929–30.

**Justice and Crime.**—There is a High Court of the Agra Province with a Chief Justice and 11 Judges, sitting at Allahabad; also a Chief Court of Oudh (constituted November 1925) with 5 Judges in all, at Lucknow. There are 19 Sessions divisions in Agra and 8 in Oudh. The persons brought to trial were 159,174 in the Agra Province and 97,718 in Oudh in the year 1929. The stipendiary Police Force is under an Inspector-General, with a force of nearly 33,800 officers and men. The village watchmen have in recent years been reduced from about 88,000 to 43,800.

**Finance.**—The revenue (revised estimates) of the United Provinces in 1930–31 was 1,230 lakhs of rupees. To this total the main contributions were: 688 lakhs from Land Revenue, 171 lakhs from Stamps, 115 lakhs from Excise, 52 lakhs from Forests, and 111 lakhs from Irrigation. On the expenditure side the total (revised estimates) for 1930–31 was 1,230 lakhs. On Education were spent 195 lakhs; on Police 179 lakhs; and on General Administration 141 lakhs. No less than 102 lakhs were spent on the interest on debt incurred on Irrigation Works for which Capital Accounts are kept. On the construction of new Irrigation work, 79 lakhs went in capital expenditure in 1930–31.

**Produce and Industry.**—Agriculture absorbs 76·8 per cent. of the population; over 33½ million acres were under cultivation in 1929–30, and about 3 million acres were irrigated from canals. The productive canals (excluding the Sarda Canal) gave a net revenue of 7·18 per cent. on the total capital outlay. The Sarda Kuchha and Sarda Oudh estimates have been combined into one project, which is estimated to cost 950 lakhs and to irrigate 1,350,000 acres. The great centre of industry is Cawnpore. In 1930 there were 409 factories in the United Provinces. The textile factories employ most labour; then follows engineering.

**Communications.**—There were, in 1929–30, 5,067 miles of metalled and 1,758 of unmetalled roads. On the River Ganges and Gogra 425 miles were kept open for navigation. The trunk lines of the East Indian Railway intersect the province.

## INDIAN STATES AND AGENCIES.

Information is given below regarding the leading States and Agencies, arranged in alphabetical order.

**Assam State (Manipur).**—The only feudatory States with which the Assam Administration has political relations are Manipur and the petty States in the Khasi Hills. Manipur has an area of 8,456 square miles and a population (1921) of 384,016. About one-third are animistic tribes. The revenue is nearly Rs. 8 lakhs. There is a tribute of Rs. 5,000. The ruler is H. H. Maharaja Chura Chand Singh, C.B.E., born 1885; succeeded 1891; salute of 11 guns. Capital, Imphal. The State Administration is under a Darbar consisting of a President (whose services are lent by the Assam Government), three ordinary and three additional Members.

**Baluchistan States.**—There are two States—Kalat and Las Bela—in relation with the Agent of the Governor-General, who is also the Chief Commissioner of Baluchistan and resides at Quetta. There is the Political Agent, Kalat. The leading chief of Kalat is His Highness Nawab Bahadur Mir Azam Jan, Wali of Kalat, who succeeded in 1931; he has a personal salute of 21 guns. He is the head of a confederacy of chiefs. The area of Kalat State is 73,278 square miles, and the population 328,281 (1921). The Khan's revenue, including the subsidies and rents for the leased areas paid by the British Government, amounts to nearly Rs. 17 lakhs annually. In 1926 private property in slaves in Kalat was abolished.

The ruling chief of Las Bela is Mir Ghulam Muhammed Khan, Jam of Las Bela, who was born in 1895 and succeeded in 1921. The area of the State is 7,132 square miles; population, 50,696 (1921); the revenue is about Rs. 3·8 lakhs. The State is under the immediate control of the Political Agent in Kalat.

**Baroda.**—The State was carved out of the remains of the Moghul Empire under Sivaji and then under the Peshwa, and is interlaced with territory in Gujarat and Kathiawar. The Gaekwar Pilaji acquired portion of Gujarat in 1725. The influence of the British as suzerain dates from 1772. The Gaekwar, Malhar Rao, installed in 1870, was deposed in 1875 for misgovernment, and on May 27, 1875, the widow of Khande Rao adopted as heir the present ruler, a descendant of the founder of the family, who was invested with full ruling powers in 1881. The area of the State is 8,135 square miles; the population, 2,126,522. Baroda City, the capital, has a population of 91,178. The receipts in 1929–30 were Rs. 265 lakhs. There were 2,742 educational institutions with 229,984 pupils, including Baroda

College with 847 students. There were 1,045 Co-operative Societies of all kinds, with 39,210 members and a working capital of Rs. 71 lakhs. The ruler is H.H. Farzand-i-Khas-i-Daulat-i-English-i-a Maharaja Sir Sayaji Rao Gaekwar, Sena Khas Khel Shamsher Bahadur, G.C.S.I., G.C.I.E., born 1863; succeeded 1875; salute of 21 guns. There is an Executive Council of 5 members, and a Legislative Council of 27 members, 10 being elected. The Government of India is represented by a Resident, who resides at Baroda.

**Hyderabad.**—The territory of this State, the largest and most populous of Indian States, had become a province of the Moghul Empire in 1687. In 1713 the Emperor appointed Mir Kamruddin Ali Khan, otherwise known as Chin Kullij Khan, of Turkoman descent, as Subadar or Viceroy of the Deccan with the title of Nizam-ul-Mulk (administrator of the land). Nizam-ul-Mulk became independent, and founded the present dynasty of the Nizam in 1724; and Hyderabad, founded in 1589 by a descendant of the Golconda dynasty which gave way to the Moghuls, became the capital. The present ruler is a direct descendant of the original Nizam-ul-Mulk.

The area is 82,698 sq. miles; and the population, 14,895,493 (1931 provisional). Most of the people are Hindus. The administration is carried on, subject to the orders of H. E. H. the Nizam, by an Executive Council. There is a Legislative Council of 20 members, in addition to the President. Of these, 12 are official, 6 non-official and 2 extraordinary members. The Government of India is represented by a Resident whose headquarters are at Hyderabad. Besides the Hyderabad Municipality, there are 15 District and 107 Sub-district Boards. There are Regular Troops, Imperial Service Troops and the Golconda Brigade.

In 1928-29 there were 145 officers administering criminal justice, and 134 Civil Judges of all classes. In 1930 38,836 criminal cases were instituted and 43,106 civil suits. The District and City Police numbered 14,554. The number of public educational institutions in 1930 was 4,247 with 292,395 pupils. There were 6 Arts Colleges and 3 Professional Colleges. The total expenditure on public instruction amounted to Rs. 88 lakhs. The revenue (estimate) for 1930-31 was Rs. 846 lakhs (Service receipts) and Service expenditure (estimate) Rs. 798.78 lakhs. The number of co-operative credit societies was 2,153. Under industries there were, in 1928-29, 5 cotton mills, 282 ginning and pressing factories, and 270 flour and other mills. **Jammu and Kashmir.**—The State of Kashmir, which had been under Hindu rulers and Mohammedan Sultans, became part of the Moghul Empire under Akbar from 1581. After a period of Afghan rule from 1756 it was overrun by the Sikhs in 1819. Ranjit Singh entrusted in 1820 the territory of Jammu to a feudatory, Gulab Singh, and after the decisive battle of Sobraon in 1846 Kashmir was made over to the latter by Lord Hardinge on payment of the indemnity demanded from the Sikhs. British supremacy was then recognised. The bulk of the population are Mohammedans, though

the ruling race is Hindu. The area is 84,258 sq. miles; the population 3,330,518. Geographically the State may be divided into (1) the Tibetan and semi-Tibetan tracts which contain the districts of Ladakh and Gilgit; (2) the Jhelum valley, within which is situated the lovely and world-famous "Happy valley" of Kashmir; (3) the submontane and semi-mountainous tract which includes Jammu, the winter capital of the State, which is connected with the railway system of India; and (4) the outer Hills, in which are comprised the Poonch Illaqa and Bhadarwah: a miniature "Happy valley."

The Government of India is represented by a Resident, who resides at Srinagar. In 1927-28 there were in addition to the High Court 128 Criminal Courts and 14,192 offences were tried. There were also 22,597 civil suits instituted in 67 courts. In 1927-28 there were 9,451 sq. miles of demarcated forests. The trade in 1928-29 was: Imports, 332 lakhs; Exports, 184 lakhs, and the total receipts 251 lakhs. The revenue of the State in 1928-29 was Rs. 251 lakhs. The Civil List amounted to Rs. 24,69,060. In 1927-28 there were two Arts Colleges at Srinagar and Jammu with 868 students. There were in all 1,012 educational institutions with 55,914 pupils, including 4,610 girls.

In addition to agriculture the chief industry is sericulture, which dates back to the 15th century. There are considerable mineral resources which have not yet been fully surveyed. A Department of Industry was created in 1922. It is equipped on modern lines and an up-to-date laboratory has been attached to it. The State has great natural resources and the Department of Industries is intended to help in their scientific development. Industries are being fostered by the Government. In recent years the State has made rapid strides in the field of progress. Primary education for boys has been made compulsory in the cities. A High Court Bench has been constituted. The Agriculturist's Relief Regulation and other legislations have been designed for the protection of the ryots. The marriage of boys below the age of 18 and girls below the age of 14 has been penalised. His Highness' Government has done much to protect the interests of the hereditary State subjects. A Board called the Civil Service Recruiting and Scholarship Selection Board has been set up for regulating appointments and selections for training. A Conference of Representatives is summoned twice every year and their representations are carefully considered by His Highness.

The present ruler is Colonel H.H. Maharajadhiraja Sir Hari Singh Bamadur, K.C.I.E., K.C.V.O., Maharaja of Jammu and Kashmir; born 1895; succeeded 1925; salute of 21 guns.

**Mysore.**—According to tradition the ancestors of the present dynasty came to Mysore in 1399, and established themselves in Hadinad, a few miles from the present capital of the State. By successive conquests, the family extended the kingdom till it reached a position of eminence during the seventeenth century. In the latter part of the eighteenth century the real power passed into the hands of Hyder Ali. Under him and his son, Tippu Sultan, the territories of Mysore were largely extended. On the defeat of Tippu in 1799, the territories were partitioned and the Mysore State, in its present shape, was handed back to the old Hindu dynasty, in the person of Krishnaraja Wadiyar III. As a result of an inquiry made by a Committee into the administration, Lord William Bentinck assumed direct administration of the State in 1831; and for fifty years Mysore was administered by Commissioners. In 1865, the father of the present ruler was adopted as heir by the deposed ruler, and in 1881 he was placed on the throne of Mysore and invested with powers under an Instrument of Transfer. In 1913 this was replaced by a treaty. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy, which had till that time amounted to Rs. 35 lakhs.

The area is 29,475 sq. miles; and the population (exclusive of the civil and military station of Bangalore) 6,423,189 (1931), a large majority being Hindus. The administration is carried on under the Maharaja by the Dewan (Prime Minister), and two Members of Council. There is a Representative Assembly of 273 members and a Legislative Council of 50 members. The Government of India is represented by a Resident at Bangalore. In 1929-30, there were besides the High Court, 87 criminal and 33 civil courts. There were 18,319 offences reported and 37,593 civil cases instituted in that year. There were 2,102 co-operative societies with 126,491 members. The University of Mysore has 5 constituent colleges and 5 intermediate colleges with a total strength of 3,127 students. The number of educational institutions, public and private, on March 31, 1930, was 8,358, with 329,928 scholars. The total revenue in 1929-30 was Rs. 375 lakhs, and the expenditure chargeable to revenue was 375 lakhs. The State forests cover 3,395 sq. miles. The mines in the Kolar Gold Fields area produced 363,741 ounces of fine gold in 1929.

The Ruler is Colonel H.H. Maharaja Sir Sri Krishnaraja Wadiyar Bahadur, G.C.S.I., G.B.E.; born 1884; succeeded 1895; salute of 21 guns.

**North-West Frontier Agencies and Tribal Areas.**—Between the border of the British Districts of the N.W. Frontier Province and the Afghan frontier is the tribal territory. The Government of India exercises the minimum of interference. The region is divided into five Political Agencies: Malakand (Dir, Swat and Chitral), Khyber, Kurram, North Waziristan and South Waziristan. There are, further, areas known as Tribal Areas under the political control of the Deputy Commissioners of the five British Districts. All are under the Chief Commissioner of the N.W. Frontier Province in his capacity of Agent to the Governor-General. Chitral is ruled by H.H. Sir Shujaulmulik, K.C.I.E., the Mehtar of Chitral.

The area under tribal territory, including that of the Agencies, beyond

## THE STRAITS SETTLEMENTS.

### Constitution and Government.

**Malaya.**—The Straits Settlements, a Crown Colony, comprise the Settlement of Singapore (including the Cocos Islands, Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca and Labuan. Malacca, one of the oldest European settlements in the East, was occupied by the Portuguese under Albuquerque in 1511, and held by them till 1641, when it passed into the possession of the Dutch, remaining in the hands of the Dutch till 1795 when it was captured by the English. It was restored (under the Treaty of Vienna) to the Dutch in 1818, being finally retroceded to the East India Company in 1824. Penang (Prince of Wales' Island) was the first British Settlement in the Malay Peninsula, being ceded by the Sultan of Kedah to the East India Company in 1786, Province Wellesley being added in 1800. The early history of Singapore is obscure; in the thirteenth and fourteenth centuries it became a position of independence and importance till destroyed by the Javanese about 1877, after which date it remained almost uninhabited until 1819, when Sir Stamford Raffles founded the trading settlement which is now the port and city of Singapore. The original lease of the site of a

factory to Raffles, on behalf of the East India Company, by the Sultan of Johore and Temenggong, Chief of Singapore, was followed in 1824 by a Treaty ceding the entire Island in perpetuity to the Company. In 1826, the three Settlements were incorporated under one Government as an Indian Presidency with headquarters at Penang. In 1830, they were incorporated under the Presidency of Bengal, headquarters being transferred in 1836 to Singapore. On April 1, 1867, the Settlements were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies. The Cocos Islands in 1886, Christmas Island in 1889, and the former Colony of Labuan in 1905, were brought under the control of the Governor of the Straits Settlements, being incorporated in the Colony, in the Settlement of Singapore in 1900, 1903 and 1907 respectively. Labuan was constituted a separate settlement in 1912.

The administration of the Colony is in the hands of a Governor, aided by an Executive Council, composed of the General Officer commanding the Troops, the Colonial Secretary, the Resident Councillors of Penang and Malacca, the Attorney-General, and the Treasurer, official members nominated by the Governor, at present three in number, and three unofficial members. There is a Legislative Council, consisting of the General Officer commanding the Troops, twelve other official members, and thirteen unofficial, eleven of the latter nominated and two elected by the Chamber of Commerce at Singapore and Penang. The municipalities of Singapore, Georgetown (Penang), and Malacca are administered by Municipal Commissioners appointed by the Governor.

The Governor of the Straits Settlements is also *High Commissioner* for the Malay States and the Bornean State of Brunei, and *British Agent* for the States of North Borneo and Sarawak.

*Governor.*—Sir Cecil Clementi, G.C.M.G. (February, 1930).

*Colonial Secretary.*—Sir John Scott, K.B.E., C.M.G. (February, 1929).

### Area and Population.

The total area of the colony, with dependencies, is 1,535 sq. miles. Singapore is an island about twenty-seven miles long by fourteen wide, with an area of 225 square miles, separated from the southern extremity of the Malay Peninsula by a strait three-quarters of a mile in width. A number of small islands adjacent form part of the settlement. The seat of government is the town of Singapore, at the south-eastern point of the island. Penang is an island of 111 square miles, off the west coast of the Malayan Peninsula, and at the northern entrance of the Straits of Malacca. On the opposite shore of the mainland, distant about two miles, is Province Wellesley, a strip of territory forming part of the Settlement of Penang, averaging eight miles in width, and extending forty-five miles along the coast, including ten miles of territory to the south of the Krian; total area 282 square miles. The chief town of Penang is George Town. Off the coast of Perak is the small island of Pangkor, which, together with a strip of the mainland, is British territory, the whole being known as the Dindings. Malacca is on the western coast of the peninsula between Singapore and Penang—about 110 miles from the former and 240 from the latter; it is a strip of territory 42 miles in length, and from eight to 25 miles in breadth, with an area of 637 square miles.

The population, according to the census of 1931, inclusive of the garrison, was 1,114,012 (671,216 males and 442,796 females).

In 1930 there were 242,149 immigrants from China, and 69,114 from Southern India.

## Education.

There is an Education Board consisting of official and unofficial members, and provision exists for an Education Rate. Vernacular instruction is provided for Malays free of charge, and attendance is compulsory. Instruction in English for all nationalities is provided in Government and numerous aided schools, and fees are charged. All the Government schools are unsectarian. There is a reformatory in Singapore for juvenile offenders and vagrants, where industrial instruction is provided.

The numbers of schools and scholars in 1930 were as follows :—

—	No. of Schools	Enrolment	Attendance

In the colony are Raffles College, formally opened in 1929, giving a higher education of a University standard in arts and science, and King Edward VII. College of Medicine.

## Justice and Crime.

The law in force is contained in local ordinances and in such English and Indian Acts and Orders in Council as are applicable to the colony. The Indian Penal Code, with slight alterations, has been adopted, and there is

a Civil Procedure Code based on the English Judicature Acts. There is a Supreme Court which holds assizes at Singapore and Penang every two months, and quarterly at Malacca, civil sittings monthly at Singapore and Penang, and once a quarter at Malacca.

There are, besides, district courts, police courts and marine magistrates' courts. Police force, actual strength 4,186 in 1930.

### Finance.

Public revenue and expenditure for six years (1 dollar = 2s. 4d.) :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure

### Commerce.

The trade of the Colony of the Straits Settlements is not now separately distinguished; the foreign trade of British Malaya which includes the Colony, the Federated Malay States and the States of Johore, Kedah, Perlis, Kelantan and Trengganu passes principally through the two free ports of Singapore and Penang in the Colony and Port Swettenham in the F.M.S.

Rubber, coconuts and palm oil are now cultivated in addition to rice.

The output of rubber amounted in 1930 to 46,444 tons.

The principal imports comprise foodstuffs, clothing and machinery; the chief exports, raw materials and articles partly manufactured. There is an important transit trade in the ports of Singapore and Penang.

The following shows the total values of Malayan trade for five years :—

The principal exports to the United Kingdom in 1930 were tin, 1,705,602*l.*; rubber, 4,825,269*l.*; preserved fruit, 810,849*l.* The principal imports from the United Kingdom were:—cotton piece goods, 774,222*l.*; iron and steel manufactures, 1,325,984*l.*; tobacco, 1,700,074*l.*; machinery, 627,840*l.*

### Shipping and Navigation.

The total tonnage of merchant vessels which arrived at and departed from the ports of the Colony during 1930 was 46,588,856, of which 21,484,759 tons was British.

### Communications.

The Straits Settlements at the end of 1929 had 1,049 miles of roads, and 15,500,000 dollars were expended on maintenance and construction in 1929. There is a railway from Singapore to Woodlands on the Johore Straits, and thence across the Johore Causeway to Johore Bahru. The Federated Malay States Railway extends from Parit Buntar in Krian to Kuala Prai in Province Wellesley, whence are steam ferries to Penang. There is a railway from Malacca to Tampin in Negri Sembilan. All the railways have a gauge of one metre, and form a part of the Federated Malay States Railway system, a continuation of which through Johore was opened in 1909. The last trade route connecting Pahang with Kelantan and Siam was opened in

August 1931. There are cables connecting Singapore and Penang, and land lines from Singapore to Johore, Malacca, Kuala Lumpur, Ipoh, and Penang, from Penang to Alor Star (Kedah), Tung Song and Bangkok (Siam), Taiping, Ipoh, Kuala Lumpur and Singapore, and from Malacca to Tampin Serimban and Kuala Lumpur. There are 2,163 miles of overhead and 6,515 miles of underground telephone line in Penang and Province Wellesley, and 1,932 miles of overhead and 648 miles of underground telephone line in Malacca.

In 1930, 23,510,901 letters and other articles of correspondence were posted, and 19,591,922 delivered. The number of letters sent to China in clubbed packets was 2,040,096. Parcels posted numbered 187,322, and delivered 136,330.

From Labuan there are telegraph cables connecting with Hong Kong, Singapore and Sandakan.

Wireless stations exist at Paya Lebar on Singapore Island and at Penaga in Province Wellesley. The wireless station at Paya Lebar transmits messages to and from ships, Christmas Island and Kuching in Sarawak. The station at Penaga transmits messages to and from ships, and to and from Siam in case of land line interruption.

### Money, Weights and Measures.

There are twenty-seven banks with establishments in the Colony. The amount of deposits in the Post Office Savings Bank on December 31, 1929, was 4,306,359 dollars.

The dollar, value 2s. 4d., is the standard coin of the Colony, and with the half-dollar and the British sovereign is legal tender for the payment of any amount. A bill was introduced in 1923 to base the currency on British sterling. Subsidiary silver coins are 20, 10, and 5 cent pieces; nickel five cent pieces; copper cents, half-cents, and quarter-cents. On December 31, 1931, Government currency notes to the value of 67,000,000 Straits dollars were in circulation.

The measure of length in use in the Settlements is the English yard, with its divisions and multiples, and land is measured by the English acre. The native terms are, however, still in use. Commercial weights are:—

1 Kati	= 16 Tahl	= 1½ lbs. avoirdupois
1 Pikul	= 100 Kati	= 133½ „ „
1 Koyan	= 40 Pikul	= 5,333½ „ „

The kati of 1½ lbs. is known as the Chinese kati. Another weight, known as the Malay kati, and still in partial use in Penang, is equal to the weight of 24 Spanish dollars, or 9,984 grains. This gives 142·628 lbs. as the weight of the pikul, and 5,705·143 lbs. as the weight of the koyan. The measures of capacity throughout the Colony are the gantang or gallon, and chupak or quart.

The **Cocos or Keeling Islands**, a group of about twenty small coral islands. Latitude 12° 5' S. and Longitude 96° 53' E., 581 miles distant from Java Head (S. 56° W.), and 1,161 miles from Singapore (S. 30° W.). The largest is 5 miles by ½ mile. They were declared a British Possession in 1857, were placed by Letter Patent of October 13th, 1878, under the control of the Governor of Ceylon, and by Letters Patent of February 1st, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. Estimated population, 1931, 1162 (males, 608; females, 554).

There are large coconut plantations, and copra oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island in the north-eastern part of the group.

**Christmas Island.**—In the Indian Ocean. Latitude 10° 30' S. and Longitude 105° 40' E. It lies 22 3miles S. 8° E. of Java Head, and 529 miles N. 79° E. from the Cocos Island. It is densely wooded and of irregular shape, about 12½ miles long (at the longest point), and about 4½ miles wide (at the narrowest point). Area about 62 square miles. The climate is healthy. Average daily maximum and minimum temperatures 87° F. and 75° F. There is a prevalent E.S.E. trade wind. Known to navigators since about the middle of the seventeenth century. The Island was formally annexed on June 6th, 1888. The Island was placed under the administration of the Governor of the Straits Settlements in January, 1889. In 1900 it was annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The Island is administered by a District Officer who is a member of the Malayan Civil Service. There is a small force of Sikh Police drafted from the Straits Settlements Police Force. All the inhabitants (mainly Chinese and Malays), with the exceptions of the District Officer and his staff, are employed by the Christmas Island Phosphate Company, Limited, registered in London, which works the large natural deposits of phosphate of lime to which the Island owes its importance. In 1923 a wireless station was installed, and the Island is now in direct communication with Singapore. Population, 1931, 1,059 (males, 973; females, 86). Revenue, 1930, 10,855*l.* (approx.); expenditure, 1930, 4,198*l.* Imports, 1930, 41,256*l.*, chiefly machinery and engineering stores; exports, 1930, 231,666*l.* (approx.), solely phosphate of lime. Tonnage cleared and entered in 1929, 70,516 tons, and in 1930, 68,458 tons; of the latter 21,236 tons were for British, and 47,222 tons for Japanese ports.

The island of **Labuan** lies about 6 miles from the north-west coast of Borneo. It was ceded to Britain in 1846; on January 1, 1907, was incorporated with Singapore, and on December 1, 1912, was created a separate Settlement. Area 35 sq. miles; the population in 1931 was 7,538, including 22 Europeans, 5,014 Malays, and 2,280 Chinese. Capital, Victoria, which has about 1,500 inhabitants. Revenue, 122,374 dollars; expenditure (excluding Government Monopolies), 149,698 dollars. Shipping entered and cleared, 1930, 241,481 tons. Trade, 2½ million dollars.

## THE FEDERATED MALAY STATES.

**Constitution and Government.**—The Federated Malay States of Perak, Selangor, Negri Sembilan, and Pahang, in the Malay Peninsula, are under British protection. The Governor of the Straits Settlements is *ex officio* H.M.'s High Commissioner for these States and the other Malay States in the British sphere.

*High Commissioner.*—Sir Cecil Clementi, G.C.M.G.

*Chief Secretary to Government.*—C. W. H. Cochrane, C.M.G., M.C.S. (Appointed 1930).

The following are the Rulers and Residents of the four States:—

*Ruler of Perak.*—H.H. Paduka Sri Sultan Iskandar Shah, K.C.M.G., K.C.V.O., ibni Idris. *Resident.*—B. W. Elles, M.C.S.

*Ruler of Selangor.*—H.H. Sultan Ala'idin Sulaiman Shah, G.C.M.G., ibni Al-Marhum Raja Muda Musa. *Resident.*—Vacant.

*Ruler of Negri Sembilan.*—H.H. Muhammad, K.C.M.G., K.C.V.O., ibni Al-Marhum Antah, Yang Di-Pertuan Besar, Negri Sembilan. *Resident.*—J. W. Simmons, M.C.S.

*Ruler of Pahang.*—H.H. Al-Mu'tasim Bi'llah Al-Sultan Abdullah, K.C.M.G., ibni Al-Marhum Al-Sultan Ahmad Al-Maazam Shah. *Resident.*—H. G. R. Leonard, M.C.S.

In Perak, Selangor, and Sungai Ujong, which State was subsequently amalgamated with other States to form the Confederation of Negri Sembilan, Residents were appointed in 1874, with a staff of European officers whose duty was to aid the native rulers by advice, and to exercise executive functions. The supreme authority in each State is vested in the State Council, consisting of the Sultan, the Resident, the Secretary to the Resident, and some of the principal Malay chiefs and Chinese merchants. The Residents are under the control of the Chief Secretary and the High Commissioner.

In 1883 the relations of the Straits Settlements with the small Native States on the frontier of Malacca were consolidated. These States were confederated in 1889, under the name of Negri Sembilan (signifying Nine States). In January, 1895, Sungai Ujong (including Jelebu, which had been administered by a Collector and Magistrate under the Resident of Sungai Ujong since 1888) and Negri Sembilan were placed under one Resident; and in July, 1895, a treaty was signed by which the administrations were amalgamated. The new federation, which retains the ancient name of Negri Sembilan, comprises the States of Sungai Ujong, Johol, Jelebu, Rembau and five smaller States. In 1887, by agreement with the Raja of Pahang, the control of his foreign relations, &c., was surrendered to the British Government. This was followed by a further agreement in 1888 with the Raja (now styled Sultan), under which Pahang was taken under British protection, on the same terms as the Protected Native States on the west coast of the peninsula. Pahang is situate on the east coast, within 200 miles by sea from Singapore. In July, 1896, the treaty between the four Protected Native States, Perak, Selangor, Pahang, and Negri Sembilan, and the British Government came into force by which the administrative federation of these States under a Chief Secretary to Government is provided for, and the States agree to furnish a contingent of troops for service in the Colony should His Majesty's Government be at war with any foreign nation.

The laws of each State are contained in enactments passed by the State Councils, up to December, 1909, and from that date, in matters common to the four States, by the Federal Council; the State Councils may still legislate in purely State matters.

The Federal Council was created in 1909 in order to give effect to a desire for the joint arrangement of all matters of common interest to the Federation or affecting more than one State, and for the proper enactment of all laws intended to have force throughout the Federation or more than one State. The Federal Council, as now constituted, consists of the High Commissioner for the Malay States (an appointment held *ex officio* by the Governor of the Straits Settlements) as President, the Chief Secretary to Government, Federated Malay States, the four British Residents, the Legal Adviser, the Financial Adviser, the Principal Medical Officer, the Controller of Labour, Malaya, the Director of Public Works, the Director of Education, S.S. and F.M.S., the Commissioner of Trade and Customs, one additional official member, and twelve unofficial members, who are nominated by the High

## 182 THE BRITISH EMPIRE :—FEDERATED MALAY STATES

Commissioner with the approval of His Majesty the King. The Federal Council generally meets at least three times a year. All Federal legislation is passed by it, and the estimates of expenditure and revenue require its approval.

**Area.**—The areas of these States are approximately :—Perak, 7,800 sq. miles; Selangor, 3,150 sq. miles; Negri Sembilan, 2,550 sq. miles; Pahang, 14,000 square miles; total, 27,500 sq. miles.

**Population.**—Census 1921 : Perak, 599,055 (378,902 males and 220,153 females); Selangor, 401,009 (267,165 males and 133,844 females); Negri Sembilan, 178,762 (119,569 males and 59,193 females); Pahang, 146,064 (87,892 males and 58,172 females); total 1,324,890 (853,528 males and 471,362 females). The population contained 510,821 Malays, 494,548 Chinese, 305,219 natives of India, 5,686 Europeans, and 3,204 Eurasians. The preponderance of males over females is due to the number of Chinese and Indian immigrants. Estimated population, June 1930, 1,722,941. The largest town is Kuala Lumpur (in Selangor) with about 80,000 inhabitants. Births, 1930, 62,839; deaths, 41,594.

**Education.**—In 1930, there were 48 English schools (35 for boys, 13 for girls), with an average enrolment of 13,679 boys and 4,476 girls, and an average attendance of 13,023 and 4,205 respectively, maintained or assisted by the Government; also 1,324 vernacular schools (Malay, Tamil, and Chinese), with an average enrolment of 83,665, and an average attendance of 75,211, which are under the control of the Education Department. The total number of schools (1930) was 1,475 with an average attendance of 92,439. There are many Chinese vernacular schools, of which 90 having an enrolment of 9,711 pupils were assisted by the Education Department. Expenditure on education (excluding buildings) in 1930 was 408,198*l*.

**Justice and Crime.**—The courts in the States are :—(1) The Supreme Court, comprising the Court of a Judge and the Court of Appeal. (2) The Court of a Magistrate of the first class. (3) The Court of a Magistrate of the second class. (4) The Court of a Kathi and the Court of Assistant Kathi. (5) The Court of a Penghulu. The Court of Appeal consists of two or more Judges, the Chief Justice being President. There is a final appeal in civil matters to the Privy Council.

The number of cases of serious crime reported in 1930 was 6,017. The number of prisoners in gaol on December 31, 1930, was 1,384.

The Police Force, with European and Malay officers, consists of an Indian and a Malay contingent. The strength at the close of 1930 was: Gazetted Officers, British and Malay, 71; British Chief Inspectors and Inspectors, 37; Malay and Asiatic Inspectors, 40; Malay subordinate police officers and constables, 2,244; Indians, 1,700; others, 291; total, 4,383.

**Finance.**—The revenue of the States in 1930 was 7,648,769*l*. (1929 revenue, 9,543,285*l*.), and expenditure, 9,621,522*l*. (1929 expenditure, 9,877,114*l*.).

Leading items of revenue in 1930 were :—licences, 445,854*l*.; customs, 2,539,078*l*.; excise, 1,381,765*l*.; fees of court, 595,157*l*.; lands and mines, 537,533*l*.; interest, 385,225*l*.; municipal, 389,118*l*.; posts and telegraphs and telephones, 365,588*l*.; forests, 153,765*l*.; light, water and power, 408,586*l*. Expenditure—police, 390,270*l*.; medical, 654,412*l*.; education, 377,888*l*.; posts and telegraphs, 354,660*l*.; municipal, 392,067*l*.;

public works, 2,078,540*l.*; other departments, 2,550,761*l.*; railways (expenditure on capital account), 859,654*l.*; charges account public debt, 726,633*l.*; miscellaneous services, 749,116*l.*; pensions, 487,522*l.* Public debt on December 31, 1930, 9,355,000*l.*

**Production.**—The staple products are coconuts, rice, rubber, sugar, tapioca, pepper, gambier, nipah and oil palms. The chief industrial enterprises are the cultivation of rubber, and the mining of tin. The Krian irrigation works in Perak irrigate 70,000 acres of rice (padi) land and supply drinking water to the district. The canal is 21 miles long with 16½ miles of branches and 188½ miles of distributory channels. The forests produce many excellent timbers, besides gutta-percha, gums, oils, resins, and canes. In 1929 the total quantity of timber of all kinds taken from the forests, on which payment was made, was 806,333 tons, in addition to a large quantity used free of royalty by the native Malay population and the tin miners. In 1930 the tin export amounted to 62,063 tons, and in 1929 to 67,041 tons. In 1930, 29,527 ounces of gold, and in 1929, 26,782 ounces were produced in the Federated Malay States. Besides gold and tin, many minerals are found, including lead, iron, copper, arsenic, manganese, wolfram, scheelite, plumbago, silver, zinc, and coal, but with the exception of coal, they have not so far been discovered in workable form. The exports of tungsten ore in 1930 were 849 tons. The labour force engaged in mining at the end of 1930 was 80,528.

**Commerce.**—The trade (excluding bullion and specie) was as follows in 1930, with total for 1929 :—

—	Perak	Selangor	Negri Sembilan	Pahang	Total 1930	Total 1929

Bullion and specie imported in 1930, 15,559*l.*; exported 1930, 100,800*l.*

Shipping, 1930. The total number of vessels, exclusive of native craft, entered and cleared at the various ports of the Federated Malay States was 13,021 with a tonnage of 8,485,778. The number of native craft entered

and cleared during the year was 29,100 with an aggregate tonnage of 582,977.

**Communications.**—There were in 1930, 2,780 miles of metalled cart roads, 156 miles of unmetalled roads, and 1,850 miles of bridle roads and paths; also more than 1,202 miles of paths maintained by the Forest Department.

The Government has made, purchased, or leased, the railway systems of the whole peninsula south of the Siamese boundary, including the railway on Singapore Island. It has leased the Johore State Railway (121 miles) extending from Johore Bahru at the southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas the line branches into the West Coast and the East Coast Lines; the West Coast Line runs north-north-west through Negri Sembilan, Malacca, Selangor, Perak and Province Wellesley to Prai—the port opposite Penang Harbour—490 miles from Singapore. From Bukit Mertajam near Prai the line proceeds northwards through the Unfederated States of Kedah and Perlis, to the Siamese frontier station of Padang Besar, 582 miles from Singapore. Through traffic with the Royal State Railways of Siam was opened on July 1, 1918, the distance between Singapore and Bangkok being 1,197 miles. Through services are in operation between Penang and Bangkok, the journey occupying 27 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the north-east coast of the Unfederated Malay State of Kelantan, 327 miles from Gemas.

Through working between the Federated Malay States and Kelantan via the Royal State Railways of Siam commenced on November 1, 1921, and via the East Coast Railway on September 6, 1931.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 13 miles to the Golok River at the Siamese boundary, where it joins the Siamese line running to Haad Yai Junction, on the main Bangkok-Penang line. Branch lines connect the main line with the ports on the west coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connecting the island of Singapore with the Peninsula.

The line is of metre gauge. On the mail trains on the West Coast main line there are sleeping saloons and restaurant cars, and on the East Coast Line sleeping saloons run from Tumpat to Singapore and vice-versa on the through weekly express.

The total route mileage open for traffic is 1,089 miles.

There were, in 1930, 109 post offices and 70 other places for postal business. In that year 41,444,554 postal packets (registered letters, 1,272,345, and parcels, 324,609) were received and delivered. In 1930 there were 3,119 miles of telegraph and telephone lines, and 25,491 miles of overhead wire, of which 22,265 were telephone wires. In addition there were 148 miles of underground cables containing 13,292 miles of wire single line. The net revenue collected by the department amounted to 365,589*l.*, and expenditure 455,728*l.* Savings Banks: 44,980 depositors and 524,928*l.* deposits on December 31, 1930.

**Money, &c.**—The current money consists of Straits Settlements dollars with subsidiary silver and copper coins. In February, 1906, the value of the dollar was fixed at 2*s.* 4*d.* or 60 dollars = 7*l.* Currency notes

and bank notes also circulate, and the sovereign is legal tender for any amount at the above rate. Weights and measures (as well as currency) are as in the Straits Settlements.

## THE MALAY STATES NOT INCLUDED IN THE FEDERATION.

The Malay States not included in the Federation are five in number, namely, Johore, Kedah, Perlis, Kelantan, and Trengganu.

The relations of Johore with Great Britain are defined by a treaty dated December 11, 1885; and, by an amendment to this treaty made on May 12, 1914, the Sultan agreed to accept, and to act upon the advice of, a British officer called the General Adviser. The Sultan is assisted in the administration of the State by an Executive Council, and by a Legislative Council consisting of official and unofficial members.

The rights of suzerainty, protection, administration and control of the other four States were transferred from Siam to Great Britain by the Anglo-Siamese treaty of March 10, 1909. In all four States the Rulers are assisted in the administration by State Councils, and by British Advisers appointed by the British Government.

In these States the currency, weights and measures are the same as in the Straits Settlements and the Federated Malay States. Their trade is almost entirely carried on with the Straits Settlements.

The religion of the Malays is Mohammedanism.

**Johore** (area 7,678 square miles, population in 1930, 343,063, of whom 206,710 were Malays, 112,142 Chinese, and 20,724 Indians) lies at the southern extremity of the Malay Peninsula. Births registered (1930), 20,406; deaths, 14,172. There were (1930) 6 English schools and 129 vernacular schools.

Revenue (1930), 14,634,966 dollars (from Customs, 4,142,845 dollars, land 2,368,973, licences 4,025,757); expenditure, 16,071,946 dollars. Imports (1930), 47,125,210 dollars (animals, food, drink and tobacco, 22,954,141; raw materials and articles mainly unmanufactured, 2,633,669; articles wholly or mainly manufactured, 21,523,650; coin and bullion, 13,750; sundries, nil). Exports, 59,714,461 dollars (rubber, 39,259,867 dollars). Rubber output, 1,522,798 pikuls.

At the end of 1930, 785 miles of metalled road had been constructed. The railway from Penang to Singapore traverses Johore for a distance of 120 miles. The Johore section has been leased to the Federated Malay States Government for a term of years. Rubber estates are situated on either side along practically the whole length, and thus, with the help of roads and navigable rivers, good communication is available. A causeway across the Straits of Johore and connecting Johore with the island of Singapore was opened to railway traffic in October, 1923, and to vehicular traffic in June, 1924.

An efficient medical service and thirteen public hospitals are maintained by the Government. Police force, end of 1930, 1,280.

The Postal revenue (1930) was 819,721 dollars. Letters, papers and parcels dealt with, 4,405,243.

*Ruler.*—His Highness Sultan Ibrahim, G.C.M.G., K.B.E.

*General Adviser.*—R. O. Winstedt, C.M.G. (acting).

**Kedah**, on the west coast of the Peninsula, and north of Province Wellesley and Perak, has an area of 3,648 square miles. The population (census 1931) is 429,645, of whom 286,722 are Malays, 78,381 Chinese, 51,027 Indians, 413 Europeans, 101 Eurasians, and 13,001 other races. The capital is Alor Star on the Kedah River, about 70 miles from Penang by sea, and 50 by rail or road. Owing to the Sultan's ill-health, the head of the Government is the Regent. There are (1931) 52 Europeans in the Government service. The police force had a strength (May, 1931) of 769 men (principally Malays). There were in May, 1931, 89 Government schools (about 11,648 pupils), 14 telegraph offices, and 19 post offices. A telephone system extends throughout the State, the wire mileage in 1931 being 2,291. The railway connecting the Federated Malay States and Siam

passes through the State. A metalled road (26 miles) connects Alor Star with Perlis, and (29 miles) with the Senggora frontier (Siam), and a metalled road (44 miles) connects it with Province Wellesley. Another metalled road (7 miles) connects Baling with Upper Perak in one direction and with Province Wellesley in the opposite direction. The total mileage of metalled road (1931) is 886. 252 miles of canal were maintained in May, 1931. The revenue of the State for the year 1930-31 (Mohammedan year A.H. 1349) was 5,086,692 dollars, including Customs, 1,458,826; lands, 795,203; and land sales, 107,432 dollars; and the expenditure, 7,198,036 dollars. Public debt, May, 1931, nil. The principal produce of North Kedah is rice. There are rubber (export, 1931, 36,537 tons), coconut, and tapioca estates in South Kedah. Several steamers ply between Penang and the various ports of Kedah. Kedah internal trade (1930-31): imports, 8,703,572 dollars; exports, 15,063,689 dollars. Postal and telegraph revenue, 1930-31, 121,156 dollars; expenditure, 245,943 dollars. Postal articles dealt with, 2,937,350.

*Ruler*.—H. H. Sultan Sir Abdul Hamid Halim Shah, K.C.M.G., ibni Almerhum Sultan Ahmad Tajudin Mukarram Shah (succeeded in 1881).

*Regent*.—H. H. Tunku Ibrahim, C.M.G., C.V.O.

*British Adviser*.—J. D. Hall, M.C.S. (acting).

Perlis, on the west coast of the Peninsula and north of Kedah, has an area of about 316 square miles and a population (1931 census) of 49,297. Malays numbered 40,021 of the population, Chinese 6,500, Indians 972, and other races 1,804. Police force (1930) 79 N.C.O.'s and men. 19 boys' and 4 girls' schools were maintained in 1929 with about 2,100 pupils. The principal products are rice, tin, and coconuts. There are guano deposits. There are 80½ miles of metalled roads and 2½ miles of paths and gravelled roads in the State. The revenue for A.H. 1348 (1929-30) was 487,436 dollars (customs 181,656), and the expenditure 573,738 dollars. Public debt, 1930, nil.

*Ruler*.—H. H. Raja Syed Alwi, C.B.E.

*British Adviser*.—M. C. Hay, M.C.S.

Kelantan, on the east coast of the Peninsula, has an area estimated at 5,713 square miles and a population (1931 census) of 302,622, including 17,610 Chinese. Kota Bharu, the capital, has a population of about 15,490. There are 60 Government elementary schools in the State. The High Court, the Central Court, and the Small Court are at Kota Bharu, and there are District Courts at Kuala Krai, Pasir Puteh, Pasir Mas, and Tumpat respectively. Police force, 1930, 434. The revenue of the State in 1930 amounted to 2,182,905 dollars (licences, excise, &c., 113,198 dollars; customs, 1,147,475 dollars; land revenue, 536,348 dollars), and the expenditure to 2,426,079 dollars. Public debt (1930) 4,980,684 dollars.

The chief industry is agriculture. About 484,388 acres were under cultivation in 1930. Chief products: rice (181,493 acres), coconuts (59,200 acres), rubber (92,536 acres). Pepper, tapioca, sugar-cane, and maize are grown in smaller quantities for local consumption. The jungle which covers a large part of the State produces some serviceable timber, resin and rattans and bamboos. The State supports cattle (100,837 in 1930), buffaloes (29,877 in 1930), sheep, goats, and poultry. Numerous estates are owned by British companies. Mineral resources are said to comprise gold, galena, and tin, but the existence of these metals in payable quantities has not been proved. The principal manufacturing industries are silk-weaving, boat-building, and brick-making. In 1930, total exports, 4,189,374 dollars; total imports, 6,276,226 dollars (1929, 7,983,889 and 7,522,954 dollars respectively). Chief exports, 1930: betel-nuts, 210,520 dollars; fish, 109,641 dollars; copra, 555,419 dollars; para rubber, 2,919,143 dollars. Chief imports, 1930: fish, 44,343 dollars; rice, 1,382,400 dollars; wheat and flour, 70,578 dollars; milk, 201,152 dollars; sugar, 120,494 dollars; tobacco, 468,287 dollars; petroleum, 155,156 dollars; textiles (all kinds), 576,561 dollars; timber, 81,427 dollars; cement, 148,352 dollars; machinery and metal goods, 32,613 dollars; motor vehicles, 112,584 dollars; drugs and medicines, 85,805 dollars; benzine, 263,631 dollars.

Tonnage of steamships inwards and outwards, 1930, 141,776 tons. 5,206 fishing and other boats are registered. There is regular steamship communication with Bangkok and Singapore. The principal roads are the Kota Bharu-Pasir Puteh road and the trunk road from Kota Bharu to Kuala Krai, and there are others extending a few miles from Kota Bharu. The metalling of these roads is not yet completed. Communication inland is by the rivers. There is railway communication between Tumpat (on the coast) and Kuala Gisi (81 miles inland). There is also a line to the Siamese border, on which a daily service is run in connection with the Siamese trains to the Kedah boundary, and thence with the Kedah service to Penang and the Federated Malay States. Kota Bharu is in direct telegraphic communication with Bangkok and Penang (via Siam), and possesses a limited telephone service. There were (1930) 6 post offices and 9 sub-post offices in the State.

*Ruler*.—H. H. Sultan Sir Ismail, K.C.M.G.

*British Adviser*.—A. S. Haynes, M.C.S. (Captain T. P. Coe, M.C., V.D., M.C.S., acting).

Trengganu, with an area of about 5,500 square miles, and a population, at the census 1931, of 179,064, lies on the east coast between Pahang and Kelantan. The capital is Kuala Trengganu, with a population of 13,972. There are 20 vernacular schools (2,118 pupils enrolled in A.R. 1349, average attendance 1,701, teachers 65), 1 Government English school (88 pupils) and 1 Chinese school (124 pupils, teachers 6). Police force 300 in 1349. There are 184 miles of road in use, and a 66 mile trunk road connecting Kuala Trengganu with Kelantan is nearly completed, and 55 miles are opened to light traffic. There are telephone exchanges at Kuala Trengganu, Kemaman and Besut. There is telegraphic communication with other parts of Malaya. There are no railways, except 2 or 3 light railways on mines, and communication with the interior is by rivers and good native paths. Steamers connect regularly with Singapore and Bangkok, and locally-built motor-boats maintain passenger services along the Trengganu coast. The industries are similar to those of Kelantan, and the country is of the same general character.

Revenue (1349, May 29, 1930, to May 17, 1931), 1,235,230 dollars, and expenditure, 1,445,708 dollars. Exports in 1930 totalled 5,227,489 dollars. Imports in 1930 totalled 4,799,763 dollars. Debt (1349), 3,250,000 dollars. Chief exports: Dried fish, 1,329,201 dollars; para rubber, 933,461 dollars; tin ore, 906,923 dollars; hematite, 374,920 dollars; copra, 213,034 dollars; arecanuts, 193,455 dollars; and manganese, 165,568 dollars. Chief imports: rice, 765,838 dollars; tobacco, cigars and cigarettes, 392,309 dollars; cotton and silk stuff, 332,300 dollars; sugar, 215,242 dollars; petroleum, 207,592 dollars; tinned milk, 113,574 dollars.

**Ruler.**—H. H. Sir Suleiman Badaru'l-alam Shah, K.C.M.G. He is assisted by a State Council.

**British Adviser**—G. L. Hum (acting).

## MANDATED TERRITORY IN ASIA.

### PALESTINE.

THE natural and historic boundaries of Palestine run from the desert on the east, along the slopes of Mount Hermon over to the Litani on the west, where the Lebanon and Anti-Lebanon first break into a series of elevated

plateaux, and thence over to the Mediterranean coast, and on the south from the Gulf of Akaba across the Desert of Sinai.

For the present political boundaries, see THE STATESMAN'S YEAR BOOK, 1923, p. 185.

**Government.**—After its conquest in 1917-18, by the British Forces, the country remained under British Military Administration till July 1, 1920, when a Civil Administration was set up.

*High Commissioner and Commander-in-Chief.*—Lieut.-General Sir Arthur Grenfell Wauchope, K.C.B., C.M.G., C.I.E., D.S.O. (Appointed Nov. 1, 1931.)

*Chief Secretary.*—Mark Aitchison Young, C.M.G. (appointed July 17, 1930).

The country is administered by Great Britain under a Mandate, which was passed by the Council of the League of Nations on July 24, 1922, and came officially into force on September 29, 1923. This provides for the Balfour Declaration of November 2, 1917, to the effect that 'His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country.'

*Constitution.*—On September 1, 1922, a new constitution was promulgated. It provides for the appointment of a High Commissioner and Commander-in-Chief and an Executive Council.

A Legislative Council will replace the Advisory Council and have authority to pass such Ordinances as may be necessary for the peace, order, and good government of Palestine, provided (1) that no Ordinance shall restrict complete freedom of conscience and the free exercise of all forms of worship, save in so far as is required for the maintenance of public order and morals, or tend to discriminate in any way between the inhabitants of Palestine on the ground of race, religion, or language; (2) that no Ordinance shall take effect until either the High Commissioner or His Majesty has assented thereto; (3) that the High Commissioner may reserve any Ordinance for the signification of His Majesty's pleasure, and shall so reserve any Ordinance which concerns matters dealt with specifically by the provisions of the Mandate; and (4) that His Majesty may disallow any Ordinance to which the High Commissioner may have assented within one year of the date of the High Commissioner's assent.

In exercise of the powers vested in him by the Palestine (Amendment) Order in Council 1923, the High Commissioner has appointed an official Advisory Council composed of the heads of the principal Government Departments and the District Commissioners of the Northern and Southern Districts. Owing to the abstention from the elections of considerable numbers of the Arab inhabitants, the Legislative Council under the new constitution has not yet been formed, and the Advisory Council will remain in being until such time as the election of a Legislative Council becomes possible.

All Ordinances are laid before the official Advisory Council and made public, as Bills, in the Official Gazette, for one month, before promulgation.

Regulations were made by the High Commissioner in 1927 for the organisation of the Jewish population of Palestine as a religious community and its recognition as such by the Government. The Jewish community thus enjoys autonomy for its internal affairs, religious, cultural and communal, and has power to levy rates on its members. The organs of the community are a Chief Rabbinate and local rabbinical offices, an Elected Assembly, a General Council, which is elected by the Assembly and which represents the community in its dealings with the Government, and local committees. A number of Jews have opted out of this community.

The British Government and Palestine Administration recognise the Jewish Agency (consisting both of Zionists and non-Zionists), which in Palestine is represented by the Palestine Jewish Agency, as the Agency of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home.

There is a Moslem Supreme Council to control Moslem religious affairs. English, Arabic, and Hebrew are the official languages of the country.

**Area and Population.**—Palestine under British Mandate is about 10,000 square miles in extent. The population, taken by official census on November 18, 1931, was 1,035,154, of whom 759,952 were Moslems (73 per cent.), 175,006 Jews (17 per cent.), 90,607 Christians (8 per cent.), and 9,589 others.

The country is at present divided into three districts: Southern (Jaffa), Northern (Haifa) and Jerusalem.

The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered on December 9, 1917. Its population in 1931 was 90,407. The population figures for the other principal towns were: Jaffa, 51,366; Tel-Aviv, 46,116; Haifa, 50,533; Gaza, 17,069; Nazareth, 8,719; Nablus, 17,171; Safed, 9,446; Tiberias, 8,633; Hebron, 17,532; Ramleh, 10,417; Bethlehem, 6,817; Lydda, 11,249; Acre, 7,893. Total immigrants (1931), 5,533, of whom 4,075 were Jews and 197 British police. Total recorded emigrants (1931), 1,346, of whom 666 were Jews.

There are some 750 Arab villages and a considerable number of Arab tribes, and three German Templar (Christian) settlements, Wilhelma, Sarona and Neuhardtshof, apart from those in the three principal towns.

The Jewish Settlements are grouped in four districts, namely, in Judea 37; in Samaria 13; in Lower Galilee 49; in Upper Galilee 9. The total population of these settlements is now about 46,000. More than 30 of them are built on land belonging to the Jewish National Fund, which was established by the Zionist Organisation for the purpose of acquiring land to remain the property of the Jewish people, and were founded with the assistance of the *Keren Hayesod* (Foundation Fund), also created by the Zionist Organisation. The total area of the Jewish settlements exceeds 1,200,000 dunums (4½ dunums equal one acre). The local affairs of the smaller Jewish settlements are controlled by *Vaadim* or Councils elected by the male and female residents who own registered holdings or pay taxes. The larger villages, Arab and Jewish, are, for internal order and rates, administered by Local Councils, constituted under Ordinance, which exercise modified municipal powers. Satisfactory progress is being maintained in cadastral survey and in land settlement.

Births and deaths for recent years are given in the following table :—

Year.	Estimated <sup>1</sup> Population (mid-year).	No. of Births.	No. of Deaths.	Infantile Mortality (per 1,000 births).
1927	778,369	29,193	21,806	200·5
1928	794,516	42,899	23,170	188·3
1929	816,064	41,742	21,634	186·5
1930	843,132	44,587	19,513	154·3

<sup>1</sup> Excludes nomad population, estimated at 103,000 in 1922.

**Religion.**—Jerusalem, being a Holy City for three Faiths, is the seat of a number of Prelates and religious bodies. There are three Christian Patriarchs, Orthodox, Latin and Armenian having the style of 'Beatitude,' and, in addition to the Anglican Bishop in Jerusalem, a Jacobite and a Coptic Bishop.

The Moslems have the Mufti of Jerusalem, who is President of the Moslem Supreme Council, and the Jews have two joint Chief Rabbis, one for the Sephardim, the other for the Ashkenazim. These three dignitaries have the style of 'Eminence.' In Nablus there is a Samaritan High Priest.

**Education.**—The schools maintained in 1931 by the Government numbered 308, of which 12 had secondary sections, and contained 24,288 scholars, the great majority of whom were Moslems. In the Government Training Colleges for teachers there were 71 men and 64 women students. Technical education is being carried out in some of the Government town schools. A Law School exists in Jerusalem, in which lectures are given in the three official languages.

The Christian and Jewish Communities provide, the former to a very large extent, and the latter almost entirely, for the education of their own children.

The Jewish Agency, through the Department of Education attached to the Palestine Zionist Executive, controlled, in 1931, 260 schools attended by 22,070 pupils with 1,031 teachers, and other Jewish bodies controlled 117 schools attended by 11,457 pupils, making a total of 377 Jewish schools attended by 33,527 pupils. These institutions include secondary schools in Jerusalem, Tel-Aviv and Haifa, Teachers' Training Colleges (General, Orthodox, Women's and Kindergarten), Schools of Music in Jerusalem, Jaffa, and Haifa, Agricultural Schools, an Arts and Crafts Institute (Bezalel), Evening Classes, and a Technical College at Haifa.

There were 156 Christian Schools, including Orthodox, 27 schools with 2,504 pupils; Catholic, excluding the Latin and Greek Patriarchates, 77 schools with 9,229 pupils; Protestant, 50 schools with 4,281 pupils; miscellaneous, 2 schools with 85 pupils.

There are also 137 private Moslem schools mainly maintained by local committees; these provide for about 7,319 children. Two of these schools include secondary classes.

Non-Government schools receive a capitation grant-in-aid from the Department of Education. The schools of the Jewish Agency receive a block grant of £P19,190 a year.

The Hebrew University on Mount Scopus, Jerusalem, was inaugurated on April 1, 1925, and has 204 students. The new library building houses 242,513 books.

**Antiquities.**—A new Antiquities Ordinance was passed in 1929 to give better effect to the provisions of the Mandate as regards excavation and preservation of antiquities. During the year 14 expeditions conducted excavations under licences issued by the Government. The Department of Antiquities began the clearance of the faubourg of the Castle of Athlit and undertook several minor works of conservation as well as the issue of a periodical called the 'Quarterly of the Department of Antiquities, Palestine.' The new Museum presented by Mr. John D. Rockefeller, Jun., is nearing completion.

**Justice.**—The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and *Waqfs* or charitable endowments, and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub-district, and in the larger towns such as Jerusalem, Jaffa, and Haifa, two such courts.

There are four District Courts, each composed of a British President and two Palestinian judges. They serve respectively the sub-Districts of Jerusalem,

Hebron, and Beersheba; Jaffa and Gaza; Nablus, Jenin, Tulkarem, and Nazareth; and Haifa, Acre, Tiberias, and Safed. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death, and civil cases outside the jurisdiction of a magistrate; it also hears appeals from the decisions of magistrates both in civil and in criminal cases. Crimes punishable with death are tried by the Court of Criminal Assize, which consists of the Chief Justice or senior British Judge of the Supreme Court sitting with the District Court.

The highest Court in Palestine is the Supreme Court, which is composed of a British Chief Justice and one other British judge and four Palestinian judges. The Court sits in two forms: (1) as a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize; (2) as a High Court of Justice, in which capacity it hears applications of the nature of habeas corpus and of mandamus proceedings.

The Court of Appeal is composed normally of three judges, while the High Court may sit with two judges. In either case a British judge presides.

A Bench of honorary magistrates has been established in Jerusalem, Jaffa, and other towns, who try contraventions for which the maximum penalty does not exceed £P5 fine and 15 days imprisonment. In addition to the bench of honorary magistrates, a stipendiary magistrate has been appointed to try such contraventions in the Municipal Areas of Jerusalem and Jaffa.

Special arrangements exist in the Beersheba sub-district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. The District Court of Jerusalem visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases. Liaison Boards have recently been established for the settlement of disputes between Beduin tribes of Palestine and those of adjacent countries.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Qadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Palestinian and other Eastern Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Orthodox and the Latin), have similar jurisdiction to that of the Jewish courts.

Questions of jurisdiction as between the Civil and Religious Courts are decided by a Special Tribunal composed of two British judges of the Supreme Court and the President of the Highest Court of the Religious Community concerned.

The police establishment (including municipal police) at December 31st, 1930, was 143 officers and 1,937 other ranks, in addition to the British Police, consisting of 9 British officers and 631 other ranks stationed at Jerusalem, Jaffa, Haifa and Nablus.

1,803 heinous crimes were reported in 1930, and 7 death sentences were carried out.

**Finance.**—For the year ending December 31st, 1930, the revenue was £P2,389,546, and the expenditure £P2,536,505; (1929, revenue, £P2,323,572, expenditure, £P2,140,032.)

The main heads of revenue for 1930 were: customs, £P991,688; port and marine, £P9,703; licences, taxes, etc., £P740,664; fees of court or office, etc., £P248,371; posts and telegraphs, £P220,384; revenue from Government property, £P14,618; interest, £P87,485; miscellaneous, £P28,465. Public debt amounted to £P4,475,000 in 1930.

**Defence.**—Palestine falls under the Middle East Command of the R.A.F. Two squadrons of aircraft and four sections of armoured cars are available for Palestine and Transjordan. Two battalions of infantry are distributed over various centres in Palestine. The Transjordan Frontier Force, the cost of which is borne by the Imperial Treasury and Palestine Government, has its headquarters at Zerka, Transjordan, and detachments at Samakh, Beisan, and at certain other stations in Palestine. Its actual strength (excluding reserve of 84 other ranks) on December 31, 1930, was 46 officers (20 British) and 850 other ranks. The force is partly mechanised and partly mounted on horses and camels.

**Production and Industry.**—Palestine comprises four zones of country. On the west, along the shores of the Mediterranean, which are deficient here in good natural harbours, is the maritime plain, which varies in width from 15 to 20 miles at Gaza to about 2 miles at Acre, and at the Plain of Esdraelon stretches for a considerable distance into the interior, and separates the highlands of Galilee from those of Samaria and Judæa. From the coastal plain the country rises into a plateau intersected by deep wadis or valleys, which drop steeply to the east to the third zone, formed by the great depression down which the river Jordan runs to the Dead Sea, and which is prolonged for another 100 miles to the Red Sea as the Wadi Araba. This depression reaches a depth below sea-level of 2,600 feet in the deepest portion of the Dead Sea, the surface of which is about 1,300 feet below sea-level. The Dead Sea is 46 miles long and has an average width of  $8\frac{1}{2}$  miles; it receives the waters of the Jordan and of six other rivers and has no outlet, the surplus being carried off by evaporation. It is intensely salt, with a specific gravity one-sixth greater than water, and with 24 per cent. of salt. East of the Jordan Valley the country rises again steeply to a plateau and merges into the Arabian desert.

Palestine is essentially an agricultural country. In 1929 the area under British Administration, exclusive of Trans-Jordan, produced:—Wheat, 85,064 tons; barley, 51,972 tons; durra, 31,000 tons; olives, 224 tons; olive oil, 3,178 tons; lentils, 1,397 tons. The tobacco crop in 1929 amounted to 1,183,195 kilos (334,455 kilos in 1928). In 1930 there were in the country 146,397 cattle, 252,773 sheep, 440,132 goats, 25,321 camels, 13,825 horses, 76,858 donkeys, and 5,247 buffaloes.

Limestone is found all over the country; sandstone abounds on the coast; gypsum of good quality is found at Mount Usdum and at Mount Gipsia near Melhamia (Galilee). Rock salt abounds in the Jordan Valley and on the shores of the Dead Sea, where also sulphur is obtainable. The Dead Sea contains cooking salt, carnallite, and bromide. A concession for the exploitation of these minerals was granted in 1929. There are medicinal springs near Tiberias and also at El Hamme, for both of which leases have been granted.

The principal industries of export importance are those of wine-making, especially in the Jewish villages Zichron Jacob, Rishon le Zion, and Petach-Tikvah; soap-boiling in Nablus, Jaffa and Haifa; olive oil in Nablus, Acre, and the district round Jaffa. Oranges, grown chiefly in the Jaffa district, are exported to England and Europe. The orange crop exported in

1930 was 2,857,041 cases. The wine production was 4,125,680 litres. Bananas are being successfully grown round Jericho.

According to an industrial census, there were in Palestine in May, 1928, 3,505 industrial establishments (mostly small), employing 18,000 work-people; a sum of 3·5 million pounds was invested on them. There were 9 tobacco factories working in 1930 with an aggregate output of 507,886 kilograms.

Further progress has been made in the reservation of state forests; nearly 821,262 dunums have been reserved out of a total area of 1,500,000 dunums of natural forest land. Extensive planting of timber, fruit and shade trees has been effected by Government and private agency. Approximately three million trees were planted during 1929—both timber trees and fruit trees, including vines, oranges and olives; 21 nurseries have been maintained during 1929 for the free issue and sale of stock to the public and the provision of material to Government plantations.

**Commerce.**—Trade for 5 Calendar years was as follows:—

The principal articles of export were: oranges, £P857,223; laundry soap, £P204,876; water melons, £P83,625; wines, £P31,411; almonds, £P27,670; durra

and maize, £P151,716; sesame, £P36,222; barley, £P55,749; hides and skins, £P28,151.

Exports to the United Kingdom (including Transjordan) (Board of Trade returns), 1931, 1,412,115*l.*; imports from the United Kingdom, 1931, 793,908*l.*

**Shipping and Communications.**—The most important ports of Palestine are Jaffa and Haifa; the two ports of lesser significance are Acre and Gaza. For the calendar year 1930, 813 steamers, totalling 1,895,540 tons, and 1,794 sailing vessels, totalling 40,454 tons, arrived at Palestinian ports. Palestine possesses no shipping of its own, other than some small sailing vessels and power launches. A modern harbour is under construction at Haifa.

A regular passenger service to Palestinian ports is provided by some 30 shipping lines.

The total length of the Palestine railways is 774 miles, divided as follows: standard gauge (4' 8½")—Kantara-El Arish-Rafa-Lyddá-Tulkarem-Haifa, 259½ miles; Jaffa-Lyddá-Jerusalem, 54½ miles; Safrieh-Sarafand, 2½ miles; Kafr Jinis-Beit Nabala, 2½ miles; Ras El Ain-Petah Tikva 4½ miles; narrow gauge (3' 6") : Haifa-Samakh, 54½ miles; Nassib South Mudawara, 282½ miles; Acre Junction-Acre, 11 miles; Afule-Jenin-Nablus-Tulkarem, 61 miles. The section Kantara to Rafa, known as the 'Sinai Military Railway' (125 miles), is being worked by the Palestine Railways on behalf of the Air Ministry. There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, and Suez and other parts of Egypt, railway vehicles being sent across the canal by means of a truck transporter.

East of Haifa the Palestine Railways system terminates at Samakh, and the section Samakh-Deraa (Junction of the Hejaz Railway to Medina) is operated by the Hejaz Railway, which in turn is controlled by the Governments of the territories through which it passes. Steam rail cars of the Sentinel-Cammell type have been introduced on certain sections of the railway with success. Goods traffic handled during 1930 was 1,186,074 tons.

There are 445 miles of metalled roads in Palestine extensively used by motor transport, and in addition, many hundreds of miles of tracks passable or wheeled traffic of all kinds during dry weather.

The Imperial Airways, Ltd., have established an aerodrome at Gaza, from which passengers and mails are carried to Egypt and Iraq once weekly in each direction. Weekly flying boat services are also operated between Alexandria, Haifa and Cyprus, and Athens and Tiberias.

**Posts and Telegraphs.**—In 1930 there were conveyed 11,763,770 letters, 932,080 postcards, 6,194,900 printed communications and samples, 163,987 parcels, and 264,373 telegrams. Length of telegraph and telephone trunk lines, 13,152 km.; local lines, 13,807 km. Number of telephone subscribers, 2,821.

**Banking and Currency.**—The most important bank in Palestine is Barclay's Bank with branches at Jerusalem, Jaffa, Haifa, Nazareth, Tel-Aviv, Nablus, and Acre. The Anglo-Palestine Bank has its head office in Jaffa, with branches in Jerusalem, Tel-Aviv, Haifa, Tiberias, and Safed. The Banco di Roma has branches in Jerusalem, Jaffa and Haifa. The Ottoman Bank has branches in Jerusalem, Jaffa, Haifa, Nablus, and Amman (Transjordan).

There are also established, in addition, a Jewish Workers' Bank, several

Co-operative Credit Institutions, a Building Loan and Saving Association, a Central Bank of Co-operative Institutions and other savings societies.

The standard of currency from November 1, 1927, is the Palestine pound (£P), divided into 1,000 mils, and equivalent in value to the pound sterling. Palestinian notes, consisting of £P½, £P1, £P5, £P10, £P50, £P100 notes, are legal tender for any amount. Silver coins, 720 fine, of 100 and 50 mils, weighing 180 and 90 grains respectively, nickel of 20, 10 and 5 mils, and bronze of 2 and 1 mils are used. The 2-mil coin is about equal in value to the United States cent. Gold coins are not being issued for the time being. About £P2,500,000 is in circulation.

The metric system is followed by the Government and local authorities, but the local weights and measures are still largely employed by the public.

**Transjordan.**—This territory, which roughly corresponds to the area of the old Seljuk Kingdom of Kerak and of the Lordship of Montreal or Oultrejourdain in the Latin Kingdom of Jerusalem, is governed by a local Arab Administration under His Highness the Amir Abdullah Ibn Hussein, K.C.M.G., G.B.E., born in Mecca, 1882, second son of ex-King Hussein of the Hijaz and elder brother of King Feisal of Iraq, who became its ruler in April 1921 and is assisted by an Executive Council. The country is covered by the Palestine Mandate, but the clauses relating to the establishment of a national home for the Jews are expressly excluded from operation therein. In April 1923 a Declaration was made that, subject to the approval of the League of Nations, His Majesty's Government will recognise the existence of an Independent Government in Transjordan, under the rule of His Highness the Amir Abdullah, provided such government is constitutional and places His Britannic Majesty's Government in a position to fulfil its international obligations in respect of the territory by means of an Agreement to be concluded between the two Governments. This agreement was signed in Jerusalem on February 20, 1928, and having been accepted by the Legislative Assembly set up under Article 11 was ratified by the High Contracting Parties on October 31, 1929. The Organic Law has been published, and the Legislative Council assembled for the first time in April 1929. In 1928 a separate commission was issued to the High Commissioner for Palestine appointing him High Commissioner for Transjordan; he is thus High Commissioner for both areas.

For the frontiers of Transjordan, see the STATESMAN'S YEAR BOOK, 1929, pp. 191-2.

The population is probably about 260,000. Of these, 220,000 are Arab Moslems, 30,000 Arab Christians; the remaining 10,000 are Caucasian elements (chiefly Circassian) settled by the Turks in Transjordan some 45 years ago following the Turco-Russian war. Most of the towns and larger villages have schools, and the Budget provision for education in 1929-30 is 22.350%. The Arab Legion, which comprises Gendarmerie, Police and Prisons, and Passport personnel, and a specially recruited Desert Patrol, is a body of 990. Detachments of the Royal Air Force are located at Amman and Maán, and there is a military force of some 700 men raised in Palestine and Transjordan, but officered largely by British Officers stationed in the country. This Force is known as the Transjordan Frontier Force. The country to the east of the Hedjaz Railway line is largely desert, but to the west of this line is potentially of high agricultural value. The resources of the country are agricultural and

pastoral products, while several antiquity sites, of which the most notable are Amman, Jerash, Kerak and Petra, are becoming an essential part of the itinerary of Eastern tourists. There are also phosphate deposits (undeveloped, though examined). Potash is found in the Dead Sea, and possibly there is oil in the southern area. A metalled road, fit for motor traffic, connects Amman with Jerusalem while unmetalled roads have been constructed making motor traffic possible from Amman to all the chief towns in the country. The road running from Amman to Maan has been continued to Aqaba, and, from this main road, branches run to Madeba, Kerak, Tafileh and Wady Musa (Petra). The towns of Jerash, Irbid, Ajloun, Kufrinji, Remte and Deraa, the last named being in Syrian territory, are joined by good roads to Amman. From Irbid a branch runs to Jisr Mejamie and Jisr Sheikh Hussein on the Palestine boundary. An alternative route from Amman to Deraa may be taken, the road running via Zerka and Mafrak. From this latter, a branch road runs to Remte, El Hosh and Irbid. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman, and from Azrak cars can pass across the desert via Rutba to Baghdad. The Hejaz Railway from Deraa to Kalaat Mudawara runs, with the exception of the first few miles, through Transjordan territory. South of Maan, however the Railway is in disrepair. The Cairo-Baghdad air route traverses the country from west to east, and there is an aerodrome with a Royal Air Force detachment at Amman, while at Zizia there is a landing ground used by the Imperial Airways Co. as a fuel replenishing station. The estimated revenue of the country in 1930-31 is 368,996*l.* including reimbursements and an estimated Grant in Aid from the Imperial Government of 103,000*l.* Great Britain is represented by a British Resident subordinate to, and the agent of, the High Commissioner for Transjordan. The official language of the country is Arabic.

*British Resident:* Lt.-Col. C. H. F. Cox, C.M.G., D.S.O.

### BRITISH EAST AFRICA.

British East Africa consists of a large area on the mainland, together with the Islands of Zanzibar and Pemba. For details as to international agreements, &c., with regard to the British sphere in East Africa, *see* the STATESMAN'S YEAR BOOK for 1907, pp. 216 and 217.

#### KENYA COLONY AND PROTECTORATE.

**Government.**—The Kenya Colony and Protectorate extend, on the Indian Ocean, from the Uмба River to Dick's Head, and inland as far as Lake Victoria and Uganda. The Protectorate consists of the mainland dominions of the Sultan of Zanzibar, viz., a coastal strip of territory ten miles wide, to the northern branch of the Tana River; also Kau, Kipini, and the Island of Lamu, and all adjacent islands between Rivers Uмба and Tana, these territories having been leased to Great Britain in 1895 for an annual rent of 10,000*l*. The colony and protectorate were formerly known as the East Africa Protectorate. On April 1, 1905, this was transferred from the authority of the Foreign Office to that of the Colonial Office, and in

November, 1906, the Protectorate was placed under the control of a Governor and Commander-in-Chief and (except the Sultan of Zanzibar's dominions) was annexed to the Crown as from July 23, 1920, under the name of 'The Colony of Kenya,' thus becoming a 'Crown Colony.' The territories on the coast rented from the Sultan of Zanzibar were proclaimed as the Kenya Protectorate.

A treaty was signed (July 15, 1924) with Italy under which Great Britain ceded to Italy the Juba River and a strip from 50 to 100 miles wide on the British side of the river. Following on ratification of the treaty, cession took place on June 29, 1925.

In 1906 Executive and Legislative Councils were constituted, the former consisting of 4 members, in addition to the Governor, the latter of 8 official and 4 unofficial members. In 1919 the Legislative Council was enlarged to consist of 11 elected representatives of the European community, three nominated members, two representing the Indian population and one the Arabs, and a sufficient number of official members to give a majority in the Council. A new constitution was adopted in December, 1925, under which the Executive Council consists of 11 members, in addition to the Governor, while the Legislative Council consists of 11 elected European members, 5 elected Indian members, 1 member nominated to represent African interests, 1 elected Arab member, and a sufficient number of *ex-officio* and nominated official members to give to these a majority. Until such time as five Indian members have been elected, as many Indian members may be nominated as will make the number of Indian members, including elected Indian members, five in all. The constituencies for Europeans, Indians and Arabs are separated from one another (*i.e.* communal franchise). Legislation is by Ordinances made by the Governor with the advice and consent of the Legislative Council. In 1908 foreign consular jurisdiction in the Zanzibar strip of coast was transferred to the British Crown.

There are 9 provinces, which are as follows: Coast (capital Mombasa), Ukamba (capital Machakos) Kikuyu (capital Nyeri), Nyanza (capital Kisumu), Northern Frontier Province (capital Isiolo), Nzoia (capital Eldoret), Turkana (capital Kapenguria), Rift Valley (capital Nakuru), and Masai (capital Ngong).

**Area and Population.**—The territory has an area of 224,960 square miles; population in 1930 estimated at 3,049,000, including 16,800 Europeans, 39,500 Asiatics, and 12,100 Arabs. European population, March 6, 1931, was 17,285. On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Masai, the Somali, and the Gallas. Mombasa is the second largest town; population about 57,000, of whom 1,200 are Europeans. The harbour is situated on the eastern side of an island of the same name, and is the terminus of the Kenya and Uganda Railway. Kilindini harbour on the south-western side of the island is the finest land-locked and sheltered harbour on the east coast of Africa and is accessible to vessels of deep draught. The principal river in the North is the Tana, which flows into the Indian Ocean. It is navigable for about 400 miles by shallow-draught steamers. Nairobi, the capital and the headquarters of the administration, has 51,599 inhabitants, of whom about 5,228 are European. There are about 2,882 European farmers in the Colony.

**Religion, Education, Justice.**—The prevailing religious beliefs are Pagan; but on the coast Mohammedanism has made great progress.

There are many Christian mission societies, British, French, Italian, Swedish, and American, several being Roman Catholic. There were 60 (including 17 European) Government schools in operation in 1930, and 2,041 mission and native schools. The Supreme Court is at Nairobi, and sessions are held at Mombasa, Nakuru, Eldoret, Kisumu, and other places. District Courts presided over by magistrates are held in each district. In native cases local ideas and customs are considered. The legal status of slavery has been abolished throughout East Africa.

**Finance.**—Revenue and expenditure for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1925	2,430,509	2,389,996	1928	3,020,604	2,834,647
1926	2,627,223	2,414,681	1929	3,333,742	3,505,072
1927	2,846,110	2,515,115	1930	3,241,600	3,438,874

Of the revenue for 1930, customs accounted for 815,286*l.*; licences, duties, taxes, etc., 948,775*l.*; posts and telegraphs, 173,525*l.*; fees, etc., 140,886*l.*; earnings of Govt. depts., 98,750*l.*; revenue from Govt. property and royalties, 72,241*l.*; sale of Govt. property, 33,959*l.*; miscellaneous receipts, 17,042*l.*; reimbursements, 788,435*l.*; interest, 55,323*l.*; and land sales, 42,586*l.* Public debt, February 1931, 16,900,000*l.*

Estimated net revenue for 1931–32, 2,323,511*l.*; expenditure, 2,261,268*l.*

**Agriculture and Mining.**—Maize, sugar, coconuts, sisal and cotton are crops of major importance at lower altitudes where conditions are tropical. Coffee, maize, sisal and wheat are the crops of major importance at higher elevations, and the dairy, wool, wattle-bark and tannin extract industries are increasing their output. There is also a considerable acreage of tea. In addition, groundnuts, simsim, beans, barley, potatoes and miscellaneous crops are grown according to elevation and rainfall, both for export and home consumption.

Livestock in European possession numbered, in 1931; cattle, 236,895, sheep, 218,845.

The merchantable forest area extends over 3,300 square miles. At the coast are found mangroves, ebony, copal and other trees, but 95 per cent. of the forests are in the Highlands. They are mainly Coniferous (Juniper and Podocarpus), but also contain valuable hardwoods such as Camphor and Olive. Pencil Cedar is abundant, and the export of pencil slats promises to be an important industry, as does also the exploitation of the large bamboo forests for paper pulp.

The mineral resources are not yet fully explored. Production for 1930 was: gold, 1,789 ozs. (value 7,490*l.*); marble, 400 tons (value 4,000*l.*); lime, 1,800 tons (value 1,800*l.*).

**Commerce and Shipping.**—There is a uniform Customs tariff in Kenya, Uganda and Tanganyika. The Colony and Protectorate of Kenya and Uganda Protectorate are one administrative unit for Customs purposes, and complete freedom of trade exists between the two territories and Tanganyika, Customs Revenue being allocated to the consuming territory.

Imports into Kenya and Uganda (excluding Government stores, bullion and specie), the domestic exports of Kenya and Uganda, and the tonnage entered and cleared—Colony and Protectorate of Kenya—were :—

Years	Trade Imports	Domestic Exports	Customs Revenue	Tonnage entered and cleared
	£	£	£	
1926	7,680,577	6,010,386	1,150,593	3,108,392

The principal countries of origin were: Great Britain, 37·10 per cent.; British Possessions, 22·89 per cent. (Total British Empire, 59·99 per cent.); Belgium, 1·23 per cent.; Dutch East Indies, 3·70 per cent.; France, 1·49 per cent.; Germany, 4·01 per cent.; Holland, 4·78 per cent.; Italy, 1·53 per cent.; Japan, 6·74 per cent.; Persia, 1·86 per cent.; United States of America, 11·25 per cent.; other foreign countries, 3·42 per cent.

The principal domestic exports of Kenya and Uganda during 1930 were: cotton (mainly Uganda), 1,569,768*l.*; coffee, raw, 1,581,865*l.*; fibres, 437,269*l.*; maize, 565,645*l.*; hides and skins, 245,303*l.*; seeds, oil, 171,902*l.*; carbonate of soda, 222,305*l.*; ivory, 28,039*l.*; wood and timber, 22,992*l.*; wheat meal and flour, 33,167*l.*; other grain and flour, 42,071*l.*; ground-nuts, 31,663*l.*; wool, 70,615*l.*; rubber, raw, 16,977*l.*; barks for tanning, 44,680*l.*; potatoes, 11,142*l.*; sugar, refined, 27,969*l.*; wheat, 91,449*l.*; butter, 53,016*l.*; tin ore, 55,300*l.*

The chief countries of consignment were: Great Britain, 43·39 per cent.; British Possessions, 32·63 per cent.; (British Empire, 76·02 per cent.); Arabia, 0·12 per cent.; Belgium, 6·65 per cent.; Egypt, 0·63 per cent.; France, 1·60 per cent.; Germany, 0·81 per cent.; Holland, 1·63 per cent.; Italy, 1·02 per cent.; Italian East Africa and Colonia Eritrea, 0·61 per cent.; United States of America, 3·70 per cent.; Japan, 4·47 per cent.; other foreign countries, 2·74 per cent.

1931 exports to the United Kingdom (Board of Trade Returns), 2,120,245*l.*; imports from the United Kingdom, 1,767,878*l.*; re-exports, 50,784*l.*

Communication between the ports of Kenya is kept up by small steamers owned by the British India S.S. Co., Messrs. Cawasji Dinshaw Brothers, at Aden, and the African Wharfage Co., Ltd., at Mombasa.

**Communications.**—The Kenya and Uganda Railways and Harbours are State Owned; the Railway, which is Metre Gauge, consists of: Main Line, Mombasa island to Kampala, on Lake Victoria to Uganda, 841 miles, other lines in Kenya are: the Nakuru-Kisumu line, 131 miles; the Voi-Kahe Branch, 92 miles, with running powers over the Tanga line (Tan-

ganyika Territory) between Kahe Junction and Moshi; the Lake Magadi Branch, 91 miles; the Thika-Nyeri-Manyuki line, 146 miles; the Lake Solai Branch, 27 miles; the Kitale Branch, 41 miles, the Thomson's Falls Branch, 48 miles, and the Kisumu-Yala Branch, 32½ miles. In Uganda, Mbulamuti-Namasaliga line, 18 miles; Port Bell-Kampala Railway, 6 miles; Tororo-Soroti Branch, 101 miles. Surveys have been made for Kedowa-Sotik-Kericho line, 66 miles, and the Bukonte-Jinja diversion, 53 miles.

The Harbours comprise the following: the Port of Mombasa, which includes Kilindini Harbour, Mombasa Old Port, Ports Reitz and Tudor; and the Ports of Lamu, Malindi and Kilifi. Kilindini Harbour possesses 5 deep-water quay berths, a bulk oil jetty and a lighterage berth. The quays are equipped with electric cranes.

The Kenya and Uganda Railways and Harbours also operate steamer services on Lakes Victoria, Kioga, Albert, and on the River Nile; and a motor transport service, 75 miles, between Masindi Port on Lake Kioga, and Butiaba, on Lake Albert.

During the year ending December 31, 1930, 1,005,041 tons of goods and 1,106,106 passengers were carried; revenue, 2,214,229£.; expenditure, 1,441,285£. Telegraphic communications exist along all lines of rail. Through bookings are in operation between Kenya and Uganda Railways and Harbours and Tanganyika Railways and Harbours via Moshi and Mwanza. The country is fairly well provided with roads and tracks. There is a motor road from Nairobi, across Uganda, to Mongalla in the Sudan.

The Post Office of the Colony and Protectorate (inclusive of the Uganda Post Office, which is worked by the Kenya Post Office) received and despatched 14,701,800 letters, packets, &c., and 505,991 telegrams during 1930. The telegraph system has 12,480 miles of wire (exclusive of Uganda). A cable connects Mombasa with Zanzibar.

A short-wave wireless station, owned by the British East Africa Broadcasting Company, Ltd., is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

**Money.**—The currency of the Colony and Protectorate, which is the same as that of the Uganda Protectorate and the Tanganyika Territory, is controlled by the East African Currency Board domiciled at 4 Millbank, London, S.W. 1, who maintain a stable rate of sterling exchange. The standard coin is the East Africa shilling of one hundred cents, introduced as from January 1, 1922, which is legal tender to any amount. Twenty East African shillings equal one East African pound. The subsidiary coins consist of 50 cent (silver), 10 cent, 5 cent and 1 cent (bronze). The paper currency consists of notes of the following denominations: 5, 10, 20, 100, 200, 1,000 and 10,000 shillings. Three banks operate in the colony.

*Governor and Commander-in-Chief.*—Brig.-Gen. Sir Joseph A. Byrne, K.C.M.G., K.B.E., C.B. (October, 1930). Salary, with allowances, 8,500£.

*Colonial Secretary.*—H. M.-M. Moore, C.M.G.

## THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East African Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia on the Sudan

boundary along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya to the eastern shores of Lake Victoria; on the south by Tanganyika Territory (late German East Africa); and on the west by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area 94,204 square miles, including 13,616 square miles of water. For administrative purposes it is divided into 4 provinces: (1) the Eastern Province, comprising the districts of Busoga, Teso, Lango, Karamoja, Bugwere, Bugishu, and Budama; (2) the Northern Province, comprising the districts of Bunyoro, Gulu, Chua, and West Nile; (3) the Western Province, comprising the districts of Toro, Ankole, and Kigezi; and (4) Buganda Province, with islands in Lake Victoria, comprising the districts of Mengo, Masaka, Mubende, and Entebbe.

The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a 'Kabaka,' with the title of 'His Highness.' He is assisted in the government by three native ministers and a Lukiko, or native assembly. In Buganda, and in Bunyoro, Ankole and Toro, also ruled over by native 'Kings,' purely native matters are dealt with by the various Lukikos, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's courts. The principal British representative is the Governor, who is assisted by a Legislative Council and an Executive Council in carrying out the functions of Government. The headquarters of the British Administration is at Entebbe; the commercial centre is Kampala.

The total population of Uganda (December, 1930) was estimated at 3,513,625, composed as follows: Native, 3,497,650; Asiatic, 14,002; European, 1,973. Among the natives approximately 840,000 are Baganda, the tribe from which the Protectorate takes its name, and which was the most powerful and civilised at the time when the first explorers visited the country. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers. Their efforts have now for some years been supplemented by a Government educational scheme, and a University College is established by Government at Makerere (Kampala) for the higher education of natives. 231,392 children attended schools during 1930. About 2,000,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Hamitic Nilotic, and Sudanese groups.

There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The appeal court consists of the judges of the High Courts of the Colony of Kenya, Uganda, Nyasaland, Zanzibar and Tanganyika territory. In 1930, 6,795 criminal cases were tried. There is an armed constabulary force under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

Cotton is the principal product, and is grown almost entirely by natives. The area under cotton in 1930 was estimated at about 739,690 acres. Other products are coffee, chillies, oil-seeds, tin ore, Para rubber, sugar and tobacco. There are valuable forests.

Total exports in 1930, 2,060,453*l.* (1929, 4,274,758*l.*); cotton, 1,555,844*l.*; coffee, 154,996*l.*; cotton seed, 137,387*l.*; rubber, 16,814*l.*;

ivory, 13,633*l.*; hides and skins, 57,189*l.*; tin ore, 55,300*l.* The total value of imports for consumption in 1930 was 1,614,164*l.*, consisting mainly of cotton fabrics and manufactures, 363,181*l.* Total imports in 1929 amounted to 2,318,177*l.* The trade is chiefly with Great Britain, the United States, and India. There is a uniform Customs tariff in Kenya, Uganda, and Tanganyika.

The revenue and expenditure (exclusive of loan disbursements) for 6 years were :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1925	1,479,244	1,108,396	1928	1,519,237	1,368,188
1926	1,389,641	1,295,612	1929	1,682,918	1,815,997
1927	1,292,306	1,430,976	1930	1,412,242	2,040,294

In 1930 the poll-tax amounted to 522,972*l.*, customs to 324,763*l.*, and cotton excise to 136,334*l.* Debt, 1,077,454*l.*

There are steamer services on Lakes Victoria, Kioga, and Albert. The steamers on Lake Albert descend the Nile to Nimule, on the Sudan boundary, whence there is a motor road (about 100 miles) round the rapids extending to Rejaf, the terminus of the Nile steamers from Khartum. The main line of the Kenya and Uganda Railway now extends to Kampala, by way of Nakuru, Eldoret, Turbo, Tororo and Jinja. Lines from Jinja to Namasagali on Lake Kioga, and from Tororo to Soroti serve as feeders to bring in the important cotton crop of the Eastern Province. There is a railway from Port Bell to Kampala, 7½ miles in length. A network of all-weather motor roads has been constructed, and a fleet of Government motor vans serves those main routes on which a regular private transport service does not exist.

Mail services by motor and relays of runners radiate from Entebbe, Kampala and Jinja. The Sudan-Egyptian telegraph and telephone system is established to Rejaf. The Uganda telegraph line is extended to Mutir and to Nimule, 89 miles from Rejaf, and also connects with the Belgian Congo via Fort Portal and the Semliki. The length of telegraph and telephone line in the Protectorate is (1930) 3,491 miles. Telephone exchanges are installed at Entebbe, Kampala, Jinja, Iganga and Mbale, with trunk communication between.

The currency unit is the shilling, introduced in 1921 and standardized, with subsidiary coinage of silver 50 cent pieces, and bronze 10 cent, 5 cent, and 1 cent pieces. East African Currency Board notes of shillings 10,000, 1,000, 500, 200, 100, 50, 20, 10, and 5 are also in circulation. ### ZANZIBAR.

The Island of Zanzibar is situated in 6° S. latitude, and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is the largest coralline island on the African coast, being 53 miles long by

24 broad, and having an area of 640 square miles. To the north-east, at a distance of some 25 miles, lies the Island of Pemba in 5° S. latitude, 42 miles long by 14 broad, having an area of 380 square miles.

In the sixteenth century the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese. The subsequent allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said transferred his capital to Zanzibar in 1832. On his death in 1856 the African possessions were, under an arbitration by Lord Canning (then Governor-General of India), declared independent of the parent State. In 1890 the supremacy of the British interests in the Islands of Zanzibar and Pemba was recognised by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions, which extended over the coast from Warsheikh in 3° N. latitude to Tunghi Bay in 10° 42' S. latitude, were ceded to Italy, Great Britain, and Germany, respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of 200,000*l.* At a later date Italy also acquired similar rights by payment of a sum of 144,000*l.* The British-rented territories on the mainland were included in the East Africa Protectorate, and now form the Protectorate of Kenya (see above under Kenya). Thus the Zanzibar Protectorate is confined for administrative purposes to Zanzibar, Pemba, and adjacent small islands. In 1891, a regular Government was formed for the Protectorate with a British representative as first minister. In 1906 the Imperial Government assumed more direct control over the Protectorate and reorganised the Government. On July 1, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change in the following year.

**Constitution and Government.**—The Sultan, Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E. (born 1879), succeeded on the abdication of his brother-in-law, Ali bin Hamoud bin Mahomed, December 9, 1911. The Government is administered by a British Resident, who is appointed by commissions under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Order-in-Council, 1924, as amended by the Zanzibar Order in Council, 1925.

Legislation consists of Decrees of His Highness the Sultan, which are binding on all persons when countersigned by the British Resident under the Order-in-Council.

In 1926 Executive and Legislative Councils were established. The former is presided over by His Highness the Sultan, and the latter by the British Resident. The Legislative Council consists of three *ex-officio* official members and five others. There are six unofficial members, representing various communities.

**Population, Religion, Education, &c.**—The population of Zanzibar and Pemba, according to the census of 1931, was 235,428 (Zanzibar, 137,741; Pemba, 97,687). The registered birth rate in 1930 was 16·93 per 1,000 for Zanzibar and 16·65 for Pemba; and the death rate 23·37 and 13·01 respectively. The Arabs are the principal landlords and employers of labour. The black population is mostly Swahili, but there are representatives of nearly every African tribe. According to the 1931 census there were 48,962 non-native inhabitants, including 278 Europeans, most of whom are English, and about 14,000 British Indian subjects, through whose hands almost the whole

trade of East Africa passes, and 33,400 Arabs. Zanzibar town has a population of 45,276.

Most of the natives are Mohammedans (Sunnis of the Shafi school); the Sultan and the principal Arabs are of the Ibadhi sect. There are 3 Christian Missions: the Universities Mission to Central Africa (Church of England), the Mission of the Holy Ghost (Roman Catholic), and the Friends' Industrial Mission.

Education is free. Subjects of H.H. the Sultan are liable to compulsion, but for others education is voluntary. There are Government schools mainly for Moslems, a number of mission schools, Indian schools supported by different communities for the children of their sects, private schools and a non-sectarian school. The total number of children attending these schools in 1930 was 4,479. There is a Teachers' Training School and a Commercial School. In 1927 education for Arab girls was started under the auspices of Government.

**Justice.**—In cases in which persons subject to the Zanzibar Order-in-Council, 1924, are concerned, justice is administered by His Britannic Majesty's High Court and the Courts subordinate to it, and in other cases by H.H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers and Arab Kathis, and an appeal lies from those Courts to the British or Zanzibar Court as may be required. An appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

**Finance.**—The revenue and expenditure for 6 years were as follows:—

Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure	Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure
	£	£	£		£	£	£
1925	741,021	578,023	543,000	1928	256,342	471,771	598,791

1927	309,159	540,345	606,301	1930	267,627	494,461	507,500

Besides Customs, the chief sources of revenue in 1930 were: interest on loan to Kenya and other investments, 18,221*l.*; electricity department, 25,705*l.*; agriculture, 15,750*l.*; court fees, fines, etc., 82,742*l.*; rent of Kenya Protectorate, 10,000*l.*; rent of Government property, land and houses, 13,464*l.* The chief heads of expenditure in 1930 were: public works, 136,358*l.*; port and marine, 30,820*l.*; police and prisons, 32,630*l.*; electricity and wireless department, 22,896*l.*; judicial department, 25,985*l.*; agricultural department, 25,635*l.*; district administration departments, 27,636*l.*; medical, 50,477*l.*; education, 24,280*l.*; pensions, 31,793*l.*

Public debt at end of 1930, 100,000*l.*; sinking fund, 115,151*l.*

**Production and Industry.**—The clove industry is by far the most important in the Protectorate, the Islands of Zanzibar and Pemba yielding the bulk of the world's supply. It is estimated that there are in both islands about 48,000 acres under cloves and over 3 million trees in bearing, the average output of the last 20 seasons being 20,768,000 lbs. The exports in 1930 were 145,831 cwts., and clove-stems 29,602 cwts. The large plantations are chiefly owned by Arabs, but many natives possess small holdings. The coconut industry ranks next in importance after cloves. It is estimated

that there are about 55,000 acres under cultivation and 3½ million trees in both islands. The export of copra amounted in 1930 to 353,514 cwts.

The manufactures are pottery, coir fibre and rope, soap, oil (coconut and simsim), jewellery, and mats. There are no mines in the Protectorate.

**Commerce.**—The total imports, exports, and shipping for 5 years were :—

## MAURITIUS.

Mauritius was known to Arab navigators at an early date, probably not later than the tenth century. It was no doubt visited by Malays in the fifteenth century, and was discovered by the Portuguese between 1507 and 1512, but the Dutch were the first settlers. In 1710 they abandoned the island and it was occupied by the French under the name of Isle de France. The British occupied the island in 1810, and it was formally ceded to Great Britain by the Treaty of Paris of 1814.

**Constitution and Government.**—Under Letters Patent of 1885, 1901, 1904, and 1913, partially representative institutions have been established. The government of the Colony, with its dependencies, Rodrigues, Diégo Garcia, &c., is vested in a Governor, aided by an Executive Council, consisting of the officer in command of His Majesty's troops, the Colonial Secretary, the Procureur-General, the Receiver-General, and such other persons holding office in the service of the Government of the Colony as the Governor, through instructions from the Secretary of State, may from time to time appoint. There is also a Council of Government, consisting of the Governor and twenty-seven members, ten being elected under a moderate franchise, eight *ex-officio*, and nine nominated by the Governor. The official councillors comprise the four Executive members, the Collector of Customs, the Protector of Immigrants, the Director of Public Works and Surveys, and the Director of the Medical and Health Department.

*Governor of Mauritius.*—Sir W. E. Francis Jackson, K.C.M.G. (Appointed March 7, 1930).

### Area, Population, &c.

Mauritius, in the Indian Ocean, 500 miles east of Madagascar, has an area of about 720 square miles. According to the census of 1931, the population of the island was 393,418. The estimated population of Mauritius at end of 1930 was 414,794, including 10,336 in the Dependencies.

## NYASALAND PROTECTORATE (BRITISH).

The Nyasaland (until 1907 British Central Africa) Protectorate, constituted on May 14, 1891, lies along the southern and western shores of Lake Nyasa, and extends towards the Zambezi. It is administered under the Colonial Office by the Governor and Commander-in-Chief, assisted by an Executive and a Legislative Council, both consisting of nominated members, the Governor having the right of veto (Order in Council of September 4, 1907). The Laws consist of local Ordinances duly enacted, with such British Acts as are of general application.

Land area, 37,596 square miles, divided into two Provinces, each in charge of a Provincial Commissioner, and twenty districts, each administered by a District Commissioner and his assistant. Population on Dec. 31, 1930, 1,905 Europeans (mostly in the Shiré Highlands), 1,599 Asiatics, and 1,392,742 natives. The chief settlements are Blantyre and Limbe in the Shiré Highlands, with about 700 European inhabitants; others are Zomba (the seat of Government), Cholo, Lilongwe, and Mlanje; on Lake Nyasa are Fort Johnston, Kota-Kota, Bandawe, Chintechi, Nkata, Likoma, and Karonga. There are good motor roads in all directions, and life and property are safe. Education is controlled by the Education Department. Grants in aid are paid to mission societies for native education and there are three elementary schools for European children, which are maintained as private establishments and receive grants from Government. The Government has established a training centre for native teachers. Eleven Christian missions are at work; in 1930 there were 2,685 native schools with a total roll of 126,607 pupils and an average attendance of 73,290. The total grant in aid paid by Government to missionary societies in 1930 was 7,616*l.* in respect of native education. The grant in aid for European education was 1,015*l.* These grants were distributed in accordance with the provisions of the Education Ordinance, 1930.

Justice is administered in the High Court, which has jurisdiction in civil and criminal matters, and also as a Court of Admiralty. Subordinate courts are held by magistrates and assistant magistrates in the various districts. Appeals from decisions of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa, sitting at Mombasa.

Coffee is cultivated in the Shiré Highlands; in 1929, 100,117 lbs. were exported, and in 1930, 106,595 lbs. Tobacco exported: in 1929, 10,340,217 lbs., and in 1930, 14,073,247 lbs. The area under tobacco in 1930 was 42,947

There are military, volunteer reserve, and civil police forces. Police force, December 31, 1930, 19 European officers and 515 African ranks. There is a Marine Transport Department on Lake Nyasa, consisting of three vessels. For ordinary traffic there are small steamers, besides small sailing vessels.

There are 32 post offices through which, in 1930, about 2,442,317 postal packets passed. The postal savings bank had 883 depositors at end of 1930; deposits, 13,129*l.* There is a 3 ft. 6 in. gauge railway from Chindio on the Zambezi in Portuguese East Africa to Blantyre (174 miles). A railway from Murraça on the southern bank of the Zambezi to the Port of Beira (175 miles) in Portuguese East Africa was opened for traffic in April, 1922, thus establishing direct railway communication between Blantyre and Beira. A bridge across the Zambezi to connect these two railways is in course of erection, as is also an extension of the railway system northwards to Lake Nyasa. A new road from Salisbury in S. Rhodesia to Blantyre via Tete in Portuguese East Africa is open for motor traffic. There is a telegraph line through the Protectorate connecting southwards with Cape Town and northwards with Tanganyika, Kenya and Uganda. Telegraphs are controlled by the Government. Electric light and power plants have been installed at Zomba, Blantyre and Limbe.

At Blantyre, Zomba, and other centres there are branches of the Standard Bank of South Africa and at Blantyre and Limbe there are branches of Barclays (Dominion, Colonial and Overseas) Bank. The currency consists of British coin, gold, silver, and bronze. There is no note circulation.

*Governor and Commander-in-Chief.*—Sir T. S. W. Thomas, K.C.M.G., O.B.E.

*Chief Secretary.*—K. L. Hall.

<sup>4</sup> Including Government stores (1929, 2,362*l.*; 1930, 3,871*l.*).

The revenue from customs in 1929 was 5,253*l.*; in 1930, 3,847*l.*

Public debt, nil; the Colony's liabilities at December 31, 1930, exceeded the assets by 4,983*l.*

The principal exports are fibre, tow, rope and twine, 934 tons in 1930.

Savings-bank deposits on December 31, 1930, 17,135*l.*, belonging to 238 depositors.

Fruit trees, Norfolk pines, eucalyptus, and cedars flourish in St. Helena. Cattle do well, but there is no outside market for the meat. The flax (*phormium*) industry is established at a Government mill and 8 private mills. The area of land under flax was estimated at 2,000 acres in 1927. A lace-making industry was started in 1907. The number of vessels that called at the Island was 40 in 1930. Total tonnage entered and cleared was 187,387 in 1930.

The Post Office in 1930 received 297 bags of mail, 1,811 parcels and 1,344 registered articles, and despatched 112 bags of mail, 281 parcels and 1,973 registered articles.

The Eastern Telegraph Company's cable connects St. Helena with Cape Town and with St. Vincent. There are telephone lines, with 41 miles of wire.

St. Helena is an Admiralty coaling station. About two of the Cape of Good Hope Squadron visit St. Helena every year.

**Ascension** is a small island of volcanic origin, of 34 square miles, in the South Atlantic, 700 miles N.W. of St. Helena. Down to November 1922 it was under the control and jurisdiction of the Lords Commissioners of the Admiralty, but it was then transferred to the administration of the Colonial Office and annexed to the colony of St. Helena. There are 10 acres under cultivation providing vegetables and fruit. Investigations are being made into the possibilities of exploiting the minerals on the Island and reports are encouraging.

The island is the resort of the sea turtle, which come to lay their eggs in the sand annually between January and May. Rabbits, wild goats, and partridges are more or less numerous on the island, which is, besides, the breeding ground of the sooty tern or "wideawake," these birds coming in vast numbers to lay their eggs about every eighth month. Phosphates and guano are collected. The island is included in the Postal Union.

*Resident Magistrate.*—E. A. Willmott.

**Tristan da Cunha**, a small group of islands in the Atlantic, half-way between the Cape and S. America, in 37° 6' S. lat. 12° 1' W. long. Besides Tristan da Cunha and Gough's Island, there are Inaccessible and Nightingale Islands, the former two and the latter one mile long, and a number of rocks. Tristan consists of an extinct volcano rising to a height of 8,000 feet, with a circumference at its base of 21 miles. The habitable area is a small plateau on the north-west side of about 12 square miles, 100 feet above sea-level. Here the struggle for life is great: it is now impossible to grow corn owing to the depredation of rats, which came from a wreck in 1882; and fuel is scarce owing to deforestation. The staple food appears to be the potato. There are apple and peach trees; bullocks, sheep and geese are reared, and fish are plentiful. Besides being inhospitable, the island is extremely lonely. Until the middle of the last century the neighbouring waters were frequented by numerous American whalers, but these have now disappeared, as have also the clippers which called occasionally. Since 1900 the annual visits of a warship have been discontinued. Despite these disadvantages, the community is a growing one. In 1880 it numbered 109, declining to 52 in 1893, since when it has increased to the present figure of 130. The characteristics of the people are longevity, good health, and a certain shyness of disposition. It had been argued that inter-marriage must have a bad effect upon their qualities, but Surgeon Commander Rickard, of the *Dublin*, who visited the island in 1923, reported that this was not the case. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St. Helena was withdrawn in 1817. Many attempts have been made to induce the inhabitants to leave. The lack of educational facilities for their children was the sole argument which carried weight in the eyes of the inhabitants. A proposal to establish a settlement in South Africa for the surplus population has been revived in order to prevent the recurrence of times of scarcity. There is no form of government.

## SEYCHELLES.

**Seychelles** and its Dependencies consist of 101 islands and islets with a total estimated area of 156 square miles. The principal island is Mahé (55 square miles), smaller islands of the group being Praslin, Silhouette, La Digue, Curieuse, and Félicité. Among dependent islands are the Amirantes, Alphonse Island, Bijoutier Island, St. François, St. Pierre, the Cosmoledo Group, Astove Island, Assumption Island, the Aldabra Islands, Providence Island, Coetivy, Farquhar Islands, and Flat Island.

The islands were first colonised by the French in the middle of the eighteenth century, the object being to establish plantations of spices to compete with the lucrative Dutch monopoly. They were captured by the English in 1794 and incorporated as a dependency of Mauritius in 1810. In 1888 the office of Administrator was created, an Executive Council of 2 *ex-officio* members and 1 nominated member was appointed, with a Legislative Council of 3 official and 3 unofficial members, the Administrator being president of both Councils and having an original and casting vote in the Legislative Council. In 1897 the Administrator was given full powers as Governor, and in November, 1903, he was raised to the rank of Governor.

*Governor and Commander-in-Chief.*—de Symons M. G. Honey, C.M.G. (January, 1928).

The population at December 31, 1930, was estimated to be 28,217; census of April 24, 1921, 24,523 (11,974 males and 12,549 females). The death-rate for 1930 was 13·99; the birth-rate 27·99. The number of births in 1930 was 790; deaths, 395; marriages, 208. The capital is Victoria, which has a good harbour. Education is not compulsory. There were in 1930, 27 grant-in-aid schools and 2 other primary schools. In addition, there are 2 secondary schools with a total of 373 pupils. Total number of children attending school in 1930 was 2,845; average attendance, 78·5 per cent. In 1930, 122 cases were brought before the Supreme Court (Criminal Side). The police force numbered 93 of all ranks (1930).

Revenue, expenditure and debt for five years:—

1929	57,155	57,539	959

Chief items of revenue : customs, 1928, 24,428*l.*, 1929, 29,042*l.* : Crown lands, 1928, 2,138*l.*, 1929, 2,147*l.* : licences, taxes, excise and internal revenue, 1928, 29,807*l.*, 1929, 25,928*l.*

Chief products, coconuts (over 28,240 acres under cultivation) and cinnamon, patchouli and other essential oils; on some islands mangrove-bark is collected and phosphate deposits are worked. Live-stock at end of 1929: Cattle, 935; goats, 100; sheep, 50; horses, 150; asses, 100. Fishing is actively pursued, chiefly for local supply, but will probably be extended.

Imports, 1929: Rs. 1,813,283; 1930: Rs. 1,626,077·1. Exports, 1929: Rs. 2,143,743; 1930: Rs. 2,049,967. Principal imports, 1930 (thous kilos): Rice, 2,500; cotton piece goods, 753; sugar, 620; wheat flour, 339; coffee, 72; gunny bags, 52; galvanized iron sheets, 141; kerosene oil, 246; dhol and lentils, 95. Chief exports, 1930: Copra, 5,909 tons; cinnamon oil, 50,478 litres; Patchouli oil, 2,341 litres; guano, 15,977 tons. Imports in 1929 from: United Kingdom, Rs. 619,649; India, Rs. 637,460; France, Rs. 166,943; Dutch Possessions, Rs. 78,586; French Possessions, Rs. 3,000; Japan, Rs. 72,905; Spain, Rs. 21,526. Exports, 1929 to: United Kingdom, Rs. 229,096; South Africa, Rs. 802,398; New Zealand, Rs. 116,370; Germany, Rs. 163,726; France, Rs. 41,436; U.S.A., Rs. 492,742.

Shipping entered and cleared (1930), 239,081 tons, mainly British, exclusive of coasters trading between Mahé and the dependencies. The British India steamers call every four weeks from Bombay on their way to Mombasa, and every eight weeks on their way from Mombasa to Bombay, and the Royal Dutch Steam Packet Co. steamers call every eight weeks. There is fairly regular communication between the islands.

There is a good road system in Mahé, and further road-making is in progress in Mahé and in Praslin. In 1930 the post office despatched and received 126,200 letters and post cards, 88,500 newspapers, &c., and 4,028 parcels. There is direct telegraphic communication with Mauritius, Zanzibar, Aden, and Colombo. The Government Wireless Station at Victoria has been reopened for the exchange of radiotelegrams with ships at sea, but the service between Victoria and the Praslin group of islands is still suspended.

At the end of 1929 the Savings Bank deposits amounted to Rs. 241,034 to the credit of 674 depositors.

Current money in the islands consists of rupees and notes.

### SOMALILAND PROTECTORATE.

The **Somali Coast** stretches from Lahadu, west of Zeyla, to Bandar Ziyada, 49° E. long. After 1884, when Egyptian control ceased, the territory was administered by the Government of India, but was taken over by the Foreign Office on October 1, 1898, and was transferred to the Colonial Office on April 1, 1905.

By an arrangement with Italy in 1894 the limits of the British Protectorate were defined; but in 1897, by an arrangement with Abyssinia, a fresh boundary as required by that country was determined, and about 15,000 square miles were ceded to Abyssinia. An agreement for the regulation of Anglo-Italian relations in Somaliland was concluded on March 19, 1907. The area is about 68,000 square miles; population about 344,700—Mohammedan, and entirely nomadic, except on the coast, where considerable towns have sprung up during the British occupation.

No census of the population other than the Europeans and Indians has been taken, but a rough estimate of the main towns of the Protectorate is as follows: Berbera, between 15,000 and 30,000; Hargeisa, 20,000; Burao, 10,000; Zeilah, 5,000. Police, 550 officers and men on Dec. 31, 1930. Convictions in 1930, 760. Revenue in 1930, 105,304*l.*, reckoned at 1*s.* 6*d.* to one rupee. Customs in 1930, 73,290*l.*; expenditure, 1930, 199,027*l.* Free Grant-in-aid in respect of military expenditure, 1930, 50,000*l.* Imports, 1930, 371,502*l.*; exports, 1930, 255,808*l.* Bullion and specie are included. The imports are chiefly rice (127,944 cwt.), dates (45,455 cwt.), sugar (21,127 cwt.), textiles (4,169,833 yds.), and specie; the exports, skins and hides, gum and resins, ghee, cattle, sheep and goats, and specie. Tonnage entered in 1930, 59,327; cleared, 60,091. The rupee is the basis of the currency. Government of India notes are also in circulation. Transport is by camel and motor-car; there are no porters. Besides ordinary telegraphs there are wireless telegraph stations at Berbera, Burao, Hargeisa, Zeilah, Erigavo, and Buramo.

The Protectorate forces now comprise a Camel Corps of 437 officers and men, with a reserve of 150 men, and 555 Police.

*Governor and Commander-in-Chief.*—His Excellency Sir H. B. Kittermaster, K. B. E., C. M. G. Appointed January 26, 1926.

## SOUTH AFRICA.

### BASUTOLAND.

Basutoland, an elevated but rugged plateau, forms an irregular parallelogram on the north-east of the Cape of Good Hope Province. The provinces of the Orange Free State, Natal, and the Cape of Good Hope form its boundaries. Area, 11,716 square miles. The territory, which is well watered and has a fine climate, is stated to be the best grain-producing country in South Africa, and the abundant grass enables the Basutos to rear large herds of cattle.

Basutoland has been under the authority of the Crown since 1884, and is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The country is divided into seven

districts, namely : Maseru, Leribe, Mophale's Hoek, Berea, Mafeteng, Quthing, and Qacha's Nek. Each of the districts is subdivided into wards, mostly presided over by hereditary chiefs allied to the Moshesh family.

According to the census of 1921 the population numbered 495,937 natives, 1,603 Europeans, 172 Asiatics, and 1,069 coloured. European settlement is in general prohibited, and is more or less limited to the few engaged in trade, Government, and missionary work. Maseru, the capital and largest town, has a population of 1,890 natives and 399 Europeans.

There were 597 Government and Government aided schools in the Territory during 1930, of which 9 were Institutions (Normal, Industrial and Agricultural), 28 Intermediate Schools and 560 Elementary Vernacular Schools. The number of pupils on the roll for 1930 was 50,443 and the average attendance was 37,150. The Education vote for the year ending March 31, 1931, was 55,405*l*. There were 9 small primary schools for European children.

The police force at December 31, 1930, numbered:—12 European officers, 1 chief constable, 30 non-commissioned officers (native) and 308 men (natives).

The revenue arises mainly from the Post Office, native tax, licences, and income tax customs rebate from neighbouring territories. Under the Native Tax Law every adult male native pays 1*l*. 5*s*. per annum, and if he has more than one wife by native custom he pays 1*l*. 5*s*. per annum for his wives up to a maximum of 3*l*. 15*s*. A levy of 3*s*. for educational purposes is paid by every adult native. An Income Tax has been enacted on the lines of that existing in the Union of South Africa, and the collections for the year 1929-30 amounted to 10,732*l*.

—	1926-27	1927-28	1928-29	1929-30	1930-31
	£	£	£	£	£
Revenue . . . . .	274,404	292,378	324,790	326,540	326,676
Expenditure . . . . .	272,627	283,602	316,573	332,949	333,862

Native tax yielded 136,237*l*. in 1930-31, and customs, 95,564*l*., education levy, etc., 14,885*l*. Balance of assets over liabilities, March 31, 1931, was 51,789*l*.

The products are wool, wheat, mealies, and Kaffir corn. There are indications of iron and copper, and coal has been found and is used in some parts.

Basutoland is in the South African Customs Union. The total trade in recent years was:—

—	1926	1927	1928	1929	1930
	£	£	£	£	£
Imports . . . . .	665,014	842,893	921,574	706,416	477,949
Exports . . . . .	696,950	839,095	1,013,392	694,794	317,646

The imports consist chiefly of blankets, ploughs, clothing, iron and tin ware, and groceries, and the exports (1930) of wool and mohair (178,438*l*.), wheat and wheat-meal (105,330*l*.). In addition to the imports above given, there were goods to the value of 55,130*l*. imported by the Government.

There are telegraph offices at the various magistracies in connection with the systems of the Cape Province and Orange Free State.

A railway built by the C.S.A.R., 16 miles, connects Maseru with the Bloemfontein-Natal line at Marseilles Station.

The currency is exclusively British.

### BECHUANALAND PROTECTORATE.

The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Matabeleland on the east to South-West Africa. Area about 275,000 square miles; population, according to the census of 1921, 152,983, of whom 1,743 were Europeans. The most important tribes are the Bamangwato (35,000), under the Chief Tshekedi (acting as regent during the minority of Seretse, the son of Sekgoma, who died in November, 1925) whose capital is Serowe (population 17,000), 40 miles west of the railway line at Palapye Road; the Bakhatla (11,000), under Chief Molefi Pilane; the Bakwena (13,000), under Kgari Sechele; the Bangwaketse (18,000), under chief Bathoen, the eldest son of the late chief Gaseitsiwe; the Batawana, under Mathibe; and the Bamalete (4,500), under Seboko Mokgosi, who assumed the Chieftainship on July 9, 1917. In 1885, the territory was declared to be within the British sphere; in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, new arrangements were made for the administration of the Protectorate, and special agreements were made in view of the extension of the railway northwards from Mafeking. Each of the chiefs rules his own people as formerly, under the protection of the King, who is represented by a Resident Commissioner, acting under the High Commissioner. The headquarters of the Administration are in Mafeking, in the Cape Province, where there is a reserve for Imperial purposes, with ample buildings. An assistant Resident Commissioner was appointed in 1923.

The Territory is divided for administrative purposes into 11 districts, each under a Resident Magistrate. There is a tax of 1*l.* on each hut and 5*s.* Native Fund Tax, for education, &c. Licences for the sale of spirits are granted only at certain railway stations. The police force consists of 32 European officers, warrant officers and sergeants, 50 mounted police, and 215 dismounted constables.

Education is provided (there were 10 European, 2 Coloured, and 87 native schools, 1930-31). The European schools were assisted financially by the Government to the extent of 1,720*l.* The native schools, with the exception of the school at Serowe, which is supported by the Chief, are now mainly financed by the Native Fund, the charge to which for 1930-31 was 5,350*l.* Under the Inspector of Education, the schools are controlled in most

of the Reserves by School Committees on which the various missionary bodies are, together with Natives, represented.

Cattle-rearing, and agriculture to a limited extent (production of maize and Kaffir corn), are the chief industries, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. Cattle numbered on May 3, 1921, 495,000 head, sheep and goats, 380,000. During the year 1930, 28,177 head of cattle were exported.

Gold and silver to the total value of 8,414*l.* were mined in 1930-31.

Revenue and expenditure for five years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1926-27	131,568	108,223	1929-30	146,884	155,822
1927-28	147,911	119,984	1930-31	148,511	154,922
1928-29	142,246	143,346			

Chief items of revenue, 1930-31: income tax and poll tax, 39,089*l.*; customs, 25,579*l.*; hut-tax, 40,691*l.*; licences, 6,558*l.*; posts, 15,469*l.* Chief items of expenditure, 1930-31: Resident Commissioner, 11,576*l.*; district administration, 14,542*l.*; posts, 6,219*l.*; police, 31,784*l.*; administration of justice, 6,159*l.*; public works (extraordinary and recurrent), 14,552*l.*; medical, 12,246*l.*; veterinary, 13,433*l.* There has been no Imperial grant-in-aid since 1911-12, when the grant amounted to 10,000*l.*

There is no public debt. Excess of assets over liabilities on April 1, 1931, 76,499*l.*

When the Union of South Africa was established, an agreement was made with the Union Government under which duty on all dutiable articles imported into the Protectorate is collected by the Union Customs Department and paid into the Union Treasury, a lump sum representing a certain portion of the annual Customs Revenue of the Union being paid over to the Protectorate. Under this arrangement full figures relating to imports and exports of the Protectorate are not available. The export of dairy products was in 1930, 43,037*l.*

The telegraph from the Cape of Good Hope to Rhodesia passes through the Protectorate. Similarly the railway extending northwards from the Cape of Good Hope traverses the Protectorate. It is the property of the Rhodesia Railways, Limited. In the Protectorate are 24 post offices; receipts, in 1930-31, 15,469*l.*; expenditure, 6,214*l.* In 1930-31, 2,297*l.* was deposited in the Savings Bank and 1,838*l.* withdrawn.

The currency is British. There is no bank in the Protectorate.

*Resident Commissioner.*—Lieut.-Col. C. F. Rey.

*Government Secretary.*—C. L. O'B. Dutton.

## SOUTHERN RHODESIA.

Rhodesia includes the whole of the region extending from the Transvaal Province northwards to the borders of the Belgian Congo and Tanganyika Territory, bounded on the east by Portuguese East Africa, Nyasaland, and the Tanganyika Territory, and on the west by the Belgian Congo, Portuguese West Africa, and Bechuanaland. The region south of the Zambezi (Matabeleland and Mashonaland) is called Southern Rhodesia; that north of the Zambezi is known as Northern Rhodesia.

Prior to October, 1923, Southern Rhodesia, like Northern Rhodesia, was under the administration of the British South Africa Company. In October, 1922, Southern Rhodesia voted in favour of responsible government. On September 12, 1923, the country was formally annexed to His Majesty's Dominions, and on October 1, 1923, the new form of government was established under a Governor, assisted by an Executive Council, and a Legislature. The latter consists at first of a single elected Legislative Assembly, but that body may pass a law constituting a Legislative Council in addition. There must be a session at least once a year, and the duration of the Legislature is five years, unless sooner dissolved. The Legislature may amend, by a two-thirds vote of the total membership, the Letters Patent setting up the Constitution, with certain exceptions (relating to reservation of bills by the Governor, native administration, Crown Letters Patent, and Governor's salary). The Crown reserves the right to disallow laws. The powers of the Legislative Council respecting appropriation and Taxation Bills are limited. In July 1928 the franchise was extended to all British subjects over 21 years of age and to married women, subject to certain qualifications.

A native Council may be established in any native reserve, representative of the local chiefs and native residents, to advise the Governor and manage such local affairs as may be entrusted to it.

*Governor and Commander-in-Chief.*—Sir Cecil H. Rodwell, K.C.M.G., Appointed August, 1928. (Salary, 4,000*l.*; allowances, 2,000*l.*)

## 222 THE BRITISH EMPIRE:—SOUTHERN RHODESIA

The chief towns are Salisbury (the capital, population (including suburbs), 28,800 (approx.), including 9,711 Europeans), Bulawayo (including suburbs), (31,000 (approx.), including 11,727 Europeans), Umtali, Gwelo, Gatooma, Que Que, Shamva, Wankie and Victoria.

The number of births (European) was 1,173 in 1930, 1,093 in 1929; deaths, 443 in 1930, 469 in 1929. Marriages among Europeans numbered 553 in 1930, and 551 in 1929.

**Education.**—At the end of 1930 the schools for Europeans numbered 74 primary, 12 secondary and 1 vocational. There is a primary teachers' training centre with 9 teachers in training in 1930. There were also 76 aided farm schools, taught by private tutors or governesses, with an aggregate enrolment of 416 pupils. Including these, the total enrolment of European children at the end of the year 1930 was 8,586. There were also 7 schools for coloured children, including Eurafrikan and Asiatic, with a total enrolment of 612 pupils; and 1,446 schools for native pupils, with a total enrolment of 108,752 pupils. The total expenditure on public education (other than native education) in the Colony in the calendar year 1930 amounted to 288,386*l.*, against which receipts from boarding and tuition fees were 91,447*l.* Grants-in-aid of native education during the year 1930 amounted to 49,511*l.*

**Justice.**—There is a High Court (composed of a Chief Justice and 2 Judges) with criminal and civil jurisdiction. Single Judges are stationed at Salisbury and Bulawayo and sittings are held at five of the other principal towns twice a year. There are nine principal Courts of Magistrate, also courts presided over by detached Assistant Magistrates and several periodical courts. Natives are subject mainly to the same laws as Europeans, though there are special restrictions relating to arms, ammunition and liquor, and there are laws particularly applicable to natives, such as those dealing with marriage, taxation and registration and passes. Native Commissioners have jurisdiction in civil and criminal matters in which natives only are concerned, but generally exercise jurisdiction in their capacity as Assistant Magistrates.

**Finance.**—The total revenue for the year ended March 31, 1931,<sup>1</sup> was 2,449,300*l.* (2,487,200*l.* in 1929-30), of which the receipts from stamps and licences were 143,300*l.* (140,100*l.* in 1929-30); Native tax, 346,100*l.* (343,700*l.* in 1929-30); income tax, 492,900*l.* (499,100*l.* in 1929-30); and customs and excise duties, 739,600*l.* (704,700*l.* in 1929-30), and lands department, 89,100*l.* (112,700*l.* in 1929-30). Total expenditure (including loan expenditure), 1930-31,<sup>1</sup> was 2,995,000*l.* (2,967,800*l.* in 1929-30), including 358,800*l.* for education, 331,800*l.* for police and defence, 255,900*l.* for public works and roads, and 366,700*l.* for debt services.

The net amount of the Public Debt outstanding was, at March 31, 1931, 6,334,492*l.* (6,142,479*l.* at March 31, 1930).

**Production and Industries.**—The British South Africa Company has relinquished all rights and interests in the land in Southern Rhodesia, except in the estates which it was already developing and working on 10th July, 1923. The Crown has recognized the Company as the owner of the mineral rights throughout both Southern and Northern Rhodesia. Land has been set apart for tribal settlements ('native reserves'). The country is well adapted for agriculture and European settlers. Live stock (1930): cattle, 2,468,400 (2,398,000 in 1929); sheep, 360,400 (353,800 in 1929), and pigs, 66,500 (61,300 in 1929). Acreage under crops (1930): maize,

<sup>1</sup> Provisional figures.

317,700 (325,300 in 1929); tobacco, 10,500 (17,800 in 1929); ground-nuts, 7,500 (9,700 in 1929); legumes and fodders, 58,000 (46,600 in 1929). Large fruit orchards have been planted, and nearly all fruit trees thrive, the cultivation of oranges and lemons constituting a rapidly expanding industry. Exports of citrus fruit have increased from 53,000 boxes in 1923-24 to 165,000 boxes in 1930. The sale of dairy produce is a profitable industry. Animal products sold in 1930 include, 726,000 dozen eggs, 1,009,000 gallons milk, 163,000 lbs. cheese, and 1,768,701 lbs. butter.

A Land and Agricultural Bank makes loans to settlers on easy terms of repayment, for the purpose of improving and developing their agricultural holdings. The amount of applications for advances granted was 135,103*l.* in 1930 and 201,676*l.* in 1929. Numerous companies have been formed with the purpose of developing land and minerals.

**Mining.**—The country contains gold and other minerals. The total output of all minerals from 1890 to December 31, 1930, is valued at 100,447,610*l.*, of which gold accounted for 75,098,148*l.* The gold output in 1931 was valued at 2,273,875*l.* The output in 1931 of other minerals was: coal, 647,341 tons; chrome ore, 89,974 tons (224,186*l.*); asbestos, 24,043 tons (386,494*l.*). The total mineral output for 1930 was valued at 4,518,198*l.*

In addition to the foregoing a number of minor industries are now established in the Colony. These include brick and tile works (10), cigarette and tobacco factories (7), cold storage and ice making installations (9), iron and brass foundries (13), mineral water manufactories (12), and electric light and power undertakings (14).

**Commerce.**—The total value of imports (including bullion and coin) into Southern Rhodesia in 1930 was 7,529,439*l.*, the chief being: food and drink, 816,214*l.*; textile goods, wearing apparel, 1,322,633*l.*; machinery, 523,665*l.*; metals and manufactures, including motor cars, 2,664,333*l.*; railway and tramway materials and locomotives, 1,312,997*l.* The value of the exports, including gold, was 7,496,955*l.* (including re-exports, 1,863,119*l.*), the chief being: raw gold, 2,156,241*l.*; asbestos, 620,400*l.*; maize (including maize meal), 344,000*l.*; chrome ore, 441,000*l.*; cattle for slaughter, 341,000*l.*; tobacco, 380,000*l.* Total imports from the United Kingdom in 1930 amounted to 3,945,000*l.* (4,019,000*l.* in 1929); from the Union of S. Africa, 1,176,000*l.* (1,902,000*l.* in 1929); from the United States, 771,000*l.* (1,025,000 in 1929). Domestic exports to the United Kingdom in 1930, 2,108,000*l.* (2,571,000*l.* in 1929); Union of S. Africa, 1,522,000*l.* (2,116,000*l.* in 1929).

**Communications.**—The British South Africa Company has a controlling interest in the Rhodesian railway system, the total mileage of which (including the Beira Railway) at September 30, 1930, was 2,628. The system begins at Vryburg in the Cape Colony, and extends through the Bechuanaland Protectorate and Southern and Northern Rhodesia to the Belgian Congo and Portuguese East Africa. In conjunction with the railways of the Union of South Africa it provides through communication from Cape Town to the Congo border (2,149 miles), and (by a line from Bulawayo via Salisbury) to the port of Beira on the Indian Ocean (2,036 miles). There are also several branch lines in Southern Rhodesia. The total length of line operated in Southern Rhodesia is 1,348 miles. A system of road motor services has been organised, having in September, 1930, a total mileage of 1,521 miles.

On December 31, 1930, there were in Southern Rhodesia 212 post offices, 47 of which are money order and savings bank offices. During the year

1930, 13,463,000 letters and post-cards were despatched; 5,836,116 newspapers, books, and parcels, and 211,234 registered articles. The postal revenue for the year 1930 was 240,551*l.*, and the expenditure, 196,079*l.* There is an extensive telephone system in operation. Automatic telephone exchanges were brought into operation in Salisbury and Umtali in 1928, and an additional one has been ordered for Bulawayo.

On January 1, 1905, a Post Office Savings Bank was established, and on December 31, 1930, the deposits amounted to 226,695*l.*

### NORTHERN RHODESIA.

By an Order in Council, dated May 4, 1911, the two provinces of North-eastern and North-western Rhodesia were amalgamated under the title of Northern Rhodesia, the amalgamation taking effect as from August 17, 1911. The limits of the territory, as defined by the Order in Council, are 'the parts of Africa bounded by Southern Rhodesia, German South-west Africa (now South-west Africa), Portuguese West Africa, the Congo Free State (now the Belgian Congo), German East Africa (now Tanganyika Territory), Nyasaland, and Portuguese East Africa.'

An Administrator was appointed by the British South Africa Company with the approval of the Secretary of State, and had, for consultative purposes, an Advisory Council of five members, chosen by the white settlers.

By an Order in Council dated February 20, 1924, the office of Governor was created, an Executive Council constituted and provision made for the institution of a Legislative Council. This latter Council is composed of five *ex-officio* members, who also constitute the Executive Council, four nominated official members and seven elected unofficial members. On April 1, 1924, the British South Africa Company was relieved of the administration of the Territory by the Crown, from which date the Order in Council of February 20, 1924, took effect.

Northern Rhodesia has an area of 287,950 square miles, and consists for the most part of high plateau country, covered with thin forest. Much of the country is suitable for farming and contains areas carrying good arable and grazing land. The permanent European population in December 1929 was computed at 9,981. The native population on December 31, 1930, was estimated to number 1,331,229. The territory is divided into nine provinces. The seat of Government is at Livingstone, three miles from the Zambezi, but the Government has, subject to the approval of the Colonial Office, selected Lusaka, 80 miles south of Broken Hill, as the site of the new capital of the territory. The most important centres are Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Fort Rosebery, Ndola, and Mongu-Lealui. The police force, called the Northern Rhodesia Police, is composed of natives, with European officers and non-commissioned officers.

There were in December, 1930, 17 European controlled schools, with an enrolment of 879; and 6 non-controlled schools, with an approximate enrolment of 60. The estimated number of European children being educated outside the territory was 150, and a considerable number of children of Government officials and missionaries were receiving home education. There are Government schools for natives at Mongu, Mazabuka, and Ndola, and a large number of mission schools, many of which receive Government grants in aid. At the end of 1930 some 20,000 scholars were on the rolls of recognised schools.

Revenue, 1930-31, 830,254*l.* (taxes, etc., 303,356*l.*; customs, 344,814*l.*; posts, etc., 55,427*l.*; fees, 66,549*l.*; land sales, etc., 34,893*l.*; miscellaneous, 25,715*l.*). The expenditure for 1930-31 was 704,986*l.*

Imports (including specie), 1930, 4,953,716*l.*; exports (including specie), 909,541*l.*, including living animals, 2,458*l.*; copper, 226,403*l.*; gold (bar), 26,511*l.*; vanadium, 24,710*l.*; zinc, 341,660*l.*; wheat, 2,870*l.*; maize and maize meal, 19,806*l.*; tobacco (unmanufactured), 57,163*l.*; hides, skins, and horns, 14,320*l.*; ivory, 4,055*l.*; timber, 23,426*l.*

Agricultural products are maize, tobacco, wheat, and coffee. There is timber of various kinds. Gold, silver, copper, zinc, lead, vanadium and mica are the chief mineral products; coal has been discovered. Chief production, 1930: gold, 7,510 ozs., value 31,903*l.*; silver, 637 ozs., value 46*l.*; copper, 6,269 tons, value 343,798*l.*; zinc, 20,055 tons, value 339,825*l.*; vanadium, 122,577 lbs., value 87,320*l.*; mica, 8,954 lbs., value, 2,238*l.*; manganese ore, 872 tons, value 1,309*l.* Total value of mineral production: 1930, 806,446*l.*

The trunk line of the Rhodesian railway system traverses Northern Rhodesia from Livingstone to the Congo border. The Zambezi, Kafue, Chambesi, and other rivers of Northern Rhodesia are navigable for a considerable portion of their extent.

There are 45 post offices, 18 being money order offices. There is a telegraph line alongside the railway from Livingstone to the Congo border, and other lines link up Fort Jameson with Nyasaland and Abercorn with Tanganyika Territory and Nyasaland.

### SWAZILAND.

Swaziland lies at the south-eastern corner of the Transvaal. On June 25, 1903, an Order in Council was issued conferring on the Governor of the Transvaal authority over Swaziland, and by Order in Council of December 1, 1906, this authority was transferred to the High Commissioner for South Africa.

The seat of the administration is at Mbabane; altitude 3,800 feet.

Area, 6,705 square miles. Population, census 1921: 112,951 (Europeans, 2,205). The Government maintains 13 European schools at different centres, average attendance, 435 in 1930; and 1 native school at Zombode, the kraal of the ex-Chief Regent, average attendance, 125 in 1930. The Government also subsidises certain native schools with an average attendance in 1930 of 6,026, and two schools for coloured children, at which the average attendance in 1930 was 146.

A Special Court, having the full jurisdiction of a Superior Court, and Assistant Commissioners' Courts have been established. A local Swaziland police force was created in 1907. Authorised strength (1930) 25 Europeans and 142 natives. During 1930, there were 3,195 summary convictions, and 9 convictions in the Superior Court. Native chiefs continue to exercise jurisdiction according to native law and customs in all civil matters between natives, subject to a final appeal to the Resident Commissioner.

## THE UNION OF SOUTH AFRICA.

### Constitution and Government.

THE Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. 7, Ch. 9), passed by the Parliament of the United Kingdom on September 20, 1909. Under the terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony were united on May 31, 1910, in a legislative union under one Government under the name of the Union of South Africa, these Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively. There is a Governor-General, and an Executive Council in charge of the Departments of State.

Legislative power is vested in a Parliament consisting of the King, a Senate, and a House of Assembly. The Governor-General has power to summon, prorogue, and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. There must be a session of Parliament every year.

The Senate consists of forty members, eight (four being selected mainly for their acquaintance with the reasonable wants and wishes of the non-European races) being nominated by the Governor-General in Council and thirty-two being elected, eight for each Province. Each senator must be a British subject of European descent, at least 30 years of age, qualified as a voter in one of the provinces, and resident for five years within the Union; an elected senator must be a registered owner of property of the value of 500*l.* over any mortgage.

The House of Assembly consists, according to the Fifth Delimitation Commission appointed on July 19, 1927, of 148 members chosen in Electoral Divisions in numbers as follows:—The Cape of Good Hope, 58; Natal, 17; Transvaal, 55; Orange Free State, 18. Parliamentary voters must have the qualifications existing in the several colonies at the time of the Union. On April 10, 1930, a Bill was passed giving the vote to all women over 21, and it is proposed to remove the property or wage qualification for men. Each electoral district in each province returns one member, who must be a British subject of European descent, qualified as a registered voter.

and resident five years within the Union. A House of Assembly continues five years from the date of its first meeting unless sooner dissolved.

The House of Assembly, not the Senate, must originate money Bills, but may not pass a Bill for taxation or appropriation unless it has been recommended by message from the Governor-General during the Session. Restrictions are placed on the amendment of money Bills by the Senate. Provision is made respecting disagreements between the Houses, the Royal Assent to Bills, and the disallowance of laws assented to by the Governor-General.

Each member of each House must make Oath or Affirmation of Allegiance. A member of one House cannot be elected to the other, but a Minister of State may sit and speak, but not vote in the House of which he is not a member. To hold an office of profit under the Crown (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime, and insanity.

Pretoria is the seat of government of the Union, and Cape Town is the seat of Legislature.

*Governor-General and Commander-in-Chief.*—Earl of Clarendon, G.C.M.G. Appointed January 1931 (salary £10,000 per annum).

The Executive Council was constituted (November 1924) as follows:—

The Governor-General.

*Prime Minister and Minister of External Affairs.*—General The Honourable J. B. M. Hertzog (3,500*l.*).

*Minister of the Interior, of Public Health and of Education.*—The Honourable Dr. D. F. Malan (2,500*l.*).

*Minister of Mines and Industries.*—The Honourable A. P. J. Fourie, (2,500*l.*).

*Minister of Railways and Harbours.*—The Honourable C. W. Malan (2,500*l.*).

*Minister of Finance.*—The Honourable N. C. Havenga (2,500*l.*).

*Minister of Justice.*—The Honourable O. Pirow, K.C. (2,500*l.*).

*Minister of Defence and Labour.*—Colonel The Honourable F. H. P. Creswell, D.S.O. (2,500*l.*).

*Minister of Agriculture.*—General The Honourable J. C. G. Kemp (2,500*l.*).

*Minister of Lands.*—The Honourable P. G. W. Grobler (2,500*l.*).

*Minister of Posts and Telegraphs and of Public Works.*—The Honourable H. W. Sampson, O.B.E. (2,500*l.*).

*Minister of Native Affairs.*—Hon. E. G. Jansen.

*Secretary to the Prime Minister and Secretary for External Affairs.*—H. D. J. Bodenstein, LL.D.

The result of the elections in June 1929 was: Nationalists, 78; South African Party, 61; Labour (Creswell), 5; Labour (National Council), 3; Independent, 1: total, 148.

In each province there is an Administrator appointed by the Governor-General for five years, and a Provincial Council elected for three years, each council having an executive committee of four (either members or not of the council), the administrator presiding at its meetings. Members of the Provincial Council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. The number of members in each Provincial Council is as follows:—Cape of Good Hope, 58; Natal, 25; Transvaal, 55; Orange Free State, 25. The provincial committees and councils have authority to deal with local matters such as provincial finance, education (elementary), charity, municipal

institutions, local works, roads and bridges, markets, fish and game, and penalties for breaches of laws respecting such subjects. Other matters may be delegated to these Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor-General-in-Council.

There is a provincial Revenue Fund in each province. The old colonial capitals are the capitals of the provinces.

The railways, ports, and harbours are managed by a Harbour and Railway Board, under the chairmanship of a Minister of State. The revenues therefrom are paid into a special fund. All other moneys received by the Union are paid into a Consolidated Revenue Fund, on which the interest on debts of the colonies forms a first charge. To the Union has been transferred the public property, real and personal, of the colonies.

The English and Dutch languages are both official. The word 'Dutch' has now been expressly declared by Act of Parliament to include Afrikaans, a local variant of the language of Holland.

*High Commissioner in London.*—Hon. C. te Water (appointed Sept., 1929).

*Agent-General of the Government of India in South Africa.*—Sir K. V. Reddi (1929)

*Envoy Extraordinary and Minister Plenipotentiary to the United States.*—E. H. Louw (1929).

*Envoy Extraordinary and Minister Plenipotentiary to Holland.*—D. J. de Villiers (1929).

*Envoy Extraordinary and Minister Plenipotentiary to Italy.*—B. J. Pienaar (1929).

*High Commissioner for South Africa and High Commissioner for the United Kingdom in the Union of South Africa.*—Sir Herbert Stanley, G.C.M.G. (appointed November 21, 1930).

The High Commissioner for South Africa is responsible for the administration of the territories in Basutoland, the Bechuanaland Protectorate, and Swaziland. The administration of native affairs and affairs specially or differentially affecting Asiatics vests in the Governor-General-in-Council. The government of the native territories of Basutoland, Bechuanaland Protectorate, and Swaziland may be transferred to the Union Government.

### Area and Population.

The total area of the Union is 471,917 square miles divided between the Provinces as follows :—Cape of Good Hope, 276,536; Natal, 35,284; Transvaal, 110,450; Orange Free State, 49,647.

The census taken in 1904 in each of the four Colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

The following tables give the returns of population at the various censuses, classified according to race and sex :—

## 230 THE BRITISH EMPIRE:—UNION OF SOUTH AFRICA

The 1926 population census was a quinquennial one of Europeans only, and was taken under the provisions of the South Africa Act for the delimitation of political constituencies.

Walvis Bay, area 480 sq. miles, previously included in the area of the Cape Province, has been included for administrative purposes in the mandated territory of South West Africa.

Of the non-European population in 1921, 4,697,813 were Bantu, 165,731 Asiatic, and 545,548 of other races.

The increase in the total population, 1911-21, was: Union, 15·99 per cent.; Cape, 8·49 per cent.; Natal, 19·71 per cent.; Transvaal, 23·81 per cent.; O. F. S., 19·06 per cent. The increase in the European population in the Union 1926-31 was: Cape, 5·9 per cent.; Natal, 11·6 per cent.; Transvaal, 14·4 per cent.; Orange Free State, 1·2 per cent.; and for the Union, 8·9 per cent.

Principal towns (including suburbs) in the Union classified according to the number of inhabitants of European race, 1921, 1926 and 1931:—

Town	Province	1921	1926	1931
		European	European	European
1. Johannesburg . . .	Transvaal . . .	151,836	170,741	203,273

13. Krugersdorp . . . .	Transvaal . . .	10,599	11,253	13,653

For the occupational census in 1926 see THE STATESMAN'S YEAR BOOK for 1931, p. 229.

*Migration.*—1930. Gross Figures (excluding 'Intransit,') European: Arrivals, 32,923; departures, 31,776. Non-European: Arrivals, 4,526; departures, 3,877.

*Vital Statistics.*—The following table gives the total numbers of marriages, births and deaths registered in the Union for recent years for all races:—

Year	European			Non-European <sup>1</sup>		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1926	43,876	16,080	14,908	53,348	41,713	17,090
1927	44,347	16,627	15,622	51,113	45,219	16,972
1928	44,813	17,642	16,348	52,577	45,810	18,131
1929	46,219	16,803	17,192	54,171	43,890	18,069
1930	47,536	17,415	16,604	56,277	45,211	18,113

<sup>1</sup> Partial Registration only.

Owing to wide variation of the laws relating to the registration of births and deaths of natives in the four provinces, and to the entire absence of native registration in one province, the figures of 1923 must be regarded

as merely recording registrations and not the total number of actual events. Unifying Act No. 17 of 1923, which came into effect as from January 1, 1924, abolished compulsory registration of native vital events in rural areas, but made registration compulsory in all urban areas throughout the Union.

### Religion.

*Religions.*—The results of the European census of 1926 as regards religions are as follows :— Europeans : Dutch Churches, 921,961 ; Anglicans, 311,281 ; Presbyterians, 79,516 ; Congregationalists, 9,965 ; Wesleyans, 105,217 ; Lutherans, 23,371 ; Roman Catholics, 71,227 ; Baptists, 17,316 ; Jews, 71,816 ; others and unspecified, 13,109 ; Christian Scientists, 3,930 ; Apostolic Faith, Mission Church, 15,544 ; other Christian sects, 32,432 ; total, 1,676,660. Non-Europeans as at the census of 1921:<sup>1</sup> Dutch Churches, 276,486 ; Anglican, 420,059 ; Presbyterians, 115,897 ; Independents (Congregationalists), 145,723 ; Wesleyans, 730,022 ; various Christian Sects, 57,186 ; Lutherans, 241,807 ; Roman Catholics, 82,008 ; Hindus, 109,261 ; Buddhists and Confucians, 14,127 ; Mohammedans, 49,936 ; no religion, 2,402,652 ; others and unspecified, 763,928 ; total, 5,409,092.

### Education.

Under the *South Africa Act*, for a period of five years after the establishment of the Union and thereafter subject to decree of Parliament, control of education other than higher education was granted to the four Provincial Administrations. This arrangement still obtains. For practical purposes it has been provisionally determined that all post-matriculation instruction and vocational education shall be deemed to constitute Higher Education.

*Higher Education.*—By legislation of 1916 three Universities, with teaching and examining functions, were established on April 2, 1918, in place of the University of the Cape of Good Hope, provision being made for the conversion of the South African College into the University of Cape Town, of the Victoria College into the University of Stellenbosch, and of the University of the Cape of Good Hope into a federal University, styled the University of South Africa, with the remainder of the University Colleges as constituent colleges, the names of which, with appropriate details, will be found in the table hereunder. In 1921 the University College of Johannesburg was created the University of the Witwatersrand, and Potchefstroom University College was incorporated as a constituent college of the University of South Africa. In October 1930, Transvaal University College, a constituent college of the University of South Africa, received its charter as the University of Pretoria.

# Justice.

The Common Law of the Union is the Roman-Dutch Law, that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The Law of England as such is not recognised as authoritative, though by Statute the principles of English Law relating to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping, insurance, and other modern business developments English Law is followed, and it has also largely influenced civil and criminal procedure. In all other matters, family relations, property, succession, contract, &c., Roman-Dutch Law rules, English decisions being valued only so far as they agree therewith. The prerogatives of the Crown are, generally speaking, the same as in England.

The Supreme Court consists of an Appellate Division with a Chief Justice and two ordinary and two additional Judges of Appeal. In each Province of the Union there is a Provincial Division of the Supreme Court; while in the Cape there are two Local Divisions, and in the Transvaal one, exercising the same jurisdiction within limited areas as the Provincial Divisions. The Judges hold office during good behaviour. The Circuit System is fully developed.

Each Province is further divided into Districts with a Magistrate's Court having a prescribed civil and criminal jurisdiction. From this Court there is an appeal to the Provincial and Local Divisions of the Supreme Court, and thence to the Appellate Division. A distinctive feature of the Criminal system is that Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a Judge.

Persons convicted, all courts, 1930 : males, 436,806, females, 58,275.

# Finance.

Prior to 1913-14 the expenditure of the four Provinces was entirely met from grants by the Union Government. Since then various Financial Relations Acts have been passed defining the conditions upon which subsidies shall be granted to the Provinces, assigning and transferring to them certain revenues and limiting their powers of taxation. Act No. 46 of 1925 bases the subsidy on the attendance of pupils receiving education, assigns certain revenues collected by the Union to the Provinces and gives special grants to the two smaller Provinces.

Revenue and expenditure of the Union (excluding Interest on Railway Capital, now paid direct to the Public Debt Commissioners, and Subsidies to Provincial Administrations).

### Defence.

The South Africa Defence Act 1912, which became law on June 14, 1912, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

1. *The South African Permanent Force*, which consists of:—(i) The South African Staff Corps; (ii) The South African Instructional Corps; (iii) The South African Naval Service; (iv) The South African Field Artillery; (v) The South African Permanent Garrison Artillery; (vi) The South African Engineer Corps; (vii) The South African Air Force; (viii) The South African Service Corps; (ix) The South African Medical Corps;

(x) The South African Ordnance Corps ; (xi) The South African Veterinary Corps ; (xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service. A surveying vessel of 800 tons and two minesweeping trawlers are maintained in commission.

2. *The Active Citizen Force* ; 3. *The Citizen Force Reserve* ; 4. *The Coast Garrison Force Reserve* ; 5. *The Royal Naval Volunteer Reserve* ; 6. *The National Reserve* ; 7. *Rifle Associations* ; and 8. *Cadets*.

Every citizen of European descent between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations is a marked feature of the Act ; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district have been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

Under the 1922 Act the Permanent Force is relieved of all Police duties in peace time for which they were liable under the Act of 1912, and becomes a purely military force. Its strength on June 30, 1931, was 126 officers and 1,271 other ranks, which included 26 officers and 255 other ranks of the South African Air Force, and 14 officers and 136 other ratings of the South African Naval Service. In addition 19 officers, nursing sisters and nurses, and 9 other ranks of the Active Citizens Forces were employed on whole-time employment.

## Production and Industry.

*Agriculture.*—The production of wheat in recent years is shown by the following table.

Other products, excluding Native Reserves, &c., 1929 : barley, 66,045,000 lbs. ; oats, 250,993,000 lbs. ; Kaffir corn, 158,862,000 lbs. ; potatoes, 288,508,000 lbs. ; tobacco, 13,365,000 lbs. 1928 : barley, 38,807,000 lbs. ; oats, 190,451,000 lbs. ; Kaffir corn, 178,681,000 lbs. ; potatoes, 299,477,000 lbs. ; tobacco, 22,019,000 lbs.

In 1929 the live-stock in the Union was as follows : 10,517,984 cattle ; 45,010,446 sheep ; 7,894,185 goats ; 513,439 pigs (excluding Native Reserves and Farms) (horses, mules, donkeys and ostriches not enumerated).

The production of wool in 1929 was 232,004,424 lbs., and of mohair, 6,269,379 lbs. The export of ostrich feathers in 1929 was valued at 42,954*l.* ; hides and skins at 3,113,026*l.* and wattle bark and extract at 755,237*l.* 1929 : wool, scoured and greasy, 286,880,000 lbs. ; mohair, 10,038,287 lbs.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize. Yield in 1929, 9,997,505 lbs. Sugar is also cultivated ; yield of 1928-29 season, 295,934 tons. The area under tea (1929) was 3,530 acres, from which the yield was 2,653,598 lbs. (green leaf). It is estimated that some 15,000 acres of land suitable for tea plantations are available.

On March 31, 1930, the forest reserve areas comprised 2,390,686 acres demarcated, and 441,652 acres undemarcated : total, 2,832,338 acres.

*Irrigation.*—Technical and financial assistance is given by the State under the Union Irrigation Law of 1912, which was designed to encourage irrigation. The Government expenditure on irrigation in 1927-28, 1928-29, and 1929-30 was 143,139*l.*, 140,055*l.* and 255,576*l.* respectively from Loan Funds and 187,825*l.*, 194,914*l.* and 215,173*l.* respectively from revenue.

*Manufactures.*—The report on the industrial census in the Union in 1928-29 gives the value added by process of manufacture, &c., as 54,519,473*l.*, and the value of the gross production of the industries covered at 113,440,757*l.* The total number of factories which made returns was 7,461. Value of land and buildings, 26,010,590*l.*, machinery, plant, and tools, 39,530,698*l.*, of materials used, 58,921,284*l.*, and cost of fuel, light, and power, 3,382,362*l.* Average number of persons employed, 217,660 (Europeans, 89,236). Wages paid, 26,546,856*l.* The gross value of the output of the principal groups of industries was : food, drink, &c., 35,454,320*l.* ; metals, engineering, &c., 21,669,739*l.* ; chemicals, &c., 7,178,624*l.* ; heat, light, and power, 6,811,829*l.* ; building, &c., 9,428,582*l.* ; clothing, textiles, &c., 5,197,903*l.* ; books, printing, &c., 5,531,118*l.* ; leather, &c., 4,017,464*l.* ; stone, clay, &c., 3,709,066*l.* ; vehicles, 5,843,016*l.* ; furniture, &c., 2,456,414*l.*

*Mining.*—The table hereunder gives the total value of the principal minerals produced in the Union to December 31, 1930. The value of gold

is calculated at 4·247732 per fine ounce up to 1919, when the gold premium came into effect, as from the 24th of July, and from 1925 onwards when the gold premium ceased to operate. Copper, tin, antimony, scheelite, and silver are valued on the estimated pure metal contained in shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

Imports of specie amounted to 6,258*l.* in 1929 and 21,192*l.* in 1930, and exports to 10,581,448*l.* in 1929 and 10,465,785*l.* in 1930.

The total value of general merchandise, exclusive of specie, imported into British South Africa in 1929 was 83,449,196*l.*, and in 1930, 64,558,504*l.*, of which 35,936,781*l.* in 1929 and 29,735,707*l.* in 1930 came from the United Kingdom; 11,474,380*l.* in 1929 and 8,165,986*l.* in 1930 from the rest of the British Empire; 15,035,662*l.* in 1929 and 9,287,735*l.* in 1930 from the United States of America; and 15,811*l.* in 1929 and 6,894*l.* in 1930 from the Belgian Congo. The imports of Government stores amounted to 4,317,513*l.* in 1929 and 4,309,259*l.* in 1930.

The total exports, excluding specie, in 1929, were 87,270,792*l.* and 72,981,749*l.* in 1930 (excluding ships' stores value 2,022,191*l.* in 1929 and 1,738,003*l.* in 1930), of which 55,899,554*l.* in 1929 and 50,683,980*l.* in 1930 went to the United Kingdom, 10,385,649*l.* in 1929 and 7,515,505*l.* in 1930 to the rest of the Empire and 1,666,580*l.* in 1929 and 1,248,641*l.* in 1930 to the U.S.A.

### Shipping and Communications.

Oversea shipping 1930: entered, 1,579 vessels of 5,414,965 tons net; cleared, 1,601 of 5,446,593 tons. Coastwise: entered, 4,123 vessels of 10,284,513 tons net; cleared, 4,091 of 10,231,709 tons.

Prior to the Union the State Railways of the several colonies were operated by the separate Governments. In May, 1910, the Government lines were merged into one system, the South African Railways, under the control of the Union Government. The total open mileage at the end of March, 1930, was 12,873 (comprising Cape 5,094 miles, Orange Free State 1,595 miles, Transvaal 3,281 miles, Natal 1,472 miles, and South West Africa 1,431 miles), of which 11,977 miles are 3 ft. 6 in. gauge, and 896 miles 2 ft. gauge. Capital expenditure on Government Railways up to March 1930, amounted to 143,327,941*l.* Earnings, 1929-30, 26,130,549*l.*; working expenditure, 1929-30, 20,878,539*l.*, including depreciation amounting to 1,890,233*l.*; passengers, 1929-30, 80,532,855. Mileage of private lines, 1929-30, 411 miles (Cape 249, Natal 84, O.F.S. 4, and South West Africa 74).

At the end of 1929-30 there were in the Union 3,334 post and 2,801 telegraph offices; 6,305,000 telegrams of all classes were forwarded. The number of money orders issued during the year 1929-30 was 634,097, while 601,574 orders were paid. 4,354,317 postal orders were issued, and 3,860,347

paid. The cash revenue of the Department of Posts and Telegraphs, 1929-30, was 4,073,232*l.*; expenditure, 3,231,432*l.* The revenue figures include 550,398*l.*, from the telegraph service, and 1,575,959*l.* from the telephone service.

At the end of March, 1930, there were 36,507 miles of telegraph wire, and 370,826 miles of telephone wire in use; there were 100,437 telephone instruments and 70,041 subscribers. A station working on the 'beam' system and in direct communication with the United Kingdom was opened for the acceptance of public traffic on July 5, 1927.

The number of depositors in the Government Savings Bank in the Union at the end of March, 1930, was 420,351, and the amount standing to their credit 6,075,759*l.*

<sup>1</sup> In December, 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June, 1921, and began to issue notes in April, 1922. Liability for the outstanding notes of the commercial banks was transferred to it on June 30, 1924, and amounted to 155,926*l.* on March 31, 1931. A branch was opened in Johannesburg on September 1, 1925, and further branches at Cape Town, Durban, Port Elizabeth and East London by the end of the year.

### Money, Weights, and Measures.

An Act of 1922 provided for the issue of a Union Coinage with denominations identical with those of British Coins, which remain legal tender. A branch of the Royal Mint which was established at Pretoria, was taken over by the Government in January, 1932.

Union of South Africa silver and bronze coins of 2*s.* 6*d.*, 2*s.*, 1*s.*, 6*d.*, 3*d.*, 1*d.*,  $\frac{1}{2}$ *d.*,  $\frac{1}{4}$ *d.* are being coined and are in circulation. A considerable portion of the gold output is being minted.

An Act (No. 22 of 1922) was passed legalizing the optional use of either the metric or the imperial standard weights and measures, but under a proclamation of 1923 the cwt. has been replaced by the 'cental' of 100 lbs. The following old Dutch measures are, however, still in use:—*Liquid Measure*: Leaguer = about 128 imperial gallons; half aum = 15 $\frac{1}{2}$  imperial gallons; anker = 7 $\frac{1}{2}$  imperial gallons. *Capacity*: Muid = 3 bushels. The customary surface measure is the *Morgen*, equal to 2·1165402 acres; 1,000 Cape lineal feet are equal to 1,033 British imperial feet.

### PROVINCE OF THE CAPE OF GOOD HOPE.

**Constitution and Government.**—The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806 and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, August 13, 1814. Letters Patent issued in 1850 declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly. On the 31st May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

Cape Town is the seat of the Provincial Administration.

**Administrator.**—The Hon. J. H. Conradie. Appointed 1929. (Salary 2,500*l.*)

The Province is divided into 125 magisterial districts, and the Province proper, including Bechuanaland, but exclusive of the Transkeian territories, into 90 divisions. Each division has a Council of at least 6 members (14 in the Cape Division) elected triennially by the owners or occupiers of immovable property. The duties devolving upon Divisional Councils include the construction and maintenance of roads and bridges, control of outspans, trekkpaths and public servitudes, destruction of noxious weeds, and preservation of public health.

There are 128 Municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are also 70 Village Management Boards.

**Area and Population.**—The following table gives the population of the Cape of Good Hope at each census:—

Census Year	All Races			European		Coloured

1930	19,468	7,416	6,529	40,609	26,142	9,752

<sup>1</sup> Partial registration.

**Religion.**—In 1926 (Europeans only) there were 678,309 Christians—410,227 members of Dutch Churches, 132,703 Anglicans, 25,539 Presbyterians, 4,494 Congregationalists, 42,043 Methodists, 10,781 Lutherans, 28,023 Roman Catholics, 10,149 Baptists, and 14,350 other Christian sects. Jews 23,984, others 3,844.

**Education.**—Local school administration is conducted by school boards and school committees, the unit of administration being the school district. There are now (1931) 111 such districts, each under the control of a school board, a portion of the members being elected by the ratepayers and a portion nominated partly by the Provincial Administration and partly by the local authorities. Education is compulsory for children of European parentage. Grants in support of education are provided from Provincial Council revenues, education up to the age of fifteen being free.

Provincial expenditure in 1930-31 on education (excluding Higher Education, which is under control of the Central Government) amounted to 2,697,015*l.* on European, and 716,697*l.* on non-European education.

In 1929 there were 2,349 public and 33 aided private schools for European scholars, and in addition 12 Institutions for the training of teachers. There were 142,967 European pupils, mostly under School

Boards, and a total of 6,438 teachers. There were 2,366 public and aided private schools for non-European scholars, of which 16 were industrial schools and 21 training institutions for teachers. Altogether, there were 5,562 teachers in non-European schools, and a total of 211,197 pupils, mostly under churches and missionary bodies.

**Pauperism.**—There is no organised system of poor-law relief, but in 1929-30, 24,802*l.* was distributed in such relief.

An Old Age Pension Act was passed in 1928, and came into force on January 1, 1929. The Act provides for an amount of 30*l.* per annum being paid to indigenous European persons who reach the age of 65, and 18*l.* per annum to persons of mixed or coloured race—but not Bantus. Up to August 31, 1930, awards had been made to 38,518 Europeans, and 17,865 coloured persons.

**Finance.**—Since the coming into effect of the Union there is only one financial statement for the four provinces together. Particulars are given above under the Union. Since the passing of the Financial Relations Act, 1913, the Provincial revenue consists of certain revenues assigned to the Province and an amount voted by Parliament by way of subsidy. The following figures show the provincial revenue and expenditure for five years —

	1925-26	1926-27	1927-28	1928-29	1929-30

## PROVINCE OF NATAL.

**Constitution and Government.**—Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and under charter of July 15, 1856, erected into a separate Colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council, June 26, 1893, the Colony obtained responsible government. The province of Zululand was annexed to Natal on December 30, 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in January, 1903. On May 31, 1910, the Colony was merged in the Union of South Africa, becoming an original province of the Union.

The seat of provincial government in Natal is Pietermaritzburg.

*Administrator.*—The Hon. H. Gordon *Watson* (Jan. 1928) (2,000*l.*).

**Area and Population.**—The Province (including Zululand, 10,427 square miles) has an area of 35,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The Province is divided into 41 Magisterial Districts.

The European population has more than trebled since 1879. The returns of the total population at the last six censuses were:—

Census Year	All Races			European		Coloured	
	Total	Males	Females	Males	Females	Males	Females
1904 . .	1,108,754	550,631	558,123	56,758	40,851	498,873	517,772

The figures for 1904 and 1911 include the districts of Vryheid, Utrecht, Paulpietersburg, Ngotshe, and Babanango.

Population of Durban according to the census of 1921: European 58,085, other 93,557, total 151,642; and of Pietermaritzburg: European 17,998, coloured 18,025, total 36,023. The European population of Durban in 1918 was 48,413, and of Pietermaritzburg, 18,525. The census figures for the European population of Durban in 1931 are 86,271, and of Pietermaritzburg, 21,566.

Vital Statistics are shown as follows:—

Year	European			Non-European <sup>1</sup>		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1928	3,514	1,498	1,525	8,259	4,344	2,122

1930	3,643	1,658	1,454	8,417	4,989	3,000

<sup>1</sup> Partial registration.

**Education.**—With the exception of Higher, Technical and Vocational Education which is under the control of the Union Government, Education comes under the Provincial Administration. In 1930 there were, for children of European extraction, 168 schools giving primary, 28 giving beyond primary education, in all 196 schools, which were supported either entirely or partially by Government funds. In addition there were 1 training school for teachers, and 283 farm schools. For non-European children, there were 696 native schools; 82 Asiatic schools and 22 other coloured schools, State and State-aided. The average number of European pupils in regular attendance at the Government and inspected schools was 26,332 for 1930; the average daily attendance 94 per cent. of the number on the registers. The number of native, Asiatic, and coloured children receiving instruction in 1930 amounted to 66,113. A sum of 202,774*l.* was spent on native, Asiatic and coloured education, during the year 1930-31 out of public funds; the corresponding figure in respect of European education was 552,933*l.* It is estimated that only a very small percentage of European children are receiving no education.

**Finance.**—For financial arrangements, *see* p. 233 above. The following figures show the provincial revenue and expenditure for five years —

	1925-26	1926-27	1927-28	1928-29	1929-30

<sup>1</sup> Includes 21,250*l.* for 1925-26, 73,250*l.* for 1926-27, 79,760*l.* for 1927-28, 94,062*l.* for 1928-29, and 110,000*l.* for 1929-30 in respect of a Special Grant from the Union Government for Native Education.

Ordinary expenditure, 1929-30: general administration, 74,232*l.*; education, 785,029*l.*; hospitals and poor relief, 211,467*l.*; roads, bridges, works, 343,589*l.*; miscellaneous, 6,029*l.* The capital expenditure in 1929-30 was 236,128*l.*

**Production and Industry.**—On the Coast and in Zululand there are vast plantations of sugar (output, 1928-29, 295,934 tons) and tea, while cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima*, the bark of which is so much used for tanning purposes, and other crops are produced.

The Province is rich in mineral wealth, particularly coal. Other minerals are asbestos, copper ore, fireclay, gold, graphite, gypsum, iron ore, lead and silver ore, limestone and marble, manganese ore, mica, molybdenum ore, nickel ore, nitre, oil shale, and tin ore. For figures of mineral production, *see* p. 237.

The various factory industries of Natal in 1927-28 numbered 1,088, with an annual output valued at 24,128,297*l.* They had 11,088,433*l.* invested in machinery, etc.; annually used materials worth 13,776,343*l.*; and paid 4,550,865*l.* yearly in wages to 42,837 employees.

A Whaling Industry was commenced at Durban in 1908. It is regulated by the Provincial Government, as indiscriminate slaughter was driving the whales away from the South African waters.

**Commerce.**—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

## PROVINCE OF THE TRANSVAAL.

**Constitution and Government.**—The territory was colonised by Boers from Cape Colony in 1836-37. In 1852 the independence of the Transvaal Government was recognised by Great Britain, but in 1877, in consequence of financial difficulties and troubles with the natives, and in accordance with representations and petitions from the Boers, the territory was annexed by the British Government. In 1880 the Boers rebelled, and in 1881 a Convention was signed restoring self-government, but with conditions, reservations, and limitations, and subject to the suzerainty of the British Crown. This arrangement was modified by a Convention in 1884, in which the name of the South African Republic was given to the Transvaal State; but the control over external affairs, other than engagements with the Orange Free State, was reserved to the Crown. The discovery of gold and the conditions which followed this discovery occasioned difficulties finally resulting in war. This led to the annexation of both States to the British Crown, the one on September 1, 1900, under the name of The Transvaal, and the other (May 24) as the Orange River Colony. Hostilities continued till May 31, 1902. [See STATESMAN'S YEAR-BOOK for 1906, under *The Transvaal*.]

The administration was thereafter carried on under a Governor and Lieutenant-Governor, assisted by an Executive and a Legislative Council. On December 6, 1906, Letters Patent were issued providing for a Constitution of responsible Government in the Colony. The Colony was merged in the Union of South Africa on May 31, 1910, as an original Province of the Union.

The seat of provincial government for the Transvaal is at Pretoria.

**Administrator.**—The Hon. J. S. Smit. Appointed November 2, 1928 (salary, 2,500*l.*).

**Area and Population.**—The area of the Province is 110,450 square miles, divided into 39 districts. The following table shows the population at each of the last six censuses:—

**Education.**—All education except that of a university and of a vocational type is under the provincial authority. The Province has been divided for the purposes of local control and management into thirty-two school districts. Instruction in Government Schools, both primary and secondary, is free.

The following statistics of education are for the year ending Dec. 31, 1930: 1,198 primary schools with 123,452 pupils; 41 beyond primary schools, with an enrolment of 11,880 pupils; 640 State and State-aided schools for coloured, native and Indian children, with 79,366 pupils. There are four training institutions for European teachers, with 865 students; and five for coloured and native teachers, with 474 students. During the year 1930, 3,139,515*l.* was expended for educational purposes.

The medium of instruction up to the fourth standard is the home language (English or Afrikaans) of the pupil, but parents may request that the other language be gradually introduced as a second medium. Above the fourth standard both languages may be used at the parents' option or as occasion allows. Bible History is taught in every school, but no doctrine or dogma peculiar to any religious denomination or sect may be taught.

**Finance.**—For financial arrangements, *see* p. 233 above.

The following figures show the provincial revenue and expenditure for five years:—

	1925-26	1926-27	1927-28	1928-29	1929-30

The Provincial Revenue is mainly derived from Licences, Native Pass Fees, Poll Tax, Transfer Duty and Companies' Tax.

**Production and Industry.**—The Province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

The live-stock numbered, in 1928, 3,019,123 cattle; 5,500,600 sheep; 905,651 goats.

For mineral production, *see above*, p. 237. The Province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile, and pottery works, tobacco, soap, and candle factories, coach and wagon works, &c. The Transvaal gold output in 1929 was 10,414,066 ozs. valued at 44,259,780*l.*; in 1930 10,719,760 ozs. valued at 45,558,980*l.*, and in 1931, 10,874,145 ozs.

**Commerce.**—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

### PROVINCE OF THE ORANGE FREE STATE.

The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the

southern parts of the Orange Free State, and the Great Trek greatly augmented the number of settlers during and after 1836. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal Rivers as a British Possession and established what was called the Orange River Sovereignty. Great dissatisfaction was caused by this step, as well as by the native policy of the British Government. In 1854, by the Convention of Bloemfontein, British Sovereignty was withdrawn and the independence of the country was recognised.

During the first five years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered. The British Government then stepped in and arranged matters much to the dissatisfaction of the conquering party. By the treaty of Aliwal North, only a part of the territory of the Basutos was incorporated in the Orange Free State.

On account of the Treaty between the Orange Free State and South African Republic, the former State took a prominent part in the South African War (1899–1902), and was annexed on May 28, 1900, as the Orange River Colony. After peace was declared Crown Colony Government was established and continued until 1907, when responsible government was introduced. On May 31, 1910, the Orange River Colony was merged in the Union of South Africa as the Province of the Orange Free State.

The seat of provincial government is at Bloemfontein.

*Administrator.*—The Hon. C. T. Wilcocks (salary, 2,000*l.*).

There are municipalities at Bloemfontein and other centres, 61 in all; local authorities have, so far as possible, the usual local administrative powers.

**Area and Population.**—The area of the Province is 49,647 square miles; it is divided into 31 districts. The census population has varied as follows :—

Census Year	All Races			European		Coloured	
	Total	Males	Females	Males	Females	Males	Females
1904 .	387,815	210,095	177,220	81,571	61,108	128,524	116,112
1911 .	528,174	277,518	250,656	94,488	80,701	183,080	169,955

1931 .	—	—	—	104,735	100,589	—	—

The capital, Bloemfontein, had, in 1921, 19,367 white inhabitants, and 19,667 natives and other coloured persons; total, 39,034. The 1931 Census figures for the European population are 28,496.

Vital statistics are shown as follows :—

Year	European			Non-European <sup>1</sup>		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1926	5,809	1,611	1,690	1,880	1,912	1,780

<sup>1</sup> Partial registration.

**Religion.**—The census of 1926 (Europeans only) gave the following results: Dutch Churches, 163,504; Anglican Churches, 13,235; Presbyterians, 3,945; Methodists, 7,478; Lutherans, 893; Roman Catholics, 2,516; Apostolic Faith Mission Church, 1,889; Jews, 5,753; others, 3,772.

**Education.**—Higher and vocational education is under the control of the Union Education Department, while primary and secondary education and the training of teachers are controlled and financed by the Provincial Administration. The amount spent during year ended March 31, 1931, on European education was 896,249*l.*, and on non-European education, 39,232*l.* Under the Education Ordinance of 1930 the Province is divided into 61 School Board Districts, for each of which there is a School Board elected by the School Committees in the district. In 1930 there were 727 European public schools and 84 aided private schools in the Province, with a total enrolment of 45,099 pupils. The number of teachers in European schools totalled 2,114. Similarly, there were 216 non-European public and aided private schools with total enrolment of 25,120 and 2 Training Institutions for native teachers; the number of teachers was 568. Education is free in all public schools up to the University Matriculation standard, but certain schools are allowed to charge fees and to expend the proceeds for the advantage of the schools. Attendance is compulsory between the ages of 7 and 16, but exemption may be granted in special cases or when a child has passed Standard VI and is in regular employment. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction and the second language being introduced gradually during the primary school course. In all the towns and villages of the Province there are either secondary or intermediate schools preparing pupils up to the standard of the University Matriculation. The Normal College trains about 120 teachers annually.

**Finance.**—For financial arrangements *see* p. 233 above. The following figures show the provincial revenue and expenditure for five years:—

	1925-26	1926-27	1927-28	1928-29	1929-30

Ordinary Expenditure, 1929-30: General administration, 56,928*l.*; education, 993,213*l.*; hospitals and poor relief, 63,468*l.*; roads, bridges, works, 303,034*l.* The capital expenditure in 1929-30 was 293,970*l.*

**Production and Industry.**—The Province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country is still mainly devoted to stock-farming, although a rapidly increasing quantity of grain is being raised, especially in the Eastern Districts.

For Mineral Statistics *see* p. 237.

**Commerce.**—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

The money, weights, and measures are English. The land measure, the Morgen, is equal to about 2·1165 acres.

## WEST AFRICA.

These Possessions are the Colony and Protectorate of Nigeria; the Gambia Colony and Protectorate; the Gold Coast Colony with Ashanti and Northern Territories; and the Sierra Leone Colony and Protectorate.

Parts of Togoland and the Cameroons are also included as mandated territories.

### NIGERIA.

**History and Constitution.**—This territory comprises a number of areas formerly under separate administrations. Lagos, ceded in August, 1861, from a native king, was placed under the Governor of Sierra Leone in 1866. In 1874 it was detached, together with the Gold Coast Colony, and formed part of the latter until January, 1886, when a separate 'Colony and Protectorate of Lagos' was constituted. Meanwhile the National African Company had established British interests in the Niger valley, and in July, 1886, the company obtained a charter under the name of the Royal Niger Company. This Company surrendered its charter to the Crown in 1899, and on January 1, 1900, its territories were formed into the two Protectorates of Northern and Southern Nigeria. The latter absorbed the 'Niger Coast Protectorate,' which was formed in May, 1893, from the 'Protectorate of the Oil Rivers,' which had been constituted in June, 1885. In February, 1906, Lagos and Southern Nigeria were united into the 'Colony and Protectorate of Southern Nigeria,' and on January 1, 1914, the latter was amalgamated with the Protectorate of Northern Nigeria to form the 'Colony and Protectorate of Nigeria,' under a Governor. Lagos is the seat of the Central Government.

The Colony of Nigeria had its boundaries defined afresh, and the Protectorate was divided into two groups of provinces, the 'Northern Provinces' and the 'Southern Provinces,' each under a Lieutenant-Governor appointed by the King, and subject to the control and authority of the Governor.

The British mandated territory of Cameroon is now attached to Nigeria for administrative purposes.

The Executive Council of the Colony was made, from January 1, 1914, the Executive Council of the Protectorate also. It consists of a few of the senior officials. There is a Legislative Council, created by Order in Council in November 1922, consisting of the Governor, the members of the Executive Council, and other official members (total official membership not exceeding 30); three members elected by the ratepayers of Lagos; one member elected by the ratepayers of Calabar; four members selected respectively by the Chambers of Commerce of Lagos, Port Harcourt and Kano, and the local Chamber of Mines; two members to represent respectively Banking and

Shipping interests; and eight members to represent African interests in those parts of the Colony and Southern Provinces which do not return elected representatives. This Council legislates for the Colony and the Southern Provinces of the Protectorate, laws affecting the Northern Provinces being enacted by the Governor as heretofore.

*Governor of Nigeria.*—Sir Donald C. Cameron, K.C.B. (appointed December, 1930).

*Chief Secretary to the Government.*—G. Hemmant, C.M.G.

*Lieutenant-Governors in the Protectorate.*—Capt. W. Buchanan-Smith, C.M.G., M.C. (Southern Provinces); C. W. Alexander, C.M.G. (Northern Provinces).

There are altogether 24 provinces, including Cameroons, each under the immediate control of a Resident. In many provinces the administration is in the hands of the paramount chief and his officials.

**Area and Population.**—Area approximately 372,841 square miles; population census April 23, 1931, 20,762,083. [Northern Provinces: 281,945 square miles, 11,282,155 population (1930). Southern Provinces: 90,896 square miles, 8,449,914 population (1930).] The population of the Northern Provinces consists of several principal racial groups of Sudanese origin, in many of which a state of political organisation had been reached which facilitated and encouraged the policy of administration through native rulers and chiefs and existing native institutions. Similar conditions existed in a limited area in the Southern Provinces and the same policy has been extended *mutatis mutandis* to the thickly populated areas of more primitive peoples.

**Justice.**—The Chief Justice is the president of the Supreme Court of Nigeria, and three other judges are stationed in Lagos and one in Calabar. Police Magistrates have District Courts at Lagos and Ebute Metta, and Station Magistrates at Port Harcourt, Ibadan, Warri, Onitsha, Enugu, Calabar, Kaduna, Jos, Lokoja, Kano, and Zaria. In other places where the Supreme Court has jurisdiction, District Officers have the same powers as Police and Station Magistrates. In each province is a Provincial Court consisting of the Resident and his assistants, and such Justices of the Peace as may be appointed by the Governor. Native courts exist in Mohammedan localities where there are chiefs and councillors, and amongst pagan tribes Judicial Councils with limited judicial powers have been established in localities where the intelligence of the natives renders such a policy possible. The number of persons summoned before the District and Divisional Courts in 1930 was 19,017, of whom 16,683 were convicted.

**Religion and Education.**—*Northern Provinces.*—In this area the majority of the population has adopted the religion and social system of Islam. There are, however, regions into which Islam has not penetrated, and where therefore, the social life of the people is still very primitive and their religion some form of animism. In the Mohammedan Emirates education is chiefly in the hands of the Government, while the Missions concentrate upon the Pagans. The main principles underlying the educational policy are the use of vernacular in elementary education, the correlation at every stage of manual and literary subjects, and the provision at the top of more advanced education for the best pupils from the lower grades. The latest figures show that there are 33,426 Koran Schools with 183,300 pupils, 365 Elementary and Primary Schools with 11,300 pupils, 10 Middle Schools with 1,900 pupils, and 3 Training Institutions having a combined roll of 140 students.

*Southern Provinces.*—Although the vast majority of the inhabitants are wholly pagan, Christianity, presented by the various Christian Missions, and Islam, assimilated by contact with numerous African adherents, are rapidly gaining ground. The lower stages of education are mainly given in Mission schools or schools conducted by the African Churches and similar agencies. More advanced education is given in some Mission and Government institutions. The direction of policy and the supervision and inspection of all schools is undertaken by the Government Department of Education. The latest figures show that there are, in the Elementary or Primary grade, 2,743 schools with 185,400 pupils, and also 15 Middle or Secondary Schools with 930 pupils, and 13 Training Institutions having a total roll of 710 students.

Seven British, three French, one American, and the Basel Missionary Societies are working in the country as well as the Salvation Army and the different African Churches.

**Finance.**—Revenue, expenditure, and debt of Nigeria as a whole :—

Year (ending March 31)	Revenue	Expenditure— Ordinary Recurrent	Total Expenditure	Public Debt
	£	£	£	£
1926-27 . . . . .	7,784,429	6,259,086	7,584,692	23,559,209
1927-28 . . . . .	6,804,663	6,723,623	7,086,775	23,559,209
1928-29 . . . . .	6,031,270	6,861,099	7,495,058	23,559,209
1929-30 . . . . .	6,045,621	6,289,900	6,986,500	23,559,209
1930-31 . . . . .	7,190,054	6,329,668	6,329,668	28,350,582

In 1930-31 the total revenue included 1,567,854*l.* recovered in respect of advances from revenue for Loan Works. The surplus at March 31, 1930, was 3,736,807*l.*

The expenditure for the year ending March 31, 1931, on railway construction was 106,287*l.*

The main items of revenue for the year 1930-31 were :—Customs, 2,980,760*l.* ; Railway, 2,225,354*l.* ; Direct Taxes, 810,449*l.* ; Fees of Court, 417,920*l.* ; Marine, 317,303*l.* ; Mining, 15,417*l.* ; Posts and Telegraphs, 121,288*l.* ; Interest, 403,679*l.* ; Miscellaneous, 242,787*l.* ; Licences, 109,770*l.* ; Rent—Government Property, 52,266*l.* The chief items of expenditure were :—Railway, 2,329,604*l.* ; Charges on account of Public Debt, 1,013,398*l.* ; Public Works, 961,258*l.* ; Administrative, 506,414*l.* ; Military and Police, 598,502*l.* ; Education, 286,521*l.* ; Medical, 368,634*l.* ; Marine, 421,077*l.* ; Agriculture, 135,348*l.* ; Colliery, 94,691*l.* ; miscellaneous, 161,822*l.* ; Pensions and Gratuities, 334,328*l.* ; Posts and Telegraphs, 268,654*l.* ; Prisons, 136,169*l.* ; Railway Capital Expenditure, 77,449*l.* ; Medical Health Department, 127,305*l.* ; Surveys, 102,533*l.* ; Customs, 101,919*l.*

There is established in each native State in the Northern Provinces a Treasury which regulates the expenditure of that portion of the local revenue which is annually assigned to the native administration of each Emirate for its support and maintenance. There are also native treasuries in a few of the more advanced States in the Southern provinces.

**Production and Industry.**—The products (1930) are palm-oil (exports, 135,801 tons) and kernels (exports, 260,022 tons); cotton lint (exports, 160,166 cwt.), cocoa (exports, 523,313 tons), mahogany (exports, 8,093 logs), tin ore (exports, 12,067 tons). Sheep and goat skins are tanned and dyed. The natives have worked iron, lead, and tin for centuries. There are also deposits of coal, silver, galena, manganese ore, lignite, and monazite (which contains thorium).

Mining rights are vested in the Government, but under an agreement made with the Royal Niger Company at the date of the revocation of the charter, that Company receives half the gross profits derived from royalties on minerals won between the main stream of the Niger on the west and a line running direct from Yola to Zinder on the east, for a period of 99 years with effect from January 1, 1900.

**Commerce.**—The principal ports are Lagos, Warri, Burutu, Sapele, Koko, Akassa, Degema, Port Harcourt, Bonny, Opobo, Calabar, Tiko, and Victoria. Numerous rivers and creeks form the chief routes for transport, and there are many well-made roads.

Considerable trade is carried on in the Northern Provinces. There is also a large trade by caravans which, coming from Salaga in the west, the Sahara in the north, and Lake Chad and Wadai in the east, make use of Kano as an emporium.

The trade and shipping of Nigeria are shown as follows (bullion and specie are included):—

Year	Trade		Shipping entered and cleared	
	Imports	Exports	Total	British only
	£	£	Tons	Tons
1926	13,597,480	17,339,618	3,006,115	1,787,417
1927	15,064,687	16,340,957	3,307,312	1,904,514
1928	16,663,525	17,206,933	3,871,850	1,976,099
1929	13,404,447	17,922,501	4,018,801	3,075,034
1930	12,700,037	15,174,315	3,884,161	2,020,891

The chief imports (1930) were: Cotton-piece goods, 3,045,144*l.*; fish, 682,807*l.*; coopers' stores, 139,926*l.* Chief exports (1930): Palm kernels, 3,679,166*l.*; palm oil, 3,250,413*l.*; cotton lint, 623,558*l.*; cocoa, 1,756,400*l.*; ground-nuts, 2,195,756*l.*; hides and skins, 874,822*l.*

Imports from the British Empire, 1930, 8,978,419*l.*, and from U.S.A., 1,141,903*l.*

**Communications.**—The railway system comprises (1) a Western line from Lagos to Kano (704½ miles), crossing the Niger by bridge at Jebba, with branches from Minna to Baro (111 miles) and from Zaria to the Bauchi tin fields (Jos) (133 miles, light railway); and from Zaria Ka to Kaura Namoda (137 miles); and from Ifo to Idogo (27 miles). The Kano-N'Guru extension was opened on October 1, 1930. (2) An Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue by train ferry at Makurdi with a branch line connecting from Kafanchan junction (458½ miles) with the tinfields (Jos)—62½ miles. Total capital expenditure on Nigerian railway, to end of March, 1931, 21,365,916*l.*; gross receipts, 2,154,731*l.*; working expenditure, 1,213,039*l.*; gross expenditure, 1,313,209*l.*; net profit, 841,522*l.*; passengers carried, 3,662,879; goods and minerals transported, 761,582 tons.

The Railway also control the Udi Cear Mines at Enugu, the output of which was 327,681 tons for the year ending March 31, 1931.

There is a wireless station at Lagos under the control of the Eastern Telegraph Company for ship to shore communication.

In 1929 there were 159 Post Offices in Nigeria and the British sphere of the Cameroons. The Savings Bank on Dec. 31, 1929, had 9,842 depositors, with 37,743*l.* to their credit.

A special silver coinage for West Africa was introduced in 1913, the de-

nominations being 2s., 1s., 6d., and 3d., of the same size, weight, and fineness as corresponding coins of the United Kingdom. The new currency, with adequate reserves in London, based on gold and securities, is under the control of the West African Currency Board. A nickel coinage (penny, half-penny, and tenth of a penny) is also in use. In 1916 local currency notes were introduced (present denominations 20s. and 10s.), and in 1920 an alloy coinage of similar denominations to the silver coinage was added.

The Bank of British West Africa, Ltd., and Barclays (Dominion, Colonial and Overseas) Bank, Ltd., have branches in Nigeria.

### GAMBIA.

*Governor*.—Herbert R. Palmer, C.M.G., C.B.E. (2,500l., and 750l. allowances). Appointed February, 1930.

**Gambia** was discovered by the early Portuguese navigators, but they made no settlement. During the seventeenth century various companies of merchants obtained trading charters and established a settlement on the river, which, from 1807, was controlled from Sierra Leone; in 1843 it was made an independent Crown Colony; in 1866 it formed part of the West African Settlements, but in December, 1888, it again became a separate Crown Colony. It is administered under a Governor with an Executive and a nominated Legislative Council containing an unofficial element. With the exception of the Island of St. Mary, on which Bathurst, the capital, stands, the whole Colony is administered on the Protectorate system. Since 1901 both banks of the Gambia have been under direct British control up to the Anglo-French boundary.

Area of Colony proper, 4 square miles; population, 10,000. In the Protectorate (area, 4,130 square miles) the population in 1921 was about 200,000.

There were, in 1930, 6 elementary Government-aided schools and 3 Government Mahommedan schools, with 2,205 pupils enrolled, and an average attendance of 1,317; Government grant, proportional to results (1930), 1,937*l*. Of the elementary schools 2 are Roman Catholic, 3 Wesleyan, and 1 Anglican. The Wesleyans and Roman Catholics each have 2 secondary schools with a total of 55 boys and 109 girls enrolled. In May, 1929, Government opened a Vernacular School in the Protectorate, and this has had an average attendance of 31 pupils. In June, 1929, a Government Manual Training Centre was opened, at which boys from the assisted elementary schools attend for one half-day a week. A Teachers' Training School was opened in 1930. Total Government expenditure on education (1930), 9,622*l*.

There is a company of the West African Frontier Force of 142 men. The armed police has a strength of 142 men.

Chief exports: ground-nuts, 867,634*l*.; hides and skins, 2,462*l*.; palm kernels, 6,583*l*.

Imports from United Kingdom in 1930, 182,262*l*.; exports to United Kingdom, 1930, 173,971*l*.

The tonnage of the 572 vessels entered and cleared in the foreign trade in 1930 was 1,239,151 tons, of which 768,394 were British.

Internal communication is maintained by steamers or launches. There are several post offices, and postal facilities are also afforded to all river towns by means of a weekly travelling post office on the Government river mail-steamers. Postal packets and parcels dealt with in 1930, 271,743. Bathurst is connected with St. Vincent (Cape de Verde) and with Sierra Leone by cable, but there are no local railways. Bathurst is in wireless communication with

Georgetown, Kuntaur and Basse in the Protectorate. The Post Office Savings Bank had 645 depositors holding deposits value 1,698*l.* in 1930. A special West African alloy currency was introduced in 1920 (*see* under Nigeria, p. 256). West African currency notes in circulation December 31, 1930, amounted to 208,000*l.* There is one bank in the Colony, the Bank of British West Africa.

### GOLD COAST.

The **Gold Coast** first became known through Portuguese navigators in the fourteenth century, and English and Dutch traders and companies exploited the district in the seventeenth century, their main object being the slave traffic. The Dutch held settlements on the coast until 1871, when a convention was made transferring them to the English. The Colony stretches for 334 miles along the Gulf of Guinea, between the French Ivory Coast and Togoland. It is administered by a Governor with an Executive and a Legislative Council. Attached to it inland are Ashanti and the Northern Territories. Togoland under British Mandate is also attached to the Gold Coast for administrative purposes.

The area of the Colony, Ashanti, and Protectorate is 78,802 square miles; population, census 1931, 3,121,214; non-Africans, 3,182. Chief towns: Accra, 59,895; Sekondi, 16,742; Cape Coast, 17,685; Keta, 6,392; Winneba, 10,990; Saltpond, 6,896; Koforidua, 19,634.

In the Colony, Ashanti, the Northern Territories and Togoland under British Mandate there were, in 1930-31, 29 Government schools (including 1 kindergarten, 1 technical and 4 junior trade schools); 320 Assisted Schools (including 2 secondary schools and 6 training colleges) which are under the control of the various Missions, and the Prince of Wales' College at Achimota (formally opened on January 28, 1928), including Kindergarten, primary, secondary and university courses and classes for the training of teachers. The total number of pupils on the roll of Government and Assisted Schools was 41,924, of whom 9,693 were girls and 572 were teachers in training. There are in addition a large number of non-assisted schools supported by the various religious bodies. Government expenditure on education in 1930-31 (including the Northern Territories but excluding Achimota) was 231,155*l.*

The strength of the police, which is distributed throughout the Gold Coast Colony, Ashanti, Togoland, under British Mandate, and the Northern Territories is (1930-31) 37 European officers and 2,073 other ranks. Summary convictions (1930-31) 21,854 persons.

Staple products and exports, cocoa, gold, manganese, diamonds, kola nuts, mahogany, palm kernels, rubber, copra, and palm oil; in 1931 there were 200 horses, 100 donkeys, 220,000 sheep and goats, 60,000 pigs and 40,000 cattle. Many of the coast inhabitants are fishermen, and there is considerable traffic in dried fish by rail into the interior.

Imports, 1930: United Kingdom, 4,395,108½; U.S.A., 1,324,242½; Germany, 979,418½; Holland, 596,289½; France, 370,820½.

Exports, 1930: United Kingdom, 4,386,843½; U.S.A., 1,577,174½; Germany, 2,236,203½; Holland, 1,457,984½; France, 293,965½.

The shipping entered and cleared in the foreign trade in 1930 was 5,267,048 tons, of which 2,872,358 tons were British. The harbour of Takoradi, opened in March 1928, and appointed as a port on December 3, 1928, is the only complete shelter for ships of over 30 ft. draught between Sierra Leone and Nigeria. There was a net loss of 30,072½ in 1930-31 on the working of the harbour.

**Communications.**—Railway communication consists of a main line running from Sekondi to Kumasi thence to Accra, a distance of 362 miles, with branches, Takoradi Junction to Takoradi (7 miles), Inchaban Junction to Inchaban (4 miles), Tarkwa to Prestea (18 miles), and Huni Valley to Kade (99 miles). The main line and branches are 3 ft. 6 in. gauge. There is a branch line Accra to Weshiang (Accra Water Works) 10 miles in length, which is 2 ft. 6 in. gauge. The railway gross earnings for the year 1930-31 were 979,235½, and the working expenditure, including provision for renewals and pensions, was 630,787½. The total number of miles open for traffic on the 31st March, 1931, was 500, and the capital cost, 9,305,607½.

There are 6,264 miles of motorable roads in the Gold Coast, Ashanti, and the Northern Territories. There were in the Colony, March 31, 1931, 4,411 miles of telegraph trunks and 7,396 miles of telephone trunks and 274 offices, and there are telephone exchanges at Aburi, Accra, Ada, Adeiso, Akrokeri, Akropong (Akwapim), Akuse, Anyinam, Asamankese, Asuboi, Axim, Bekwai, Cape Coast, Dodowa, Dunkwa, Efidnasi, Ejisu, Elmina, Half Assim, Ho, Huhunya, Juaso, Keta, Kibi, Kintampo, Koforidua, Konango, Kumasi, Kwanyaku, Mampong (Akwapim), Mampong (Ashanti), Mangoase, Mpraeso, Navrongo, Nsawam, Nkawkaw, Nyakroon, Obuasi, Oda, Salaga, Swedru, Saltpond, Sekondi, Sunyani, Suhum, Tafo, Tarkwa, Tamale, Takoradi, Wenchi, Winneba. There are over 2,111 telephones now in use, and over 2,840 miles of wire in the exchange areas. The telephone trunk system connects up all the main towns in the Colony. Telegrams in 1930-31: 337,226. There is a wireless telegraph station at Takoradi. The number of letters, packets, &c., handled in the postal service in 1930-31 was 7,612,202. In 1930-31 the savings bank had 13,372 depositors with 89,115*l.* to their credit.

The Bank of British West Africa, Ltd. and Barclay's Bank (Dominion, Colonial and Overseas) operate in the Colony and Ashanti. For currency, *see* p. 256. West African currency notes in circulation at March 31, 1929, amounted to 1,831,663*l.*; March 31, 1930, 1,935,379*l.*; March 31, 1931, 1,963,573*l.*

**Ashanti** was placed under British protection on August 27, 1896. Under Orders in Council of September 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though only some of the laws and ordinances of the Gold Coast apply to the annexed territory. The area is 24,379 square miles and the population (census 1931) was 582,866; Europeans (1931), 400. Kumasi, the chief town, has about 25,000 inhabitants. For purposes of education, Ashanti is considered as part of the Gold Coast. The number of children in the Government schools was (1930) 1,207, and in the mission schools, 3,918. At the Agricultural and Forestry Training Centre 47 students were in residence during 1929-30. Police force (1929-30), 6 European officers and 276 other ranks. Prosecutions, 1930-31, 4,056, but there is little serious crime. There are 1,191 miles of motor roads. Agriculture is the staple industry. 66,721 tons of cocoa were exported by rail in 1930-31. Gold output (1930-31), 159,019 oz. (675,513*l.*). Average number employed in mining industry, 2,831 in 1930-31.

In the western parts of the Colony are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber, and gum copal. This district has been opened up by a trunk motor road from Kumasi to Pamu on the western frontier, via Sunyani, with the accompanying branch roads. The country is well watered, and with proper restraint it would contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, coco-yams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

In 1931 there were 1,500 cattle, 10,000 sheep and goats, 20,000 pigs, 400 horses, and 500 donkeys.

The Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection in 1901. They are administered, under the Governor, by a Chief Commissioner and 21 Political officers. The country is divided into two provinces, Northern and

Southern, with headquarters at Tamale in the Southern Province, 237 miles north of Kumasi. Estimated population (1931), 717,283; non-Africans (1931), 107. Chief towns, Tamale, 12,941; Navrengo, 18,138. Area of the Protectorate, 30,486 square miles; Mandated Territory is about 13,041 square miles in addition. Police force (1930-31), 2 European officers and 280 other ranks. The Mohammedans have substantial mosques; there are Roman Catholic and other missions. For the purposes of education the Northern Territories are regarded as a part of the Gold Coast under the administration of the Director of Education, but having a separate Ordinance and Rules. Government schools exist at Tamale, Gambaga, Salaga, and Wa. Pupils in 1930, 729. There is now a veterinary school in Tamale. There are also Mohammedan schools. There are 2,311 miles of motorable roads in dry season. The chief crops grown are yams, guinea corn, millet, maize, rice, and tobacco. Livestock, 1931: cattle, 96,000; sheep and goats, 454,200; donkeys, 15,430; horses, 3,740; pigs, 6,810. There are 5 quarantine stations through which foreign cattle and sheep enter the Protectorate. Gold-bearing quartz and alluvial deposits, and mica, exist.

## SIERRA LEONE.

The Colony of Sierra Leone originated in the sale and cession, in 1788, by a native King to English settlers, of a piece of land intended as a home for natives of Africa who were waifs in London; and later it was used as a settlement for Africans rescued from slave-ships. It lies between French Guinea on the north and the Republic of Liberia on the east and south-east. Sierra Leone proper consists of a peninsula about 26 miles long, and 12 miles broad, with an area of about 260 square miles, terminating in Cape Sierra Leone. The Colony of Sierra Leone extends from the Scarcies River on the north, to the border of Liberia on the south, 180 miles. Inland it extends to a distance varying from 8 to 20 miles and includes the Yellaboi and other islands towards the north, as well as Sherbro and several smaller islands to the south, but the Isles de Los were ceded to France under the Convention of 1904. There are for the Colony and Protectorate a nominated Executive Council and a Legislative Council consisting of the Governor, eleven official members, three elected unofficial members, and not more than seven nominated unofficial members, of whom three are paramount chiefs of the Protectorate. Elected members must be 25 years of age, and hold their seats for five years. The franchise is confined to males.

Area of the Colony 4,000 square miles approximately; population (census 1921), 85,163. Europeans, 1921, numbered 1,161. The birth-rate (1930) was 22·04 per thousand, and the death-rate 27·16; infantile mortality-rate 336 per 1,000 registered births. Owing to the fact that many births escape registration, the birth-rate appears lower and the infantile mortality-rate higher than they really are. Chief town, Freetown, 44,142 inhabitants (1921). The battalion of the Royal West African Frontier Force has its headquarters at Wilberforce, Freetown. Freetown, the greatest seaport in West Africa, is a second-class Imperial coaling-station, with an excellent harbour.

In 1930, there were 48 primary schools, belonging to missionary

societies and assisted from public funds, and 1 Government primary school. The average attendance in these 49 schools was 4,842. Salaries paid by Government, under amalgamation scheme, to African teachers in mission schools, including grants to European teachers at Roman Catholic schools, amounted to 10,973*l*. There were 8 assisted secondary schools with an average attendance of 899. The grant awarded these secondary schools amounted to 1,355*l*. One of these (the Albert Academy) includes industrial work in its curriculum. There were also 2 assisted industrial schools with an average attendance of 78, and one (The Sir Alfred Jones' Trades School) controlled by Government with an average of 23 boys. The assisted industrial schools received grants amounting to 211*l*. Besides these there were 1 secondary, 1 preparatory to secondary, and 2 primary unassisted schools.

The Government conducts in Freetown a Model School for primary and post-primary education with an average attendance of 237, and a secondary school for boys with an average attendance of 78. Fourah Bay College which is under the management of the Church Missionary and Wesleyan Missionary Societies is affiliated to the University of Durham.

Police force at end of 1930 had an authorised strength of 304, including 5 European officers. In 1930, 31 persons were convicted in the Supreme Court, and 48 in the Circuit court.

<sup>1</sup> Excluding railway revenue and expenditure.

The revenue in 1930 from customs was 426,944*l*.; railway, 190,577*l*.; licences, 13,145*l*.; court fees, 75,138*l*.; post-office, 13,763*l*.; light dues, 15,190*l*. house tax, 78,343*l*.

Net public debt, December 31, 1930, 1,990,173*l*.

Principal imports, 1930: cotton manufactures, 224,704*l*.; coal, 42,763 tons, 62,698*l*.; spirits, 34,931 gallons, 25,397*l*.; tobacco manufactured, 58,016 lbs., 23,727*l*.; tobacco unmanufactured, 1,364,854 lbs., 62,809*l*.; oil (kerosene), 465,015 gallons, 31,114*l*. Principal exports, 1930: ginger, 1,972 tons, 57,228*l*.; kola nuts, 2,271 tons, 186,197*l*.; palm kernels, 56,641 tons, 664,591*l*.; palm oil, 3,652 tons, 79,310*l*.; piassava, 2,417 tons, 36,582*l*.

Imports (Board of Trade returns) from United Kingdom in 1931, 557,905*l*.; exports thereto, 208,586*l*.; 1930, imports, 625,423*l*.; exports, 312,633*l*.

The tonnage of vessels entered and cleared in the foreign trade (excluding vessels in Admiralty service) was (1930) 4,621,121 tons, of which 2,816,249 tons were British.

A Government railway, a single line of 2ft. 6in. gauge, is open from Freetown to Pendembu, near the Liberian frontier, a length of 227½ miles. From Bauya Junction, 64½ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. Total line open, 1930, was 310 miles, excluding sidings. Total receipts 1930, 190,577*l*., gross expenditure 268,006*l*. There are over 1,912 miles of telegraph and telephone, including electric-train-staff lines. In 1930, 2,014,666 postal packets

were dealt with in the Colony; money order transactions amounted to 42,813*l*. There are 1,151½ miles of combined telegraph and telephone wires in operation. There are 69 post offices and postal agencies. At the end of 1930 there were 8,005 depositors in the savings bank with 62,796*l*. (inclusive of interest) to their credit. The West African Silver Currency was introduced in 1913 (*see* under Nigeria, p. 251), and in 1920 West African Alloy Coinage was put into circulation; but British coins are still used. Currency notes of the West African Currency Board are in circulation (150,000*l*. at the end of 1928). The Bank of British West Africa and the Colonial Bank have their headquarters at Freetown.

**The Protectorate.**—The Protectorate was proclaimed August 21, 1896. On March 7, 1913, an Order in Council was issued providing for its administration; this was revoked and replaced by an Order in Council of January 16, 1924. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and January 21, 1911. The Protectorate extends inland about 180 miles.

The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is given to the Legislative Council of Sierra Leone, by ordinance, to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown.

The Protectorate has an area of 27,000 square miles, and a population, according to the census of 1921, of 1,456,148 (natives, 1,450,903). The whole territory has been divided into two Provinces, each of which is placed under a European commissioner. Circuit courts are held at the chief centres of population. There are also district commissioners' courts, chiefs' courts for purely native cases (not serious crime), and combined courts (a chief and a non-native) for small debts and trivial misdemeanours (assaults, abusive language) arising between native and non-native. The chief articles of imports are cotton goods, spirits, hardware and tobacco; the chief exports are palm kernels, kola nuts, palm oil, and ginger. A platinum-bearing area of about 40 square miles has been discovered. Platinum and gold are now being mined in small quantities. Two large hematite deposits have been discovered and exploitation of one deposit is being proceeded with. Deposits of chromite of commercial value have been found at a short distance from the Government Railway. There were, in 1930, 159 mission primary schools, 81 of which received assistance from the Government. The average attendance at the assisted schools was 3,729 and the grant paid them was 2,902*l*.; 6 assisted secondary schools with an average attendance of 391, and which received grants amounting to 875*l*.; one industrial school with an average attendance of 50, and which received a grant of 110*l*.; a Government School for the sons and nominees of chiefs at Bo, with 153 pupils at the end of 1930; in 1929, Government opened a Central School at Koyeima, the 136 pupils from the old school at Njala being transferred there. There were also 10 smaller Government Rural Schools, with a total of 386 pupils; 20 apprentices were in training at the Agricultural College at Njala.

*Governor.*—Sir Arnold Weinholt Hodson, K.C.M.G. (1930).

*Colonial Secretary.*—C. E. Cookson.

## ANGLO-EGYPTIAN SUDAN.

## Government.

The rule of Egypt in the Sudan, after having gradually extended during the course of 60 years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country from 1885 for about 13 years under a desolating tyranny. In 1896 an Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899, he was killed by the Egyptian forces near Gedid.

A convention between the British and Egyptian Governments, signed at Cairo, January 19, 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. The British and Egyptian flags shall be used together; laws shall be made by proclamation; no duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt; the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition, and spirits.

The Sudan is divided into thirteen Provinces under Governors. Administration is carried out through British District Commissioners one or more of whom are appointed to each of the districts into which the provinces are subdivided. Native administrative officers are employed under the District Commissioners. Courts of Sheikhs and Chiefs have varying powers of limited jurisdiction over their tribesmen in accordance with native custom throughout the country.

In 1910 a Governor-General's Council was created to assist the Governor-General in the discharge of his executive and legislative powers. All ordinances, laws and regulations are now made by the Governor-General in Council.

### Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N. lat. 5°), a distance of about 1,650 miles, and stretching from the Red Sea to the confines of Wadai in Central Africa, the subject territory has an area of 1,008,100 square miles. The population of the Sudan, according to the most recent estimates, is 5,605,848, including natives of the Sudan, 1,432,606 men, 1,782,903 women, 2,330,431 children, total 5,545,940; non-natives, 59,908. (As so great a proportion of the people are nomads, the numbers are difficult to assess with any degree of accuracy, and the figures of the native population must be taken as approximations only.) The Gambela Enclave, situated within the boundaries of Abyssinia, is leased by the Sudan Government from the Abyssinian Government as a Trading Post. The Eritrea-Sudan frontier and the frontier with French Equatorial Africa have been delimited and demarcated, as also has the greater part of the frontier with Abyssinia (see under *Abyssinia*). The chief towns are: Khartoum, population 50,463, the capital; Omdurman (the old Dervish capital), population 103,669; Khartoum North and Rural District, population 107,720; Wadi Halfa, Merowé, El Damer, Atbara, Port Sudan, Suakin, Kassala, Ed Dueim, Kosti, El Obeid, En Nahud, Wad Medani, Singa, and El Fasher.

### Education.

The schools under the Central Authority are classified as follows:—(1) The elementary vernacular schools (Kuttabas), 89 in number (January, 1931), situated in all parts of the country, and with a total number of about 8,348 pupils. Instruction is given to boys from 7 to 12 years of age. (2) The primary schools, of which there are now 11—at Khartoum, Omdurman, Khartoum North, Wad Medani, Atbara, El Obeid, Halfa, Rufaa, Berber, El Dueim and Port Sudan. The number of boys in attendance is 1,310. The school at Gordon College is attended by 535 pupils, 13 of whom are being trained as teachers for the primary schools, and for the College itself. There is also in the Gordon College buildings a training college attended by 7 students, who are eventually drafted out as Kadis in district courts. Also in Khartoum, but separate from the Gordon College, is the Arifs' College, attended by 44 students who are being trained as teachers for the Kuttabas. The industrial workshops, of which there are three, at Khartoum, Omdurman and Atbara, are attended by 376 boy apprentices. There is a training college for girls in Omdurman attended by 60 students, and 20 other girls' schools, attended by 1,886 girls altogether. Affiliated to the Gordon College are the Wellcome Tropical Research Laboratories, where investigations are carried on in connection with diseases and with the

economic products of the country. In addition to the above the Central authority aids 768 native schools (Khalwas) attended in 1930 by 29,360 boys.

### Justice.

The Courts of Justice as well as the Registry of Lands, the Department of Government Lands, and the offices which deal with the legal business of the Government, are administered by the Legal Secretary, who has a permanent seat *ex-officio* on the Governor-General's Council.

The High Court of Justice for the trial of civil suits comprises the Court of Appeal and Courts of original jurisdiction. Judges of the High Court sitting singly have general original jurisdiction. The Court of Appeal is constituted by any two or more Judges of the High Court sitting together.

The general superintendence of the High Court is vested in the Chief Justice. In addition to the Chief Justice there are four Judges of the High Court.

Subordinate to the High Court in every province is the Province Court. This comprises a Province Judge, except in Khartoum Province, and District Judges of three grades. An Appeal lies to the Court of Appeal from a decree made in a suit of value more than £E60 if the value of the relief claimed in the appeal is more than £E50. There are wide powers of revision exercised by the Court of Appeal or the Province Judge in matters where there is no right of appeal.

In Provinces where there is neither a High Court Judge nor a specially appointed Province Judge the Governor acts as Province Judge, and in any District where there is no specially appointed District Judge, the district commissioners and assistant district commissioners act as District Judges. There are four specially appointed British District Judges, and seven specially appointed District Judges of the second grade.

The Mohammedan Law Courts administer the Moslem religious law in cases between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, and also Mohammedan charitable endowments.

In some districts there are native courts presided over by sheikhs, chiefs, or village elders. This system is being developed and extended.

Criminal justice is administered either by single magistrates, or courts of three magistrates. Judges of the High Court, and District Judges of the first and second grades, governors of provinces, district and assistant district commissioners, and some subordinate administrative officials are magistrates; there are also native notables appointed as magistrates to sit as members of courts. Decisions of courts in the more serious cases require confirmation either by the Governor of the province or by the Governor-General, both of whom have extensive powers of revision. Rights of appeal exist.

The Sudan penal code is an adaptation of the Indian penal code.

### Defence.

Egyptian troops were evacuated in 1924, and a new Sudan Defence Force, owing allegiance to the Governor-General, has been created.

### Finance.

The revenue and expenditure of the Sudan are as follows (£E1 = £1 0s. 6d.) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	££	££		££	££
1925 . .	4,866,883	4,375,670	1928 . .	6,646,883	6,045,286
1926 . .	5,857,989	5,482,388	1929 . .	6,981,590	6,610,274
1927 . .	5,929,945	5,560,489	1930 <sup>1</sup> . .	4,693,623	4,693,623

<sup>1</sup> Including net receipts only from Railways and Steamers.

The main sources of revenue in 1930 were: Land Tax (££27,667); Animal Tax (££150,913); Royalties (££152,950); Customs (££663,538); Railways net profit (££506,025); Posts and Telegraphs (££184,316).

These figures do not include the revenue and expenditure of Local Provincial Services, which amounted in 1926, to ££208,168 and ££192,422; 1927, to ££157,174 and ££143,673; 1928, to ££133,577 and ££116,743; 1929, to ££126,543 and ££108,719; 1930, to ££90,132 and ££791,536.

### Production and Commerce.

The Sudan is the chief source of the world's supply of gum arabic, exports of which in 1930 amounted to 20,072 tons, valued at ££980,157. Egyptian cotton has been well established, and increasing quantities, which compare favourably with corresponding varieties grown in Egypt, are being produced annually. In 1930-31 the area of cotton on the Gezira Irrigation Scheme (put into operation in 1925) was increased to 196,000 acres and produced a crop of 266,343 kantars of 315 lbs. seed cotton. The areas of cotton grown on the Gash and Baraka Deltas were 37,900 and 60,000 acres respectively and produced 57,300 and 68,200 kantars of 315 lbs. seed cotton. In addition, increasing quantities of high-grade, long-staple American cotton are produced in the Northern Provinces of Berber and Dongolla under irrigation, and as a rain crop in the Kassala, Fung, Blue Nile and White Nile, Kordofan, Upper Nile, and Mongalla Provinces. The total area under cotton in the 1930-31 season is recorded as 373,051 acres, and the crop of 1930-31 amounted to 513,820 kantars of 315 lbs. of seed cotton.

Other products of the Sudan include sesamé, senna leaves and pods, ground-nuts, dates, hides and skins, salt, ivory and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). The cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for her meat supply.

In 1930 there were in the Sudan approximately 22,000 horses; 350,000 asses; 1,000 mules; 1,505,000 cattle; 2,200,000 sheep; 200,000 goats; and 400,000 camels. Pigs are kept by the Nubas only—about 5,000.

The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. On the White Nile they contain valuable trees—the ebony tree, the gum acacia, the bamboo, the rubber creeper, whilst the sudd area in the upper reaches is composed of an inexhaustible quantity of papyrus. The finest gum forests are in Kordofan, and the best rubber in the Bahr el Ghazal.

Gold is being successfully exploited in the Sudan, a mine being worked at Gabait in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country, and considerable quantities are exported annually to Abyssinia. In 1929 and 1930 the output from the salt fields totalled 11,688 tons and 14,082 tons respectively.

### IMPORTS AND EXPORTS.

The principal exports in 1930 were ginned cotton, 27,811 tons (valued at 3,046,330*l.*); cotton seed, 56,267 tons (205,746*l.*); gum, 20,072 tons (980,157*l.*); sesame, 12,071 tons (156,675*l.*); untanned skins of sheep and goats, 950 tons (98,250*l.*); untanned hides, 1,049 tons (40,604*l.*); cattle, 2,510 (54,070*l.*); sheep and goats, 5,773 (5,998*l.*); salted fish, 786 tons (23,669*l.*); ground nuts, 4,835 tons (40,078*l.*); dura, 8,932 tons (41,854*l.*).

### Internal Communications.

There is a railway from Wadi Halfa to Khartoum with connections to the Red Sea at Port Sudan and Suakin, to Kareima in Dongola Province and Sennar and El Obeid. There is also a line 498 miles long from Haiya on the Atbara—Port Sudan line to Sennar on the Blue Nile passing through Kassala (near Eritrea) and Gedaref. A new section from Gedaref to Makwar, 143 miles, was opened in 1929. The total length of the line open for traffic is 1,995 miles. The gauge is 3ft. 6in.

There is a motor transport service throughout the year between Juba and Aba (Belgian Congo) a distance of 143 miles, and between Juba and Nimule (127½ miles) on the Uganda border, from the end of December to the third week in March. Motor transport, privately owned in Kenya, operates between Nairobi and Kampala and Juba during dry season—November to April.

All navigable arms of the Nile and its tributaries between Assuan (Egypt) and Rejaf are served by a fleet of Government steamers.

There is telegraphic communication with Egypt, Erythraea, and Abyssinia, and also wireless communication with Gambela in Western Abyssinia and submarine cable communications with the Hedjaz. There are 20 wireless stations, 5,796 miles of telegraph and telephone routes, and 22,201 miles of wire, including those maintained by the Sudan Government Railway. There are 78 stationary Post and Telegraph Offices and 17 travelling Post Offices, and one office is opened to telegraph business only. In 1930, 19,984,886 postal packets were dealt with, 290,309 parcels and 789,618 telegrams. There were 1,520 telephone subscribers.

## BRITISH MANDATED TERRITORIES IN AFRICA (TANGANYIKA, SOUTH-WEST AFRICA, CAMEROONS, AND TOGOLAND).

### TANGANYIKA TERRITORY (LATE GERMAN EAST AFRICA).

**Government.**—German East Africa was conquered in 1918, and was subsequently divided between the British and Belgians. In March 1921 the district of Ujiji and part of Bukoba, formerly administered by the

Belgians, were handed over to British jurisdiction. The country is administered under mandates approved by the League of Nations. The mandates lay down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic, the trade in spirits, usury, and security of labour. The interests of natives are safeguarded.

Under an Order in Council, dated July 22, 1920, the Territory is administered by a Governor, who is assisted by an Executive Council, all of whose members are nominated. A Legislative Council has been constituted as from Oct. 1, 1926, consisting of 13 official members and not more than 10 non-official members. Rights in or in relation to any public lands vest in the Governor, but the Secretary of State for the Colonies may appoint, if he sees fit, another trustee or trustees to exercise such right. A Native Affairs Department was established in 1926.

**Area and Population.**—The Territory extends from the Uмба River on the north to the Rovuma River on the south, the coast-line being about 500 miles in length, and includes the adjacent islands. The northern boundary runs approximately north-west to Lake Victoria at the intersection of the first parallel of southern latitude with the eastern shore (Mohuru Point). The boundary on the west follows the Kagera River (the eastern frontier of Ruanda), thence the eastern boundary of Urundi to Lake Tanganyika. The western boundary then follows the middle of Lake Tanganyika to its southern end at Kasanga (formerly Bismarckburg), whence it goes south-east to the northern end of Lake Nyasa. Rather less than half-way down the lake the boundary turns east and joins the Rovuma River, whose course it follows to the sea. The total area is about 374,000 square miles, which includes about 20,000 square miles of water. Dar-es-Salaam is the capital, population, 25,000.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated (April 1921) at 4,107,000. Asiatics numbered 14,991 (Indians 9,411, Goans 798, Arabs 4,782), and Europeans 2,447. In 1930 the European population was estimated at 6,876 and the native population at 4,852,244. European population, 1931 census; 5,189 males, 2,974 females; total, 8,163. According to German law every native born after 1905 was free, but a mild serfdom was continued under German rule. Legislation for the abolition of slavery was enacted in 1922.

**Education.**—There were in 1930, some 94 Government schools with an average attendance of 5,606 pupils, and 3,044 Mission schools with an average attendance of 97,745 pupils. The amount allotted to education in 1930–31 was 127,211*l.* There are 3 schools for the children of Dutch settlers in the Arusha District and another European school at Engare Nairobi in the Moshi District. A school for young European children was established in Dar-es-Salaam in 1929, and a correspondence course exists for children in outlying districts who are unable to attend school.

There is a monthly paper published by the Government in Swahili.

**Finance.**—The revenue in 1930–31 was 1,749,478*l.*; expenditure 2,102,501*l.* The chief items of revenue were licences, taxes, etc., 854,890*l.*; customs, 569,824*l.*; fees of court or office, 119,353*l.*; posts and telegraphs, 70,843*l.* The chief items of expenditure were: public works, 267,096*l.*; provincial administration, 397,851*l.*; medical and sanitation, 261,519*l.*; military, 102,068*l.*; police and prisons, 144,781*l.* Education, 111,802*l.* Estimates 1931–32: revenue, 1,911,500*l.*; expenditure, 1,904,919*l.*

Loans were received from the Imperial Government in the years

1920-21 to 1925-26, amounting to 3,135,446*l.* for capital improvements and developments and were expended upon railway works, 1,298,614*l.*; other works, 766,824*l.*; restoration of war damage, 177,909*l.*, and to meet deficit upon recurrent account, 897,599*l.* Interest at 5 per cent. and sinking fund at 1 per cent. is being paid on the loan for railway and other works, while the balance is temporarily free of interest, but repayment is to be considered in 1933. A further loan of 2,070,000*l.* was raised in the home market in June, 1928, under the East African Guaranteed Loan Bill. Railway works, 1,736,000*l.*; ports and harbours, 100,000*l.*; other works, 234,000*l.* The loan bears interest at 4½ per cent. No payment of sinking fund for redemption need be made for a period of three years from date of flotation.

**Defence.**—The Southern Brigade Headquarters, the Brigade Signal Section, two sections and a sub-section of the Brigade Supply and Transport Corps, the 2nd and 6th Battalions and a company of the 1st Battalion (Nyasaland) of the King's African Rifles are stationed in the Territory. The police force consisted (1930) of 1,864 all ranks.

**Production and Industry.**—The total area under forest other than savannah forest is approximately 4,117 square miles of which 96·8 per cent. is Government forest reserves, 1·5 per cent. awaits reservation, and 1·7 per cent. is valuable forest in private ownership. These forests contain some good merchantable timbers in large quantity, among which Pencil Cedar, Yellow-Wood and Mvule are the most important. In addition, valuable species of hard woods occur as single trees or in groups widely scattered throughout large areas of savannah forest. Ebony is plentiful near the coast, and the creeks and river mouths support extensive mangrove woods valuable as a source of tanning bark and poles. The possible output of the Territory's forests far exceeds the present local consumption. The approximate production of timber and fuel wood in 1930 was 256,900 and 6,585,000 cubic feet respectively.

The chief export product of the territory is sisal fibre, the export of which in 1930 reached 49,962 tons, valued at 1,172,315*l.*, as compared with 45,728 tons, valued at 1,485,593*l.* in 1929. Other major export crops are: coffee, cotton, groundnuts, copra, simsim, grains and beeswax. The area under tea and tobacco (Turkish) in the South-western highlands is being extended and the exporting stage has now been attained.

In 1930 there were 5,170,162 cattle, 2,262,102 sheep and 3,259,443 goats in the territory.

The value of minerals produced in 1930 was: diamonds, 27,211*l.*; gold, 47,013*l.*; salt, 36,790*l.*; mica, 6,182*l.*; tin, 852*l.*; red ochre, 365*l.*; building minerals, 6,982*l.* Companies desiring to investigate the mineral resources can obtain information and assistance from the Mine Dept., Dar-es-Salaam.

**Trade and Shipping.**—There is a uniform Customs tariff in Tanganyika, Kenya, and Uganda. Total imports, 1930, 3,982,605*l.*; 1929, 4,285,952*l.*; total exports, 1930, 2,897,938*l.*; 1929, 3,988,365*l.*; total transit, 1930, 2,552,113*l.*; 1929, 2,531,205*l.*

Chief exports, 1930: Sisal (49,962 tons), 1,172,315*l.*; cotton (82,224 cents), 247,413*l.*; coffee (230,940 cwts), 397,040*l.*; ground-nuts (17,333 tons), 186,567*l.*; hides and skins (41,872 cwts), 123,471*l.*; copra (7,395 tons), 109,733*l.*; grain (143,912 cwts), 88,103*l.*; simsim (3,115 tons), 32,547*l.*; beeswax (3,773 cwts), 20,297*l.*; ghee (5,860 cwts), 16,385*l.*; diamonds (13,337 carats), 32,962*l.*; gold (12,971 ozs. troy), 46,585*l.* Chief imports, 1930: Cotton piece-goods, 696,902*l.*; iron and steel manufactures, 439,972*l.*; food-stuffs, 203,215*l.*; machinery, 221,653*l.*; building materials (including cement

and galvanised iron sheets), 277,848*l.*; kerosene and motor spirits, 266,384*l.*; sugar, 67,196*l.*; rice, 52,968*l.*; spirits, 44,584*l.*; cigarettes, 74,301*l.*

In 1930, 597 steamers (exclusive of coastal boats) of 2,477,070 tons, and 4,098 dhows of 89,057 tons, entered and cleared the various coast ports from places beyond the Territory.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, and Mikindani.

**Communications.**—Light motor traffic is now possible over 12,740 miles of road during the dry season.

There are two railways of metre gauge in the territory. The Tanga Railway from Tanga to Arusha via Moshi (272 miles), and the Central Railway from Dar-es-Salaam to Kigoma (772 miles), with a branch line from Tabora to Mwanza (235 miles). A branch line from Manyoni to Kinyangiri (93 miles) via Singida is under construction. A 60 cm. tram line from Mingoyo near Lindi to Ndanda (57 miles) is worked by hand during certain periods of the year only. There are steamers on Lakes Victoria, Nyasa and Tanganyika.

Dar-es-Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Cable communication exists between Dar-es-Salaam and Zanzibar and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville. A wireless station with a range of 450 miles spark transmission and 1,000 miles continuous wave transmission was erected at Dar-es-Salaam in 1927, and a short wave apparatus is also in use. There are 124 Post Offices and Postal Agencies (97 of which have telegraphic facilities), and 141 Telegraph Offices. Telegraph Money Order and Savings Bank business is conducted at 22 Head Offices, and Postal Order and ordinary Money Order business at 21 Sub Offices, whilst 20 others afford full postal facilities. Telephone Exchanges are established and Trunk Telephone communication is in operation between 38 Inland centres and also with Mombasa.

East African currency is in use consisting of a silver shilling, the equivalent of 100 cents; a 50 cent silver piece; copper and bronze 10 cent, 5 cent, and 1 cent pieces. There are currency notes in denominations ranging from 5 to 1000 shillings. Four banks, the National Bank of India, the Standard Bank of South Africa, Barclays Bank (Dominion, Colonial and Overseas) and the Banque du Congo Belge, have branches in the country.

*Governor.*—Lt.-Colonel Sir G. Stewart Symes, K.B.E., C.M.G., D.S.O. Appointed January, 1931.

*Chief Secretary.*—D. J. Jardine, C.M.G., O.B.E.

### SOUTH-WEST AFRICA.

**Situation and Physical Features.**—This country is bounded on the north by Portuguese West Africa and North Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary

by the Cape Province of the Union, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and North Rhodesia. On the western coast, a strip varying from 60 to 100 miles in width and extending from the Orange River in the south to the Ugab River, which borders on what is known as the Kaokoveld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing land.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi Strip, the Kwando or Mashi, which flows through the Caprivi Strip from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great sandy dry river beds throughout the country, in which water can generally be obtained by sinking shallow wells; these are the Kuiseb, Swakop, Omaruru and Ugab on the west, the Fish River in the south, the Nosob, the Auob and the Elephant Rivers in the south-east, and a series of what are known as Omuramba in the north-east, with numerous smaller stream beds. In the Grootfontein area, which geologists describe as a "karst" region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

**Government and Administration.**—The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on July 9, 1915, at Khorab. It is now administered by the Union under a Mandate from the League of Nations, dated December 17, 1920. The laws of the Union, subject to local modifications, if required, may be applied to the country and are gradually being introduced.

The Administration is conducted from Windhoek, and the country is divided into 17 Districts controlled by Magistrates. In addition there is a Chief Native Commissioner at Windhoek who has charge of all Native Affairs in the Territory. Under him are officers at the larger labour centres and Superintendents of Reserves in the Districts where there are large Native Reserves. The Native Commissioner in Ovamboland keeps in touch with the Ovambos living there. There is also an officer stationed at Kuring Kuru on the Okavango River, who keeps close touch with the natives living along the North-Eastern border of the territory.

Windhoek, the capital, is situated in the centre of the territory, and with its surrounding district contains a population of 4,602 Europeans (1926 Census) and 13,639 (estimated) Natives.

The administration has been vested by the Union Parliament in the Governor-General of the Union, who has delegated his powers to an Administrator with full authority to legislate. By Act No. 42 of 1925 the Union Parliament conferred a Constitution on South-West Africa, providing for an Executive Committee, an Advisory Council, and a Legislative Assembly with such powers, authorities and functions severally as are in the Act defined.

*Administrator.*—A. J. Werth (April 1926).

**Area and Population.**—The total area of the country including the Caprivi Zipfel is 322,394 square miles; that of Walvis Bay, administered by S.W.A., 374 square miles.

The European population according to the figures of the 1926 Census amounted to 24,115, and in 1930 was estimated at 31,586. The Native population is estimated at 243,936. As large areas of the country, particu-

larly along the coast and in the north, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the numbers of the Bushmen, who still exist in considerable numbers in the north-eastern portion of the country.

The principal native races are the Ovambos, Hereros, Bergdamaras or Klipkaffirs, Hottentots and Bushmen.

The Ovambos are a Bantu race and follow agriculture. They still possess to its full extent tribal organisation.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans oppressed them, their tribal organisation completely disappeared and they were scattered throughout the country on farms and in the different towns, where they formed the ordinary source of labour. The Herero makes an excellent herd. Since the British occupation of the country Reserves have been set apart for them and they have considerably increased in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race whose language they now speak. They are an inferior tribe and were alternately the slaves of the Hereros and the Hottentots in pre-European days, as the former or the latter were in the ascendant.

The Hottentots, so called, consist of two distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, the source of which is but little understood; the other is composed of tribes resulting from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, which, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are the oldest inhabitants of South-West Africa and are found in considerable numbers in its eastern portion from Lat. 26° to the Northern boundary.

In the centre of the country just south of the Windhoek district is the Bastard Gebiet occupied by a race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, except that the admixture of European blood is much greater, and their ordinary language is Cape Dutch. These people have a measure of self-government under a council of which the local Magistrate is Chairman. They number about 5,000.

**Education.**—*European.*—There are (1930) 72 Government schools with 4,457 pupils, and 55 registered private schools with 1,074 pupils. Of the children in Government schools 1,108 are accommodated in hostels which are conducted by the Administration in conjunction with 22 of the Government schools. The general policy has hitherto been to bring the country children into these hostels and so obviate the necessity of single-teacher country schools. In consequence of the expenditure involved, however, this policy is now being modified, and wherever possible Government farm schools and aided private farm schools are being established. There are 15 Government farm schools and 47 aided private farm schools.

*Native.*—The education of the Natives is under the direct supervision of the various Missions. There are (1930) 66 Government-aided mission schools with 4,725 pupils. There are 2 Training Schools for Native Teachers, subsidised by the Government, with 56 student teachers in training.

**Finance.**—In 1930-31 the revenue amounted to 619,229*l.* and the expenditure to 1,271,281*l.* (including 367,411*l.* loan expenditure, and

69,662*l.* expenditure in connection with settlement of Angola farmers). The Estimates for 1931-32 are: revenue 754,000*l.*, expenditure 1,448,328*l.* (including 623,206*l.* loan expenditure).

The principal source of revenue is the tax on diamonds, which is 66 per cent. of the gross proceeds less 70 per cent. of the working costs.

For the purposes of Customs and Excise revenue the territory is included in the South African Customs Union, and a lump sum based on the customs and excise duties on goods consumed in the territory is paid over to the Administration. The total annual revenue from this source is now approximately 220,000*l.*

**Production and Industry.**—South-West Africa is essentially a stock-raising country, the absence of water rendering agriculture, except in the Northern and North-eastern portions, almost impossible. Generally speaking the southern half of the Territory is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. It is estimated that in 1930 there were about 655,260 head of cattle, 2,459,661 head of small stock, 19,376 horses, 60,976 donkeys and 1,832 mules.

Minerals constitute 70 to 80 per cent. of the total value of exports from the Territory, which may be said to be well mineralised, but, up to the present, sufficient useful exploratory work has not been done in many parts to permit of any definite assessment of future production. Diamonds, which constitute the principal production, are recovered from alluvial sources on a 275 mile stretch along the coast line from the Orange River northward. Exports in 1929: 533,101 carats, valued at 1,563,805*l.*; in 1930: 415,047 carats, valued at 1,184,217*l.*

Copper, lead, vanadium and tin are at present being worked in the north of the Territory. Exports: copper-lead ore, copper-lead matte and pig lead, in 1929, valued at 900,000*l.*; in 1930, at 462,000*l.* Vanadium, as concentrates (1929), valued at 222,000*l.*; (1930), 150,700*l.* Tin, as concentrates (1929), valued at 32,000*l.*; (1930), 20,200*l.*

**Commerce:**—Imports and exports for 6 years:—

Year	Imports.	Exports.	Year.	Imports.	Exports.
	£	£		£	£

1926	2,507,625	3,292,986	1929	3,081,848	3,595,813
1927	2,490,816	3,475,561	1930	2,120,282	2,617,127

Imports from overseas, 1930, 904,271*l.*; Union of South Africa, 1,216,011*l.* Exports overseas, 2,241,272*l.*; Union of S. A., 375,855*l.*

The bulk of the direct imports into the country are landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

**Communications.**—The railway line between De Aar Junction and Prieska has been extended through Upington across the Orange River and joined up with the line from Kalkfontein to Windhoek.

The total length of the line inside South West Africa is 1,128 miles of 3ft. 6in. gauge, and 353 miles of 2ft. gauge. There are also 98 miles of private line, most of which have been constructed for the service of the diamond fields south of Luderitz.

At the 31st March, 1931, there were 110 Post Offices and 484 Private Bag Services distributed by rail or road transport. The number of articles posted was 4,346,058 and 5,251,542 were received.

On 31st March, 1931, there were 5,280 miles of trunk lines, 533 miles of telegraphs, 2,017 miles of super-imposed telegraphs and telephones, 505 miles of rural telephones and 2,053 miles of farm telephone lines; 87 telegraph offices, 43 telephone exchanges, and 1,525 telephone subscribers.

A Post Office Savings Bank was established in 1916. The number of accounts open at 31st March, 1931, was 5,918, with a credit of 170,588*l*.

At Walvis Bay there is a 3½ k.w. Coastal Wireless Station for long-wave working and a 1 k.w. set for short-wave working.

### BRITISH CAMEROONS.

The Cameroons, lying between British Nigeria and the French Congo, extends from the coast north-eastwards to the southern shore of Lake Chad. It was captured from the Germans in February, 1916, and is now divided between the British and French under a Declaration signed at London July 10, 1919. The British portion is a strip, area about 34,236 square miles and population estimated at 700,050, stretching from the sea along the Nigerian frontier to Lake Chad. Bantu negroes live near the coast, Sudan negroids inland. The country is administered under a mandate which contains provisions directed against slavery, forced labour (except for essential public services) and abuses of the traffic in arms and spirituous liquors. The northern part is attached to the Provinces of Bornu and Yola in Nigeria, and the southern part known as the Cameroons Province, to the Southern Provinces of Nigeria. There are Government schools at Victoria.

The soil in the coast region is fertile. In Victoria, experiments are being made towards the cultivation of cloves, vanilla, ginger, pepper, and other products; there is an active trade in ivory and palm-oil; hardwood and ebony are abundant, and gold and iron have been found.

There are graduated direct taxes for the native population. Europeans are not subject to direct taxation. The revenue and expenditure are incorporated in the accounts for Nigeria. Government revenue for 1929-30, 82,590*l*.; expenditure, 147,083*l*.

Imports into the British Cameroons in 1930, 177,206*l*.; exports, 279,039*l*. Chief exports: bananas (dried), 3,217,022 lbs.; palm kernels, palm oil, cocoa, 58,242 cwts.; and rubber, 2,382,560 lbs. Chief imports: textiles, spirits, timber, salt, iron wares, flour, kerosene, fish, rice, tobacco, cigarettes, motor spirit, coopers' stores, hardware, and colonial produce. In 1930, 115 vessels, having a total tonnage of 221,848, entered and cleared the port of Victoria, and 102 vessels (86,487 tons) entered Tiko.

The mark was in use until July 1, 1922, on which date British currency, similar to that in use in Nigeria, was substituted for it.

## TOGOLAND.

Togoland, between the Gold Coast Colony on the west and French Dahomey on the east, was surrendered unconditionally by the Germans to British and French forces in August, 1914. On September 30th, 1920, the country was divided between France and Britain in accordance with the Franco-British declaration of July 10th, 1919. The boundary between the two spheres extends from the north-west corner in a general direction south-east and south, terminating not far from the port of Lome, but so that no part of the British sphere reaches the coast. (See map in the YEAR Book for 1920.) The area allotted to Great Britain is 13,041 square miles, and for administrative purposes it is attached to adjacent provinces of the Gold Coast Colony and Northern Territories. The population, according to the 1931 census, is 275,925 (excluding 43 non-Africans).

For purposes of education Togoland under British mandate is considered as part of the Gold Coast.

In the British mandated area the Ewe Mission has 53 schools with 2,657 pupils, average daily attendance 2,284, and the Roman Catholic Mission has 14 schools with 1,046 pupils, average daily attendance 978.

The revenue and expenditure of the area are now included in the figures for the Gold Coast. Expenditure still greatly exceeds revenue.

Separate figures for imports and exports are no longer available, being included in the general total for the Gold Coast.

The principal imports are cotton goods, salt, and tobacco. Principal exports are palm oil, palm kernels, cocoa, kola nuts, and raw cotton.

*Administrator of British Area.*—The Governor of the Gold Coast.

## BERMUDA.

A Colony, with representative government, consisting of a group of 360 small islands (about 20 inhabited), 580 miles east of North Carolina, and

677 miles from New York, noted for its climate and scenery; favourite winter resort for Americans, who number some 30,000 annually.

The Spaniards visited the islands in 1515, but they had previously been discovered (the exact date is unknown) by Juan de Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609. A company was formed for the 'Plantation of the Somers' Islands, as they were called at first, and in 1684 the Crown took over the Government.

*Governor.*—Lieut.-General Sir T. Astley-Cubitt, K.C.B., C.M.G., D.S.O., appointed 1931 (salary 3,400*l.* + 1,000*l.* for entertainment allowance), assisted by an Executive Council of 7 members (four official) appointed by the Crown, a Legislative Council of 9 members (three official), also appointed by the Crown, and an elected House of Assembly of 36 members; 1,523 electors.

Area, 19.3 square miles (12,360 acres, 2,759 under cultivation). Civil population at census 1931, 27,789 (11,353 white). In 1930 the birth-rate was 25.28 and the death-rate 9.99 per 1,000; there were 240 marriages. In 1930 there was an excess of immigration over emigration of 453. Chief town, Hamilton; population 3,000. Bermuda is an important naval base on the North America and West Indies Station, with dockyard, victualling establishment, &c. Police force, 1931, 60.

Education is compulsory between the ages of 7 and 18, and Government assistance is given by the payment of grants, and, where necessary, school fees, but there are no Government schools. The aided schools must reach a certain standard of efficiency, and submit to Government inspection and control. In 1930, 32 aided primary schools, with 3,782 pupils, and 4 secondary schools, received in Government grants 15,812*l.* There are 2 garrison schools and 1 naval school; about 15 other primary schools receiving no Government grant.

Food supplies are mostly imported from the United States and Canada, and nearly all the export produce of Bermuda goes to the United States. The principal imports in 1930 were: beef, 34,695*l.*; bran, 30,324*l.*; flour,

29,388*l.*; clothing, 83,721*l.*; cotton goods, 28,677*l.*; electrical goods, 52,645*l.*; hardware, 90,423*l.*; oats, 38,292*l.*; woollen goods, 33,749*l.*; kerosene oil, 20,987*l.*; machinery, 30,454*l.*; malt liquor, 33,430*l.*; coal (steam), 4,610*l.*; fresh fruit, 33,800*l.*; smoked and pickled meats, 49,703*l.*; groceries, 64,694*l.*; fancy goods, 164,871*l.*; canned goods, 41,415*l.*; butter, 40,590*l.* The principal exports in 1930 were: lily bulbs, 16,706*l.*; potatoes, 44,101*l.*; other vegetables, 66,995*l.*

The registered shipping consisted (1930) of 13 steam vessels of 26,421 tons net, 1 motor ship of 19,086 tons, and 20 sailing vessels of 3,378 tons net, and two motor boats of 93 tons net; total net tonnage, 48,978. In 1930 the total tonnage of vessels entered and cleared was 5,739,748 tons, of which 3,862,478 were British.

There are 220 miles of telephone wire under the control of the military, and 15 of telegraph cable. There is also a private telephone company, with over 1,600 miles of wire. Cables connect the islands with Halifax, Nova Scotia, Turks Island, and Jamaica. There were (1930) 19 post offices in the colony; the number of letters and post cards dealt with in the year 1930 was 4,084,956; newspapers, book packets and circulars, 934,793; parcels, 85,900. The post office revenue was 54,273*l.*, and expenditure, 18,063*l.* Savings bank deposits on December 31, 1930, were 92,094*l.* to the credit of 4,868 depositors.

There are two banks in the Island, the Bank of Bermuda, Ltd., and the Bank of N. T. Butterfield and Son, Ltd., both local. Bills of exchange issued by the Treasury Chest Office in the Colony form the basis of exchange with the outside world.

The currency, weights, and measures are British. The British 1*l.* and 10*s.* notes are legal tender. The Bermuda Government is also authorised to issue 1*l.* and 10*s.* notes up to an amount not exceeding 175,000*l.* A considerable quantity of American paper is also in circulation, being largely used for remittances to the United States.

## CANADA.

(DOMINION OF CANADA.)

### Constitution and Government.

The territories which now constitute the Dominion of Canada came under British power at various times, by settlement, conquest, or cession. Nova Scotia was temporarily occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632, and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858.

As originally constituted, the Dominion was composed of the provinces of Canada—Upper and Lower Canada, now Ontario and Quebec—Nova Scotia, and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament known as 'The British North America Act, 1867,' which came into operation on July 1, 1867, by royal proclamation. The Act provides that the Constitution of the Dominion shall be 'similar in principle to that of the United Kingdom'; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons.' The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926: 'The self-governing Dominions are autonomous Communities within the British Empire, equal in status, though united by a common allegiance to the Crown.' The Dominion has its own representatives in the United States, Great Britain, France and Japan, and was elected a member of the Council of the League of Nations in 1927. Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, the North-West Territories, and Newfoundland into the Dominion; Newfoundland alone has not availed itself of such provision. In 1869 Rupert's Land, or the North-west Territories, were purchased from the Hudson's Bay Company; the province of Manitoba was erected from this territory, and admitted into the confederation on July 15, 1870. On July 20, 1871, the province of British Columbia was admitted, and Prince Edward Island on July 1, 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabaska, Assiniboia, and Saskatchewan, and admitted on September 1, 1905.

In February 1931 the Government of Norway formally recognised the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

On July 10, 1931, the House of Commons approved the enactment of the proposed Statute of Westminster which will emancipate the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus remove what legal limitations still exist as regards Canada's legislative autonomy. The Statute received the Royal Assent on December 11, 1931.

The members of the Senate are nominated for life, by summons of the Governor-General under the Great Seal of Canada. By the Amendment of the British North America Act, 1867 (May, 1915), which came into effect in 1917, the Senate consists of 96 senators—namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, and 6 from Saskatchewan. The total number may not exceed 104. Each senator must be 30 years of age, a born or naturalised British subject, and must reside in, and be possessed of property, real or personal, to the value of 4,000 dollars within, the province for which he is appointed. The House of Commons is elected by the people, for five years, unless sooner dissolved, the province of Quebec always having 65 members (one for each 38,283 persons at the 1921 census), and the other provinces proportionally, according to their populations at each decennial census. The seventeenth Parliament, elected on July 28, 1930, comprised 245 members, in accordance with the Representation Act of 1924 which, as the result of the census of 1921, fixed the representation as follows: 82 for Ontario, 65 for Quebec, 14 for Nova Scotia, 11 for New Brunswick, 17 for Manitoba, 14 for British Columbia, 4 for Prince Edward Island, 21 for Saskatchewan, 16 for

Alberta, and 1 for the Yukon Territory. Voting is by ballot. Women have the vote and are eligible for election to the Dominion Parliament.

State of the Parties in the seventeenth Parliament, elected on July 28, 1930: Conservatives, 138; Liberals, 87; Liberal-Progressives, 3; United Farmers of Alberta, 10; Progressives, 2; Labour, 3; and Independent, 2.

The Speaker in the House of Commons has a salary of 6,000 dollars per annum, the Deputy Speaker an allowance of 1,500 dollars, and each member an allowance of 4,000 dollars for the session, subject to deductions for non-attendance.

The Speaker and members of the Senate have the same sessional indemnity as the Speaker and members of the House of Commons, with no extra allowances.

*Governor-General.*—The Right Hon. Lord Bessborough, G.C.M.G. Appointed February 9, 1931. Salary, 10,000*l.* per annum.

He is assisted in his functions, under the provisions of the Act of 1867, by a Privy Council composed of Cabinet Ministers and other persons.

The following is the list of the Cabinet, which was sworn in on August 7, 1930, in order of precedence, which in Canada attaches generally rather to the person than to the office:

*Prime Minister, President of the Privy Council, Secretary of State for External Affairs and Minister of Finance (pro tem.).*—Rt. Hon. R. B. Bennett, M.P.

*Ministers without Portfolio.*—Sir George H. Perley, K.C.M.G., M.P., Hon. Arthur Meighen, M.P.

*Minister of Finance and Minister of Fisheries.*—Hon. E. N. Rhodes.

*Minister of Justice and Attorney-General.*—Hon. Hugh Guthrie, M.P.

*Minister of Agriculture.*—Hon. Robert Weir, M.P.

Each minister with portfolio has a salary of 10,000 dollars a year, and the Prime Minister 15,000 dollars, in addition to the 4,000 dollars sessional allowance. The Leader of the Opposition receives a salary of 10,000 dollars, in addition to the sessional allowance.

The Department of External Affairs is the medium of communication between the Government of Canada and the governments of other countries. Canada has diplomatic representatives at Washington, Paris, and Tokyo, and the Governments of the United States, France, and Japan are also represented at Ottawa.

*High Commissioner for Canada in Great Britain.*—Hon. G. H. Ferguson, K.C. (appointed November 28, 1930), Canada House, Trafalgar Square, London, S.W. 1.

*High Commissioner for the United Kingdom in Canada.*—Sir William Henry Clark, K.C.S.I., C.M.G. (appointed April 25, 1928).

*Canadian Advisory Officer, League of Nations.*—Dr. W. A. Riddell (appointed 1925).

*Canadian Minister in the United States.*—Major the Hon. William D. Herridge, K.C., D.S.O., M.C. (appointed March 7, 1931).

*United States Minister in Canada.*—Lieut.-Colonel Hanford MacNider (appointed Aug. 1930).

*Canadian Minister in France.*—Hon. Philippe Roy (appointed 1928), 1 rue François Premier, Paris, France.

*French Minister in Canada.*—M. Charles A. Henry (appointed 1931).

*Canadian Minister in Japan.*—Hon. H. M. Marler (appointed 1929), Tokyo, Japan.

*Japanese Minister in Canada.*—Mr. Iyemasa Tokugawa (appointed 1929).

#### PROVINCIAL GOVERNMENT.

The nine provinces have each a separate parliament and administration, with a Lieutenant-Governor appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieutenant-Governor; direct taxation for revenue purposes; borrowing; management and sale of crown lands; provincial hospitals, reformatories, &c.; shop, saloon, tavern, auctioneer, and other licences for local or provincial purposes; local works and undertakings, except lines of ships, railways, canals, telegraphs, &c., extending beyond the province or connecting with other provinces, and excepting also such works as the Dominion Parliament declares are for the general good; marriages; administration of justice within the province; education. Quebec has two Chambers and the other Provinces one Chamber. The North-West Territories and the Yukon Territory are governed by Commissioners assisted by Councils.

#### Area and Population.

The following is the population of the area now included in the Dominion:—

Year	Population	Year	Population
1806-7 (est.)	433,000	1891	4,833,239
1825	860,000	1901	5,371,315

<sup>1</sup> The water areas here assigned to Prince Edward Island, Nova Scotia, New Brunswick, and British Columbia are exclusive of the territorial seas, that to Quebec is exclusive of the Gulf of St. Lawrence. Ontario is inclusive of the Canadian portions of the great lakes of the St. Lawrence system.

<sup>2</sup> By Federal Act passed during the session of 1912, the boundaries of the provinces of Ontario, Quebec and Manitoba were extended at the expense of the North-West Territories. Ontario was enlarged by 146,400 square miles, Quebec by 351,780, and Manitoba by 178,100.

<sup>3</sup> As amended by the Labrador Boundary Award.

<sup>4</sup> Distributed according to naval station or home residence.

Of the total population in 1921, 6,832,747 were Canadian born, 1,065,454 British born, and 890,282 foreign born, 374,024 of the latter being U.S. born.

For figures for the population in 1921 according to origin see THE STATESMAN'S YEAR BOOK, 1923, p. 278.

### Education.

By the British North America Act the Provincial Governments have control in educational matters. In all provinces except Quebec the number of private schools is small, so that elementary and secondary education in Canada is almost entirely State-controlled. In Quebec primary education is only partly State-controlled. Roman Catholic secondary education is given by independent institutions, mainly consisting of State-subsidised classical colleges for boys and convents for girls. Except for a few independent schools, Protestant education, primary and secondary, is State-controlled. Primary schools—i. e. elementary schools, and in all provinces, except Ontario, continuation schools other than regular secondary schools—are free, and the same is true of secondary education in most provinces. In Quebec (except in certain municipalities) a fee is collected for primary education for every child of school age without reference to school attendance. In the same province Catholic and Protestant schools are under one Department of Public Instruction and are supported by a common system of taxation, but are administered independently. In Alberta, Ontario, and Saskatchewan minority elementary schools, whether Protestant or Catholic, are called Separate Schools, and are under the same provincial administration as majority schools. Secondary education in these three provinces is non-sectarian.

There are 6 State-controlled universities in Canada, and 17 independent of provincial control, making 23 in all. These, together with 101 colleges of higher education, had an enrolment of 74,183 students in 1930, and employed 6,117 professors, lecturers, etc.

\* Exclusive of British Columbia University.

As a result of assistance given by the Dominion Government to the provinces in providing for technical and vocational education, the enrolment of students in technical schools increased from 56,774 in 1921 to 125,644 in 1930.

In 1930 there were in Canada 1,609 periodical publications, classified as follows: Dailies, 116; tri-weeklies, 5; weeklies, 966; semi-weeklies, 21; monthlies, 388; semi-monthlies, 56; miscellaneous, 57.

### Justice and Crime.

There is a Supreme Court in Ottawa, having appellate, civil and criminal jurisdiction in and throughout Canada. There is an exchequer court, which is also a colonial court of admiralty, with powers as provided in the Imperial 'Colonial Courts of Admiralty Act, 1890.' There is a Superior Court in each province; county courts, with limited jurisdiction, in most of the provinces; all the judges in these courts being appointed by the Governor-General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

For the year ended September 30, 1930, total convictions for indictable offences were 28,457; total convictions for all offences amounted to 345,641.

## Defence.

'The National Defence Act, 1922,' which came into force January 1, 1923, provides for a Department of National Defence presided over by the Minister of National Defence.

*Militia.*—Canada is organised in 11 military districts, each under a Commander and his District Staff.

The militia of Canada is classified as active and reserve, and the active is sub-divided into permanent and non-permanent forces. The permanent force consists of 11 units of all arms of the service, with an authorised establishment limited to 10,000, but at present the strength is about 3,800. The non-permanent active militia is made up of cavalry, artillery, engineers, machine gun, signalling, infantry and other corps. The total establishment of the Canadian non-permanent militia totals 9,050 officers and 116,545 other ranks, organised as follows:—

	Regiments	Batteries		Battalions	Companies	Troops	Units or Detachments
		Field	Medium and Heavy				
Cavalry . . . . .	35	—	—	—	—	—	—

Total . . . . .	35	68	24	123	56	14	120

<sup>1</sup> Machine Gun Companies.

<sup>2</sup> Anti-Aircraft Sections.

The reserve militia consists of such units as are named by the Governor in Council and of all able bodied citizens between the ages of 18 and 60, with certain exemptions.

The reserve of the active militia consists of (1) reserve units of city and rural corps, (2) reserve depôts, (3) reserve of officers.

The above organisations are supplemented by numerous cadet corps and rifle associations. The Royal Military College at Kingston, Ontario, provides both a military and a general education for about 200 cadets. The course extends over four years. Each year there are available for graduates a number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, also in the British Army and the Royal Air Force. R.M.C. graduates are given one year's seniority in the British or Indian armies because their course is longer than that given at Woolwich or Sandhurst.

The estimated expenditure for the militia for the year ending March 31, 1932, is 9,785,000 dollars.

*Navy.*—The Royal Canadian Navy was established in 1910. Its authorised complements are: 104 officers and 792 men of the permanent force (Royal Canadian Navy), 70 officers and 430 men of the Royal Canadian Naval Reserve; and 70 officers and 930 men of the Royal Canadian Naval Volunteer Reserve. The vessels at present maintained in commission are the

destroyers *Champlain* and *Saguenay* and the mine-sweeping trawlers *Festubert* and *Ypres*, based on Halifax, N.S.; the destroyers *Vancouver* and *Skeena* and mine-sweeping trawlers *Armentières* and *Thiepval*, based on Esquimalt, B.C. There are several small craft, some armed, used for fisheries protection and patrol duty on the eastern and western coasts and on the Great Lakes, but these are attached to the Department of Marine and Fisheries or to the Customs Department, and do not normally form part of the naval forces. H.M.C. dockyards are at Halifax and Esquimalt, having been taken over from the Imperial Government in 1910. Naval depots are maintained at both bases, and are used as training headquarters for the personnel of the R.C.N., R.C.N.R., and R.C.N.V.R.

The appropriations for naval services for 1930-31 amounted to 3,600,000 dollars. The estimated expenditure for the year ending March 31, 1932, is 3,375,000 dollars.

*Aeronautics.*—The direction and control of aeronautics in Canada, both civil and military, come under the jurisdiction of the Department of National Defence. The powers and duties involved are exercised, under the direction of the Minister, by four separate branches of the Air Services, namely:—(a) the Royal Canadian Air Force; (b) the Directorate of Civil Government Air Operations; (c) The Controller of Civil Aviation; (d) The Aeronautical Engineering Division. The total personnel of the above four branches as at August 1, 1931, was 182 officers and 703 airmen. The Royal Canadian Air Force administers and controls all military air operations. The proposed establishment of the Royal Canadian Air Force is (i) Permanent Active Air Force, 202 officers and 803 airmen; (ii) Non-Permanent Active Air Force, 85 officers and 130 airmen.

The foregoing personnel does not include cadets and boys who undergo flying training and artisan training each summer at Camp Borden. The number undergoing such training during the summer of 1931 was as follows:—University and R.M.C. Cadets, 97; boys from various technical schools, 25. The estimated expenditure for the R.C.A.F. for 1931-32 is 2,266,000 dollars.

The Directorate of Civil Government Air Operations administers and controls all air operations carried out by State aircraft other than those operations of a military nature. The personnel consists of R.C.A.F. officers and other ranks who are loaned to this branch for various periods of duty, and a small number of civilian tradesmen. The work of this branch consists of carrying out operations for other Dominion Government Departments such as air photography for the Department of the Interior, Topographical Surveys Branch; forest fire patrol and suppression for the Forest Service of the Department of the Interior; experimental dusting operations for the Department of Agriculture; transportation for the Department of Indian Affairs; air mail investigation for the Post Office Department; and any other operation which is requested by a Dominion Government Department, such as the investigation of ice conditions in the Hudson Straits which was carried out during the 1927-28 season.

*Royal Canadian Mounted Police.*—The Royal Canadian Mounted Police is an armed police force organised in 11 divisions under a Commissioner whose headquarters are at Ottawa; on July 31, 1931, its strength was 60 officers, 1,085 other ranks, and 135 special constables.

The duties of the Police are to enforce Dominion Statutes (except the Criminal Code, which is enforced by the Provincial authorities); to assist the

other Departments of the Dominion Government, and to enforce the observance of law in the Yukon, in the Northwest Territories, in the islands of the Arctic Ocean, and in Indian Reserves and the National Parks. By an agreement which came into effect on July 1, 1928, the Force enforces criminal and Provincial laws in the Province of Saskatchewan under the direction of the Attorney-General of the Province. Assistance from time to time is rendered in certain circumstances to other Provincial authorities.

## Production and Industry.

*Agriculture.*—Though the manufacturing industries now predominate, Canada is largely agricultural, and among her natural resources arable lands stand unrivalled. Present information permits only a rough estimate of their actual extent, but it is believed that about 381 million acres are physically suitable for agriculture. Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. The following table shows the estimated agricultural wealth and production for 1930 :—

*Dairying.*—The dairying industry of the Dominion is carried on most extensively in Ontario and Quebec, although there are dairy factories in all of the provinces. The total number of creameries in Canada in 1930 was 1,209; of cheese factories, 1,204; of combined butter and cheese factories, 284; of condenseries, 26; and the total value of all products of dairy factories, 126,668,748 dollars.

*Fruit Farming.*—The value of fruit production by provinces in 1930 was (in dollars): British Columbia, 7,056,558; Ontario, 6,475,150; Nova Scotia, 2,977,862; Quebec, 1,020,765; and New Brunswick, 159,500; total, 17,689,835 dollars. The production of apples in 1930 was (in barrels): Nova Scotia 1,146,103, Ontario 598,039, British Columbia 1,443,888, Quebec 133,650, New Brunswick 30,000; total, 3,351,680 (total 1929, 3,870,380 barrels). The commercial crop of apples in 1930 was estimated at 3,351,680 barrels, valued at 10,883,344 dollars.

*Miscellaneous.*—The wool-clip of Canada for 1930 was estimated at 21,016,000 lbs., valued at 2,522,000 dollars. The production in 1930 of tobacco, which is practically confined to Ontario and Quebec, was estimated at 36,712,700 lbs. from 41,391 acres, and for 1931, the production was estimated at 48,230,000 lbs. The total production of eggs (for 1930), 278,255,753 dozens, valued at 74,837,092 dollars, and the 1930 value of maple products 5,250,620 dollars.

*Forestry.*—The total area of land covered by forests is officially estimated at 1,151,454 square miles. Of this 865,880 square miles are productive and accessible, a little over a third of this area bears timber of merchantable size.

The Crown forests belong to the Provincial Governments, those of Manitoba, Alberta, Saskatchewan and the Railway Belt and Peace River

Block of British Columbia having been transferred in 1930 to the provinces concerned by the Dominion Government.

**Fisheries.**—In the calendar year 1930 the capital invested in vessels, gear, canneries, etc. (including working capital and stocks on hand) was 64,026,297 dollars. The total value of the produce of the fisheries of Canada in 1930 was 47,894,216 dollars. The principal kinds of fish marketed in 1930 were: salmon, 17,731,891 dollars; halibut, 2,871,455 dollars; lobsters, 5,214,643 dollars; codfish, 4,288,813 dollars; herrings, 2,623,174 dollars; haddock, 1,851,724 dollars; sardines, 1,074,487 dollars; whitefish, 1,818,941 dollars; trout, 1,031,979 dollars; pickerel, 929,762 dollars; pilchards, 1,589,609 dollars; smelts, 853,034 dollars. The exports in calendar year 1930 were valued at 31,869,350 dollars (dry-salted codfish, 3,774,333 dollars; canned lobsters, 3,234,892 dollars; fresh lobsters, 2,279,238 dollars; canned salmon, 6,479,255 dollars). The number of persons employed in 1930 was 79,558, including those in shore work and canneries. The number of factories and canneries in operation in 1930 was 699.

**Mining.**—Nova Scotia, British Columbia, Quebec, N. and W. Ontario, Alberta, and Yukon Territory are the chief mining districts. The total value of the mineral produce in 1930 was 279,873,578 dollars, and in 1931, 227,769,000 dollars. The principal metals and minerals produced in 1930 and 1931 were as follows :—

<sup>1</sup> The metals copper, lead, and silver are, for statistical and comparative purposes, valued at the final average value of the refined metal. Pig-iron is valued at the furnace. Non-metallic products are valued at the mine or point of shipment, and structural material and clay products at the point of shipment.

Production of pig-iron in 1930 was 747,000 tons, and steel, 1,011,700 tons. The following table shows the value of the mineral production of Canada in 1929 and 1930, by Provinces:—

*The Fur Trade.*—In 1929–30 (year ended June 30), 3,798,444 pelts, valued at 12,158,876 dollars, were taken. Exports in 1930–31 were valued at 17,187,399 dollars, imports at 7,518,885 dollars. Exports to the United States amounted to 6,972,456 dollars; to the United Kingdom, 9,453,322 dollars. Fur auctions are now held on a large scale at Montreal and Winnipeg. The more important animals raised on fur farms are fox, muskrat, beaver, mink, racoon, marten, and fisher. The value of animals and pelts sold from the farms during the year 1929 was 6,779,863 dollars. There were in 1929, 4,493 fox farms and 1,020 other fur farms in Canada.

*Water Power.*—Canada is richly endowed with water power resources; on January 1, 1931, the available horse-power was 20,347,400; on January 1, 1932, turbine installation amounted to 6,666,000 horse-power. The Central

Electric Station industry, of which over 96 p.c. of the total main plant is hydro equipment which generates 99 p.c. of the total electrical output, ranked fifth among the industries of Canada with a gross production of power valued at 157,499,385 dollars in 1929. The number of establishments was then 1,024 and the capital invested 1,055,731,582 dollars.

### Commerce.

The customs tariff of Canada is protective, but there is a preferential tariff in favour of the United Kingdom and of the Dominions (including Australia, with which Dominion a new trade agreement was concluded in July 1931) and of a number of the Crown Colonies.

Exports and imports entered for home consumption in the Dominion (merchandise only):—

Total . . . . .	82,205	43,666,866	82,197	44,067,907

During the fiscal year 1930, the vessels entered and cleared at Canadian ports on inland waters between Canada and the United States were : Canadian, 22,106 of 19,463,850 tons ; United States, 88,236 of 16,982,707 tons.

During the fiscal year 1930, 282 vessels, with a tonnage of 28,871 tons, were built in Canadian shipyards.

### Internal Communications.

Canada has a system of canal, river, and lake navigation over 2,700 miles in length, and vessels from the lake ports reach the Atlantic without breaking bulk. Up to March 31, 1930, 225,909,708 dollars had been spent on canals for construction and enlargement alone (capital expenditure). The heavy expenditures in recent years have been due to the construction of the Welland Ship Canal on which 112,891,841 dollars had been spent to March 31, 1930. The canal was opened on April 20, 1931. In 1930, 26,163 vessels, of 16,173,621 tons, passed through the Canadian canals, carrying 14,803,834 tons of freight, chiefly grain, lumber, iron ore and coal.

On January 11, 1909, a treaty was signed at Washington between the United Kingdom and the United States relating to the use of the boundary waters between Canada and the United States. The treaty provides for the establishment and maintenance of an international joint commission, consisting of three representatives appointed by the King on the recommendation of the Dominion, and three appointed by the President of the United States. This commission, subject to the conditions of the treaty, has jurisdiction in all cases involving the use or obstruction or diversion of the boundary waters. Precedence is given by the treaty to uses of the waters in the following order, viz., (1) for domestic and sanitary purposes, (2) for navigation, (3) for power and irrigation.

The total single track mileage of steam railways in Canada on December 31, 1930, was 42,075. The total mileage, including second track, yard track and sidings was 56,642.

The lines built or acquired by the Canadian Government are now consolidated in one system, known as the Canadian National Railways, covering over one-half of the single track mileage, including two transcontinental lines with termini in Canada at Saint John, Halifax, Vancouver and Prince Rupert, and the Grand Trunk with termini at Portland, Maine, U.S.A., and Chicago.

The mileage in private ownership is mainly that of the Canadian Pacific Railway, 14,888 in 1930. The main line of this road from Vancouver, B.C., to Saint John, New Brunswick, is 3,367 miles.

Statistics of the Canadian steam railways for 1930 : passengers, 34·7 millions ; freight, 96·2 million short tons ; gross receipts, 454,231,651 dollars ; net receipts, 73,508,239 dollars ; capital liability, 4,101,124,843 dollars.

Electric railways in 1930, 53, mileage 1,509 ; passengers during the year, 792,701,493 ; tons of freight carried, 2,873,628. The gross earnings in 1930 reached an aggregate of 54,719,259 dollars. Operating expenses amounted to 39,125,515 dollars. Paid-up capital, 224,089,539 dollars.

On March 31, 1930, there were 12,409 post offices. Net revenue, 32,969,293 dollars ; expenditure, 35,036,629 dollars. At the end of the fiscal year 1930 there were 4,210 rural mail delivery routes, on which were erected 237,351 boxes.

Money order offices on March 31, 1930, 6,209 ; orders issued, 17,525,979, value 197,699,353 dollars. The Ocean Mail subsidies and steamship sub-

ventions paid by the Government amounted to 1,083,436 dollars in the fiscal year 1930.

There were 52,835 miles (9,848 being Government) of telegraph lines in Canada in 1929, and 360,883 miles of wire (including 12,455 miles of Government lines), with 4,766 offices; 4,476,213 miles of telephone wire on December 31, 1929, and 1,399,986 telephones (14·3 per 100 population).

*Wireless Telegraphy.*—On March 31, 1930, there were 936 coast and land wireless stations, 319 ship wireless stations, 91 broadcasting stations, and 424,146 private receiving stations for the reception of broadcast programmes.

The ship and shore wireless traffic for the twelve months ended March 31, 1930, amounted to 440,912 messages and 9,167,302 words.

Wireless 'beam' stations are operated at Montreal for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long distance service to ships.

### Money and Credit.

The Bank Acts of Canada impose stringent conditions as to capital, notes in circulation, limit of dividend, returns to the Dominion Government, and other points, on all chartered banks. On December 31, 1930, there were 11 incorporated banks making returns to the Government, with 4,083 branches, including sub-agencies. The following are some particulars (in dollars) of the banks for 1930, the figures being an average of the twelve monthly returns: capital paid up, 144,560,874; notes in circulation, 159,341,085; total on deposit, 2,516,611,587; liabilities to the public, 2,909,530,263; assets, 3,237,073,853; percentage of liabilities to assets, 89·88.

In addition to the capital there was in 1930 the sum of 160,639,246 of rest or reserve funds belonging to the banks.

Bank debits in the clearing house centres of Canada for 1930 amounted to 37,491,301,766 dollars, against 46,670,481,838 dollars in 1929. Of the transactions of 1930, Montreal had nearly 33 per cent., Toronto 28 per cent., Winnipeg 10 per cent., Ottawa about 5 per cent., and Vancouver 4·8 per cent.

Government post-office savings-banks have been in operation in Canada since 1868. The post-office savings-banks had on July 31, 1931, deposits amounting to 24,059,119 dollars.

The deposits in special savings-banks amounted on July 31, 1931, to 69,715,622 dollars.

### Currency, Weights, and Measures.

The denominations of money in the currency of Canada are dollars, cents and mills. The cent is one-hundredth part of a dollar, and the mill one-tenth part of a cent. A five-cent. nickel coin has been issued. The standard of fineness for gold coins is nine-tenths fine, and British and United States gold coins are legal tender. The privilege of issuing notes is restricted to the Dominion Government and the chartered banks. The legal equivalent of the British sovereign is 4·86½ dollars.

The Dominion Government issues Dominion notes, which are legal tender, in denominations of \$1, \$2, \$5 and certain other larger denominations used chiefly in clearing-house transactions between banks. They may be issued in any amount. Prior to the war, the security behind Dominion notes consisted of 25 per cent. gold for the first fifty million

dollars of such notes and dollar for dollar in gold for amounts in excess of fifty million. They were redeemable in gold. The war necessitated the suspension of redemption in gold, and by special legislation the Government was given power to issue Dominion notes to the banks upon the pledge of satisfactory securities and interest at not less than 5 per cent. per annum was charged the banks. At the same time banknotes were made legal tender, and an issue of twenty-six million dollars of Dominion notes without security as formerly prescribed by law, largely to implement railway guarantees, was legalised. Redemption in gold was resumed on July 1, 1925.

Dominion notes in circulation on Aug. 31, 1931, amounted to 141,615,347 dollars.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901, and in December, 1931, control of the Mint was passed over to the Canadian Government. The Mint issues gold, silver and copper coins for circulation in Canada, and sovereigns and half-sovereigns coined will be legal tender in every country under the British flag. Coinage for Newfoundland was struck at the Mint in 1917 and 1918. In 1931 an Act was passed transferring the administration of the Royal Mint to the Canadian Government.

In 1930 gold bullion to the value of 17,820,668 dollars was received for treatment, and bullion to the value of 14,934,759 dollars was issued. No gold was struck. Coin issued: bronze, 13,400 dollars; nickel, 164,500 dollars; silver, 326,000 dollars.

The legal weights and measures are the Imperial yard, pound avoirdupois, gallon, and bushel; but the hundredweight is declared to be 100 pounds and the ton 2,000 pounds avoirdupois, as in the United States.

## CANADIAN PROVINCES.

### ALBERTA.

**Constitution and Government.**—The Constitution of Alberta is contained in the British North America Act of 1867, and amending Acts; also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, creating the province. In the British North America Act, provision was made for the admission of the new provinces from time to time, including the then North-West Territories, of which the present province of Alberta formed a large portion. Upon the granting of autonomy to the North-West Territories, Alberta and Saskatchewan were erected into provinces, and all the provisions of the British North America Act, except those with respect to schools, lands, and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On October 1, 1930, the natural resources were transferred from the Dominion to Provincial Government control. The province is represented by 6 members in the Senate and 16 in the House of Commons of Canada.

The executive is vested nominally in the Lieutenant-Governor, who is appointed by the Federal Government, but actually in the Executive Council or the Cabinet of the Legislature. Legislative power is vested in the Assembly in the name of the King.

Members of the Legislative Assembly are elected by the direct vote of the people. Woman suffrage has been established in the province.

There are 63 members in the Legislature (1930)—39 United Farmers of Alberta, 11 Liberals, 4 Labour, 6 Conservatives, and 3 Independents.

*Lieutenant-Governor.*—His Honour W. L. Walsh.

The members of the Ministry are as follows:—

*Premier and Provincial Secretary.*—Hon. John E. Brownlee.

*Attorney-General.*—Hon. J. F. Lymburn.

*Minister of Agriculture and Public Health.*—Hon. Geo. Hoadley.

*Minister of Public Works.*—Hon. O. L. McPherson.

*Minister of Railways and Telephones.*—Hon. Vernor W. Smith.

*Minister of Education.*—Hon. Perren E. Baker.

*Minister of Lands and Mines, Minister of Municipal Affairs and Provincial Treasurer.*—Hon. Richard Gavin Reid.

*Minister without Portfolio.*—Hon. Mrs. Irene Parlbry.

**Local Government.**—Municipal Districts, formerly known as Local Improvement Districts, comprise the area within the limits of nine townships, *i.e.* 18 miles square (324 square miles), or as near to this as natural features will allow. Each Municipal District is a body corporate and governed in most cases by an elected council of six members, the chairman of whom is called the Reeve. The councillors are elected by a vote of all persons who are assessed for property within the Municipal District, together with the vote of the wife, husband, son, daughter, father or mother of such assessed persons, provided these relatives reside on the land of the assessed person.

Towns operate under the Town Act, 1927, except one which carries on under special charter. Villages are erected by Order of the Minister of Municipal Affairs, and are governed by the Village Act. The town council consists of a Mayor and six councillors elected by those whose names appear on the last revised assessment roll. These must be twenty-one years of age, and assessed for property of the value of one hundred dollars and upwards. The village council consists of three members elected annually, the Chairman being Mayor of the village.

There are seven cities in Alberta, namely: Edmonton, Calgary, Lethbridge, Wetaskiwin, Red Deer, Medicine Hat, and Drumheller. These cities operate under special charters granted by the North-West Territorial Assembly, and later confirmed by the Legislative Assembly of the Province of Alberta. The governing body consists of a Mayor and a council of from six to ten members, according to the size of the city.

**Area and Population.**—The area of the province is 255,285 square miles, 252,925 sq. miles being land area and 2,360 sq. miles water area. The population (Census, 1931) was 727,497; in 1921, 588,454, in 1916, 496,442; in 1906, 185,195, and in 1901, 73,022. In 1921 the rural population numbered 365,550 (54,489 in 1901), and the urban 222,904 (18,533 in 1901). There were 8,745 Indians in 1921, or 1·49 per cent. of the total population. Population of the principal cities (1931):—Calgary, 82,362; Edmonton, 78,829; (1926) Lethbridge, 10,735; Medicine Hat, 9,536; Red Deer, 2,021; Wetaskiwin, 1,884.

The vital statistics for 5 years are given as follows:—

—	Births	Marriages	Deaths	Excess of Births
1926 . . .	14,455	4,498	5,156	9,299
1927 . . .	14,897	4,707	5,059	9,888
1928 . . .	15,692	5,776	5,699	9,993
1929 . . .	16,924	6,004	6,239	10,685
1930 . . .	17,659	6,334	5,507	12,152

**Education.**—Schools of all grades are included under the term of public school. The same boards of trustees control the schools from the kindergarten to entrance to the university. All schools are supported by taxes levied by the local board, supplemented by Government grants, which are distributed to encourage elementary, secondary, and technical education and agricultural training. In 1930 there were 3,710 schools, 63 being consolidated schools and 16 being rural high schools, with 168,076 pupils. There are Normal schools at Calgary, Camrose and Edmonton for the training of teachers. The attendance during 1930 was 1,001. The University of Alberta, organised in 1907, had, in 1929–30, 1,578 students.

**Justice and Crime.**—Judicial power of the province is vested in the Supreme Court, consisting of two divisions, the appellate and trial divisions. The judges are appointed by the Dominion Government, and hold office for life unless impeached by Parliament. There are also minor Courts of Civil and Criminal Jurisdiction. The district courts have full jurisdiction over all matters up to 600 dollars. By the Small Debts Act of 1918, as amended in 1924, magistrates have jurisdiction over matters up to 100 dollars. There are also Juvenile Courts having power to try boys under 16 and girls under 18 years of age.

The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

**Finance.**—The revenue of the province is derived from the following sources:—(1) Dominion subsidies; (2) School lands; and (3) Provincial sources.

—	1926	1927	1928 <sup>1</sup>	1929	1930
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . . .	11,912,128	12,268,400	16,149,896	15,265,084	15,829,865
Expenditure . . .	11,894,327	12,479,880	15,870,113	18,686,261	15,402,884

<sup>1</sup> Fifteen months ending March 31, 1928.

The gross bonded debt of the province March 31, 1930, amounted to 106,888,380 dollars. Of this amount 38,936,134 dollars represent assets which are self-supporting. There are other revenue producing but not self-sustaining assets amounting to 5,500,000 dollars.

**Production and Industry.**—Alberta is pre-eminently an agricultural province. Within the surveyed area of the province, which comprises about 85,000,000 acres, there are about 60,000,000 acres which may be classed as lands capable of agricultural development. Up to the present, however, little more than one-fourth of this area has been brought under cultivation.

For particulars of agricultural production and live-stock, *see* under Canada above. The wool clip for 1930 was 3,095,000 lbs.

Grain elevators (1930-31), 1,727, with a capacity of 73,960,000 bushels.

A coal survey of Alberta by the Geological Survey of Canada places the coal area at 16,588 square miles containing 1,035,629 million tons (approx.), 80,000 million being lignite. The output in 1930 was 5,755,911 tons, valued at 18,513,620 dollars. Natural gas is found abundantly in numerous localities. In 1930, 20,540,858 cubic feet, valued at 4,806,125 dollars, were consumed. High grade gasoline is profitably extracted from the gas in Turner Valley. 1,433,844 barrels of oil were produced in the Province in 1930. Immense deposits of bituminous sand containing on an average 15 to 18 per cent. bitumen are situated in the McMurray district in northern Alberta. Value of total mineral production in 1930, 28,028,473 dollars.

Alberta has 12,072,960 acres of forest reserves.

The lakes of the province abound in whitefish, pickerel, pike and trout, but the industry is not developed to any great extent. Value of fish marketed, 1930, 699,980 dollars.

Manufacturing in the province: Flour, oatmeal, cement, and linseed oil mills, pork and beef packing houses, clay, brass and iron, glass, wood, clothing, canning, biscuit and macaroni factories, large railway repair shops and oil refineries.

Statistics of manufactures for 1928: number of industrial establishments, 778; capital, 92,190,476 dollars; number of employees, 12,827; salaries and wages, 15,403,292 dollars; cost of materials, 59,398,697 dollars; value of products, 100,744,401 dollars.

**Commerce and Communications.**—The principal exports of the province consist of grain, live-stock, meat and meat products, wool, fish, butter, eggs, mining and timber products.

Length of railway lines 5,583 miles in the year 1929-30. Alberta's modern telephone system is owned and operated by the Provincial Government except in the town of Banff and city of Edmonton. Automatic exchanges are operated at Calgary, Edmonton, Lethbridge, and Medicine Hat and Drumheller. 216,816 miles of wire serve 329 exchanges and 278 toll stations. There are 76,944 rural and urban subscribers, and first-class long distance service is available to all points in the Province and to every other Province in the Dominion and every State in the United States as well as to Mexico, Cuba and many points in Europe.

Provincial funded debt April 31, 94,201,735 dollars.

**Production and Industry.**—The southern part of Manitoba is rich agricultural land, while the northern two-thirds of the province form part of the Canadian shield, an area underlain by pre-Cambrian rocks which have been proved to be rich in mineral deposits in other parts of Canada. Estimated arable land, 25,000,000 acres, of which about 30 per cent. is under cultivation. For particulars of agricultural production and number of live-stock, *see* under Canada above. The wool clip for 1930 was 1,268,000 lbs.

Total value of minerals, 1931, 10,000,000 dollars. Gold in Central Manitoba and large copper-zinc-gold-silver deposits in northern Manitoba are now being operated. The numerous lakes in Manitoba furnish large quantities of excellent fish. Value marketed in 1930, 1,760,395 dollars. Forest reserves in Manitoba 2,236,858 acres.

Statistics of manufactures for 1929: 923 industrial establishments, with a capital of 173,152,948 dollars; employees, 26,318; wages and salaries, 34,158,583 dollars; cost of materials used, 89,158,381 dollars; and value of products, 164,909,127 dollars.

**Communications.**—In the year 1929, the Province had 4,294 miles of railway as compared with 3,074 miles in 1907. There are (1930) 220,484 miles of telephone wire in Manitoba, and 78,915 telephones, which includes approximately 3,500 of municipal and privately owned systems.

*Minister of Public Works.*—Hon. D. A. Stewart.

*Minister of Lands and Mines.*—Hon. D. C. McKenzie.

*Minister without Portfolio.*—Hon. E. A. Reilly, K.C.

**Area and Population.**—The area of the Province is 27,985 square miles, of which 27,911 square miles are land area. There are 7½ million acres of Crown lands, principally lumber lands. The population (Census, 1931) was 408,255; in 1921, 387,876. The rural population in 1921 was 265,648. Population of the principal cities (1931):—Saint John, 46,640; Moncton, 20,617; Fredericton (capital), 8,828.

**Education.**—Education is free and undenominational. There are three Universities. The University of New Brunswick, at Fredericton, founded in 1800, had 168 students in 1922; the Mount Allison University at Sackville had 265 students; and the University of St. Joseph's College at Memramcook had 53 undergraduates in 1923. There were (1927) 80,690 pupils and 2,533 teachers in the 2,311 public schools. Total expenditure on public schools in 1926–27, 3,071,315 dollars.

**Finance.**—The finance for recent years is shown as follows (years ended October 31):—

Year	Ordinary Revenue	Ordinary Expenditure	Year	Ordinary Revenue	Ordinary Expenditure
	Dollars	Dollars		Dollars	Dollars
1925	2,667,611	4,154,780	1928	5,290,098	5,393,784
1926	4,382,655	4,145,820	1929	5,991,375	6,521,575
1927	5,096,446	4,636,157	1930	6,513,285	7,357,020

Funded debt, October 31, 1929, 39,525,603 dollars.

**Production and Industry.**—New Brunswick is productive in agricultural manufacture, mining, fishing, and forest products. The total area under field crops in 1927 was 839,276 acres. For particulars of agricultural production and live-stock *see* under Canada, pp. 291, 292. The wool clip for 1930 was 875,000 lbs.

The Government owns over 10,600 square miles of forests and a similar area is owned privately. In 1926 the total timber cut in New Brunswick from both Crown and Private Lands, including sawn lumber, lath, shingles, railway ties, pulpwood, etc., was in excess of 730 million feet, board measure. Of this amount sawn lumber formed 405 million feet and pulpwood was equivalent to 239 million feet. The total value of forest products, including sawn lumber, lath, shingles, pulp and paper, etc., and also pulpwood exported totals over 30,000,000 dollars. The capital invested in sawmills, pulp mills, logging and driving equipment, etc., is placed at 42,000,000 dollars, and wages amount to over 7,500,000 dollars annually.

A considerable variety of minerals is known to exist in the Province, such as iron, copper, antimony, lead, zinc, tungsten, manganese, bituminous coal, gypsum, oil shale, salt, diatomite. The only active mining in the year 1929 was in coal, copper, antimony, and gypsum. Quantities of good limestone exist in the southern part of the Province, and are quarried for lime, the pulp industry and as a fertilizing agent. Various granites are quarried and manufactured at St. George, and there is an active industry in pulpstones at Quarryville. Natural gas and oil are produced near Moncton. Coal output, 1930, 209,349 short tons.

In 1929 there were 860 industrial establishments, with a capital of 117,965,970 dollars, employing 18,517 persons; salaries and wages, 15,712,322 dollars; cost of materials, 40,453,535 dollars; value of products, 71,433,966 dollars.

The total value of fisheries in 1930 was 4,853,575 dollars, and in 1929, 5,935,635 dollars.

**Commerce and Communications.**—The exports of the Province in 1930-31 amounted to 51,374,506 dollars; the imports for consumption to 24,377,083 dollars.

The Province had in 1930, 11,836 miles of highway, comprising 1,368 miles of main-trunk roads, 3,268 miles of secondary-trunk roads and 7,200 miles of branch roads.

There were 1,934 miles of steam railway operating in 1929, as compared with 1,503 miles in 1907. In 1930 there were 60,987 miles of telephone wire and 34,935 telephones.

### NOVA SCOTIA.

The first permanent settlement was made by the French early in the seventeenth century, and the province was called Acadia until finally ceded to the British by the Treaty of Utrecht in 1713.

**Constitution and Government.**—Under the British North America Act of 1867 the Legislature of Nova Scotia may exclusively make laws in relation to local matters, including direct taxation within the Province, and the administration of justice. The Legislature of Nova Scotia consists of a Lieutenant-Governor, appointed and paid by the Federal Government, and holding office for five years; and a House of Assembly of 38 members, chosen by popular vote every five years. The province is represented in the Dominion Senate by 10 members, and in the House of Commons by 14.

The franchise and eligibility to the Legislature are granted to every person, whether male or female, if of full age (21 years), a British subject, and a resident for one year in the county of which the polling district forms part, and if not by law otherwise disqualified, or in receipt of aid as a pauper.

*Lieutenant-Governor.*—His Honour The Hon. William H. Covert, K.C. (appointed October, 1931).

The Members of the Ministry are as follows (appointed 1930):—

*Premier and Minister of Public Works and Mines.*—Col. the Hon. G. S. Harrington, K.C.

*Minister of Agriculture.*—Hon. O. P. Goucher.

*Attorney-General and Minister of Lands and Forests.*—Hon. J. Doull, K.C.

*Minister of Highways.*—Hon. P. C. Black.

*Provincial Secretary-Treasurer.*—Hon. J. Fred. Fraser.

*Minister of Health.*—Dr. G. H. Murphy.

*Ministers without Portfolio.*—Hon. A. Parsons, Hon. J. McDonald.

**Area and Population.**—The area of the Province is 21,428 square miles, of which 21,068 square miles are land area, and 360 square miles

water area. The population (Census, 1931) was 512,027; in 1921 was 523,837; in 1911, 492,338.

Population of the principal cities and towns (1921):—Halifax, 58,372; Sydney, 22,545; Glace Bay, 17,007; Dartmouth, 7,899; Amherst, 9,998; New Glasgow, 8,974; Sydney Mines, 8,327; Truro, 7,562; Yarmouth, 7,093.

The vital statistics for three years are as follows :—

—	Births	Marriages	Deaths	Excess of births
1926-27	11,184	2,861	6,259	4,875
1927-28	11,062	3,255	6,077	4,985
1928-29	10,981	3,256	6,202	4,729

**Religion.**—The denominations according to the Census of 1921 were:—Roman Catholics, 160,802; Presbyterians, 109,860; Baptists, 86,833; Anglicans, 85,604; Methodists, 59,065; and Congregationalists, 2,372.

There are also various other sects with small numbers of adherents.

**Education.**—Education in Nova Scotia is free, compulsory, and undenominational. Besides the elementary schools and high schools, there are in Halifax Maritime Provinces schools for the blind and for the deaf. A large Provincial Agricultural College is established at Truro; also a Normal College for the training of teachers. The Provincial Technical College grants degrees in civil, mining, chemical and electrical engineering. It also conducts correspondence courses in numerous subjects. Besides this central institution there are, working under its supervision, coal mining schools near all the collieries, and engineering and technical schools of various kinds in the industrial centres.

The total expenditure on education in 1930 was 3,970,025 dollars. The Province has 9 universities and colleges; 3,191 schools, with 3,448 teachers and 113,860 pupils.

**Justice and Crime.**—Justice in Nova Scotia is administered by the following courts: Courts for the collection of small debts; county courts; inferior courts in criminal cases; courts of superior jurisdiction; a divorce court and probate courts. The supreme court of appeal is composed of a chief justice and six judges. There are also courts for the revision of assessment rolls and voters lists, and a court for juvenile delinquents.

In 1929-30, 3,115 persons were imprisoned for various crimes and misdemeanours.

**Finance.**—In Nova Scotia there is no general direct Government taxation. The revenue is raised from the Dominion subsidy; royalty on coal and other minerals; succession duty; special taxes on banks, incorporated companies, partnerships, automobiles and theatres, marriage licences, and statutory fees.

Revenue, expenditure, and debt for five years :—

Year	Revenue	Expenditure	Debt
	Dollars	Dollars	Dollars
1926	5,744,574	6,327,042	35,253,823
1927	6,517,072	6,566,143	41,708,457
1928	6,933,629	7,543,077	43,757,113
1929	7,390,410	7,288,486	50,072,865
1930	7,682,066	7,900,986	56,983,480

**Production and Industry.**—Nova Scotia is largely an agricultural Province. Fruit-growing is specially profitable, and apples are the most important fruit grown; in 1930 the estimated crop was about 2,000,000 barrels. Nova Scotia is admirably adapted for dairying. Owing to the cool, moist climate, fodder may be raised easily, and the pastures are excellent. For particulars of agricultural production and live-stock, *see* under Canada above. The wool clip for 1930 was 1,638,000 lbs.

Principal minerals are (Sept. 30, 1931): coal, 4,745,000 tons; coke, 223,685 tons; tar, 3,815,686 gallons; gold, 575 ozs.; gypsum, 764,037 tons; salt, 25,951 tons.

The known coal fields embrace 1,000 square miles. The gold districts cover about 10,250 square miles.

The estimated forest area of Nova Scotia is over 12,000 square miles. The principal trees are spruce, fir, hemlock, pine, birch, oak and maple. The estimated value of the forest products in 1926 reached the sum of 14,500,000 dollars.

The fisheries of the Province in 1930 had a value of 10,411,202 dollars, including cod fishery, 2,685,879 dollars, and lobster fishery, 3,046,084 dollars. In 1930, 11,244,740 dollars were invested in this industry, and about 19,150 men were employed.

The number of industrial establishments was (in 1929) 1,195, with a capital invested of 117,965,970 dollars, employing 20,946 wage and salary-earners; wages and salaries, 17,925,190 dollars; value of products, 94,292,816 dollars.

**Commerce and Communications.**—The imports entered for consumption during 1930 were 33,464,986 dollars; the exports, 59,203,315 dollars.

The country is covered with a network of railways, 1,420 miles in extent. There are 14,682 miles of highways. Besides this, subsidised boats ply round the shores making regular calls at all the important ports.

In 1930 there were 90,991 miles of telephone wire and 46,471 telephones.

### ONTARIO.

**Constitution and Government.**—From 1791 to 1867 Ontario was called Upper Canada. The Provincial Government is administered by a Lieutenant-Governor, a cabinet, and one chamber with 112 members. The latter are elected for five years by a general franchise. Women have the vote and can be elected to the chamber.

*Lieutenant-Governor.*—The Right Honourable Sir William Mulock, K.C.M.G. (temporary appointment).

The members of the Ministry are as follows:—

*Premier, President of Council and Minister of Education.*—Hon. G. S. Henry.

*Minister of Highways.*—Hon. L. Macaulay.

*Attorney-General.*—Hon. W. H. Price, K.C.

*Provincial Treasurer.*—Hon. E. A. Dunlop.  
*Secretary and Registrar.*—Hon. G. H. Challis.  
*Minister of Agriculture.*—Hon. T. L. Kennedy.  
*Minister of Public Works and Labour.*—Hon. J. D. Monteith.  
*Minister of Lands and Forests.*—Hon. W. F. Finlayson.  
*Minister of Mines.*—Hon. Charles McCrea.  
*Minister of Health.*—Hon. J. M. Robb.  
*Minister of Public Welfare.*—Hon. W. G. Martin.  
*Ministers without Portfolio.*—Hon. R. J. Cooke, Hon. H. C. Scholfield,  
 Hon. P. Porson.

*Agent-General in London.*—Wm. C. Noxon, 163 Strand, W.C. 2.

At the elections for the Provincial Legislature held on October 30, 1929, the following parties were returned:—Conservatives, 90; Progressives, 5; Liberals, 12; United Farmers of Ontario, 1; Labour, 4; total 112.

**Area and Population.**—The greatest extent of the Province from east to west is 1,000 miles and from north to south 1,075 miles. The area is 412,262 square miles (370,880 sq. miles land area and 41,382 water). The Province is roughly divided into two sections by a line running westward from Mattawa on the Ottawa River to Georgian Bay—southern (or old) Ontario, the older settled portion, with an area of about 77,000 square miles, and northern (or new) Ontario, with an area of about 330,000 square miles, of which 146,400 square miles, the district of Patricia, was added in 1912. Population of the principal cities (Census, 1931):—Toronto (capital), 627,582; Ottawa, 124,988; Hamilton, 159,914; London, 71,022.

The population of the Province (Census, 1931) was 3,426,488. The Indian population of the Province in 1921 was 26,486.

**Education.**—There is a complete State system of elementary and secondary schools. The University of Toronto, founded in 1827, has (1930) 725 professors and lecturers, and 7,178 students (4,382 men and 2,796 women). The other Universities are Queen's at Kingston, Western Ontario at London, McMaster at Hamilton, and Ottawa in Ottawa, which are private foundations. The first two are now undenominational and are aided by the State. The Royal Military College at Kingston is maintained by the Dominion Government. There were, in 1930, 7,706 schools of all grades with over 747,000 pupils. There are 20,000 certificated teachers engaged in these elementary and secondary schools. The total expenditure by the Government of Ontario on education in 1929 was 10,278,187 dollars.

**Finance.**—The revenues of the Province are derived from the sale of Crown lands, timber, mining, liquor sales, amusement, gasoline and betting taxes, succession duties and other fees, supplemented by a subsidy from the Dominion. The revenue and expenditure in recent years were as follow:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1925-26	50,841,042	51,653,183	1928-29	64,549,717	61,906,824
1926-27	56,306,224	55,947,001	1929-30	57,343,291	57,989,352
1927-28	58,426,982	58,198,746	1930-31	54,390,002	54,846,994

**Production and Industry.**—The Province is rich in agricultural and mineral resources. The land under cultivation is about 14,000,000 acres, more

than 1,000,000 additional acres are cleared, and 25,358,000 acres are assessed. Of the total land surface of the Province, which is 234,000,000 acres, the amount of arable land is much larger than the portion now under cultivation. Beyond the cultivated portion it is estimated that northern Ontario alone contains some 20,000,000 acres of alluvial soil, not including the vast stretches of agricultural land south and west of James Bay. The farm values for 1930 were:—Land, 962,861,922 dollars; buildings, 540,570,877 dollars; implements, 177,648,862 dollars; and live-stock, 239,954,787 dollars. For particulars of agricultural production and live-stock *see* under Canada above. The wool clip for 1930 was 6,325,000 lbs.

The mineral production in 1930 included gold, 1,736,012 ozs., value 35,886,558 dollars; silver, 10,531,243 ozs., 3,998,112 dollars; nickel in matte exported, 20,978 short tons; nickel, metallic, 57,482,455 lbs.; nickel oxide, 5,797,257 lbs.; copper in matte exported, 5,855 short tons; copper, metallic, 115,998,612 lbs.; platinum metals, 68,040 ozs.; Portland cement, 3,842,690 barrels; crude petroleum, 117,302 barrels; natural gas, 7,943,416 m. cubic feet. Total value of metallic minerals in 1930, 83,356,365 dollars, and in 1929, 83,967,446 dollars. Non-metallic minerals and structural materials in 1930 were worth 25,063,889 dollars, and in 1929, 27,163,114 dollars. The total value of the mineral production of Ontario in 1930 was 118,441,468 dollars as against 117,960,722 dollars in 1929.

Total area of forests 240,000 square miles; chief timber is spruce, pine and poplar.

In 1929 Ontario had 9,910 manufacturing establishments, with a capital of 2,418,340,450 dollars, employing 341,680 wage-earners; wages and salaries, 421,971,546 dollars; cost of materials, 1,080,106,598 dollars; gross value of products, 2,103,090,788 dollars.

**Communications.**—There were in 1929, 66,102 miles of public road with an expenditure during 1930 of 17,908,412 dollars. In 1929 there were 10,872 miles of steam railway in Ontario, as compared with 7,868 in 1907. There were 1,991,378 miles of telephone wires and 636,118 telephones in 1930.

Hydro-electric power:—At January 1, 1931, there were turbine installations representing 2,088,055 h.p. of which 1,752,773 h.p. were being developed in central electric stations.

### PRINCE EDWARD ISLAND.

This island was discovered by Sebastian Cabot in 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, and constituted a separate colony in 1769.

**Constitution and Government.**—Prince Edward Island entered the Confederation on July 1, 1873. The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 30 members, who are elected for 4 years, half by real property holders and the remainder by universal male and female suffrage. Women can also be elected to the Assembly. State of Parties (elected August, 1931): Conservatives, 19; Liberals, 11.

*Lieutenant-Governor.*—Hon. Charles Dalton.

The members of the Ministry are as follows (August 29, 1931):—

*Premier and Attorney and Advocate General.*—Hon. J. D. Stewart, K.C.

*Minister of Public Works and Highways.*—Hon. Leonard MacNeill.

*Minister of Agriculture and Provincial Secretary-Treasurer.*—Hon. G. Shelton Sharp.

*Minister of Education and Public Health.*—Hon. William J. P. MacMillan, M.D.

*Ministers without Portfolio.*—Hon. H. Francis McPhee, Hon. Adrian F. Arsenault, Hon. Harry D. McLean, Hon. Walter G. McKenzie and Hon. Matthew W. Wood.

**Area and Population.**—The province, which is the smallest in the Dominion, lies at the mouth of the Gulf of St. Lawrence, and is separated from the mainland of New Brunswick and Nova Scotia by Northumberland Strait. The area of the island is 2,184 sq. miles. The total population (Census, 1931) was 88,040. Population of the principal cities (1931):—Charlottetown (capital), 12,357; Summerside, 3,914.

**Religion and Education.**—The population of the Province at the census of 1921 was divided among the different creeds as follows;—Roman Catholic, 39,312; Presbyterian, 25,945; Methodist, 11,408; Baptist, 5,316; Anglican, 5,057. There were (1930) 472 schools, 618 teachers, 17,277 pupils. This is exclusive of 3 Roman Catholic convent schools at Tignish, Summerside and Charlottetown, with 551 pupils. There are two colleges, Prince of Wales College, head of the Provincial school system, and St. Dunstan's, a Roman Catholic institution, both in Charlottetown. Total expenditure on public education in 1929 was 496,059 dollars.

#### Finance.—

<sup>1</sup> Gross.

The expenditure does not include sinking fund or highway improvement, the outlay on the latter in 1930 being 350,084 dollars.

The total liabilities of the Province amounted on 31st December, 1930, to 2,793,321 dollars; assets calculated at 568,225 dollars.

**Production and Industry.**—The farm land occupied in 1921 was 1,216,483 acres. Field crops in 1928 covered about 540,619 acres. The land in natural forest covers 356,996 acres, and in pasture 293,454. For particulars of agricultural production and live-stock see under Canada above. The wool clip for 1930 was 496,000 lbs.

Silver fox breeding is extensively carried on, and pelts are shipped to United States and European markets; breeding foxes are exported to all northern countries. The value of fur-bearing animals on farms in 1929 was estimated at 4,500,000 dollars.

The total value of the fisheries in 1930 was 1,141,279 dollars. Of the total, lobsters make up 694,227 dollars, smelts, cod, herring and oysters being, in the order named, the largest other items.

The fishing season of 1930 showed a considerable falling off in production

as compared with the previous year, notably in lobsters. Oysters abound in Richmond Bay, where the beds extend to 15,000 acres. The Dominion Government has possession and control of the oyster areas surrounding the Province. It is believed that the industry will soon be of major importance.

In 1929 there were 276 industrial establishments, with a capital of 8,489,934 dollars, employing 2,133 persons; salaries and wages, 781,448 dollars; cost of materials, 2,864,831 dollars; value of products, 4,638,725 dollars.

**Commerce and Communications.**—The trade of Prince Edward Island is chiefly with the other provinces of Canada and this inter-provincial trade does not appear in the trade statistics. In 1928-29 the exports to other countries amounted to 956,045 dollars; the imports entered for consumption to 1,808,713 dollars. In 1927 the province had 276 miles of railway. A railway and automobile ferry steamer of great power is in operation, connecting the lines of the Canadian National Railway in Prince Edward Island with those on the mainland. Daily steamship communication with the mainland was successfully maintained for the first time during the winter of 1917-18, and has since continued without interruption. In 1930 there were 7,028 miles of telephone wires and 5,753 telephones.

### QUEBEC.

Quebec was formerly known as New France or Canada from 1535 to 1763; as the Province of Quebec from 1763 to 1790; as Lower Canada from 1791 to 1846; as Canada East from 1846 to 1867; and when, by the union of the four original provinces, the Confederation of the Dominion of Canada was formed, it again became known as the Province of Quebec.

**Constitution and Government.**—The Provincial Government is modelled on that of the Dominion organization and is in the hands of a Lieutenant-Governor and a responsible Ministry, assisted by a Legislative Council of 24 members, appointed for life by the Lieutenant-Governor, and a Legislative Assembly of 90 members elected for 5 years. Members of both Houses receive 2,500 dollars per session. Quebec is the only Canadian Province in which women are not enfranchised or eligible for election to the Legislature, but a Bill was presented by the Government at the last session of the last Parliament, 1931, giving the married women of the Province a status in respect of legal rights equal to that enjoyed by their husbands and removing existing anomalies. Last election, August 24, 1931: Liberals 79, Conservatives 11.

*Lieutenant-Governor.*—Hon. Henry George Carroll (appointed April, 1929).

The members of the Ministry (November, 1931) are as follows:—

*Premier, Attorney-General, Minister of Municipal Affairs and Provincial Treasurer.*—Hon. L. A. Taschereau.

*Minister of Lands and Forests.*—Hon. Honoré Mercier.

*Provincial Secretary.*—Hon. Athanase David.

*Minister of Agriculture.*—Hon. J. A. Godbout.

*Minister of Colonisation, Game and Fisheries.*—Hon. H. La Ferté.

*Minister of Public Works.*—Hon. J. N. Francoeur.

*Minister of Labour.*—Hon. A. J. Arcand.

*Minister of Roads and Mines.*—Hon. J. E. Perrault.

*Ministers without Portfolio.*—Hon. E. Moreau, Hon. L. Lapierre, Hon. J. H. Dillon, N. Pérodeau, G. Bryson.

*Agent-General in London.*—Dr. L. J. Lemieux, 2 Cockspur Street, London, S.W. 1.

**Area and Population.**—The area of Quebec (as amended by the Labrador Boundary Award) is 594,434 sq. miles (583,895 sq. miles land area and 10,539 sq. miles water). Of this extent, 351,780 sq. miles represent the Territory of Ungava, annexed in 1912 under the Quebec Boundaries Extension Act. The population (Census, 1931) was 2,869,793; and in 1921 was 2,360,665. Of the 1921 population 357,108 were of British and 1,889,277 of French origin. The rural population in 1921 was 1,038,128, and the urban population 1,323,071. ## THE NORTHWEST TERRITORIES.

**Constitution and Government.**—The Northwest Territories comprise the Territories formerly known as Rupert's Land and the North-western Territory, except such portions thereof as form the Provinces of Manitoba, Saskatchewan and Alberta, and the Yukon Territory, together with all British territories and possessions in North America and all islands adjacent thereto, not included within any province, except the Dominion of Newfoundland and its dependencies. The Territories were reconstituted September 1, 1905, and for administrative purposes were divided into three Provisional Districts, namely, Mackenzie (527,490 sq. miles), Keewatin (228,160 sq. miles), Franklin (554,082 sq. miles) this division having come into effect on January 1, 1920.

The seat of Government is located at Ottawa. By Order in Council of March 16, 1918, the Northwest Territories are governed by the Commissioner, the Deputy Commissioner and five Councillors appointed by the Governor-General in Council. The Commissioner in Council has power to make ordinances for the Government of the Territories under instructions from the Governor-General in Council or the Minister of the Interior respecting direct taxation within the Territories in order to raise revenue, etc., establishment and tenure of territorial offices, and the appointment and payment of officers, maintenance, etc., of prisons, municipal institutions, licenses, solemnization of marriage, property and civil rights, administration of justice and generally all matters of a merely local and private nature in the Territories.

*Commissioner.*—Hugh Howard Rowatt.

**Area and Population.**—The area of the Territories is 1,309,682 sq. miles. The population (estimated) is 12,000, including 7,100 Eskimos and 3,800 Indians.

This territory, including the counties of Demerara, Essequibo, and Berbice, named from the three rivers, was first partially settled by the Dutch West India Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English, and was finally ceded to Great Britain in 1814.

**Constitution and Government.**—The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, and ten Official Members and nineteen Unofficial Members. Executive and administrative functions are exercised by the Governor and Executive Council. The law of the Colony, both civil and criminal, is based on the common and statute law of England, except that the English law of personal property applies to both movable and immovable property, with certain exceptions, and the Roman-Dutch legitimatisation *per subsequens matrimonium* is preserved. There is absolute equality of males and females before the law as regards divorce, property, succession and all other matters. Appeals lie to the Full Court of the Supreme Court and to the West Indian Court of Appeal, and from each of these Courts to the Judicial Committee of the Privy Council.

**Shipping**—In 1930, 2,928 vessels, with a total tonnage of 1,434,190, entered and cleared (in 1929, 2,860 vessels of 1,324,312 tons), mainly British, Norwegian and Dutch. The registered vessels in 1930 were 12 steamers of 1,297 tons, 3 motor vessels of 161 tons, and 23 sailing vessels of 3,341 tons.

**Communications**.—There are 78 miles of railway; 450 miles river navigation; 39 miles of canals; 500 miles of driving or motor road, 17 miles of bridle road and 497 miles of trails, including a Government cattle trail of 182 miles, from Takama on the Berbice River to Annai on the Rupununi Savannah. There are 73 post-offices, of which 45 are telegraph offices, 38 money order offices, 40 savings banks, and 9 travelling post-offices. There are about 390 miles of post-office telegraphs and telephone exchanges in Georgetown and New Amsterdam having (1929) 4,873 miles of aërial wire, including 13 miles of aërial cables, and 23 miles of submarine cables, with 1,960 instruments; 120 miles of land line maintained for railway and telephones are included in the foregoing total.

The Georgetown wireless station communicates with five wireless stations in the interior, and with stations in neighbouring countries and on ships. A direction finding service is available for shipping.

**Money**.—Accounts are kept in dollars and cents (1 dollar = 4*s.* 2*d.*). In circulation are British gold, silver and bronze coin, with some silver 'bits,'—fourpenny pieces—local coins. United States gold coins are also current and are legal tender. Notes are issued by the Royal Bank of Canada and Colonial Bank in denominations of 5, 20, and 100 dollars, and there are Government currency notes of one and two dollars. The face value of the latter in circulation at 31 December, 1930, was 104,167*l.*

## HONDURAS, BRITISH.

*Governor and Commander-in-Chief.*—Sir Harold Kittermaster, K.B.E., C.M.G. (2,000*l.*), (appointed November, 1931) assisted by an Executive Council of seven members, and a Legislative Council consisting of six official and seven unofficial members.

British Honduras is a Crown Colony on the Caribbean Sea, south of Yucatan, and 600 miles west from Jamaica. Its early settlement was probably effected by woodcutters from Jamaica about 1638, and from that date to 1798, in spite of opposition from the Spaniards, settlers held their own and prospered. In 1786 the Home Government appointed a Superintendent, and in 1862 the settlement was declared a Colony, subordinate to Jamaica. It became an independent colony in 1884.

**Area and Population.**—Area, 8,598 sq. miles. Population, census 1931, 51,347 (25,524 males, and 25,823 females). Estimated population at December 31, 1930: 52,136 persons (25,756 males, 26,380 females). The birth-rate per 1,000 (1930) was 36·61, and the death-rate 19·19. In 1930 there were 399 marriages. Primary schools (1930), 75; children enrolled, 7,754; average attendance, 6,118; Government grant (expended), 14,787*l.* There are 4 schools with secondary departments, and altogether about 576 pupils. They are under denominational management and none receive aid from Government. The total school roll, including private schools, was 8,701, and attendance 6,975. The police force contains (December 1930) 3 officers, 118 non-commissioned officers and men. Chief town: Belize; population, census of 1931: 16,687 (7,668 males, and 9,019 females).

Besides the staple products, mahogany and logwood, there are bananas, citrus fruits, cacao, plantains, &c. The higher parts afford good pasturage for cattle.

**Shipping and Communications.**—Tonnage entered, 1930, 313,587 tons (773 steamships, 310,159 tons). Registered shipping, 1930, 130 sailing vessels, 1,031 tons, and 87 motor and steam vessels, 1,106 tons. In 1930, 583,785 letters and post-cards, and 241,243 books, newspapers, and parcels passed through the post office. Telegraph and telephone lines connect Belize with Corozal and Consejo on the coast, Orange Walk on New River, San Antonio on the Rio Hondo, and other stations in the north, El Cayo and Benque Viejo in the west, Stann Creek and Punta Gorda in the south. Telegraph line (1930), 925 miles; offices, 32. In 1930, 14,305 local and foreign telegrams were sent, and 10,058 telephonic conversations were held. There are 25 miles of railway. In 1930, 6,600 radio telegrams were transmitted. Belize is a stopping place of the Pan American bi-weekly air mail and passenger air service between Miami, Fla., and Cristobal, Canal Zone.

**Money and Credit.**—The Royal Bank of Canada took over the business of the local bank in 1912. There are 6 Government savings banks; depositors, 1,495, deposits 235,235 dollars on March 31, 1931. United States gold is the standard of currency. The British sovereign and half-sovereign are legal tender for 4·867 dollars and 2·433 dollars respectively. There are (March 31, 1930) a paper currency of 477,784 dollars in Government notes and a subsidiary silver coinage of 190,160 dollars in circulation. There is also a bronze cent piece and a nickel-bronze five-cent piece, whose issues amount to 6,150 dollars and 5,000 dollars respectively.

## NEWFOUNDLAND AND LABRADOR.

Newfoundland was discovered by John Cabot in 1497. It was soon frequented by the Portuguese, Spanish and French for its fisheries. Guy, Calvert and others made unsuccessful attempts to colonise the island, but in the 17th century English colonists established themselves there. A French station also existed on the island, and there were constant disputes as to fishing rights. Although exclusive British sovereignty was ceded in 1713 by the Treaty of Utrecht, these disputes were not finally settled till 1904.

The coast is rugged, especially on the south-west, where the coast range reaches an elevation of nearly 2,000 feet. The hills attain their summit within a few miles of the salt water, and then spread out into an

undulating country, consisting largely of barrens and marshes, and intersected by numerous rivers and lakes. On the borders of the lakes and water-courses good land is generally found, and in some cases, as about the Exploits, the Gander and the Humber, it is heavily timbered.

**Constitution and Government.**—The Governor is assisted by an Executive Council (not exceeding 10 members), a Legislative Council (not exceeding 24 members), and an elected House of Assembly consisting of 40 representatives. Members of the Legislative Council receive 250 dollars per session; members of the Legislative Assembly receive 1,000 dollars per session. For electoral purposes the whole colony is divided into 37 districts or constituencies. Women were enfranchised by an Act of the Legislature passed in 1925.

After the general election of October, 1928, the Government supporters in the House of Assembly numbered 28, the opposition 12.

*Governor and Commander-in-Chief.*—Sir John Middleton, K.C.M.G., K.B.E., appointed August, 1928; salary 15,000 dollars, with travelling allowance of 2,500 dollars.

The Ministry (October, 1931) is as follows:—

*Prime Minister and Minister of Justice.*—Rt. Hon. Sir R. A. Squires, P.C., K.C.M.G., K.C.

*Secretary of State.*—Hon. A. Barnes, B.Sc., Ph.D.

*Minister of Posts and Telegraphs.*—Hon. W. W. Halfyard.

*Solicitor General.*—Hon. F. G. Bradley, K.C.

*Chairman, Board of Health.*—Hon. H. M. Mosdell, M.D.

*Ministers without Portfolios.*—Hon. Sir W. F. Coaker, K.B.E., Hon. Dr. A. Campbell, Hon. P. J. Lewis, Hon. Sir T. K. Cook.

Not in the Cabinet:

*Minister of Marine and Fisheries.*—H. B. C. Lake.

*Minister of Public Works.*—R. Hibbs.

*Minister of Agriculture and Mines.*—J. F. Downey.

The ministers with departments receive salaries of 4,000 dollars each.

**Area and Population.**—Area, 42,734 square miles. Population in 1929, 271,553 (137,333 males and 134,220 females). Dependent on Newfoundland is Labrador, the most easterly part of the American continent. The boundary between the said Dependency and the Province of Quebec, which had, for many years, been in dispute, was defined by the Judicial Committee of the Privy Council in March 1927, as being, in effect, the watershed of the rivers flowing into the Atlantic Ocean, the coastal boundaries being from Blanc Sablon, on the South, to Cape Chidley, on the North. As a result of this decision an estimated area of some 110,000 sq. miles, formerly in dispute, was confirmed as under the jurisdiction of Newfoundland. The population of Labrador in 1929 was 4,203 (2,251 males, 1,952 females). Of the total Newfoundland population in 1921, 65,448 were engaged in the fisheries, 3,227 were farmers, 4,862 mechanics, and 1,117 miners. Capital, St. John's, 42,143 inhabitants (1930); other towns (1921), Harbour Grace, 3,825; Bonavista, 4,052; Carbonear, 3,320; Twillingate, 3,217, and Grand Falls, 3,769. The birth rate in 1930 was 24.28, and the death rate (1930), 13.91 per 1,000. Immigrants (1930), 15,383; emigrants (1930), 12,920.

**Religion and Education.**—Of the total population of Newfoundland and Labrador in 1921, 89,221 belonged to the Church of England, 91,792 were Roman Catholics, 76,307 United Church, 1,905 Presbyterians, 13,576 Salvation Army, 3,056 other denominations. The number of schools of all kinds (1929) was 1,156: Church of England, 398; Roman Catholic, 334; Methodist, 336; and other denominations, 88. The attendance in 1929 was: Church of England, 19,410; Roman Catholic, 19,998; Methodist, 17,405, and others, 3,767; total, 60,580: total expenditure, including Government grants, fees, &c., 1,021,083 dollars.

### Revenue and Expenditure in four years ended June 30:—

<sup>1</sup> Estimated.

Public debt (June 30, 1931), 87,592,106 dollars.

**Production, &c.**—The total value of all crops harvested in 1921 was 4,824,090 dollars. In 1921 (census figures) there were in Newfoundland 16,340 horses, 27,721 cattle, 86,732 sheep, and 14,573 swine. Some fine pine forests exist to the north, and large saw mills have been established. The mineral resources of Newfoundland are considerable. Large beds of iron ore have been found on Bell Island in Conception Bay, on the east coast, and other rich deposits have been discovered on the west coast. The total deposits are estimated at about 3,600 million tons. Copper ore and pyrites are worked. Coal is found near St. George's Bay on the west coast, and in the Grand Lake district. In the eastern part of the island gold-bearing quartz rock and extensive deposits of silver and lead ore have been found. Extensive paper and pulp mills have been erected at Grand Falls, Bishop's Falls, Corner Brook, Lomond in Bonne Bay, and Alexander Bay.

### Imports and Exports, including bullion and specie, for five years:—

Molasses . . . . .	154,723	Lobsters (tinned) . . . . .	219,999

Of the imports (1929-30) the value of 5,527,575 dollars came from the United Kingdom; 12,992,600 from Canada; 12,101,752 from the United States. Of the exports the value of 8,647,948 dollars went to the United Kingdom; 3,968,479 to Canada; 11,432,918 to United States; 2,157,404 to Portugal; 2,748,547 to Spain; 1,478,420 to Italy; 2,990,472 to Brazil.

**Shipping.**—Total tonnage of vessels entered and cleared in 1929-30, 3,375,499 tons, of which 1,820,223 tons were British. Vessels registered December 31, 1930, 2,501 sailing vessels of 102,718 tons, 89 steam vessels of 34,450 tons, and 166 motor vessels of 7,220 tons; total, 2,756 vessels of 144,388 tons.

**Fishing** is the principal occupation of the population. The principal fish are cod, salmon, halibut, lobster, caplin, and seal: the value of the fishing products is about four millions sterling annually.

By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights under the treaty of Utrecht, but retained the right to fish in territorial waters from St. John's Cape northwards to Cape Ray for all sorts of fish, including bait and crustacea. An award of The Hague court in 1910 secured the right of Great Britain to make fishing regulations without the consent of the United States, subject to any limitations imposed by treaty. It also confirmed Great Britain's contention that the whole extent of a bay from headland to headland is comprised within territorial waters.

There were engaged in the Bank cod fishery during 1930, 1,150 men, and 62 Newfoundland sailing vessels, aggregating 4,981 net tons. The catch in 1930 totalled 86,098 quintals of dry fish. In 1930 the output of the cod-fishery is estimated at 1,252,479 quintals of dry fish, valued at 11,520,686 dollars. There were about 12,931 small sailing vessels, boats (including motor boats), &c., utilised, and 27,500 men employed in this fishery. In 1930 exports of fresh lobsters amounted to 34,148 lbs., valued at 9,911 dollars, and preserved, 10,978 cases, valued at 219,999 dollars.

During 1930, 241,236 seals, valued at 405,809 dollars, were caught; 17 vessels and 2,295 men were engaged in the seal fishery. In 1929 the catch was 201,856 seals.

**Communications, &c.**—Railways open 1926: 907 miles of Government line with a gauge of 3ft. 6in., and 56 miles of private line. Communication between various points on the coast and between the island and the continent is maintained by a fleet of 17 first-class steamers; 13 owned by Government Railway, each of which connects with some central point on the railway. There were in 1930 (including 52 Labrador stations) 923 post offices, 126 of which were telegraph offices; there were 120 telegraph offices which were not post offices. There were about 782 Government postal telephone stations, most of them being in post and telegraph offices. Letters and cards sent in 1930, 9,000,000; newspapers, books, parcels, &c., 227,522 sent abroad; received, 3,106,432. The postal and telegraph revenue, 1930, was 825,777 dollars, and the expenditure, 1,404,208 dollars. Telegraph line open (1930), 7,000 miles of wire; about 2,000 miles of telephone wire.

In December, 1930, the Newfoundland Savings Bank held 2,026,426 dollars standing to the credit of 3,707 depositors; this is in addition to the amount of 24,207,391 dollars held by the Savings Departments of the four banks doing business in St. John's.

The legal coin of the colony is the gold dollar, normally equivalent to 4s. 1½d. of British money.

## TRINIDAD.

Trinidad, which lies immediately north of the mouth of the Orinoco, and includes Tobago administratively, was discovered by Columbus in 1498 and colonised by the Spaniards in the 16th century. About the period of the Revolution a large number of French families settled in the island, where the French element is still preponderant. In 1797, Great Britain being at war with Spain, Trinidad was occupied by the British, and ceded to Great Britain by the Treaty of Amiens in 1802.

*Governor.*—Sir Alfred Claud Hollis, K.C.M.G., C.B.E. (5,500*l.*, and

allowances 375*l.*), appointed Nov. 27, 1929. There is an Executive Council consisting of the Governor, as President, the Colonial Secretary, Attorney-General, and Treasurer and such other persons, not being *ex-officio* members, as may from time to time be appointed; there is also a Legislative Council with the Governor as President, twelve official and thirteen unofficial members. Of the unofficial members six are nominated and seven are elected. Women over thirty years of age have the franchise.

*Colonial Secretary*.—Hon. S. M. Grier, C.M.G.

**Area**: Trinidad, 1,862 square miles; Tobago 114. **Population**: census 1921, 365,913 (186,802 males and 179,111 females). Estimated population, end of 1930, 413,119. **Capital**, Trinidad, Port of Spain, 69,534. The white population is chiefly composed of English, French, Spanish and Portuguese. The large majority of the inhabitants are natives of the West Indies, of African descent, the balance being made up of East Indians, estimated at 133,277, and a small number of Chinese. English is spoken generally throughout the Colony. Births, 1930, 12,730; deaths, 7,721; marriages, 1,819.

**Education**.—At the close of 1930 there were 287 Elementary and Intermediate schools in the Colony, 43 being Government and 244 Assisted Schools. There were 251 schools in Trinidad and 36 in Tobago. Of the 244 Assisted Schools 96 were Roman Catholic, 55 Church of England, 69 Canadian Presbyterian Mission, 12 Wesleyan, 11 Moravian and 1 Baptist. There were 2 Government and 3 Assisted Intermediate Schools. The following Colleges afford facilities for the higher education of boys: the Queen's Royal College and its affiliated institutions, the St. Mary's College in Port-of-Spain, and the Naparima College in San Fernando. The St. Joseph's Convent and the Bishop's High School in Port-of-Spain and the Naparima Girls' High School in San Fernando, which are also affiliated to the Queen's Royal College, provide similar education for girls. The number of pupils on the roll at December 31, 1930, was: Queen's Royal College 287, St. Mary's College 462, Naparima College 172, St. Joseph's Convent School 496, St. Hilary's School 135, the Naparima Girls' High School 138, and the Bishop's High School, Tobago, 69. The affiliated institutions work under the same curriculum as the Queen's Royal College, and receive a Government grant-in-aid.

**Police force**, 899 all ranks (December 31, 1930). In 1930 the number of summary convictions was 23,233.

Imports, 1930, were consigned principally from the United Kingdom (36½ per cent.); U.S.A. (24 per cent.); and Canada (16 per cent.). Exports were shipped chiefly to United Kingdom (22½ per cent.); U.S.A. (29½ per cent.); and Canada (9 per cent.).

Shipping: The number of vessels entered and cleared during the year 1930 was 4,679, with a tonnage of 7,936,881. There were 2,336 arrivals of 4,003,086 tons, and 2,343 departures of 3,933,795 tons, of which 50½ per cent. was British.

Of the total area of 1,367,236 acres (Trinidad, 1,292,844 acres, and Tobago, 74,392 acres), about 686,400 acres have been alienated. About 380,000 acres were under cultivation (1926). Sugar production in 1930 amounted to 98,753 tons. Asphalt: The pitch lake is situated in the Ward of La Brea, comprising 114 acres, was first leased as a whole in 1888 for 21 years, and in accordance with the terms of the lease, it was renewed for a further period of 21 years from February 1, 1909, to January 31, 1930. On February 19, 1925, a fresh demise of the pitch lake comprising 109 acres was made to the Trinidad Lake Asphalt, Limited, for 21 years from February 1, 1930. The quantity of asphalt produced during 1930 was 157,859 tons. The quantity of asphalt exported was 118,055 tons of the value of 313,397l., and yielding a revenue of 58,478l. The development of the oilfields continues in a satisfactory manner, and the Colony is now the second largest producer of petroleum within the Empire. The number of companies operating at the close of 1930 was 14. During 1930, 329,661,745 imperial gallons of crude oil were extracted. Five refineries are at work in the Colony and all grades of petroleum products from petrol to road oil are produced, while two or three small topping plants produce petrol, distillate and residual oils.

There are 1,074 miles of main and 1,261 miles of local roads. Government railway: 118 miles of 4 ft. 8½ in. gauge; 118 miles of telegraph and 21,234 miles of telephone (1930). Cable: Communication by cable with the United Kingdom, Europe, North America, and other parts of the world is maintained by the Pacific Cable Board and the West India and Panama Telegraph Company.

The Pacific Cable Board system has no wireless station in Trinidad, but three wireless stations are maintained by the Trinidad Government, namely, stations at Port-of-Spain, North Post, and Tobago. The North Post Station dealt exclusively with ship and Tobago traffic, while communication with British Guiana, St. Martin, Venezuela and Paramaribo is carried out by Port-of-Spain.

Number of post offices, 119; of telegraph offices, 44. There are four private banks. British currency and United States gold are legal tender. There is no Colonial coinage, but Government 1 and 2 dollar notes (4s. 2d. and 8s. 4d.), and 1,000 dollar notes (208l. 6s. 8d.) are issued. Government savings-banks are established in 35 districts with a Head Office in Port-of-Spain, the amount of deposits at the end of 1930 being 470,273l., and the total number of depositors, 37,906.

TOBAGO is situated about 26 miles north-east of Trinidad, and has an area of 114 square miles.

The total value of the exports in 1930 was 127,741l., of which cocoa amounted to 70,858l. and copra to 27,169l.

## AUSTRALASIA AND OCEANIA.

THE British Territories in Australasia comprise the Commonwealth of Australia ; the Australian Dependencies of Papua and Norfolk Island, the Dominion of New Zealand and adjacent islands, and the Crown Colony of Fiji. The British possessions in Oceania include the Solomon and Tonga Islands, and many other groups of islands and islets scattered over the Pacific. There are also the mandatory territories of New Guinea, Western Samoa, and Nauru.

### THE COMMONWEALTH OF AUSTRALIA.

The Commonwealth of Australia, consisting of the six colonies (now denominated Original States) of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, was proclaimed on January 1, 1901.

On September 1, 1906, the administration of Papua was transferred to the Commonwealth (*see* Papua).

Legislative power is vested in a Federal Parliament, consisting of the King, represented by a Governor-General, a Senate, and a House of Representatives. There must be a session of Parliament at least once every year. The Senate consists of 36 Senators (at least six for each of the Original States voting as one electorate) chosen for six years. In general, the Senate is renewed to the extent of one-half every three years, but in case of prolonged disagreement with the House of Representatives, it may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as may be, of twice as many members as there are Senators, the numbers chosen in the several States being in proportion to population (excluding aborigines) as shown by the latest statistics, but not less than five for any original State. Number in 1931, 76. The Northern Territory, by virtue of an Act passed in 1922, elects a member who is not entitled to vote, but may take part in any debate in the House. The House of Representatives continues for three years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a natural-born subject of the King, or have been for five years a naturalised subject under a law of the United Kingdom or of a State of the Commonwealth. He or she must be of full age, must possess electoral qualification, and have resided for three years within the Commonwealth. The franchise for both Chambers is the same and is based on universal adult (male and female) suffrage.

The legislative powers of the Federal Parliament embrace commerce, shipping, &c.; finance, banking, currency, &c.; defence; external affairs; postal, telegraph, and like services; census and statistics; weights and measures; copyright; railways; conciliation and arbitration in industrial disputes extending beyond the limits of any one State; and other matters. The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution, or, in the last resort, a joint sitting of the two Houses. No religion may be established. The Federal Parliament is a government of limited and enumerated powers, the several State Parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

At the election for the Lower House held on December 20, 1931, the following parties were returned: United Australia Party, 39; Country Party, 16; Federal Labour Party, 14; Lang Labour Party, 4; Independent, 2.

The Executive power, vested in the King, is exercised by the Governor-General, assisted by an Executive Council of thirteen responsible Ministers of State. These Ministers are, or must become within three months, members of the Federal Parliament; they are paid salaries and allowances not exceeding, in all, 20,637*l.* a year.

*Governor-General.*—His Excellency the Rt. Hon. Sir Isaac Alfred Isaacs, P.C., K.C.M.G., Commander-in-Chief of the Commonwealth of Australia and its Dependencies (salary, £10,000). Assumed office on January 22, 1931.

The Cabinet, appointed in December 1931, is as follows:—

*Prime Minister and Treasurer.*—Hon. J. A. Lyons.

*Assistant Treasurer.*—Rt. Hon. S. M. Bruce, C.H.

*Vice-President of the Executive Council.*—Senator the Hon. A. J. McLachlan.

*Attorney-General, Minister for External Affairs and Industry.*—Hon. J. G. Latham, C.M.G., K.C.

*Minister for Defence.*—Rt. Hon. Sir Geo. F. Pearce, K.C.V.O.

*Minister for Trade and Customs.*—Hon. H. S. Gullett.

*Minister for Home Affairs and Transport.*—Hon. R. Archdale Parkhill.

*Minister for Markets.*—Hon. C. A. S. Hawker.

*Minister for Health, Repatriation and Works.*—Hon. C. W. C. Marr.

*Postmaster-General.*—Hon. J. E. Fenton.

*Assistant Ministers (Honorary).*—Senator the Hon. W. Massy-Greene, Hon. Josiah Francis, Hon. J. A. Perkins.

*Resident Minister in London.*—Rt. Hon. S. M. Bruce. (Appointed Feb. 10, 1932).

*High Commissioner for Commonwealth in London.*—Major-General Hon. Sir G. de L. Ryrie, K.C.M.G., C.B., V.D. (Appointed March 22, 1927.)

*Official Secretary for the Commonwealth in London and Financial Adviser.*—J. R. Collins, C.M.G., C.B.E.

*Representative in the Commonwealth of H.M. Government in the United Kingdom.*—E. T. Crutchley. Appointed May 22, 1931.

*Defence Liaison Officer for the Commonwealth in London.*—T. Trumble C.M.G., C.B.E.

*Commonwealth Trade Representative in France.*—C. H. Voss.

*Commissioner-General for Australia in the United States of America.*—Vacant.

*Official Secretary for the Commonwealth in America.*—D. McK. Dow.

*Australian Trade Commissioner in Canada.*—L. R. McGregor.

The Constitution provides for a Federal Judicature and an Inter-State Commission on Trade and Commerce, and for the admission or creation of new States. The Inter-State Commission was brought into existence in 1913 and the Commissioners were appointed for a term of seven years. At the expiration of this period no fresh appointments were made. In 1911 the Commonwealth acquired from the State of New South Wales the Yass-Canberra site for the Federal Capital, with an area of 912 square miles. Building operations were begun in 1923 and Parliament was opened at Canberra on 9th May, 1927, by H.R.H. the Duke of York. A further area of 28 square miles at Jervis Bay was acquired in 1917 for purposes of a Naval College, with the right to construct a railway from the Capital thereto.

Proposed laws for the alteration of the Constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the States and also a majority of all the electors voting.

## Pensions and Maternity Allowances.

The Invalid and Old Age Pension Acts provide for the payment of invalid and old age pensions at such rates as the Commissioner deciding the question deems sufficient, but so that the amount shall not exceed 52*l.* a year, nor the pensioner's whole income (including the pension) exceed 84*l.* 10*s.* a year. By special provision, made in 1920, a permanently blind person may receive an amount of pension (not exceeding £52) as will make his total income equal to £221 per annum, or such other amount as is declared to be a basic wage. Old age pensions are granted upon application to persons who are at least 65 years of age and have lived in Australia or Australian territory at least 20 years. In the case of women, however, and of men subject to certain disability, the pension may be paid from age 60. Invalid pensions are granted to persons who have lived at least 5 years

in Australia, have there become incapacitated, and have no other sufficient means of support. The Financial Emergency Act, 1931, reduced the amount of old age and invalid pensions by 2s. 6d. per week and the income limit to 78l. per annum. In the case of blind pensioners the pension has been reduced to an amount not exceeding 45l. 10s., but at present the limitation on total income has not been altered. The estimated savings are approximately 1,825,000l. per annum.

On October 9, 1912, a Maternity Act was passed providing for the payment of an allowance of 5l. in respect of every viable child born (alive or dead) in Australia. The mother must be a native of the Commonwealth or intend to settle permanently therein. No payment is made in the case of an aboriginal or an Asiatic. The amount of maternity allowance which, under the provisions of the Financial Emergency Act, 1931, is only payable where the total income of claimant and her husband did not exceed 260l. for the preceding 12 months, has been reduced to 4l., thus effecting a saving of 230,000l. per annum. War pensions are subject to a reduction of 22½ per cent. under the same Act. The Returned Soldiers' organizations have submitted a scheme satisfactory to Parliament to enable this reduction to be given effect to and reduce the annual war pension bill by 1,300,000l. The disbursements for old age and invalid pensions and maternity allowances are shown under Finance below. The numbers of pensioners in the Commonwealth on June 30, 1931, were:—Old age, 172,177; invalid, 68,343; total, 240,520. War pensioners at June 30, 1931, numbered 283,322. To June 30, 1931, the total number of claims for the maternity allowance was 2,475,475, the claims passed for payment in 1930-31 numbering 126,149.

### Justice.

The judicial power of the Commonwealth is vested in a Federal Supreme Court (the High Court of Australia), consisting of a Chief Justice and five Justices, appointed by the Governor-General in Council. The High Court has original jurisdiction in all matters arising under treaties, between States of the Commonwealth, or affecting representatives of other countries, as well as in other matters as empowered by the Parliament. It may also hear and determine appeals from judgments of its own Justices exercising original jurisdiction, and from judgments of any other Federal Court, or of the Supreme Court of any State, subject to certain rights of final appeal to the King in Council. The Commonwealth Court of Conciliation and Arbitration consists of a Chief Judge and two other Judges.

### Finance.

Actual revenue and expenditure for 1927-28 to 1930-31 are given in the following table. Under the 'Surplus Revenue Act, 1910,' the amount payable by the Commonwealth to each State was a sum equivalent to 25 shillings per head of the population as estimated by the Commonwealth Statistician at 31st December in each year. In 1927 the States Grants Act abolished the *per capita* payments as from 30th June, 1927. In 1929 in accordance with a Commonwealth Referendum, the Commonwealth took over all State Debts existing on 30th June, 1927, and will pay 7,584,912l. a year for 58 years towards the interest charges thereon, and will make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 53 years. The Commonwealth Government will arrange all future borrowing for both Commonwealth and States through a Loan council consisting of representatives of Commonwealth and State Governments.

## Defence.

### ARMY.

The principle of the defence policy of Australia from 1911 to 1929 was the universal compulsory training of a Citizen Army, but from the 1st November, 1929, the constitution of the forces on a voluntary basis was adopted. Permanent troops are maintained only in such numbers as are necessary to administer and instruct the Militia Forces. The administrative organisation consists of a central administration and 6 districts, corresponding to the 6 States. The Military Board, under the presidency of the Minister of Defence, has responsibility for control and administration. The Council of Defence, under the presidency of the Prime Minister, deals with policy and insures its continuity, and co-ordinates the requirements of the sea, air and land. The Militia Force is organised in 2 cavalry divisions and 5 infantry divisions. Each cavalry division comprises

3 cavalry brigades and divisional troops. Each cavalry brigade comprises 3 regiments. The divisional troops are comprised of 5 field artillery batteries, 2 engineer squadrons, 8 train companies, 6 field ambulances, 2 sanitary sections and 6 veterinary sections.

Each of the first 4 infantry divisions is composed of 3 infantry brigades each of 4 battalions and divisional troops, which include for each division: 9 field artillery batteries, 4 engineer companies, 3 signal companies, 4 train companies, 3 field ambulances, 1 sanitary section and 1 veterinary section. The 5th division comprises 3 mixed brigades. The garrison troops of the permanent and militia forces are organised in 6 district bases. The garrison artillery of permanent troops consists of 10 garrison and 1 field batteries. The garrison artillery of militia forces consists of 12 batteries, and there are 6 fortress companies.

There is a Senior Cadet Force for boys between the ages of 16 and 18, with an annual training of 60 hours. Enlistment in the Militia is for 3 years between the ages of 18 and 40, with annual training for 16 days, 8 at home and 8 in camp.

An arsenal has been established, which insures the supply of war needs through Australian trade. Mobilisation stores are provided.

Military education is provided at the Royal Military College, Duntroon, Sydney, from which cadets may obtain permanent commissions.

Rifle clubs receive a subsidy and a free grant of ammunition.

On March 31, 1931, the strength of the permanent force was 1,556, and of the militia forces, 29,726.

#### NAVY.

Since 1913 the Commonwealth has undertaken the obligation of fleet building, with maintenance of its own vessels. The policy of the Commonwealth is to make Australia self-defending. Having accepted the position that a fuller Imperial partnership is necessary for the future security of the Empire, and that a definite place in the Pacific has been allotted to Australia, the Government agreed in 1911 to furnish an Australian Fleet Unit, called the 'Royal Australian Navy.' The ships of the Royal Australian Navy in May, 1932, included the 10,000 ton cruisers *Australia* and *Canberra*; the older cruisers *Adelaide* (5,500 tons) and *Brisbane* (5,400 tons); the seaplane carrier *Albatross* (6,000 tons, with accommodation for 9 seaplanes); the flotilla leader *Anzac*; 5 destroyers, 4 sloops, a depot ship and a fleet oiler. Owing to financial stringency, the only sea-going ships maintained in full commission in March, 1932, were the *Australia*, *Canberra*, *Albatross*, and the destroyer *Tattoo*.

#### AIR FORCES.

There is a Royal Australian Air Force, administered by the Air Board, consisting of three Air Force members and a finance member. To this force is entrusted the air defence of Australia, the training of personnel for co-operation with the naval and military forces, and the refresher training of pilots engaging in civil aviation. The present establishment of the force includes the following units:—(a) Headquarters, Royal Australian Air Force, with representation in London; (b) a Flying Training School, (c) a stores depot, (d) two service landplane squadrons, and (e) one service amphibian flight. The Minister is represented by a representative Air Council, which includes officers of the Navy, Army, and Air Force, and the Controller of Civil Aviation. The approved establishment of the Permanent Air Force in June, 1931, was 104 officers and 788 airmen, and of the Citizen Air Force 60 officers and 290 airmen. The Air Force and Civil Aviation expenditure (excluding war services) for the year 1929–30 was 708,956*l*.

### Production.

Up to the year 1929, 765,413,665 acres, representing 40·21 per cent. of the total area of Australia, were either unoccupied or occupied by the Crown; only 6·30 per cent. had been actually alienated (120,005,827 acres); 3·33 per cent. (63,342,125 acres) was in process of alienation; and 50·16 per cent. (954,970,623 acres) was held under the various forms of leases and licences.

The value of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. The value of goods exported is generally the value in the principal markets of the Commonwealth in the usual and ordinary commercial acceptance of the term.

The Customs Tariff Act of 1921-30 provides for preference to goods produced in and shipped from the United Kingdom to Australia, and for reciprocal tariff agreements with other countries. A reciprocal customs tariff which had been in operation between Australia and the Union of South Africa since 1906 was repealed by Customs Tariff 1926. The repeal came into force on 1st July,

1926. On September 1, 1922, a reciprocal tariff agreement, modified in 1922, 1926, and 1928, came into operation between Australia and New Zealand. The agreement made with Canada in 1925 was considerably extended by the new treaty which came into operation on August 1931.

The Customs Tariff (Papua and New Guinea Preference) 1926 came into force on April 1st, 1926, and provides that imports of certain goods specified in the schedule to the Act, and being the produce of the Territory from which they were imported, shall be free of duty.

The staff employed on Government Railways numbered 102,318 persons.

Private railways in Australia, open for general traffic, 1930, 872 miles.

A trans-continental railway from north to south is under construction. The terminus of the Northern Territory line has been carried down from Mataranka to Birdum (316 miles from Darwin), while the existing line from Port Augusta to Oodnadatta has been extended as far north as Alice Springs.

In Victoria a scheme for the electrification of the railways in the Metropolitan area has been carried out. Electric railways are also under construction in Sydney.

The State railway gauge is: In New South Wales, 4ft. 8½in. (40 miles, 3ft. 6in.); in Victoria, 5ft. 3in. (122 miles, 2ft. 6in.); in Queensland, 3ft. 6in. (30 miles, 2ft. 0in.); in South Australia, 5ft. 3in. for 1,458 miles, the rest, 3ft. 6in.; in W. Australia, 3ft. 6in.; and in Tasmania, 3ft. 6in. (25 miles, 2ft. 0in.). Of the Federal lines, the gauge of the Trans-Australian and Federal Territory is 4ft. 8½in.; and that of the Oodnadatta and Northern Territory is 3ft. 6in. A commission has recommended a uniform 4ft. 8½in. gauge, and this has been accepted in principle. The unification is estimated to cost 20,851,000*l*.

The following are the particulars of the operations of the electric tramways of the several States of the Commonwealth for the year 1929-30:—

At June 30, 1930, 6,094 telephone exchanges with 395,812 lines and 520,169 instruments connected were in operation.

During the year 1929-30, 128,916 flights, of a total duration of 42,963 hours, were carried out by civil aircraft, 3,234,307 miles were covered and 104,216 passengers were carried.

Subsidized aerial mail services are in active operation from Perth to

Wyndham on the west coast of Western Australia; from Brisbane to Camooweal and Cloncurry to Normanton, Queensland; from Perth to Adelaide, and from Camooweal, Queensland, to Daly Waters, North Australia. Approximately 5,697,000 passenger miles have been flown, and 31,394 paying passengers and 95,000 lbs. of letters carried. The route mileage of the existing subsidized services is 5,479, while regular unsubsidized commercial services are also in operation over 2,260 miles.

At June 30, 1930, 656,314 motor vehicles, including 466,930 motor cars, 84,897 motor cycles, and 104,487 commercial vehicles were registered in Australia. The Revenue derived from Registration fees and Motor Tax was 4,524,898*l.* for the year. The registrations were equivalent to 101·9 vehicles per 1,000 of population.

Wireless telegraphy stations are in operation in all the State Capitals, and in certain other places. 311,648 wireless Broadcast Listeners' licences had been issued at June 30, 1930, and 331,128 at June 30, 1931. The National Broadcasting Service controlled by the Postmaster-General's Department now operates eight broadcasting stations. In addition thirty-nine other stations were licensed at 30th June, 1931. Two beam stations have been erected, one for direct communication with London, and the other for direct communication with Canada, United States, and Mexico; direct beam wireless service with London was established on April 8, 1927, and with Canada, etc., on June 16, 1928.

### Money and Credit.

On January 20, 1913, the Commonwealth Bank was opened at Sydney. Average deposits for June 1931 quarter (General Bank) were 23,211,604*l.*, of which 8,425,860*l.* represented non-interest bearing deposits. The deposits of the savings bank which was created a separate department on 9th June, 1928, aggregated 49,473,661*l.* at June 30, 1931. The bank started without capital, and began to make profits in 1913-14. At June, 1930, the capital was 4,000,000*l.*, which was transferred from the reserve and redemption funds. Aggregate net profits to June 30, 1930, amounted to 8,336,125*l.*, and the Reserve Fund to 868,808*l.*

There are, besides, 20 private banks trading in Australia. Their paid-up capital on June 30, 1931, was 66,855,564*l.*, and the amount of reserved profits, 52,857,447*l.*

The total liabilities of cheque-paying Banks trading in the Commonwealth, in the quarter ended June 30, 1931, were 338,444,936*l.*, and the deposits, excluding Savings Bank deposits in the Commonwealth Bank were 301,687,858*l.* Assets amounted to 412,873,093*l.*, of which advances totalled 276,584,784*l.* and Government and Municipal securities 62,651,713*l.*

The total number of accounts open in the Savings Banks in the Commonwealth on June 30, 1931, was 5,150,662, and the amount on deposit, 193,375,397*l.*

There are 2 mints in the Commonwealth, at Melbourne (opened 1872), and Perth (1899). Besides issuing gold coin (sovereigns and half-sovereigns) they also issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export. Since 1916 silver and bronze coins have been minted at the Sydney and Melbourne Mints on behalf of the Commonwealth Treasury. The Sydney Mint was closed at the end of 1926.

The gold issues during 1930 are shown in the following table :—

Mint	Coin			Bullion	Total
	Sovereigns	Half-Sovereigns	Total		
Melbourne . . .	£ 77,547	—	£ 77,547	£ 461,325	£ 538,872
Perth . . .	1,915,352	—	1,915,352	2,462	1,917,814
Total . . .	1,992,899	—	1,992,899	463,787	2,456,686

Silver coinage to the value of 61,200*l.*, and bronze to the value of 5,330*l.*, were issued during the year ended June 30, 1930. The total issues of coin and bullion to the end of 1930 were 402,966,649*l.* and 32,278,900*l.* respectively.

On June 30, 1931, notes issued by the Commonwealth and unredeemed amounted to 50,653,426*l.* The amount of gold held in reserve on that date was 15,226,530*l.*, representing 30·06 per cent. of the liability. Bank notes ceased to circulate after 1911.

NORFOLK ISLAND, 29° S. latitude, 168° E. longitude, area 18 square miles, population (June 30, 1930) 942 (517 males and 425 females). The island was formerly part of the Colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856, and under an Order-in-Council of 1900 was governed by the Governor of New South Wales; but from July 1, 1914, the affairs of the island have been administered by the Commonwealth Government. The island, which is very picturesque and possesses a delightful climate, coupled with a fertile soil, is especially suitable for the cultivation of citrus fruits, bananas, and coffee. In 1929-30 the imports (mostly from the Commonwealth) were valued at 46,776*l.*, and the exports, 32,255*l.*

## NEW SOUTH WALES.

### Constitution and Government.

New South Wales became a British Possession in 1788; a partially elective Legislative Council was established in 1843, and responsible government in 1856. New South Wales federated with the other Australian States to form the Commonwealth of Australia in 1901. The legislative power of the State is vested in a Parliament of two Houses, the Legislative Council

and the Legislative Assembly. The Legislative Council consists of not less than twenty-one members (86 in August, 1931), appointed by the Crown for life. Members travel free on the State railways and tramways. The President receives an annual salary of 1,020*l.*, and the Chairman of Committees, 595*l.* The Legislative Assembly has 90 members, to which number 25 members were added in November, 1931. On December 4, 1930, a preliminary Bill for the abolition of the Legislative Council was passed, but on December 23, 1930, the New South Wales Supreme Court ruled that the Bill cannot be presented to the Governor for the Royal Assent without a referendum. The High Court on March 16, 1931, supported this view, but an appeal to the Privy Council is pending. Postal voting is permissible. Every man or woman, being a natural born or naturalised British subject above 21 years of age, having resided six months in the Commonwealth, three months in the State, and one month in the electorate, is qualified to be enrolled as an elector, and enrolment is compulsory. Members of the Legislative Assembly are paid an annual salary at the rate of 743*l.* 15*s.* per annum, and they are allowed to travel free on Government railways and tramways in the State. The leader of the Opposition receives an additional allowance of 250*l.* per annum. The duration of a Parliament is not more than three years. The Women's Legal Status Act, 1918, gives women the same political rights as men.

As from August 7, 1931, all salaries and allowances shown above have been reduced, for a period of twelve months, under the Public Service Salaries Act (No. 2), 1931, by an amount arrived at by deducting sums ranging from 15 per cent. on the portion of salary below 200*l.* to 32½ per cent. on that portion of salary which exceeds 1,500*l.*

The Legislative Assembly, elected in October, 1930, consists of the following Parties: Labour, 55; Nationalists, 22; Country Party, 13.

The executive is in the hands of a Governor, appointed by the Imperial Government.

*Governor.*—Air Vice-Marshal Sir Philip Woolcott *Game*, G.B.E., K.C.B., D.S.O. (Appointed January, 1930.)

*Lieut.-Governor.*—The Honourable Sir Philip Whistler *Street*, K.C.M.G.

In the exercise of the executive the Governor is advised by a Cabinet consisting of the following members (June 17, 1931):—

*Premier and Colonial Treasurer.*—The Hon. J. T. *Lang*, M.L.A.

*Secretary for Mines and Minister for Labour and Industry.*—The Hon. J. M. *Baddeley*, M.L.A.

*Attorney-General.*—The Hon. Joseph *Lamaro*, M.L.A.

*Minister for Agriculture and Minister for Forests.*—The Hon. W. F. *Dunn*, M.L.A.

*Colonial Secretary.*—The Hon. M. *Gosling*, M.L.A.

*Minister for Education.*—The Hon. W. *Davies*, M.L.A.

*Secretary for Lands.*—The Hon. J. M. *Tully*, M.L.A.

*Minister of Justice.*—The Hon. W. J. *McKell*, M.L.A.

*Secretary for Public Works.*—The Hon. M. A. *Davidson*, M.L.A.

*Minister for Health.*—The Hon. W. T. *Ely*, M.L.A.

*Minister for Local Government.*—The Hon. J. *McGirr*, M.L.A.

*Vice-President of the Executive Council.*—The Hon. J. M. *Concannon*, M.L.C.

*Agent-General in London.*—The Hon. A. C. *Willis* (appointed March 9, 1931); Australia House, Strand, London, W.C. 2

#### LOCAL GOVERNMENT.

A system of Local Government extends over the whole of the State, except the Western Land Division, where, however, seven municipalities

are incorporated. There are 181 boroughs and municipal districts under the title of municipalities, and in addition 138 corporate bodies called shires. The central Government of the State affords financial assistance to the municipalities and shires in the form of endowment or of grants for special purposes, *e.g.* road-making. The total Government Assistance in 1929 was for Municipalities 430,834*l.*, and for Shires 1,743,780*l.*

### Area and Population.

The area of New South Wales, inclusive of Lord Howe Island, but exclusive of the Federal Capital Territory (912 sq. miles at Canberra and 28 at Jervis Bay), is 309,432 square miles.

The population (including aboriginals) at six consecutive censuses was :—

Year	Males	Females	Total	Pop. per square mile	Average increase per cent. per annum.
1871	275,551	228,430	503,981	1·61	3·69
1881	411,149	340,319	751,468	2·41	4·08
1891	612,562	519,672	1,132,234	3·64	4·18
1901	712,456	646,677	1,359,133	4·38	1·84
1911 <sup>1</sup>	858,850	789,896	1,648,746	5·32	1·95
1921 <sup>1</sup>	1,072,424	1,029,544	2,101,968	6·79	2·46

<sup>1</sup> Excluding Federal Capital territory (1,724 in 1911, 2,572 in 1921).

The population at March 31, 1931, was: males, 1,272,928; females, 1,233,158; total, 2,506,086.

For population according to race and also for foreigners (both as in the 1921 census), see THE STATESMAN'S YEAR BOOK for 1928, p. 357.

For occupational census returns in 1921, see THE STATESMAN'S YEAR BOOK, 1925, p. 359.

At the end of 1930 the population of Sydney,<sup>1</sup> including suburbs and shipping, was 1,253,560. The chief country municipalities, with their populations, were as follow :—Newcastle and suburbs, 104,170; Broken Hill, 22,990; Lithgow, 15,300; Cessnock, 13,930; Maitland, E. & W., 11,810; Holroyd, 14,850; Goulburn, 12,560; Katoomba, 10,020; Bathurst, 9,690; Lismore, 10,370; Wagga Wagga, 8,920; Albury, 9,320; Orange, 8,590; Wollongong, 10,130; Kurri Kurri, 6,845; Fairfield, 7,840; Tamworth, 7,690; Grafton and South Grafton, 6,950; Liverpool, 6,240; Armidale, 7,090; Dubbo, 6,180; Dundas, 5,600; Forbes, 5,120; Glen Innes, 4,680; Inverell, 5,390; Cowra, 4,490; Parkes, 5,660; Windsor, 3,360; Queanbeyan, 3,840; Illawarra, Central and North, 13,740.

The following table shows the births, deaths, and marriages for five years :

Year	Marriages	Total Births	Ex-Nuptial Births	Total Deaths	Excess of Births
1926	19,219	53,126	2,748	22,188	30,938

### Religion.

There is no established church in New South Wales, and freedom of worship is accorded to all. An Act abolishing State aid to religion was passed in 1862.

The following table shows the statistics of the religious denominations in New South Wales at the census of 1921 and of ministers of religion in 1931:—

### Education.

The State maintains a system of national education, and instruction is compulsory between the ages of 7 and 14 years. In all State schools education is free. There is a large number of private schools subject to State inspection.

There were at the end of 1930, 3,217 Government schools, classified as follows: High schools 36; public primary schools 2,010; provisional schools 606; half-time schools 48; travelling schools 1; evening continuation schools 44; correspondence schools 1; subsidised schools 468; industrial and reformatory schools 3; total 3,217 schools. During December quarter, 1930, there were 380,645 children enrolled, and an average attendance of 314,052, with 12,754 teachers. The pupils receiving kindergarten instruction at Government schools (1930) numbered 14,881. In 1930 the total Government expenditure on Public Instruction was 5,349,298*l*.

At the end of 1930 there were 748 private schools (with 93,034 pupils and 4,732 teachers), of which 528 were Roman Catholic. Denominational

Schools, having 3,184 teachers and 76,824 scholars. The Church of England Denominational Schools numbered 62 with 575 teachers and 6,131 scholars; other denominational schools 24, teachers 267, pupils 3,153. The undenominational private schools numbered 134, the teachers 706, and scholars 6,926.

The University of Sydney, founded in 1850, had (1930) 2,824 individual students (including 776 women) with 295 professors, lecturers and demonstrators. There are 4 denominational colleges, Church of England, Roman Catholic, Presbyterian, and Methodist, and 2 colleges for women, affiliated to the University. The Technical College, with branch schools, had a total enrolment of 34,776 in 1930.

### Widows' Pensions and Family Allowances.

For particulars of old age and invalidity pensions see under *Australia*. The numbers current in New South Wales on June 30, 1930, were: old age, 58,438 (Males, 25,651; Females, 32,787); invalidity and accident, 25,740 (Males, 11,361; Females, 14,379).

The Widows Pensions Act of New South Wales, 1925-29, provides for pensions to widows with dependent children under fourteen years of age, also to other widows in special cases. The maximum pension is 1*l.* per week with 10*s.* for each child under 14 years. The amount of each pension is ascertained by deducting from the maximum annual amount 1*l.* for each 1*l.* by which the widow's net income exceeds 26*l.* Pensions became payable on March 10, 1926. On July 1, 1930, pensions were being paid to 4,843 widows, the amount paid during the year was 611,947*l.*

The Family Endowment Act, 1927-28, as amended by the Family Endowment (Further Amendment) Act of 1929, provides for the payment of endowment in respect of each dependent child except one under 14 years of age in cases where the 'family income,' for such continuous period of one or more quarters, not exceeding four, preceding the date of claim as shows the highest average family income, is less than the appropriate living wage (fixed by the Industrial Commission to cover the maintenance of a man, wife and one child). The Endowment, at the rate of 5*s.* per week, is payable to the mothers. A residence qualification of two years in New South Wales is prescribed in respect of the mothers and of the children except when a child is under 2 years and was born in the State. During the year 1929-30 the claims numbered 49,491 and at the 30th June, 1930, endowment was payable to about 37,000 families. The amount of endowment paid during the year was 1,261,202*l.*, as compared with 1,553,986*l.* in 1928-29. State relief is also given to neglected and destitute children.

### Justice and Crime.

In New South Wales legal processes may be grouped within the Lower or Magistrates Courts, or the Higher Courts presided over by Judges. There is also an appellate jurisdiction. Prisoners charged with capital crimes must be tried before the Supreme Court.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. Fair Rents Courts were established in 1916, their function being the determination of the fair rental of small dwellings and retail shops. There are also a number of tribunals exercising special jurisdiction, *e.g.* the Industrial Commission, the Workers' Compensation Commission.

In 1930 there were 102,670 convictions before magistrates at Courts of

Petty Sessions and Children's Courts and 1,034 distinct persons were convicted at the Higher Courts. On June 30, 1930, there were 1,843 convicted prisoners in gaol.

### Finance.

<sup>4</sup> Excluding Family Endowment Tax 1,018,429*l.* and Wages Tax 4,375,803*l.*

From 1910 to 1927 the State received from the Commonwealth an annual payment at the rate of 25*s.* per head of population. This arrangement has been replaced by an agreement between the States and the Commonwealth which provides for the transfer to the Commonwealth of the debts of the States, annual contributions by the Commonwealth towards the payment of interest on such debts, the establishment of sinking funds in respect of these debts and new loans, and joint borrowing and management of loans through an Australian Loan Council. The scheme was brought into operation as a whole as from July 1, 1927. The continuance of the provisions as to payment of interest, sinking funds and transferred properties was contingent upon the amendment of the constitution to permit the Federal Parliament to validate the agreement. The amendment was approved by a majority of the electors in all states on November 17, 1928.

The following table shows the net expenditure exclusive of expenditure from loans (cf. note at the foot of the last table):—

The amount of the net Public Debt on June 30, 1930, was 270,908,044*l.* (exclusive of Floating Debt on Loan Account and Closer Settlement Debentures, &c., 5,301,368*l.*), with mean rate of interest 4·9 per cent. Of this

amount about 88 per cent. has been spent on reproductive works. There is a general sinking fund as well as sinking funds in respect of specific loans. The total credits to the sinking fund amounted to 1,192,575*l* in 1929-30. The moneys have been applied in purchasing or paying off stock, debentures, &c., or in temporary investment in approved securities. The credit balances amounted to 145,739*l*. at June 30, 1930.

## Production and Industry.

### I. LAND SETTLEMENT.

The total area of land alienated or in process of alienation from the Crown on June 30, 1930, was 67,509,292 acres, exclusive of Federal Capital Territory. The total area of land neither alienated nor in process of alienation was 130,527,208 acres.

### II. AGRICULTURE.

In 1929-30 there were 5,499,403 acres under crops (exclusive of areas double cropped).

The area under cultivation in New South Wales during four years and the principal crops produced were as follows:—

The area sown for wheat during the season 1930-31 was 5,664,600 acres, of which 5,123,100 acres were for grain, 519,900 were reaped for 670,750 tons of hay, while 21,600 acres were fed off. The estimated total yield of wheat grain was 65,811,000 bushels.

In 1930 the area planted with cane-sugar was 15,425 acres, production, 174,110 tons; grapes, total area, 15,589 acres, wines, 1,933,709 gallons.

The principal fruit-culture of the State is that of the orange. There

were in June, 1930, 34,010 acres under citrus fruit, with a production of 2,541,681 bushels. The total area under fruits was 77,532 acres, and the total production was 5,125,624 bushels. During 1929-30 the production of bananas was 117,120 cases from an area of 3,340 acres. The total production of dried fruits during 1929-30 was 14,335,051 lbs.

At June 30, 1930, the State had approximately 48,720,000 sheep and lambs, 2,686,132 cattle, 534,945 horses, and 323,499 swine. The production of wool in the year 1929-30 was 459,970,000 lbs. (greasy), and in 1930-31, according to a preliminary estimate, was 430,000,000 lbs. (greasy). In the year ended June 30, 1930, production of butter was 105,022,384 lbs.; cheese, 6,345,785 lbs.; bacon and ham, 21,616,472 lbs.

There were 126,271 persons engaged permanently in rural holdings during the year ended June 30, 1930.

The estimated forest area is 11,000,000 acres. The total area of State forests amounts to 5,258,290 acres, and 1,543,235 acres have been set apart tentatively as timber reserves. The revenue from royalties, licences, &c., amounted in the year ended June 30, 1930, to 128,795*l*. There were 433 saw-mills in the year ended 30th June, 1930, the employees numbering 3,896; the value of plant and machinery was 754,574*l*., and land and buildings 933,092*l*. The estimated value of production from Forestry in 1929-30 was 1,496,000*l*.

### III. MINES AND MINERALS.

The aggregate value of all minerals won in N.S.W. to the end of 1930 was 452,251,740*l*. The following table gives details for the year 1930:—

Mineral	Quantity 1930	Value 1930	Total value to end of 1930

The estimated value of production from the primary and manufacturing industries in 1929-30 was as follows: Pastoral, 23,511,000L.; agriculture, 15,438,000L.; dairying and farmyard, 14,796,000L.; forests, fisheries, and trapping, 4,131,000L.; mining (excluding the output of quarries 945,060L.), 7,499,000L.; total primary, 70,375,000L.; manufacturing, 66,848,000L.; total, 137,223,000L.

### Commerce and Communications.

The external commerce of New South Wales, exclusive of Inter-State trade, is included in the Statement of the Commerce of the Commonwealth. The external commerce of the State is given in the following table:—

Year ended June 30	Imports Oversea	Exports Oversea		
		Australian Produce	Other Produce	Total
	£	£	£	£
1927	68,946,777	60,407,279	2,407,797	62,815,076
1928	65,072,266	49,493,820	2,389,100	51,882,929

1931	26,288,111	20,908,599	1,467,763	31,876,862

The chief exports are wool, wool tops, butter, wheat, flour, fruits, sugar, tobacco, timber, meats (frozen and preserved), hides and skins, tallow, leather, pig-lead, tin, copper, coal, and gold.

Of the total value of trade of New South Wales in 1930-31, an amount of 9,555,107L. was imported from Great Britain and Northern Ireland and 10,546,323L. exported thereto.

The vessels engaged in the interstate and overseas trade which entered the ports of New South Wales in 1930-31 numbered 2,711, net tonnage

8,215,327 tons; the clearances were 2,667 vessels, 8,187,963 tons. Of the total net tonnage for the year 1929–30, 28·4 per cent. was owned in Australia, nearly 46 in Great Britain, 5·4 per cent. elsewhere in the Empire, and 20·2 per cent. was foreign. Sydney Harbour is the principal port of Australia. The number of vessels, coastal, inter-State, and oversea, which entered in 1930–31 was 5,982, and the net tonnage 8,468,282.

On March 31, 1931, 6,044 miles of Government railway were open; the capital expended on lines open was 126,318,236*l.*; the revenue for 1929–30 was 17,826,692*l.*; the expenditure, 14,962,423*l.*; the number of passengers carried, 147,892,548. There are 7 private railways having a total mileage of 112 miles (mainly colliery lines). All tramways are the property of the Government. There were, on June 30, 1930, 211 miles of tramways open for traffic, the capital cost being 11,764,974*l.* The gross earnings for 1929–30 were 3,903,470*l.*; the working expenses, 3,625,564*l.*

The number of registered motor vehicles on August 31, 1931, was 218,344, including 24,770 motor cycles and 40,749 vans and lorries. At August 31, 1931, there were 637 motor omnibuses registered in the Metropolitan Traffic area, which in many cases operated in competition with the tramways. The value of the omnibuses, plant and equipment at June 30, 1930, was 618,035*l.*, the total revenue 1,540,455*l.*, total expenditure including depreciation 1,398,120*l.*, and the number of passengers carried 94,481,982.

## VICTORIA.

### Constitution and Government.

Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective Legislative Council, and in 1855 responsible self-government was conferred. The legislative authority is vested in a Parliament of two Chambers. The Upper House consists of 34 members, elected for six years, and the Lower of 65, elected for three years (unless sooner dissolved). Members of the Council must be in possession of an estate of the net annual value of 50*l.* for one year prior to their election; and electors must be in the possession or occupancy of property of the rateable value of 10*l.* per annum if derived from freehold, or of 15*l.* if derived from leasehold or the occupation of rented property. No electoral property qualification is required for graduates of British or Colonial universities, matriculated students of the Melbourne University, ministers of religion of any denomination, certificated teachers, lawyers, medical practitioners, and officers of the army and navy active and retired. One-half of the members of the Legislative Council retire every three years. The members of the Legislative Assembly require no property qualification, and are elected by universal male and (since 1908) female suffrage, and no person may vote in more than one district, nor twice in the same district. Clergymen of any religious denomination are not allowed to hold seats in either the Legislative Council or the Legislative Assembly.

Members of the Legislative Assembly are entitled to reimbursement for expenses at the rate of 500*l.* per annum, and members of the Legislative Council at the rate of 200*l.* per annum. Members of both Houses have free passes over all the railways.

The Legislative Assembly, elected on November 30, 1929, consists of the following parties:—Labour, 30; United Australia Party, 19; Liberals, 1; United Country Party, 13; Independents, 2. Total, 65.

Governor (Temporary).—Hon. Sir William H. Irvine, K.C.M.G.

In the exercise of the executive the Governor is assisted by a Cabinet of responsible ministers.

The Ministry (appointed December 12, 1929) is as follows:—

*Premier, Treasurer and Minister of Markets.*—Hon. E. J. Hogan, M.L.A.

*Chief Secretary.*—Hon. Thomas Tunnecliffe, M.L.A.

*Minister of Education and Labour.*—Hon. John Lemmon, M.L.A.

*Attorney-General, Solicitor-General and Minister of Agriculture.*—Hon. William Slater, M.L.A.

*Minister of Lands and Water Supply.*—Hon. H. S. Bailey, M.L.A.

*Minister of Railways and Minister in Charge of Electrical Undertakings.*—Hon. John Cain, M.L.A.

*Minister of Public Works, Mines and Immigration.*—Hon. J. P. Jones, M.L.C.

*Minister of Forests and Minister of Health.*—Hon. Robert Williams, M.L.C.

*Ministers without Portfolio.*—Hon. G. C. Webber, M.L.A., Hon. R. T. Pollard, M.L.A., Hon. D. L. McNamara, M.L.C., and Hon. E. L. Keirnan, M.L.C.

The number of salaried ministers is limited to eight, and their total salaries to 10,000*l*. At least four of the Ministers must be members of either the Legislative Council or the Assembly, but not more than two shall be members of the Council, nor more than six be members of the Assembly.

*Agent-General for Victoria in Great Britain.*—W. Leitch, C.B.E. Offices: Melbourne Place, Strand, W.C. 2.

#### LOCAL GOVERNMENT.

The State is divided into urban and rural municipal districts. The basis of the constitution of the former, called cities, towns, and boroughs, is statutory requirements in respect of area, the number of inhabitant householders and annual value of rateable property; and of the latter, called shires, and not limited in area by statute, rateable property capable of yielding upon a rate not exceeding one shilling in the *l*. on the annual value thereof, a sum of 1,500*l*. In 1930 there were 56 urban and 140 rural municipalities, in the State.

#### Area and Population.

The State has an area of 87,884 square miles, or 56,245,760 acres, about  $\frac{1}{11}$  part of the whole area of Australia. The State is divided into 37 counties, varying in area from 920 to 5,933 square miles.

The growth of the population, as shown by census returns, is exhibited in the following table:—

Date of Enumeration	Males	Females	Total	Annual rate of increase per cent.
March 29, 1857 . . .	264,334	146,432	410,766	—
April 7, 1861 . . .	328,651	211,671	540,322	7·88
April 2, 1871 . . .	401,050	330,478	731,528	3·07
April 3, 1881 . . .	452,083	410,263	862,346	1·65
April 5, 1891 . . .	598,414	541,991	1,140,405	2·83
March 31, 1901 . . .	603,883	597,458	1,201,341	0·48
April 2, 1911 . . .	655,694	660,053	1,315,747	0·91
April 4, 1921 . . .	754,724	776,556	1,531,280	1·54

The estimated population at December 31, 1930, was 1,790,817 (886,662 males, 904,155 females); and on June 30, 1931, was 1,797,459.

The average density of the population is 20 persons to the square mile, or one person to every 32 acres.

The population in 1921 included 4,179 Chinese and 586 aborigines; in 1911, 5,601 Chinese and 643 aborigines.

At the date of the census of 1921, the Australian-born numbered 1,330,136, or 87 per cent. of the population; natives of New Zealand, 11,210; of British Isles, 161,117; of Germany, 3,693; of other countries, 20,171; 1,111 were born at sea and the birthplaces of 3,842 were unspecified.

For occupational census, 1921, see THE STATESMAN'S YEAR BOOK for 1925, p. 369.

Inclusive of the suburbs the estimated population on December 31, 1930, of Melbourne was 1,032,500, or considerably more than half of that of the State; the other cities are Geelong, 43,400; Ballarat, 42,050; Bendigo, 33,690; and Warrnambool, 8,100; and the principal towns are Castlemaine, 7,170; Wonthaggi, 7,000; Mildura, 6,000; Shepparton, 5,500; Hamilton, 5,300; and Ararat, 5,300.

The following are the births, deaths, and marriages in the State for five years :—

Year	Marriages	Total Births	Illegitimate	Deaths	Surplus of Births
1926	13,405	35,362	1,595	16,355	19,007
1927	13,608	35,074	1,556	16,773	18,301
1928	13,186	34,498	1,625	17,708	16,790
1929	12,935	33,604	1,461	16,717	16,887
1930	11,641	33,127	1,480	15,959	17,168

The annual rates per 1,000 of the population in 1930 were as follows: marriages, 6·52; births, 18·56; deaths, 8·94; infantile deaths, 46·52 per 1,000 births.

The recorded immigration into and emigration from the State of Victoria by sea were as follow in recent years :—

Year	Immigration (by sea)	Emigration (by sea)	Year	Immigration (by sea)	Emigration (by sea)
1925	77,487	64,276	1928	78,153	72,068
1926	88,026	73,799	1929	74,936	74,709
1927	90,388	77,079	1930	67,218	69,594

Of the immigrants in 1930, 32,547 were females, and of the emigrants 33,054 were females.

### Religion.

There is no State Church in Victoria, and no State assistance has been given to religion since 1875. At the date of the census of 1921 77 per cent. of the population were Protestants, 21 per cent. were Roman Catholics, and a half per cent. were Jews. The following were the enumerated numbers of each of the principal religions in 1921:—Episcopalians 620,445 (including 'Protestant,' so stated, 18,636); Presbyterians, 257,072; Methodists, 183,829; other Protestants, 100,097; Roman Catholics, 322,565; Jews, 7,677; Buddhists, Confucians, &c., 1,367; others (including unspecified), 88,228.

### Education.

Educational establishments in Victoria are of four kinds, viz., the University, established under a special Act and opened in 1855, with its four affiliated colleges, State schools (primary and secondary), technical schools or colleges, and registered schools.

Affiliated to the University are four colleges—Trinity, Ormond, Queen's and Newman—in connection with the Church of England, Presbyterian, Methodist and Roman Catholic Churches respectively. In 1930 the students who matriculated numbered 678, the direct graduates numbered 456, and there were 3,040 students attending lectures.

Public instruction is strictly secular; it is compulsory for children between the ages of 6 and 14, and is free. In 1929 there were 2,601 State schools with 8,070 teachers, a total enrolment of 258,872 scholars, and an average attendance of 180,274, or 69 per cent. of the numbers on the roll. Amongst persons aged 15 years and upwards at the census of 1921, about 98 per cent. were able to read and write. In 1928-29 the total cost of public instruction, including grants to the University, was 3,296,983*l.* (exclusive of interest on loans)—all paid by the State. Secondary education is for the most part under the control either of private persons or proprietary bodies, usually connected with some religious denomination. There were, in 1929, 501 registered schools in Victoria, with 2,249 teachers, and a net enrolment of 65,418 scholars. A large proportion of these were in connection with the Roman Catholic denomination, the members of which do not as a rule avail themselves of the free education afforded by the State.

Under the auspices of the Education Department are 29 technical schools, 26 junior technical schools, 36 high schools (including agricultural high schools), 47 higher elementary schools, and 12 schools of domestic arts. In 1929 there were 932 teachers attached to the technical schools, irrespective of agricultural and horticultural colleges, the gross enrolment of pupils at senior technical schools being 18,182. The attendance at junior technical schools numbered 5,945 in 1929.

### Pensions, &c.

On July 1, 1909, the Federal Old Age Pensions Act came into operation, and the State pensioners were taken over by the Federal authorities. The number in Victoria on June 30, 1931, was 49,999. Pensions are also granted to invalids, 19,925 being on the register on June 30, 1931. The amount paid in old age and invalid pensions during 1930-31 was 3,321,037*l.*

The number of war pensions in force in Victoria on June 30, 1931, was 96,202 and the annual liability of the Commonwealth Government in connexion therewith was 2,338,076*l.*

An Act was passed by the Commonwealth Parliament in October, 1912, providing for the payment, on application, of a maternity allowance of 5*l.* to the mother of every child born in the Commonwealth, no additional sum to be paid for twins. During the year ended June 30, 1931, the allowance was granted to 32,241 mothers in the State of Victoria.

Under the provisions of the Commonwealth Financial Emergency Act 1931, old age and invalid pensions have been reduced by 12½ per cent., and certain war pensions by 22½ per cent., whilst the amount of maternity allowance has been reduced to 4*l.*, and is not payable unless the total income of the claimant and her husband for the twelve months preceding the date of the birth did not exceed 260*l.*

## Justice and Crime.

There is a Supreme Court with a Chief Justice and six puisne judges. There are courts of general and petty sessions, county courts, courts of insolvency, courts of mines, and courts of licensing.

The following are the criminal statistics for 1930 :—Arrested, 17,295 ; summarily convicted, 12,511 ; committed for trial, 885 ; and sentenced after committed, 683.

There are 6 gaols and 6 reformatory prisons in Victoria, besides 3 police gaols. At the end of 1930 there were confined in these prisons and police gaols 1,325 males and 43 females.

## Finance.

The revenue and expenditure of the State in the years shown were :—

Year ended June 30	Revenue	Expenditure	Year ended June 30	Revenue	Expenditure
	£	£		£	£
1926	25,269,756	25,559,583	1929	28,156,034	28,104,947
1927	27,128,700	27,744,903	1930	27,823,842	28,496,712
1928	27,857,917	27,521,270	1931	25,575,504	28,029,702

In 1930-31 the principal items of revenue were from State taxes (including motor car taxes), which amounted to 8,056,615*l.*, and from railways, 9,698,720*l.* ; among the principal heads of expenditure were 7,349,989*l.* on the railways, and 2,821,612*l.* on education.

The amount raised by taxation (exclusive of taxes collected by Commonwealth) as shown in the above table, viz. 8,056,615*l.*, was equivalent to a proportion of 4*l.* 10*s.* per head of population.

On June 30, 1931, Victoria had a debt of 167,020,518*l.*, including 2,100,000*l.* incurred to meet deficiency in revenue, 164,920,518*l.* was raised for the construction of public works. Of this amount 74,049,433*l.* was borrowed for the construction of railways ; 24,345,125*l.* for waterworks ; 24,982,320*l.* for discharged soldiers' settlement ; 10,011,816*l.* for closer settlement ; 9,461,948*l.* for country roads ; 17,188,492*l.* for electricity supply ; and 4,881,384*l.* for other public works and purposes.

The estimated total value of the rateable property of the State in 1930-31 amounted to 679,539,071*l.*, and the annual value was 36,032,913*l.*

## Production and Industry.

### I. AGRICULTURE.

Of the total area of Victoria about 33,457,677 acres at the end of 1929 were either alienated or in process of alienation. Of the remainder about 4,488,423 acres are at present suitable for agriculture ; 6,551,125 acres for pastoral purposes ; 91,018 acres are held under perpetual lease ; 53,524 acres are held under other leases ; State forests, timber, water, and other reserves, 5,915,653 acres ; auriferous land, 465,555 acres ; roads, 1,794,218 acres ; and unsold land in towns, &c., 3,428,567 acres.

The total number of holdings in 1929-30 was 74,161.

The following table shows the areas under the principal crops and the produce of each for five years :—

Years ended March 31	Total Area Cultivated	Wheat		Oats		Barley		Potatoes		Hay

<sup>1</sup> Extracted from gold at Melbourne Mint.

The total quantity of gold raised from 1851 to 1930 is estimated at 71,427,261 oz. (fine). About 2,220 persons were employed in coal-mining. Total mineral production, 1930, 1,683,285*l.*, compared with 1,766,083*l.* in 1929.

### III. MANUFACTURES.

The total number of manufactories, works, &c., in 1929-30, was 8,195, of which 762 used steam or gas engines and 6,142 electric power; the aggregate horse-power used was 465,739; the number of hands employed was 151,009; and the lands, buildings, machinery and plant were valued at 72,011,020*l*. The value of materials used was 66,770,302*l*., and of articles produced or work done, 122,811,099*l*. The wages paid amounted to 30,517,535*l*. The manufactures are almost entirely for home consumption.

### Commerce and Communications.

The commerce of Victoria, exclusive of inter-State trade, is included in the statement of the commerce of the Commonwealth of Australia.

The total value of the imports and exports of Victoria, excluding inter-State trade, in six years, was :—

Years	Total Imports (Oversea)	Total Exports (Oversea)	Years	Total Imports (Oversea)	Total Exports (Oversea)
	£	£		£	£

## QUEENSLAND.

### Constitution and Government.

Queensland, formerly a portion of New South Wales, was formed into a separate colony in 1859, and responsible government was conferred. The power of making laws and imposing taxes is vested in a Parliament of one House—the Legislative Assembly, which comprises 72 members, returned from 72 electoral districts for three years, elected by ballot. Members of the Assembly are entitled to payment of 500*l.* per annum, with travelling expenses, and an allowance for stationery and postage. At the General Election of May, 1929, there were 509,999 persons registered as qualified to vote under the 'Electors Act Amendment Act of 1914.' This provides for male and female adult franchise, a twelve months' continuous residence in the State being the only proviso.

Prior to 1922 there was also a Legislative Council, but this has been abolished.

The Legislative Assembly, elected in May, 1929, is composed of the following parties: Ministerialists (National and Country Progressive), 44; Independent, 2; Labour Party, 26.

*Governor of Queensland.*—Lt.-Gen. Sir T. H. J. C. Goodwin, K.C.B., C.M.G., D.S.O., F.R.C.S. (appointed February, 1927). (Salary, 3,000*l.*)

The Executive Council of Ministers consists (1931) of the following members:—

*Premier, Chief Secretary and Vice-President of the Executive Council.*—Hon. A. E. Moore.

*Secretary for Public Instruction and Works.*—Hon. R. M. King.

*Treasurer.*—Hon. W. H. Barnes.

*Home Secretary.*—Hon. J. C. Peterson.

*Attorney-General.*—Hon. N. F. MacGroarty.

*Secretary for Public Lands.*—Hon. W. A. Deacon.

*Secretary for Agriculture and Stock.*—Hon. H. F. Walker.

*Secretary for Railways.*—Hon. G. Morgan.

*Minister for Labour and Industry.*—Hon. H. E. Sizer.

*Secretary for Mines.*—Hon. E. A. Atherton.

Each Minister has a salary of 1,000*l.*; the Vice-President of the Executive Council receives 300*l.* in addition.

*Acting Agent-General for Queensland in Great Britain.*—L. H. Pike. (Salary, 1,500*l.*) Office.—409 Strand, London. Acting Secretary, T. J. Whittington.

Provision is made for Local Government by the subdivision of the State into areas denominated respectively cities, towns and shires. These are under the management of aldermen and councillors, who are elected by the Parliamentary electors and are charged with the control of all matters of a parochial nature, more especially the construction and maintenance of roads and bridges within their allotted areas. Shires for the most part consist of purely rural districts.

The number and area of these subdivisions, together with the receipts and expenditure for the year 1930, were :—

	No.	Area in square miles	Receipts £	Expenditure £	Rateable Values. £
City of Brisbane	1	885	2,006,514	2,125,966	22,947,610

### Area and Population.

Queensland comprises the whole north-eastern portion of the Australian continent, including the adjacent islands in the Pacific Ocean and in the Gulf of Carpentaria. Estimated area 670,500 English square miles, with a seaboard of 2,250 miles. In 1825 a branch penal settlement was made at Moreton Bay; in 1842 free settlers were admitted to the country, and during the next twenty years great progress was apparent.

The increase in the population at different periods since 1846 has been as follows :—

Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum
1846	2,257	—	1871	120,104	6·74	1901	498,129	2·78
1856	18,544	72·16	1876	173,283	8·85	1911	605,818	2·16
1861	80,059	17·06	1881	213,525	4·64	1928 <sup>1</sup>	916,689	2·74
1864	61,467	84·83	1886	322,853	10·24	1929 <sup>1</sup>	980,871	1·55

<sup>1</sup> Estimated at 31st Dec.

At the census of April, 1921, the population consisted of 398,969 males, and 357,003 females. The estimated population on June 30, 1931, was 959,572 (509,093 males, 450,479 females). In 1921 there were 3,502 male and 80 female Chinese; 873 male and 142 female 'Polynesians'; 1,036 male and 43 female Japanese; 2,080 persons of other Asiatic, &c., races. The total number of aborigines according to the census June 30, 1930, was 14,042 full-bloods, and 3,889 half-castes.

For occupational census, 1921, see THE STATESMAN'S YEAR BOOK, 1928, p. 374.

Of the total population, 1921, 592,295 persons (exclusive of aborigines) were born in Australia; 128,082 in the British Isles; 148,163 in Europe; 6,741 in Asia; 740 in Africa; 1,764 in America; 1,015 in Polynesia.

The following table shows the births, deaths, and marriages for five years:—

Years	Total Births	Illegitimate	Deaths	Marriages	Excess of Births
1926	19,765	994	8,215	6,428	11,550
1927	19,830	1,041	8,079	6,278	11,751

1929	18,487	942	8,308	6,169	10,179
1930	18,939	952	7,455	6,199	11,484

The immigration and emigration, including arrivals and departures by sea and by rail across the border:—Immigration, 1928, 68,894; 1929, 63,829; 1930, 58,008. Emigration, 1928, 63,188; 1929, 61,658; 1930, 53,995.

Brisbane, the capital, with an area of 385 square miles, had in 1930 a population of 313,251. The estimated population of the chief towns at the same date was: Rockhampton, 30,000; Townsville, 31,800; Maryborough, 12,000; Gympie, 9,588; Ipswich, 26,233; Toowoomba, 26,145; Charters Towers, 9,200; Bundaberg, 11,250; Mt. Morgan, 4,000; Cairns, 9,750; Warwick, 7,000; Mackay, 9,230.

### Religion.

There is no State Church. Previous to 1861 valuable grants of land had been made to the principal religious denominations, which they still retain. The following were the numbers in 1921:—Church of England, 309,786; Church of Rome, 172,662; Presbyterian, 91,610; Methodist, 77,566; Lutheran, 17,891; Baptist, 14,735; other Christian sects, 44,132; Hebrew, 1,003; other non-Christians, 3,264; no religion, 3,926; unspecified, &c., 19,897.

### Education.

Primary secular education is free and compulsory. According to the marriage statistics, 99·85 per cent. of persons married during 1930 were able to read and write. The Public Expenditure on account of education, science and art for the year 1930–31 was 1,608,982*l*. During the year 1930 there were 1,726 State schools (including 13 high schools and 109 provisional schools, also 18 'Rural Schools,' 5 Intermediate, one Farm Home and 2 Aboriginal schools) in operation, with 4,410 teachers, and an average daily attendance of 115,326 pupils. Secondary education is provided for by 10 grammar schools, 6 for boys and 4 for girls, with, in 1929, 110 teachers and an average attendance of 2,036 pupils; 13 'High Schools' with (1930) 118 teachers and 2,061 scholars. There were besides (1929) 195 private schools, with 1,156 teachers,

and an average daily attendance of 25,772 pupils. The Government grants annually a considerable number of scholarships (1,756 in 1930-31), tenable for two years, to the various secondary schools. There were 15 technical schools in 1930 with 12,422 enrolled students. The Queensland University (established in 1911) in Brisbane had, at the end of 1929, 14 professors, 21 full-time lecturers, and 29 other members of staff, with 666 students on the roll.

### Justice and Crime.

Justice is administered by Supreme Courts, Magistrates' Courts, and Courts of Petty Sessions. In these last Justices of the Peace sit, presided over in the more important centres by Police magistrates. The Supreme Court consists of a Chief Justice and six puisne judges. The total number of persons convicted of serious offences by the Superior Courts in 1930-31 was 198, and the summary convictions at petty sessions in the same year numbered 16,814 (including cases of bail estreated). Including penal establishments, there were, at the end of 1930, 7 prisons, with 349 male and 10 female prisoners. The total police force, including native troopers, averages about 1,293 men.

### Pauperism, Pensions, etc.

Charitable institutions and hospitals are maintained by public subscription, supplemented by State endowment; benevolent asylums, an institution for the blind, deaf, and dumb, refuges and homes are also maintained by the Government or receive State assistance. Old Age and Invalid Pensions are payable by the Commonwealth. The number of Old Age Pensioners in the State at June 30, 1931, was 22,376, and of Invalid Pensioners, 9,707. The number of War Pensioners at the same date was 29,362 (including dependants). Maternity allowance was paid to 18,790 mothers during 1930-31.

### Finance.

The following table shows the net revenue and expenditure of Queensland during five years ending June 30 :—

—	1926-27	1927-28	1928-29	1929-30	1930-31
	£	£	£	£	£
Revenue .	16,147,787	16,718,070	16,736,188	15,997,870	15,072,652
Expenditure .	16,490,954	16,707,564	16,902,145	16,721,055	15,914,696

The gross income from or expenditure on account of Departments under the control of the Commonwealth is not included.

The following were the chief sources from which revenue was received during 1930-31 :—Net amount from Commonwealth, 1,096,235*l.*; stamp duty, 970,278*l.*; income tax, 2,556,050*l.*; licences, 148,566*l.*; totalisator and betting tax, 94,016*l.*; land tax, 503,656*l.*; from land—rent, pastoral occupations, 406,332*l.*; other rents and sale of land, 785,250*l.*; from railways, 6,426,965*l.*

The chief items of expenditure during 1930-31 were as under :—Interest on public debt, 5,233,080*l.*; public instruction, 1,523,426*l.*; treasurer's department, 866,908*l.*; public lands department, 241,659*l.*; home department, 1,357,084*l.*; public works department, 135,475*l.*; department of labour and

The estimated value of landed property in 1930 for assessment for Local Government purposes was 80,526,913*l.* This includes lands leased from the Crown for agricultural and pastoral purposes, as Runs and Grazing Farms, etc., the lessees' interest in which has been capitalised for assessment purposes at 23,055,167*l.*, but is exclusive of unoccupied Crown lands, the property of local bodies, reserves for public purposes, and lands upon which are erected buildings for public worship.

The gross public debt of the State amounted, on June 30, 1931, to 112,231,189*l.*

### Defence.

For Defence, see under *Commonwealth of Australia*.

### Production and Industry.

Of the total area of the State, 18,731,295 acres (1930) have been alienated: in process of alienation, under deferred payment system, are 6,860,667, leaving 403,528,038 acres still the property of the Crown, or about 94·04 per cent. of the total area. The receipts from the sale of land up to the end of 1930 amounted to 11,553,466*l.*

A large proportion of the area is leased in squatting runs for pastoral purposes, amounting to 200,716,960 acres in 1930, besides 75,961,276 acres in grazing farms and homesteads, and 21,168,520 acres under occupation licence. Perpetual Leases, 3,901,261 acres; Prickly Pear Leases, 12,636,240. The live-stock in 1930 numbered 481,615 horses, 5,463,724 cattle, 22,542,043 sheep, and 217,528 pigs. The total area under cultivation in 1930 was 1,331,513 acres, and of this 1,144,216 acres were under crops, and 187,297 acres lying fallow, idle, etc., also 661,839 acres laid down with permanent artificial pasture. In addition, 8,406 acres were cleared and prepared for ploughing. The wool production, expressed as greasy, was in 1926-7, 119,847,967 lbs., valued at 9,423,046*l.*; 1927-8, 126,429,938 lbs., valued at 10,635,919*l.*; 1928-29, 138,988,930 lbs., valued at 9,943,500*l.*; 1929-30, 161,087,873 lbs., valued at 7,779,202*l.*

A considerable area consists of natural forest, eucalyptus, pine and cedar being the timbers mostly in demand, although a considerable quantity of more ornamental woods are utilised by cabinet makers. The amount of wood cut in the various saw mills in 1929-30 was (in superficial feet):—pine, 48,055,000; cedar, 234,947; hardwood, 32,534,505; other, mostly cabinet timber, 11,423,598; number of railway sleepers, 518,698; total value, 1,876,818*l.* This value is inclusive of planing work valued at 153,577*l.*, but not of 5,538,795 super feet of Oregon pine and Redwood (value 104,701*l.*) sawn from imported flitches. The quantity actually cut for all purposes is nearly double these quantities. The Plywood Industry is important; 21,376,034 sq. ft. of plywood were produced, the value being set down at 148,279*l.* Forest reservations total 5,330,980 acres (1930), areas for National Parks 160,611 acres.

The crops, &c., in two years were as follows:—

<sup>1</sup> Bearing area only.

1,519 acres of vines produced 5,366,062 lbs. of grapes; 3,427 acres of apples produced 217,317 bushels; 155 acres of mangoes produced 31,924 bushels; 173 acres of strawberries produced 209,413 quarts. 26,947 acres were irrigated.

Total value of all crops, 1925, 12,526,609l.; 1926, 12,181,917l.; 1927, 14,431,644l.; 1928, 12,709,041l.; 1929, 13,803,792l.; 1930, 12,782,165l.

There are several coal mines in the State, the produce of which amounted to 1,094,676 tons in 1930, valued at 952,856l. Gold-fields were discovered in 1858; and from the commencement of gold mining to the end of 1930 the production amounted to 20,134,459 fine ounces, of the value of 85,525,691l. In 1930, 7,821 ozs. of gold were produced, valued at 33,224l.; 69,808 ozs. of silver, valued at 5,527l.; copper, 2,930 tons, valued at 174,075l.; total value of all minerals, 1,263,236l.

To the end of 1930 the aggregate value of all mining amounted to 151,553,557l. The gross value of Queensland production during 1929-30 amounted to 59,687,162l., which includes Agriculture, 13,803,792l.; Dairying, Poultry and Bee-keeping, 7,618,659l.; Pastoral, 16,234,817l.; Mining, 1,889,853l.; Forestry, Fisheries and miscellaneous primary production, 2,556,204l.; manufacturing, 17,583,837l.

In the western portion of the State water is comparatively easily found by sinking artesian bores. Up to June 30, 1931, 4,756 bores were recorded as having been sunk. Total depth bored, 787·86 miles. The continuous yield of water is estimated at 281,836,070 gallons per diem from 1,424 flowing bores and supplies are pumped from 1,896 others.

### Commerce and Shipping.

The commerce of Queensland, exclusive of inter-State trade, is comprised in the Statement of the Commerce of the Commonwealth of Australia.

The total value of the oversea imports and exports of Queensland in recent years is given in the following table:—

Years	Imports	Exports <sup>1</sup>	Years	Imports	Exports <sup>1</sup>
	£	£		£	£
1925-26	13,772,854	26,384,916	1928-29	11,594,348	23,251,716

THURSDAY ISLAND (longitude 142°, latitude 11°), with an area of 900 acres, is the smallest of the Prince of Wales group of Islands. It is situated in Torres Straits, about 30 miles to the north-west of Cape York, on the northernmost point of the Queensland coast, and is some 1,430 miles by sea from Brisbane, the capital city. The island was constituted a municipality in 1912, and is part of the State of Queensland. The town of Port Kennedy is situated on the south side of the island, and is the centre of local government and the residential area for Commonwealth and State officials.

Thursday Island is the headquarters of the pearl-shell, bêche-de-mer and other fisheries of the Torres Straits, and is in regular and frequent communication by steamer with the other Australian States. The picturesque Albany Passage is passed through on the way from Cooktown to Thursday Island.

The climate during the south-east monsoon period from March to October is ideal; but during the north-east monsoon period from November to March it is rather humid.

The population is a mixed one and numbers under 2,000.

## SOUTH AUSTRALIA.

### Constitution and Government.

South Australia was formed into a British Province by Letters Patent of February, 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date October 24, 1856. It vests the legislative power in a Parliament elected by the people. The Parliament consists of a Legislative Council and a House of Assembly. The former is composed of twenty members. Every three years half the members retire, and their places are supplied by new members elected from each of the five districts into which the State is divided for this purpose. The executive has no power to dissolve this body. The qualifications of an elector to the Legislative Council are, to be twenty-one years of age, a natural born or naturalised subject of His Majesty, and have been on the electoral roll six months, besides having a freehold of 50*l.* value, or a leasehold of 20*l.* annual value, or occupying a dwelling-house the rent of which is not less than 17*l.* per annum, or a registered proprietor of a Crown lease with improvements to the value of at least 50*l.*, the property of the elector; head teacher of a college or school residing on premises; postmaster or postmistress residing in the building; railway stationmaster resident on premises; member of police force in charge of a station; officiating minister of religion. By the Constitution Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the General Election of April 25, 1896. There were 132,294 registered electors in 1930. The qualification for a member of Council is merely that he be thirty years of age, a natural born or naturalised subject, and a resident in the State for three years. Each member of the Council and also of the House of Assembly receives 400*l.* per annum and a free pass over Government railways. The salary of members was increased from 200*l.* per annum on December 1, 1921, but reduced by 5 per cent. for one year from December 1, 1930, and by 10 per cent. for one year from December 1, 1931.

The House of Assembly consists of 46 members elected for 3 years, representing 19 electoral districts. The qualifications for an elector are that of having been on the electoral roll for 6 months, and of having arrived at 21 years of age; and the qualifications for a member are the same. There were 323,907 registered electors in 1930. Judges and ministers of religion are ineligible for election as members. The election of members of both houses takes place by ballot.

The House of Assembly, elected on April 5, 1930, consists of the following parties: Labour, 30; Liberals, 13; Country Party, 2; Independent, 1.

The executive is vested in a Governor appointed by the Crown and an Executive Council, consisting of 6 responsible Ministers and the Chief Justice of the Supreme Court.

*Governor of South Australia.*—Brigadier-General the Hon. Sir Alexander G. A. Hore-Ruthven, V.C., K.C.M.G., C.B., D.S.O., May, 1928. (Salary, 5,000*l.* per annum.)

The Chief Justice (Hon. Sir George J. R. Murray, K.C.M.G., 2,500*l.*), being also Lieutenant-Governor, acts during the absence of the Governor.

The departments of the Public Service are controlled by the following Ministers (appointed April 17, 1930):—

*Premier, Treasurer, and Minister of Education.*—Hon. L. L. Hill, M.P.

*Chief Secretary, Minister of Agriculture, and Commissioner of Forest Lands.*—Hon. S. R. Whitford, M.L.C.

*Attorney-General and Minister of Railways.*—Hon. W. J. Denny, M.P.

*Commissioner of Crown Lands, Minister of Mines, and Minister of Marine.*—Hon. R. S. Richards, M.P.

*Commissioner of Public Works, Minister of Industry, and Minister of Labour and Employment.*—Hon. J. McInnes, M.P.

*Minister of Local Government, Minister of Immigration, Minister of Repatriation, and Minister of Irrigation.*—Hon. J. Jelley, M.L.C.

The provision for the payment of Ministers was increased from 5,000*l.* to 7,750*l.* to date from December 1, 1921, but reduced by 15 per cent. for one year from December 1, 1930, and by 20 per cent. for one year from December 1, 1931. They are jointly and individually responsible to the Legislature for all their official acts, as in the United Kingdom.

*Agent-General for South Australia in London.*—Hon. Sir Henry N. Barwell, K.C.M.G., Australia House, Strand, London, W.C. 2.

### Area.

The total area of South Australia is 380,070 square miles. The settled part of the State is divided into counties, hundreds, municipalities, and district councils, the last being the most general, as they cover most of the settled districts. There are 48 counties proclaimed, covering 54,194,880 acres. This area covers the settled portion of the State, 44,645,584 acres being in occupation. Outside this area there are three extensive pastoral districts—the western, northern, and north-eastern, covering 189,049,920 acres, 88,118,500 being under pastoral leases, with a population of less than 5,000. There are 39 municipalities and 157 district councils.

## WESTERN AUSTRALIA.

### Constitution and Government.

In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain (afterwards Sir Charles) Fremantle, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the State was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on March 31, 1886.

In 1870 partially representative government was instituted, and in 1890 the administration was vested in the Governor, a Legislative Council, and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the Colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, as set forth in a proclamation dated July 18, of that year, the Colonial Parliament passed an Act (57 Vict. No. 14) amending the constitution.

By the Constitution Acts Amendment Act, 1899, further amended by the Constitution Acts Amendment Act, 1911, it is provided that the Legislative Council shall consist of 30 members representing 10 electoral provinces and holding their seats for six years. Members must be 30 years of age, resident in the State for two years, and either be natural-born British subjects or naturalized for 5 years and resident in the State for 5 years. Every elector must have resided in the State for 6 months, and must possess within the province freehold estate of the clear value of £50, or be a householder occupying a dwelling-house of the clear annual value of £17, or holder of a lease of the value of £17 per annum, or the holder of a lease or licence from the Crown of the annual rental of £10, or have his name on the electoral list of a Municipality or Roads Board in respect of property in the province of the annual rateable value of £17. The Legislative Assembly consists of 50 members, each representing one electorate, and elected for 3 years. Members must be 21 years of age, be either natural-born subjects of

the Crown and have resided in Western Australia for twelve months, or naturalized for 5 years and have resided therein for 2 years. Electors must be 21 years of age, natural-born or naturalized subjects of the Crown, and must have resided in the State for 6 months, and must be resident in the district for at least one month when making their claims. Members of and electors for both Houses may be of either sex. Enrolment for the Legislative Assembly is compulsory. No person can be registered as a voter in more than one district or more than once in each Province for which he holds a sufficient qualification. Members of the Legislature are paid 600*l.* a year, and travel free on all Government railways. The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the Legislature of the State.

There is a movement for West Australian secession from the Commonwealth, and a Secession Referendum Bill passed its second reading on December 3, 1931.

State of political parties (1930):—Legislative Council: Labour Party, 5; Country Party, 7; Others, 18. Legislative Assembly: Labour Party, 23; Nationalist Party, 16; Country Party, 10; Independent, 1.

*Governor*.—Position vacant (June 1931).

*Administrator*.—His Excellency John Alfred Northmore (June 1931).

The salary provided for the Governor is 4,000*l.* per annum. He is assisted in his functions by a cabinet of responsible ministers, as follows:—

*Premier and Treasurer*.—Hon. Sir James Mitchell, K.C.M.G., M.L.A.

*Minister for Lands, Immigration and Health*.—Hon. Charles G. Latham, M.L.A.

*Attorney General and Minister for Education*.—Hon. Thomas A. L. Davy, M.L.A.

*Minister for Agriculture*.—Hon. Percy D. Ferguson, M.L.A.

*Agent-General in London*.—Hon. William C. Angwin. Offices.—Savoy House, Strand.

### Area and Population.

Western Australia includes all that portion of the continent situated to the westward of 129° E. longitude, together with the adjacent islands. The total estimated area of the State is 975,920 English square miles, or, 624,588,800 acres. It is divided into 38 magisterial districts.

The enumerated population in the various census years was as follows:—

Years	Males	Females	Total
1848	2,818	1,804	4,622
1859	9,522	5,315	14,837
1870	15,375	9,410	24,785
1881	17,062	12,646	29,708
1891	29,807	19,975	49,782
1901	112,875	71,249	184,124
1911	161,565	120,549	282,114
1921	177,278	155,454	332,732

There were enumerated, in 1921, 1,956 half-caste aborigines. The estimated full-blood aboriginal population in the State on June 30, 1931, was 23,119.

Of the total population in 1921, 248,866 were returned as born in Australia, of whom 142,947 were recorded as natives of Western Australia. The number of married persons was 121,635 (61,899 males and 59,736 females); widowers, 4,528; widows, 8,526; divorced, 316 males and 294 females; unmarried, 108,792 males and 85,843 females. The conjugal condition of the remaining 2,798 persons was not stated. The number of males under 21 was 72,346, and of females 70,455. The population on December 31, 1930, was estimated to be: males, 226,713; females, 193,893; total, 420,606; and on June 30, 1931: males, 225,492; females, 195,140; total, 420,632.

Perth, the capital, had an estimated population on December 31, 1930, within the 10-mile radius area of the Metropolitan district, of 204,780. This, however, includes the chief port of the State, Fremantle, with its suburbs, the population of which, 1930, was estimated at 33,535. The other principal municipalities, with population in 1930, are:—Claremont, 6,500; Boulder, 5,705; Kalgoorlie, 5,400; Midland Junction, 5,300; Bunbury, 5,100; Northam, 4,975; Geraldton, 4,627; Albany, 3,980; Collie, 3,500.

The movement of population for the State in 5 years is given as follows:—

Years	Marriages	Births	Deaths	Immigrants	Emigrants
1926	2,844	8,301	3,350	30,732	29,120
1927	3,107	8,481	3,393	35,275	26,818
1928	3,309	8,704	3,640	36,039	27,522
1929	3,367	9,051	3,930	32,847	27,078
1930	3,205	9,200	3,774	22,457	24,040

Illegitimate births:—1926, 325; 1927, 331; 1928, 334; 1929, 368; 1930, 374.

### Religion.

The religious division of the population was as follows at the census of 1921:—Church of England, 153,229; Methodists, 39,108; Presbyterians, 28,377; Congregationalists, 6,557; Baptists, 5,541; other Protestants, 14,618; Roman Catholics, 64,488; Catholics (Undefined), 2,048; other Christians, 2,930; Jews, 1,919; Mohammedans, 826; Buddhists, 1,177; other non-Christians, 654; indefinite, 1,478; no religion, 1,774; not stated, 8,008.

### Education.

Of the total white population of 15 years and upwards in 1921, 3·97 per cent. were stated to be unable to read. Primary education is compulsory.

There were in the State in the 2 years ending June 30, 1929, 846 public schools, with 53,226 pupils; 1930, 861 schools, with 54,354 pupils. Private schools, 1929, 125 with 12,069 pupils; 1930, 122 with 11,828 pupils.

Education is free throughout from the kindergarten to the University and comprises ample provision also for secondary education, technical schools, continuation classes, scholarships, etc. During the financial year ended June 30, 1931, the total sum spent on education and schools, exclusive of a grant of 31,000*l.* to the University of Western Australia, was 673,202*l.*

### Justice and Crime.

The following table gives the number of apprehensions and convictions for five years :—

—	1926	1927	1928	1929	1930
Apprehended or summoned . . .	12,885	13,845	15,499	16,972	15,784

Convictions in superior courts . .	92	79	64	83	117

The total number of persons committed to prison in the year ended June 30, 1931, was 2,007; the number of commitments totalled 3,496—viz.: adult males, 3,309, adult females, 187.

All the above figures are exclusive of aboriginal crime.

### Pauperism and Old Age Pensions.

There are two charitable institutions, one situated at Claremont, and one at Fremantle, both supported by public funds, with 713 inmates on June 30, 1931. Seventeen Government hospitals, a Government sanatorium for consumptive patients, 4 hospitals for the insane, and 2 depôts for diseased natives at Port Hedland and Derby and a Leper Lazarette at Cossack, are maintained by public funds, whilst 3 public and 67 other assisted hospitals exist, in addition to numerous private hospitals situated in Perth and other centres of population. Ten Protestant and 5 Roman Catholic orphanage industrial schools are supported partly by private subscriptions and partly out of public money. There are also 11 native and half-caste institutions, including 3 Government native settlements. Government receiving depôt for all State children who are afterwards sent to the various Institutions. On June 30, 1931, a total of 1,181 adults and 2,378 children, total, 3,559 persons, in the State received monetary assistance from the public funds for widows and others.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Western Australia at June 30, 1931, was: Old Age, 10,461; Invalid, 3,554; War Pensioners, 28,063.

### Finance.

The revenue and expenditure of Western Australia in six years, ended June 30, are given as follows :—

Years ended June 30	Revenue	Expenditure	Years ended June 30	Revenue	Expenditure
	£	£		£	£
1926 . . .	8,808,166	8,907,809	1929 . . .	9,947,950	10,223,919
1927 . . .	9,750,838	9,722,588	1930 . . .	9,750,515	10,268,518
1928 . . .	9,807,949	9,834,415	1931 . . .	8,686,756	10,107,294

Approximately two-fifths of the public income is derived from railways and tramways (3,425,220*l.* for the year ended June 30, 1931), and the rest mainly from various forms of taxation (1,134,386*l.*), lands, timber, and mining (338,759*l.*), business and trading concerns (1,308,274*l.*), from Commonwealth Funds (773,432*l.*) and from other sources (1,706,685*l.*). Western Australia had a net public debt of 75,465,110*l.* on June 30,

1931, the annual charge for which was 3,621,602*l.* The amount of accrued sinking fund on June 30, 1931, was 1,099,775*l.*

For **Defence**, see under *Commonwealth of Australia*.

### Production and Industry.

Up to June 30, 1931, of the entire acreage of the State, 14,984,035 acres had been alienated; on that date 21,224,805 acres were in process of alienation: the area alienated and in process of alienation thus amounting to 36,208,840 acres. At the same date there were in force leases comprising an area of 216,627,175 acres, of which 214,403,147 acres were pastoral, and 1,267,064 acres were timber, while 53,066 acres were under mining leases, and 31,932 acres were Miners' Homestead leases.

The chief crops for two recent years were as follows:—

Crops	1929-30	1930-31	1929-30	1930-31
	Acres	Acres	Bushels	Bushels
Wheat . . .	3,568,225	3,956,313	29,081,183	52,801,492

Orchards . . .	18,813	19,353	—	—
			Gallons Wine	Gallons Wine
Vines . . .	4,964	4,960	317,637	300,000

The estimated acreages sown with wheat, oats and barley for the season 1931-32, for grain, hay and green food, are respectively 3,320,524, 508,689, and 17,764 acres.

The total forest area is 4,794,000 acres; the greater proportion of the State is carrying trees of some description providing timber for development; the number of superficial feet cut was (1929-30) 159,642,788 (including jarrah, 107,224,248 superficial feet).

The live-stock at the end of 1930 consisted of 156,973 horses; 811,844 cattle; 9,874,970 sheep; 100,664 pigs; 19,007 goats; 3,623 camels; and 9,414 mules and donkeys.

The wool clip in 1930 was 71,541,885 lb.; the exports 74,482,316 lb. (excluding 5,409,615 lb. on skins), valued at 2,693,491*l.*

Gold was first obtained in Western Australia in 1886. The sensational gold finds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian gold mining, which, in a few years' time, placed this State at the head of all the Australian Colonies as regards gold output. The aggregate output to the end of 1930 was 38,303,816 fine oz., valued (according to prices realised) at 165,293,766*l.* There were in the State, in 1930, 375 leases of gold mines; men employed in the mines, 4,284, viz., 2,185 above and 2,099 underground; output of gold, 416,369 fine oz., value 1,768,626*l.*

The total value of the mineral output of the State in 1929 was 2,087,893*l.*, and in 1930, 2,191,557*l.* Principal minerals in 1930 were coal, 501,425 tons, value 394,758*l.*; gold, 416,369 ozs., value 1,768,623; silver, 46,348 ozs., value 3,748*l.*

There were, on June 30, 1930, a total of 1,466 industrial establishments in the State, employing either machinery or at least four hands. The total number of persons employed by them was 19,643, as against 20,913 in

1929. The gross output of these establishments for the year ended June 30, 1930, was computed at 16,891,482*l*. The total estimated value of Western Australian production during 1929 was 31,025,623*l*., distributed as follows: agricultural, 11,965,208*l*.; pastoral, 5,831,083*l*.; dairy, poultry, and bee-farming, 2,185,635*l*.; forestry and fisheries, 2,023,781*l*.; mining, 2,247,942*l*.; manufacturing, 6,771,974*l*.

### Commerce and Communications.

The external commerce of Western Australia, exclusive of inter-State trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

The total value of the imports and exports, including inter-State trade, in 5 years is shown in the subjoined statement:—

June	1926-27	1927-28	1928-29	1929-30	1930-31
	£	£	£	£	£
Imports . .	18,376,876	18,287,876	20,053,772	18,781,656	10,880,848
Exports . .	15,151,959	18,240,775	17,185,954	17,739,529	17,026,654

The most important of the exports for 1930-31 were wheat (5,258,252*l*.) and flour (635,518*l*.), wool (2,386,538*l*.), gold specie (5,782,662*l*.), timber (503,696*l*.), pearl shell (167,218*l*.), pearls (7,525*l*.), hides and skins (269,659*l*.).

There were on the West Australian register on December 31, 1930, 60 steamers of 6,716 tons, and 324 sailing vessels of 10,795 tons; total, 384 vessels of 17,511 tons. Tonnage inwards and outwards, 1929-30, from and to ports outside the State, 7,887,555.

For the year ending June 30, 1931, the State had 4,180 miles of State Government railway, and 450 miles of Commonwealth line, the latter being the western portion of the Trans-Australian line (Kalgoorlie-Port Augusta), which links the State Railway System to those of the other States of the Commonwealth.

### Money and Credit.

A branch mint was opened at Perth in 1899. The issues of Imperial coin to the end of June 1931 were: gold, 106,388,874*l*.; silver, 15,600*l*.; bronze, 2,000*l*. The issue in 1930-31 was: gold, 1,927,357*l*.; silver and bronze, nil.

There are nine banks in Western Australia besides the State Government Savings Bank and the Commonwealth Bank of Australia and Savings Bank. The total paid-up capital of the cheque paying banks in the quarter ended June 30, 1931, was 36,014,752*l*., of which 4,000,000*l*. is profit transferred to Capital Account by the Commonwealth Bank; deposits, 12,766,900*l*.; total average liabilities, 14,552,441*l*.; total assets, 26,298,800*l*.

*State Government Savings Bank.*—The amount due to depositors on June 30, 1931, inclusive of interest, was 7,992,329*l*., whilst in addition an amount of 86,720*l*. was due under the head 'Schools Savings Bank.'

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913. On June 30, 1931, 2,788,373*l*. stood to the credit of 100,753 depositors.

## TASMANIA.

### Constitution and Government.

Abel Jans Tasman discovered Van Diemen's Land (Tasmania) on November 24, 1642. The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connection with New South Wales was terminated; in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On January 1, 1901, Tasmania was federated with the other Australian States into the Commonwealth of Australia.

Parliament consists of a Legislative Council and a House of Assembly. The Council has 18 members, elected on a property qualification of 10*l.* freehold or 30*l.* a year leasehold. Certain professional men and all 'returned soldiers' are also electors. Members sit for 6 years, and retire in rotation. There is no power to dissolve the Council. The House of Assembly has 30 members, elected for 3 years by adults with six months' residence in the State. Members of both Houses are paid according to the district represented. The amounts vary from 370*l.* (Buckingham) to 500*l.* (Darwin) a year. Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method being the single transferable vote in 6-member constituencies. By-elections are superseded (from 1919) by a recount of the votes at the preceding General Election. At the election in 1931 for the House of Assembly 18 Nationalist, 11 Labour, and 1 Independent members were returned.

*Lieutenant Governor.*—Sir Hubert Nicholls, K.C.M.G.

The Cabinet (appointed June, 1928) is composed as follows:—

*Premier and Treasurer.*—Hon. J. C. McPhee.

*Chief Secretary and Minister of Railways and Mines.*—Hon. C. E. W. James.

*Attorney General and Minister of Education.*—Hon. H. S. Baker.

*Minister of Lands and Works and Agriculture.*—Hon. Sir Walter Lee, K.C.M.G.

*Ministers without Portfolio.*—Hon. Edward Hobbs, Hon. A. L. Wardlaw, M.L.C., Hon. C. W. Grant.

A minister must have a seat in one of the two Houses.

Each of the ministers has a salary of 1250*l.* per annum. The Premier has an additional 250*l.* a year.

Members of Parliament and Ministers of the Crown suffered a reduction from July 25, 1931, of 25 per cent. of their official salaries as given above.

*Agent-General in London.*—(Acting) H. W. Ely, I.S.O.

*Official Secretary.*—H. W. Ely, I.S.O., Australia House, Strand, London, W.C. 2.

### Area and Population.

Area, with Macquarie (170 square miles), 26,215 square miles or about 16,778,000 acres, of which 15,571,500 acres form the area of Tasmania

Proper, the rest constituting that of a number of small islands, in two main groups, the north-east and north-west.

The population has increased as follows (census returns about April 1):—

Year	Population	Increase per Ct. per Annum	Year	Population	Increase per Ct. per Annum
1861	89,977	2·44	1901	172,475	1·64
1871	99,328	1·13	1911	191,211	1·04
1881	115,705	1·38	1921	213,780	1·12
1891	146,667	2·36	1931	219,694	0·27

In 1921 there were 107,743 males and 106,037 females. The average density is 8·15 persons to a square mile. Of the total population in 1921, 5·96 per cent. were natives of the British Isles, 0·44 per cent. natives of other European countries, and 92·44 per cent. natives of the Commonwealth and New Zealand. There were 371 Hindus, 234 Chinese, and 106 other coloured Asiatics. The pure aboriginal is extinct.

The births, deaths, and marriages for five years were as follows:—

Year	Births	Marriages	Deaths	Excess of Births
1926	4,988	1,435	1,912	3,076
1927	4,833	1,432	2,033	2,800
1928	4,691	1,502	2,132	2,559
1929	4,797	1,712	2,176	2,621
1930	4,786	1,450	1,948	2,838

Population of the capital, Hobart, and suburbs (March 31, 1931), 58,100, of Launceston and suburbs, 31,040.

### Religion.

In 1921, belonging to the Church of England, 112,222; Roman Catholics, 33,106; Catholics (undefined), 2,359; Methodists, 27,171; Presbyterians, 14,796; Baptists, 5,332; Congregationalists, 4,548.

### Education.

Primary education is free and secular, and compulsory between the ages of 7 and 14. Nine-tenths of the primary teaching is at State schools. Secondary education is about equally divided between the new State High Schools and the older endowed schools. The 5 State High Schools in 1929 had an average attendance of 1,510. There are 4 Technical Schools, and 3 junior Technical Schools, with a total enrolment of 1,319.

The University of Tasmania, established 1890, had 240 students taking courses for degrees in 1929. University expenditure in 1929 (exclusive of capital expenditure) was about 19,710*l.* In 1929, 11 Tutorial Classes were provided by the University at different centres for the Workers' Educational Association.

### Justice and Crime.

There are a Supreme Court, courts of petty sessions and general sessions, the latter presided over by a stipendiary magistrate, assisted by justices of

the peace. The Supreme Court is both a court of first instance and a Court of Appeal in all jurisdiction, civil and criminal. The State is also divided into four districts with local civil courts presided over by Commissioners who are also police magistrates, and petty sessions have all the powers of two justices of the peace. Petty offences and a limited number of civil claims are dealt with in petty sessions and in general sessions by justices of the peace. During the year 1929, 6,898 persons were summarily convicted, and 105 persons were committed for trial. The total police force on December 31, 1930, was 246. There was 1 gaol, with 87 male and 2 female inmates, at the end of June, 1930.

### Old Age Pensions.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Tasmania on June 30, 1930, was : Old Age, 7,678 ; Invalid, 2,456 ; War, 12,321.

### Revenue and Expenditure.

The revenue is derived chiefly from taxation (income, land, death duties and taxation of betting), and from the rental and sale of Crown lands. The customs and excise duties are in the hands of the Commonwealth, which Government makes a special grant to Tasmania and contributes a fixed amount per annum towards interest on the State's Public Debt.

—	1927-28	1928-29	1929-30	1930-31
	£	£	£	£
Revenue . . . . .	2,962,687	2,766,434	2,956,272	2,609,290
Expenditure . . . . .	2,867,605	2,855,977	2,981,992	2,854,394

The public debt of Tasmania amounted, June 30, 1931, to 23,389,079*l.*, of which 25 per cent. has been spent on railways, 16 per cent. on hydro-electric works, and 24 per cent. on roads and bridges.

State taxation amounted to 5*l.* 4*s.* 2*d.* per head, of which income tax provides 2*l.* 15*s.* 2*d.* (including tax on lottery prizes formerly collected by the Commonwealth Government), land tax 9*s.* 3*d.* death duties 6*s.* 2*d.* Land and income taxes and death duties are also collected by the Commonwealth, averaging 19*s.* 5*d.* per head, and customs and excise of 7*l.* 12*s.* 1*d.* in 1929-30 per head.

### Defence.

For defence, see under *Commonwealth of Australia*.

### Production and Industry.

The total area of Tasmania is 16,778,000 acres, including 1,206,500 acres islands and lakes. Unalienated land, chiefly rugged mountain country, much of it mineral-bearing, amounts to about 10,500,000 acres. Of this unalienated land about 2,800,000 acres are leased.

The net value in 1929-30 of agricultural and pastoral products was 3,895,220*l.*, of manufactures, 3,562,225*l.* (output less raw material, fuel, etc.) and of mining products, 1930, 1,043,268*l.*

## Agricultural production and yield per acre:—

	1929-30			1929-30	
	Crop	Yield per Acre		Crop	Yield per Acre

*Manufactures.*—The two important manufactures for export are metal extraction and fruit-preserving. The electrolytic-zinc works at Risdon near Hobart are now using large quantities of ore imported from Broken Hill, and also considerable quantities of Tasmanian West Coast ores. The output in 1930 was 54,901 tons of zinc, valued at 1,034,932*l.*, with 227 tons of cadmium and other by-products. Other manufactures that have an output beyond local requirements are wool, confectionery and cement. The carbide works at North-West Bay are able to supply the needs of all Australia.

## Commerce, Shipping, &amp;c.

Principal imports, 1929-30 : Food, drink and tobacco, 2,493,851*l.* ; drapery, clothing and textiles, 1,801,653*l.* ; metals and metal manufactures, 2,150,415*l.* ; ores and concentrates, 751,655*l.* Total imports, 9,848,102*l.* Principal exports, 1929-30 : Butter and cheese, 321,623*l.* ; fruit, fresh, 820,857*l.* ; fruit, dried, preserved or pulped, 333,626*l.* ; hops, 143,927*l.* ; jams and jellies, 351,418*l.* ; oats and chaff, 130,054*l.* ; peas, 90,799*l.* ; potatoes, 578,528*l.* ; wool, 630,011*l.* ; hides and skins, 257,105*l.* ; zinc bars and blocks, 1,159,559*l.* ; timber, 340,502*l.* ; woollen manufactures, 647,348*l.* Total exports, 9,088,014*l.*

Direct overseas imports and exports are about 19 per cent. and 27 per cent. respectively of total imports and exports.

In 1929-30, Hobart did 50 per cent. of the total trade, Launceston 31 per cent., Burnie 7 per cent. and Devonport 5 per cent.

The registered shipping in 1930 consisted of 132 sailing vessels of 4,253 tons, and 56 steamers of 6,304 tons. Total, 188 vessels, 10,557 tons.

For shipping, railways, posts and telegraphs, see under *Commonwealth of Australia*.

### Savings Banks.

The number of depositors in Savings Banks, including the Commonwealth Savings Bank, 1930, was 177,983, and the amount on deposit 5,738,437l.

## THE NORTHERN TERRITORY OF AUSTRALIA.

### Government.

The Northern Territory, after forming part of New South Wales, was annexed in 1863 to South Australia, and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any State, and under this provision an agreement was entered into on December 7, 1907, for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on January 1, 1911.

On the 1st March, 1927, the Northern Territory was divided for administrative purposes into two Territories, North Australia and Central Australia, the dividing line between the two Territories being the twentieth parallel of south latitude. Each Territory was under a Government Resident, with headquarters at Darwin and Stuart respectively. This division was effected under the authority of the Northern Australia Act, 1926, which also provided for the appointment of a North Australia Commission, the powers of which extended to matters relating to the development of North Australia, and also to the administration of Crown Lands throughout North Australia and Central Australia. The Northern Australia Act, 1926, was repealed as from June 12, 1931, by the Northern Territory (Administration) Act, 1931, and the whole of the Northern Territory was placed under the control of an administrator.

The North Australia Commission was abolished and the administration of Crown Lands vested in a Land Board.

*Administrator* (Darwin).—R. H. Weddell.

*Deputy Administrator* (Stuart).—V. G. Carrington.

### Area and Population.

The Northern Territory is bounded by the 26th parallel of south latitude, and the 129th and 138th degrees of east longitude. Its area is 523,620 square miles. The area alienated on December 31, 1930, amounted to 746 square miles absolutely; 265,813 square miles were held under leases and licences; and the remainder, 257,807 square miles, was unoccupied. The coast line is about 1,040 miles in length. The Territory possesses many fine rivers and several good harbours, the principal being Port Darwin. The

greater part of the interior consists of a table-land rising gradually from the coast to a height of about 1,700 feet. On this tableland there are large areas of excellent pasturage. The southern part of the territory is generally sandy with a small rainfall, but it can be watered by means of sub-artesian bores. The climate is tropical, but varies considerably over the whole Territory. The proximity of the sea in the north keeps it fairly equable in the coastal region, but further south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The population, excluding aborigines, has varied as follows :—

Year	Europeans	Others	Totals
1881	670	2,781	3,451
1901	1,055	3,756	4,811
1911 (Census)	1,418	1,892	3,310
1921 (Census)	2,459	1,408	3,867
1929 (30th June)	2,790	838	3,628
1930 (30th June)	3,030	884	3,914

Of the 1921 Census total 1,046 were females. Chinese in the Territory numbered 722.

The estimated number of aborigines (including half-castes) on the 30th June, 1930, was 21,824.

### Finance.

The revenue and expenditure for 6 years were as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1924-25	81,812	339,299	1927-28	142,902	459,756
1925-26	97,298	382,268	1928-29	125,830	454,259
1926-27	122,062	431,512	1929-30	121,835	482,562

The chief sources of revenue for the year ending June 30, 1930, were Customs and Excise, 8,307*l.*; Railways, 31,291*l.*<sup>1</sup>; North Australia Commission, 38,811*l.*; and Postal revenue, 11,149*l.* Land and Income Tax: Territorial, 4,034*l.*; Federal, 2,224*l.* The chief items of expenditure (excluding interest, loans, &c.) were Administrative Staff, 89,870*l.*, North Australia Commission, 63,484*l.*, and Railways, 56,155*l.*<sup>1</sup> The public debt (outstanding indebtedness in respect of securities taken over from South Australia on account of Northern Territory and Central Australia Railways plus Loan Monies used for (a) redemption of such securities as have matured and (b) for development) on June 30, 1931, was 9,670,278*l.*

### Production and Industry.

The soils of the Territory differ greatly, but most products suitable to the tropical and semi-tropical zones can be grown successfully. At present, however, agriculture is insignificant. In most parts the natural grasses are extremely rich in nutriment, and provide food for cattle, horses, sheep, and other stock. The numbers of stock on December 31, 1929, were :—Cattle, 711,607; horses, 33,703; goats, 9,247; pigs, 359; sheep, 11,803; camels, 707; mules, 95; donkeys, 779.

The Territory is rich in mineral resources, though these are very little developed. The value of the minerals produced in the year ending June 30,

<sup>1</sup> The figures in respect of Railways are for North Australia Railways only. The figures in regard to Central Australia Railways included in the Finance Statement 1929-30 were: Interest, 176,711*l.*; Sinking Fund, 21,718*l.*; Working Expenses, 198,108*l.*; Interest on Loans taken over from South Australia, 84,718*l.*, against which were receipts totalling 104,726*l.*

1930, was as follows:—Gold bullion, 57*l.*; Tin ore, 3,345*l.*; Silverlead ore, 2,293*l.*; Tantalite ore, 1,013*l.*; Mica, 6,099*l.*; Wolfram, 3,778*l.*; Copper, 79*l.*; grand total, 16,664*l.*

### Commerce.

The oversea imports and exports are given as follows:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1924-25	20,636	41,944	1927-28	30,387	29,265

## TERRITORIES OF THE AUSTRALIAN COMMONWEALTH: TERRITORY OF PAPUA (BRITISH NEW GUINEA).

Papua is the south-eastern part of the island of New Guinea, with the islands of the d'Entrecasteaux and Louisiade groups and all islands between 8° and 12° S. latitude, and 141° and 155° E. longitude. Area 90,540 square miles, of which about 87,786 are on the mainland of New Guinea, and 2,754 on the islands above mentioned. On June 30, 1931, the population was as follows:—European, 1,128; Papuans (estimated), 275,000. (For the part of New Guinea lately possessed by Germany and now administered by Australia, see below.)

To prevent that portion of the island of New Guinea not claimed by Holland from passing into the hands of a foreign power, the Government of Queensland annexed it in 1883. This step was not sanctioned by the Imperial Government, but on November 6, 1884, a British Protectorate was proclaimed over the Southern portion of the Eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The Federal Government took over the control in 1901; the political transfer was completed by the *Papua Act* of the Federal Parliament in November, 1905, and on September 1, 1906, a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua. There is an executive council composed of 8 official members and 1 non-official member, and a legislative council composed of the executive councillors and 5 non-official members, 4 being nominated by the Lieutenant-Governor and appointed by the Governor-General of Australia, and the fifth being

nominated by the Lieutenant-Governor of Papua as representing the interests of the Christian Missions of the Territory.

Tribes have in large areas settled down to peaceful habits. Five missionary bodies are at work ; many hundreds of natives are being taught by these bodies. 195,951 acres of land have been leased, chiefly by planters, the principal cultures being coconuts (47,837 acres at December 31, 1930), rubber (9,075 acres), sisal hemp (950 acres). On December 31, 1929, there were 58,902 acres of plantations. A preferential tariff is granted by the Commonwealth on certain raw material from Papua, and a bonus for 10 years on other products imported into Australia. Freehold alienation is prohibited, but leases may be obtained at low rentals for long terms. Indigenous sago is plentiful in the western portion of the Territory, and there are considerable numbers of native-owned coconut trees. A regulation, which is strictly enforced, requires that each native shall plant coconut trees or other economic trees or plants if his land is suitable, or the natives may, in lieu of paying a tax in money, establish communal plantations under the direction of European instructors.

The ports of entry are—Port Moresby, Samarai, Kulumadau, Woodlark Island and Daru.

There are 8 magisterial districts, each in charge of a resident magistrate. There are also 20 assistant resident magistrates, and 9 patrol officers. There is a Central Court at Port Moresby, but it holds sittings wherever and whenever necessary. For native government some simple regulations have been passed. There were (1931) 1,160 village policemen ; armed constabulary, 250 (exclusive of Europeans who are officers of armed constabulary).

Throughout the Territory there are numerous schools belonging to the various Christian missions ; the attendance of native children is compulsory if English is taught. There is a tax not exceeding 10s. per head on indentured native labourers, and not exceeding 20s. per head on other natives. After expenses of collection are paid the balance is devoted, first, to native education, and, secondly, to other purposes having for their object the direct benefit of the natives. The education is chiefly undertaken by the missions aided by grants from the taxation fund. 7,018*l.* was spent on education in 1930–31. The expenses of the plantation instructors to develop native agriculture are borne by the Education Fund, 1,301*l.* being expended in 1930–31.

A Government Anthropologist is supported from this fund with a view to assisting the Government to understand the native point of view. A Family Bonus is paid to native mothers of four or more children under 16 years of age at the rate of 5s. for four and 1s. for each child over the four. In 1930–31, 5,422*l.* was spent from the fund on medical work among the natives, besides 611*l.* on native hospital buildings.

Years ended 30 June	Local Revenue	Expenditure	Imports	Exports	Tonnage entered and cleared
	£	£	£	£	Tons
1927	111,508	167,728	455,904	454,462	226,948
1928	107,052	158,964	403,561	350,363	226,784
1929	93,751	152,949	361,271	337,365	184,946
1930	100,349	151,874	373,918	324,775	228,391
1931	134,918	135,325	240,074	274,354	220,399

Revenue is mainly from customs duties. An annual subsidy is given by the Australian Government. The subsidy for 1931-32 has been reduced from 50,000*l.* to 40,000*l.*

Gold, silver and osmiridium are the only minerals exported. There are 9 proclaimed mineral fields, seven of which are gold fields, and 2 copper. Gold is obtained in the Louisiade Islands, on the mainland, and on Woodlark Island. A large area near Port Moresby with promising copper deposits has been proclaimed a mineral field, and was being vigorously developed. A railway from the field to the coast was constructed and smelters erected. The whole field was abandoned in 1927 owing to the low price of copper, but the machinery remains in the hope of a rise in the price of copper sufficient to justify a renewal of operations. Indications of petroleum have been found over an area of 1,000 sq. miles. Prospecting Licences have been issued to a number of private companies. In 1930-31 the gold output was valued at 18,296*l.* The trade is principally with Queensland and New South Wales. The chief imports are food-stuffs, tobacco, drapery and hardware; exports 1930-31, copra (3,436½ tons, 93,710*l.*); gold (6,923 ozs., 22,440*l.*); osmiridium (46½ ozs., 700*l.*); rubber (776 tons, 47,036*l.*); desiccated coconut, 467½ tons, 79,264*l.* Number of horses (1930), 707; cattle, 5,883; mules, 135.

A steamer trades between Sydney, Port Moresby and Samarai every month, and small coastal vessels run at frequent intervals between the various inter-territorial ports. Ocean-going shipping entered and cleared 1929-30, British, 184,806 tons; foreign, 43,585 tons. There are wireless telegraph stations at Port Moresby and Samarai.

There are branches of the Bank of New South Wales at Port Moresby and Samarai. The currency and its legal tender are the same as in the Commonwealth of Australia.

### NEW ZEALAND.

New Zealand was first discovered in 1642 by Tasman, and the coast was explored by Captain Cook in 1769, and in subsequent years. It became a resort for whalers and traders, chiefly from Australia. In 1840 the native chiefs ceded the sovereignty to the British Crown and the islands became a British Colony.

The aborigines, called Maoris, are a branch of the Polynesian race; they

are divided into about twenty clans, analogous to those of the Scottish Highlands. Between 1845 and 1848, and again between 1860 and 1870, about half of these clans were in revolt against British rule, but peace was permanently established in 1871.

### Government and Constitution.

By Order in Council, the designation of the Colony of New Zealand was changed to the Dominion of New Zealand, on and from September 26, 1907. The present form of government was established by Statute 15 & 16 Vict., cap. 72, passed in 1852. The Colony was divided into six provinces and later into nine. By an Act of the Colonial Legislature, 39 Vict., No. xxi., passed in 1875, the provinces and the provincial system of government were abolished, and the powers previously exercised by superintendents and provincial officers were exercised by the Governor (Governor-General from June 1917) or by local boards. The legislative power is vested in the Governor-General and a 'General Assembly' consisting of two Chambers—a Legislative Council and a House of Representatives. The Governor-General has the power of assenting to or withholding consent from bills, or he may reserve them for His Majesty's pleasure. He summons, prorogues, and dissolves the Parliament. He can send drafts of bills to either House for consideration, but in case of appropriations of public money must first recommend the House of Representatives to make provision accordingly before any appropriations can become law. He can return bills for amendment to either House.

The Legislative Council consists of thirty-five members, who are paid at the rate of 283*l.* 10*s.* per annum. Members hold their seats for seven years only, unless reappointed.

The House of Representatives consists of eighty members, including four Maoris, elected by the people for three years. They are paid at the rate of 405*l.* per annum. Every man or woman registered as an elector is eligible as a member of the House of Representatives. For European representation every adult person (of either sex), if resident one year in the Dominion and three months in an electoral district, is required to be registered as an elector for such Electoral District. No person may be registered on more than one electoral roll. Every adult Maori resident in any of the four Maori electoral districts can vote, provided he (or she) be not registered on any European roll. Registration is not required in Native districts.

The result of the general election of November 1928 was: Reform Party, 28; United Party (Liberals), 29; Labour Party, 19; Independent, 4.

*Governor-General and Commander-in-Chief.*—His Excellency Rt. Hon. Lord Bledisloe, G.C.M.G., K.B.E. (appointed December 1, 1929). Salary 5,000*l.*, and 2,500*l.* allowances. (For the year 1931-32 salary is 4,050*l.*, and 2,025*l.* allowances.)

The (Coalition of Reform and United Parties) Cabinet (Assumed office September 22, 1931) was composed (December, 1931) as follows:—

*Prime Minister, Minister of Railways and Minister of External Affairs.*—Rt. Hon. G. W. Forbes, P.C.

*Minister of Public Works and Minister of Transport.*—Rt. Hon. J. G. Coates.  
*Minister of Lands and Commissioner of State Forests.*—Hon. E. A. Ransom.

*Minister of Native Affairs and Cook Islands.*—Hon. Sir Apirana Ngata, Kt.  
*Minister of Finance, Minister of Customs and Stamp Duties, Attorney-General.*—Hon. W. D. Stewart.

*Minister of Education, Minister of Industries and Commerce.*—Hon. J. Masters, M.L.C.

*Minister of Health, Minister of Immigration.*—Hon. J. A. Young.

*Minister of Agriculture and Mines.*—Hon. C. Macmillan.

Each Minister has a salary of 1,053*l.* (with the exception of the Prime Minister, who has 1,620*l.*), with House Allowance of 180*l.* if no Government residence is provided.

Department of the High Commissioner in London :—

*High Commissioner.*—Sir T. M. Wilford, K.C.M.G. K.C. (appointed January 1, 1930), 415 Strand, London, W.C. 2.

#### LOCAL GOVERNMENT.

For purposes of local government New Zealand is divided into counties, boroughs and town districts. The counties are subdivided into ridings.

#### Area and Population.

There are two principal islands, the North and South Islands, besides Stewart Island, and small outlying islands, including (since 1901) the Cook and some other islands in the Pacific Ocean. The group is 1,000 miles long, and 180 miles across at the broadest part; coast line 3,000 miles. New Zealand is about 1,200 miles east of Australia. Area, excluding annexed islands, 103,722 square miles. North Island, 44,281 square miles, South Island 58,092, Stewart Island 670 square miles, Chatham Islands 372 square miles, outlying islands 307 square miles. Acreage 66,390,262 acres, exclusive of the Cook and other islands (179,200 acres), and up to March, 1931, 21,512,206 acres had been alienated, and 15,127,882 acres reserved and set apart by the State for special purposes. The area of Native lands at March 31, 1931, was 4,589,957 acres. The estimated population September 30, 1931, was 1,516,128, inclusive of Maoris, 68,850, but exclusive of residents of Cook and other annexed Islands, 15,153, of the Tokelau Islands, 1,048, and of Western Samoa (mandated territory), 45,845. Census population, exclusive of aborigines and dependencies :—

#### Religion.

No State aid is given to any form of religion. For the Church of England the Dominion is divided into seven dioceses, with a separate

bishopric (Ao-tea-roa) for the Maoris. The Roman Catholic Church is under an Archbishop residing at Wellington, assisted by a coadjutor Archbishop and three bishops.

### Education.

The University of New Zealand consists of the Otago University at Dunedin, with 93 professors and lecturers; the Canterbury University College at Christchurch, with 39 professors and lecturers; the Auckland University College, with 39 professors and lecturers; and the Victoria University College at Wellington, with 28 professors and lecturers; students on registers of the four constituent colleges (1930), 4,567. The University colleges are all endowed with lands. The Canterbury Agricultural College and the Massey Agricultural College (at Palmerston North) are recognised schools of agriculture.

At the end of 1930 there were 46 incorporated or endowed secondary schools, with 681 (excluding part-time) teachers and 15,552 pupils (excluding 325 in lower departments). There are also 81 District High Schools with 185 teachers and 4,115 scholars in the secondary division. Two Junior High Schools with 125 pupils and 22 Technical High and Technical Day Schools with 6,953 pupils. Of private secondary schools there were 48 registered, with 3,825 pupils. Twelve secondary schools for Maoris had 517 pupils.

For primary schools there is an Education Department (which also exercises certain functions in regard to both university and secondary schools). There are 9 Local Education Boards. At the end of 1930 there were 2,593 public primary schools, 6,975 teachers (including 542 probationers), 220,813 scholars on the rolls; average attendance (1930), 199,548. Education is compulsory between the ages of 7 and 14. The instruction given at the public schools is secular only, and for the ordinary standard course entirely free.

There are 5 schools of mines; 4 normal schools; 15 child welfare institutions; a school for the deaf; an institute for the blind (at Auckland); a special school for mentally backward boys at Otekaike, Otago; and a similar school for girls at Richmond, Nelson. There were also, at the end of 1930, 306 registered primary private schools, with 26,451 pupils.

There were 138 Native village schools, with 322 teachers and 7,070 scholars,

including 850 Europeans. Total net expenditure by the State on Native schools in 1930-31 was 99,101*l*. Total expenditure out of public funds in 1930-31 upon education of all kinds 4,095,323*l*.

### Justice and Crime.

There are nine supreme court judges, and thirty-one stipendiary magistrates. There are numerous magistrates' courts and justices of the peace.

In 1930 there were 47,247 summary convictions, and 1,524 sentences in supreme courts, including 1,119 cases sent up from lower courts for sentence. At the end of 1930 the gaols and Borstal institutions contained 1,523 prisoners undergoing sentence.

### Pauperism, Pensions, etc.

The Dominion is divided into districts, with elective boards for the administration of the public hospitals and charitable relief. The Government subsidises bequests and voluntary contributions at the rate of 20*s*. in the pound; and contributions by local authorities, according to a sliding scale, ranging from 1*s*. in the pound to 26*s*. in the pound, and averaging throughout the Dominion 20*s*. in the pound. The apportionments are made according to the value of rateable property within the district. The total expenditure on Charitable Aid during the year ended March 31, 1930, was 254,597*l*, and on hospital maintenance, 1,253,387*l*. During 1930 the benevolent and orphan asylums accommodated 13,450 inmates; and 4,633 children were wholly or partly maintained by the State in various institutions in 1930.

An Act, passed in 1898 and amended on several occasions since, provided for old-age pensions. Every person, not an alien or an Asiatic, who fulfils certain conditions is entitled to a pension of 45*l*. 10*s*. a year, reducible by 1*l*. for every 1*l*. by which income exceeds 52*l*. The joint annual income of a married couple in receipt of pensions must not exceed 143*l*. (including pensions). Pensions are also granted to widows, to miners incapacitated as a result of miners' phthisis, to veterans of the Maori war, to dependents of those who died in the influenza epidemic of 1918, and to certain classes of blind persons. In addition are those pensions granted in respect of the recent war.

There is a system of family allowances at the rate of 2*s*. per week for each child after the second, in cases where income excluding family allowance is under 3*l*. 12*s*. per week.

<sup>1</sup> Excluding tyre-tax and motor-spirit tax—for main highways purposes.

<sup>2</sup> The total shown for interest covers interest on the Public Debt Redemption Fund and on other public moneys, together with interest on railway capital liability (since 1925-26) and on post and telegraph capital liability (since 1928-29). From the years stated, railway and post and telegraph revenue and expenditure have been removed from the operations of the consolidated Fund, these two undertakings, however, paying interest on their capital liability. Railway revenue in 1930-31 was 7,294,666*l.*, and post and telegraph revenue, 3,707,420*l.*

<sup>3</sup> Excludes unemployment taxation.

The number of income-tax payers in 1929-30 was 55,235, and of land-tax payers, 51,391.

The following expenditure table of the Consolidated Fund is exclusive of sums paid to the Public Works Fund:—

Year ended March 31	Public Debt Charges	Pensions	Education	Post and Telegraph	Constabulary and Defence	Total (including others)
	£	£	£	£	£	£

Estimates 1931-32: Revenue, 24,666,000*l.*; expenditure, 24,540,000*l.*

The total expenditure out of the Public Works Fund from 1870 to March 31, 1931, was 117,945,690*l.*, including charges and expenses for raising loans.

The average taxation per head of the population in 1930-31 was 12*l.* 12*s.* 1*d.*

The gross public debt at March 31, 1931, was: 276,033,358*l.*; of which indebtedness on account of the war of 1914-19 represented 67,711,800*l.* Most of the rest of the debt represents reproductive expenditure or investments.

### Defence.

The New Zealand military forces are under a general officer commanding, who has at his disposal a general headquarters divided into the general staff and administrative services and departments. He is responsible to the Ministry of Defence. New Zealand is organised into 3 military commands, the Northern, Central, and Southern, each command being under an officer commanding.

The Air Force consists of 21 machines. The personnel is 122, including 56 permanent officers and men.

The system of compulsory Territorial and Cadet training is now in abeyance. Reorganization is proceeding with a voluntary system upon a reduced scale.

*Civil Aviation.*—There are 17 aerodromes, 179 licensed pilots and 59 aircraft.

The Naval Defence Act, 1920, provided for the establishment of a New

Zealand Naval Force, to be raised and maintained by voluntary enlistment only, enlistment being for a prescribed period not less than two years. In time of war the Naval Force (including vessels acquired for defence purposes) is at the disposal of the British Government. The Naval force consists of training ship *Philomel* (ex-cruiser of 2,500 tons), the cruisers *Dunedin* and *Diomedé*, loaned free of charge (other than maintenance) by the Imperial Government, and the sloops *Laburnum* and *Veronica*. In addition there are the oil-tank vessel *Nucula*, the trawler *Wakakura* and the tug *Toia*. The establishment of a New Zealand Royal Naval Reserve is also provided for under the Act. Expenditure on naval defence in 1930-31 amounted to 418,838*l.*, not including interest on loan-moneys. In addition 125,000*l.* was paid as the fourth of eight annual instalments towards the cost of the Singapore Naval Base.

## Production and Industry.

### I. AGRICULTURE.

Two-thirds of the surface of New Zealand is suitable for agriculture and grazing. About 12,500,000 acres are still under forest. The total area under cultivation (including 17,320,701 acres in sown grasses and 124,565 in fallow) in 1930 was 19,156,074 acres. The area of Crown lands (other than reserves) leased under various tenures at March 31, 1931, was 17,974,311 acres, and 2,121,086 acres were available for future disposal.

The largest freehold estates are held in the South Island. The extent of occupied holdings of or over one acre in 1930 (exclusive of holdings within borough boundaries) was as follows:—

Sizes of Holdings (Acres)	Number of Holdings	Acres	Sizes of Holdings (Acres)	Number of Holdings	Acres
1 & under 9	13,029	56,030	5,000 & under 10,000	552	3,740,004

Total area of the Cook and other islands about 280 square miles.

Rarotonga is 20 miles in circumference; Atiu, 20 miles; Aitutaki, 21 miles; Niue (or Savage Island), 40 miles. Laws for the Cook Islands have been made since 1890 by a general Legislature, and are administered by an Executive Council, of which the Arikis, or native chiefs, are members. At Rarotonga and Niue there are (New Zealand) Resident Commissioners, whose approval is required for all enactments. The customs tariff of New Zealand is enforced. In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Islands, and providing for the appointment of a member of the Executive Council of New Zealand as Minister of the Cook Islands. The Minister is charged with the administration of the Islands. The Act provides for the constitution of Island Councils, lower and higher Courts of Justice, and native land court, as well as for the establishment of public schools, &c. In 1930–31 the numbers of births, marriages, and deaths were respectively 519, 131, and 226. Education: there are 30 Government or subsidized mission schools in the group, with 2,800 scholars. ## FIJI.

**Constitution and Government**

The Fiji Islands were discovered by Tasman in 1643 and visited by Captain Cook in 1769. The sovereignty was ceded to Great Britain on October 10, 1874.

*Governor of Fiji and High Commissioner for the Western Pacific.*—Sir Murchison Fletcher, K.C.M.G., C.B.E. (appointed, 1929). Salary 3,000*l.* as Governor of Fiji, and 1,200*l.* as High Commissioner for the Western Pacific.

The Constitution is regulated by Letters Patent of February 9, 1929. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Colonial Treasurer, the Secretary for Indian Affairs, the Secretary for Native Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than thirteen nominated members, six European elected members, three native members and three Indian elected members.

The natives retain a large share of self-government. Their system of village and district councils has been recognised and improved, and supplemented by a triennial meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under the 'Native Affairs Ordinance, 1876,' which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well-being of the native population. All such regulations have to receive the sanction of the Legislative Council.

There is a constabulary force consisting of Fijians and Indians, with European officers, and a Defence Force (Europeans, half-castes, and Fijians). Strength of constabulary force in 1931, 218.

**Area and Population.**

Fiji comprises a group of about 250 islands (about 80 inhabited) lying between 15° and 22° south latitude and 177° east and 178° west longitude. The largest is Viti Levu, area 4,053 square miles; next is Vanua Levu, area 2,130 square miles. The island of Rotuma, between 12° and 15° of south latitude, and 175° and 180° east longitude was added to the colony in 1880. Total area, including Rotuma, 7,088 square miles.

At the 31st December, 1930, the population of the Colony, including Rotuma, was estimated at 182,576; Europeans, 5,078 (2,688 males, 2,395 females); Fijians, 92,189 (47,384 males, 44,805 females); Indians, 74,417 (44,289 males, 30,128 females); Chinese, 1,503 (1,377 males, 126 females); half-castes, 3,333 (1,720 males, 1,630 females); others, 5,356 (3,229 males, 2,127 females).

Among Europeans the birth-rate in 1930 was 16·94 per 1000, and deaths 9·45; among Fijians, birth-rate, 36·43, death-rate, 31·24; among Indians, birth-rate, 36·02, death-rate, 12·30; others, birth-rate, 32·38, death-rate, 19·52; marriages, 22·19 of the total population.

Suva, the capital, is on the south coast of Viti Levu: European population (census of April 24, 1921), 1,443, suburbs, 298, total, 1,741.

**Religion and Instruction.**

Attending at Methodist native churches in 1930, 83,105; Roman Catholic Mission, 14,272. The Methodist Mission comprises 18 European missionaries,

23 European mission sisters, 127 native ministers, 293 catechists, 472 teachers, and 3,499 local preachers, 4,989 class leaders, with 701 churches, and 355 other preaching places. The Roman Catholic Mission has 30 European ministers, 16 European teaching brothers, and 287 native teachers, 75 European sisters, 86 churches and chapels, 3 native training institutions, 244 Catechists, 25 native brothers, and 79 native sisters.

In 1930 there were two Government Grammar schools for European children at Suva, one for boys and one for girls, with a total roll number of 359. In Levuka there is a Government school for both boys and girls, at which 133 were on the roll in 1930: and two others at Rarawai and Tailevu with a roll number of 43. Besides these the Roman Catholic Mission has three schools for Europeans. The Queen Victoria School (a Government school), and six Provincial Schools (supported by Government), are boarding schools for Fijian boys. There were 508 pupils in 1930. ### Shipping and Communications.

During 1930 the number of merchant vessels entered at the ports of entry was 182 steamers of 744,807 tons, and 9 sailing vessels of 948 tons. Total tonnage entered and cleared in 1930, 1,481,955 (British 1,072,671).

There is a private small-gauge railway of 120 miles from Tavua to Sigatoka.

There is telegraphic communication between Suva and Levuka, 54 miles, of which 11½ miles are by submarine cable, and an overland telephone from Suva to Lautoka, 125 miles. Wireless telegraph stations have been erected at Suva, Labasa, Waiyevo (Taveuni) and Savusavu. There is direct cable communication with Canada, Australia and New Zealand, and direct wireless communication with Australia.

The Government Savings Bank had, at the end of 1930, 9,977 depositors, whose deposits amounted to 170,172*l.* The headquarters are at the General Post Office, Suva, and there are seventeen branches throughout the Colony.

The Bank of New South Wales has three branches and the Bank of New Zealand has two in the Colony. The currency in circulation consists of Government notes and English coins of pre-war fineness. The currency notes in circulation on December 31, 1930, amounted to 436,984*l.* The gold reserve in the note guarantee fund amounted to 88,481*l.*, and the securities forming the investment portion of the fund to 353,101*l.*

Money, weights, and measures are the same as in the United Kingdom.

## PACIFIC ISLANDS.

### TONGA.

#### (FRIENDLY ISLANDS.)

The Tonga or Friendly Islands continued up to 1899 to be a neutral region in accordance with the Declaration of Berlin, April 6, 1886. By the Anglo-German Agreement of November 14, 1899, subsequently accepted by the United States, the Tonga Islands were left under the Protectorate of Great Britain. A Protectorate was proclaimed on May 18, 1900, and a British Agent appointed. British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tongan courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner.

*Queen*.—Salote, succeeded on the death of her father, George II, on April 12, 1918.

There is a Legislative Assembly which meets annually, composed of seven nobles elected by their peers, seven elected representatives of the people, and the Ministers of the Crown, numbering eight, or twenty-three members including the Speaker. The elections are held triennially.

The kingdom consists of 3 groups of islands, called respectively Tongatabu, Haapai (which are low-lying groups of coral formation), and Vavau (which is high and mountainous), together with the outlying islands of Niuafoou, Tafahi, and Niuafoou, and lies between 15° and 23° 30' south, and 173° and 177° west, its western boundary being the eastern boundary of Fiji. The main group was discovered by Tasman in 1643. The climate is mild and healthy, malaria being unknown. The temperature during seven months of the year, from May to November, rarely exceeds 84° F. in the shade, and seldom, even in the hottest part of summer, exceeds 90° F. Total area, approximately 385 square miles; capital, Nukualofa; population, estimated at the end of 1930, 28,431 Tongans, 480 Europeans, 350 half-castes, and 350 other Pacific islanders. The natives are Christian, there being about 22,000 adherents of the Wesleyan Free Church of Tonga, 3,000 of the Free Church, and 3,000 Roman Catholics. The native Tongans enjoy free education, free medical attendance and dental treatment. At the end of 1930 there were 73 Government and 44 denominational primary schools, with an average daily attendance throughout the year of 4,999 pupils. At Tonga College there were 9 teachers, 3 Europeans, and 6 Tongans, and the number of pupils averages 220. The revenue amounted in 1930-31 to 71,672*l.*, and the expenditure to 78,660*l.* Native produce consists almost entirely of copra; the export in 1930 amounted to 14,134 tons, valued at 169,610*l.*, most of which was shipped to the U.K. and Continental ports. Total imports, 1930, 148,306*l.*; total exports, 169,610*l.* The imports include drapery, flour, kerosene, benzene, biscuits, fish, hardware, timber, sugar, meats; and the exports copra. The trade is with Great Britain, New Zealand, Australia, Fiji, Europe and the United States of America. Steamer communication

with the outside world consists of one vessel of the Union Company's Fleet which maintains a four-weekly service with New Zealand, via Fiji and Samoa, in addition to which steam vessels of the Clan and other lines visit the group for shipments of copra. During 1930, 28 vessels entered and cleared: total tonnage 163,023, of which 120,834 tons were British. There is a wireless station at Nukualofa which keeps up telegraphic communication through Samoa or Fiji, and sub-stations at Vavau, Haapai, Nuiatoua and Nuiatoputabu, which communicate only with Nukualofa. There is a telephone system in Nukualofa.

Since 1906 British coin has been legal tender. There is a Government note issue. The weights and measures are the same as in Great Britain. Accounts are kept in pounds, shillings, and pence.

*High Commissioner and Consul-General for the Western Pacific.*—Sir A. G. M. Fletcher, K.C.M.G.

*Agent and Consul.*—J. S. Neill.

The High Commissioner of the Western Pacific, assisted by deputies, has jurisdiction, in accordance with an Order in Council of 1893, for the purpose of carrying out the provisions of the Pacific Islanders' Protection Acts of 1872 and 1875, and to settle disputes between British subjects living in these islands. The jurisdiction of the High Commissioner extends over all the Western Pacific not within the limits of Fiji, Queensland, or New South Wales, or the jurisdiction of any civilised Power, and includes the Southern Solomon Islands, and the various small groups in Melanesia.

In the sections devoted to New South Wales and New Zealand mention is made of various annexed Pacific Islands. The following summary (omitting islands described elsewhere) gives the names and positions of islands which are unattached:—

**Ducie Island**, 24° 40' S. lat., 124° 48' W. long.

**Pitcairn Island**, 25° 5' S., 130° 5' W.; area 2 sq. m.; pop. in 1914, 140 (35 adult males, 39 adult females, 66 children). The affairs of the island are conducted by a Council of 7 members, with a President, who acts also as Chief Magistrate, and a Vice-President, who is also Government Secretary, subject to the control of the High Commissioner for the Western Pacific. In religion the islanders (descendants of the mutineers of the *Bounty*) are 'Seventh Day Adventists.' The products of the island are sweet potatoes, beans, sugar cane, yams, taro, melons, pumpkins, oranges, bananas, pineapples, and arrowroot, which is prepared in limited quantities with antiquated appliances. Excellent coffee also grows. The island is well stocked with goats and poultry.

**Phoenix Group**, between 2° 30' and 4° 30' S. lat., and 171° and 174° 30' W. long. Eight islands: Mary, Enderbury, Phoenix, Birney, Gardner, McKean, Hull, Sydney; area of group, 16 sq. m., pop. 59.

**Gilbert and Ellice Islands Colony.** The islands in this group were proclaimed as Protectorates in 1892 and annexed (at the request of the native Governments) as Gilbert and Ellice Islands Colony, on November 10, 1915. The Colony includes several groups of islands. (1) The **Ellice Islands**, between 5° 30' and 11° 20' S. lat., and 176° and 180° E. long. (population June 30, 1927, 3,741). The principal islands are Funafuti, Nukufetau, Vaitupu, Nui (or Netherland), Niutao (or Lynx or Speiden), Nanumaga (or Hudson), Nanumea (or St. Augustine), Nukulaelae (or Mitchell); Nura-kita; area of group, 14 sq. m. (2) **Fanning Island**, 8° 50' N., 159° W.

area 15 sq. m.; **Washington Island**, 4° 40' N., 160° 20' W., area 6 sq. m., population of the two islands, June 30, 1927, 517, including 37 Europeans; and **Ocean Island** (population June 30, 1927, 2,467, including 113 Europeans and 456 Asiatics). The last-named island is the Colony headquarters. It is situated 0° 52' S., and 169° 35' E., is six miles in circumference, and was annexed by Great Britain in 1901. The island is exceedingly rich in high-grade phosphate, which is worked by the British Phosphate Commission, who purchased the rights of the Pacific Phosphate Company in 1921. A wireless station on the island maintains telegraphic communication via Fiji and Australia. (3) **Christmas Island**, situated roughly 2° N. lat., and 157° W. long., discovered by Cook in 1777, annexed by Great Britain in 1888, and included in the Colony in November, 1919, is the largest atoll in the Pacific, being over 100 miles in circumference. It is leased to the Central Pacific Coconut Plantations, Ltd., for a term of 87 years from January 1, 1914. Population 1927, European, 5, natives, 18. The **Gilbert Islands**, on the equator (population 1927, 23,586). The principal islands are Butaritari, Makin, Tarawa, Abaiang, Marakei, Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nukunau, Onotoa, Tamana, and Arorae. Area, 166 sq. m.; population at 1921 census: 264 Europeans, 29,285 Pacific Island natives, and 348 Asiatics; total, 29,897 (including 14,205 females). The Administration maintains two native boys' schools—the King George V. School at Tarawa, Gilbert Islands, with 90 pupils, and a school at Vaitupu, Ellice Islands, with 60 pupils. A school for native boys on Ocean Island has been maintained since 1920 out of Banaban phosphate royalties. Village schools for native boys and girls throughout the Gilbert and Ellice Groups are kept up by the London Missionary Society and the Society of the Sacred Heart. Revenue of the Colony for the year ended June 30, 1929, 73,712*l.*, of which the principal items were: Customs, 28,097*l.*; native taxes, 10,308*l.*; licences, &c., 16,060*l.*; fees of court, &c., 3,269*l.*; royalty on phosphates, 5,988*l.*; interest on investments, 2,273*l.*; post office and telegraphs, 1,415*l.*; miscellaneous, 5,739*l.*; Imperial grant, 563*l.* The expenditure for the same period amounted to 60,595*l.* Principal crops: pandanus fruit and coconuts. The trade in 1927-28 amounted to 190,436*l.* for imports, and 348,272*l.* for exports (phosphate, 233,820 tons, 292,275*l.*; copra, 4,122 tons, 55,657*l.*). The Colony is administered by the High Commissioner through a Resident Commissioner, whose headquarters are at Ocean Island.

*Resident Commissioner*—A. F. Grimble.

**British Solomon Islands**, about 8° S. and 160° W., are Guadalcanar, Malaita, Ysabel, San Cristoval, New Georgia, Choiseul, Shortland, Mono (or Treasury), Vella Lavella, Ronongo, Gizo, Rendova, Russell, Florida, Rennell, and numerous small islands (the Lord Howe Group or Ontong Java, the Santa Cruz Islands, Tucopia and Mitre Islands, and the Duff, or Wilson Group, are also included in the Solomon Islands Protectorate). The total area of land and sea included in the B.S.I. Protectorate boundaries is approximately 375,000 square nautical miles. Population (census 1931), Europeans, 497; Aliens, 193; native population, 90,719. They are under British Protection. Education is entirely in the hands of missions. Revenue, for the year ended March 31, 1931, 62,728*l.*; expenditure, 67,816*l.* Coconuts, rubber, sweet potatoes, pine-apples, bananas are grown. The value of imports in 1930-31 was 215,269*l.*; and of exports, 304,310*l.* (mainly copra, 23,681 tons, 271,828*l.*; trocas shell, 294 tons, 13,332*l.*; ivory nuts, 724 tons, 5,653*l.*; timber logs, 786,639 square ft., 4,683*l.*). Vessels entered, 1929-30, 74,891 tons (61,899 British); cleared, 74,830 tons (British 61,338 tons).

A paper currency was issued in 1917-18. Little gold is in circulation, and only 4,600*l.* Protectorate paper money. The chief medium of exchange is Commonwealth bank notes. There is a Resident Commissioner, whose headquarters are at Tulagi, a small island off the south coast of Florida. A nominated Advisory Council assists in the administration. (For part of the Solomon Islands lately owned by Germany and now administered by Australia, see section on late German New Guinea below.)

*Resident Commissioner.*—F. N. Ashley.

**Starbuck Island**, 5° 30' S. lat., 155° W. long.; area 1 sq. m., uninhabited. **Malden Island**, 4° S. lat., 155° W. long.; area 35 sq. m., contains a considerable deposit of guano. **Jarvis Island**, on the equator, 159° W., area 1½ sq. m., pop. 30. **Palmyra**, 6° N., 162° 30' W., area 1½ sq. m. **Baker Islands**, on the equator.

These islands are mostly of coral formation; most of them grow coconut trees, and some of them are valuable for their guano.

The **New Hebrides Group** lies roughly 500 miles west of Fiji and 250 miles N.E. of New Caledonia. Estimated area 5,700 square miles. The group is under joint administration of English and French officials, as provided for by Anglo-French Convention of February 1906, ratified October 1906, and a Protocol signed at London on August 6, 1914, and ratified on March 18, 1922. The interests of British, French, and natives, respectively, are guaranteed; the conditions of land-holding in the Islands fixed; and the regulation of the recruitment of native labour provided for. Within the Islands Great Britain is represented by a High Commissioner, who delegates his powers to a Resident Commissioner stationed in the group.

The larger islands of the group are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna and Aneityúm. There are three active volcanoes, on Tanna, Ambrym and Lopevi, respectively. Earthquake shocks are of common occurrence. The native population of the group is about 50,000. On Malekula, Santo and Pentecost cannibalism is still practised. White population 1930: British 219, French 931. Foreigners, including Asiatics, who have opted for British regime 51, and for French regime 5,030. With the latter are included 40 Javanese, 500 Chinese, and 5,396 Tonkinese coolies under indenture to the French. There are numerous Presbyterian and Catholic mission native schools; one French Government school and two Catholic mission schools for whites. Public revenue: Condominium service, 1930: 20,152*l.*; public expenditure: British service, 1929-30 (to March 31), 9,506*l.*; Condominium service, 1930, 28,140*l.*

Area under cultivation: British, 3,000 acres; French, 40,000 acres. British acreage under cultivation is composed principally of coconuts and a few hundred acres under cotton. French acreage under cultivation includes coconuts, about 20,000 acres; cocoa, 8,000 acres; cotton, 5,500 acres; coffee, 2,000 acres.

Bananas, sugarcane, oranges and all tropical fruits grow well. A small saw-mill has been established on Efate. Kauri pine is found on Aneityúm, but is no longer worked. There are several British and French trading companies operating in the group. Settlers and speculating companies have acquired large areas of land within the islands, the ownership of which is generally disputed, and which in consequence remains undeveloped pending adjudication by the mixed tribunal. Imports, Condominium, 1930: value in French currency, 19,535,138 francs; value in British currency, 157,541*l.* Exports, Condominium: value in French currency, 81,064,480 francs; value in British currency, 250,520*l.* The trade is

mostly with Australia, New Caledonia and France. Principal imports are: Provisions and foodstuffs, clothing, metal-work and furniture; exports: Copra (11,888 tons in 1930, value 130,573*l.*); coffee (125 tons, 7,892*l.*); cocoa (2,265 tons, 73,444*l.*); cotton, (480 tons, 26,880*l.*); maize (455 tons, 3,670*l.*). Import of arms, ammunition, wines and spirits is prohibited except under special permit. There is frequent communication between New Caledonia and Australia, a six-weekly mail service being maintained by the Burns, Philip Line and a five-weekly service by Messageries Maritimes, while a two-monthly service is also maintained by the last-named company with France and the New Hebrides via Tahiti and Panama. The shipping entered and cleared from the Port of Vila during 1930 was: *Entered*:—British, 12,300 tons (18 vessels); French, 104,000 tons (35 vessels); other, 22,900 tons (11 vessels). *Cleared*:—British, 13,000 tons (18 vessels); French, 104,200 tons (37 vessels); other, 22,900 tons (11 vessels).

*British High Commissioner*.—Sir A. G. M. Fletcher, C.M.G.

*French High Commissioner*.—Monsieur Guyon.

*British Resident Commissioner*.—G. A. Joy.

*French Resident Commissioner*.—Monsieur Tronet.

## MANDATED TERRITORIES IN THE PACIFIC: NEW GUINEA, WESTERN SAMOA, AND NAURU ISLAND.

THE former German possessions in the Western Pacific included: Kaiser Wilhelm's Land, Bismarck Archipelago, the German Solomon Islands, Nauru, the Caroline Islands, the Marshall Islands, and the Marianne or Ladrone Islands (excepting the Island of Guam). The islands north of the Equator, namely, the Marshall, Caroline, Pelew, and Ladrone (Marianne) Islands, are now administered by Japan as mandatory. Those south of the

Equator, namely, the Bismarck Archipelago, those of the Solomon Islands formerly owned by Germany, and (late) German New Guinea (Kaiser Wilhelm's Land), are assigned to Australia, German Samoa to New Zealand, and Nauru, a small islet just south of the Equator, to the British Empire.

### THE MANDATED TERRITORY OF NEW GUINEA.

The Territory has an area of 93,000 square miles, extending from the Equator as far as 8° south latitude, and from 141° east longitude as far as 160° east longitude. An Australian force occupied these Possessions on September 12, 1914. The mandate from the League of Nations (see p. xxvii, *THE STATESMAN'S YEAR BOOK*, 1929) is dated December 17, 1920, and on May 9, 1921, the Australian Government established its civil administration in the Territory. The laws of the Commonwealth, subject to local modifications as necessary, may be applied to the mandated territories. The military training of the natives, except for local police purposes, is prohibited, and no naval or military base or any fortifications may be established.

The estimated non-indigenous population at June 30, 1930, was 4,155, of which the British numbered 1,992, Chinese 1,238, Dutch 209, German 348, Japanese 45, and United States of America 116. The number of persons engaged in agricultural pursuits was 506, and in mining pursuits 200 (approximately). The counted native population was 400,135.

Inter-island trade is carried on by small steamships and motor-schooners. There is a three-weekly service from Australia to Rabaul.

The total area under cultivation in the Mandated Territory at June 30, 1930, was 204,000 acres. The greater part of this area was planted with coconuts (about 198,000 acres). Coffee, cocoa and kapok are also grown. Tropical fruits grow very abundantly. The staple articles of food of the natives are yams, taro, sago, and bananas. There is very little land used for pasture. The land is rich in mineral wealth, but no minerals, except gold at Bulolo, are worked on account of the difficulty of transporting mining machinery. Native labour is used to work the plantations, and the natives are recruited either from the adjacent villages or from other parts of the Possessions. There are some 19,872 native labourers so recruited for plantation purposes. The total indentured labour in the territory on June 30, 1930, was 30,130.

*Administrator of the Territory of New Guinea.*—Brigadier-General E. A. Wisdom, C.B., C.M.G., D.S.O., V.D.

The seat of Administration is at Rabaul, New Britain.

1. **North Eastern New Guinea.** This territory, the northern section of south-east New Guinea, lies between 2° 35' and 8° south latitude, and 141° and 148° east longitude. The area, including Manam, Karkar, Long, Bagabag, Schouten, Kairiru (D'Urville), and some smaller islands, is 69,700 square miles. The native population in 1930 for areas explored was, counted, 197,048. It was declared a German Protectorate in 1884, and was under the control and development of the New Guinea Company from 1885 to 1899. The principal station on the mainland is at Salamaua. The coast-line is very little broken, and there are few good harbours. There are high ranges running parallel with the coast plain, which is from 20 to 100 miles wide and broken with steep spurs in some places extending to the actual coast-line. The ranges in the interior have been little explored, and some of their summits are known to exceed 12,000 feet. The principal rivers are the Sepik, which is navigable for over 250 miles, the Ramu or Ottilien, and the Markham. The climate is hot and the rainfall large. There are

three missionary societies at work; these missions are also planters and traders.

The chief towns are: Madang and district (non-indigenous population, 198); Salamaua and district (non-indigenous population, 135); Aitape and district (non-indigenous population, 49); The Wau (non-indigenous population 250).

**2. Bismarek Archipelago.**—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, and in May, 1885, they were renamed the Bismarek Archipelago. The Archipelago lies between  $140^{\circ} 30'$  and  $156^{\circ}$  east longitude, and the Equator and  $8^{\circ}$  south latitude. The chief islands are New Britain, area 14,600 square miles; New Ireland, area 2,800 square miles; Lavongai (late New Hanover), 460 square miles; Duke of York Islands, area 22 square miles; the Admiralty Islands (principal island, Manus), area 663 square miles. The other groups included in this Archipelago are Mussau Islands, Gardner Islands, Nuguria, Nissan Island, the Vitu Islands, Umboi Islands, Hermit Islands, Ninigo Group, Kaniet and Sae Islands. In these various groups there are upwards of 100 small islands, having a total area of 1,115 square miles. The native population of the Archipelago in 1929 of areas patrolled was 129,074.

**New Britain**, the largest island of this group, is a long island of crescent shape lying east and west. It has a mean breadth of 50 miles and a length of 300 miles. The island is practically undeveloped except for 63,700 acres under cultivation chiefly on the Gazelle Peninsula in the north, four plantations on the northern coast, and six plantations on the southern coast, west of Henry Reid Bay. A Government station, named Gasmata (non-indigenous population 16), has been established about midway along the southern coast. Talasea (non-indigenous population 34) is situated on the north coast. The interior of the island is little known. The native population of areas patrolled in 1930 was 81,537. A mountain chain traverses the entire length of the island, and in the centre consists of several irregular ranges. There are several active volcanoes. The highest known peak is the Father, about 7,500 feet high, which is an active volcano. The island has very fine harbours. The only one visited by oversea shipping is Simpson Harbour, in Blanche Bay. The principal settlement is around the shores of this bay. The chief product is copra, but cocoa and coffee are now being extensively planted. There are three missionary societies at work. The chief town is Rabaul (non-indigenous population, 1,800), which is the seat of the Government. The old capital was at Kokopo (non-indigenous population, 350), which is situated 14 miles south-east of Rabaul. At Rabaul there is an anchorage for all ships and a fine jetty has been built. Rabaul is well laid out and has a fine public garden. New Britain and the adjacent islands, including Duke of York Island, have an area of 14,600 square miles.

**New Ireland**, the second in size and importance of the Bismarek Archipelago, is situated north of New Britain, from which it is separated by St. George's Channel. The chief town is Kavieng (non-indigenous population, 856), at the north-west extremity of the island. The only other town is Namatanai (non-indigenous population, about 148), on the south-east coast. The island has a long range of mountains running through it. It is of older formation than New Britain, and does not show any signs of recent volcanic activity. The principal harbour is Nusa, on the north coast of which Kavieng, the seat of the local administration, is situated. The interior of the island, with the exception of the extreme southern end, is fairly well known. The

native population in 1930 was 38,416, including adjacent islands. The soil is fertile and the climate similar to that of New Britain. The chief industry is coconut growing. There are numerous plantations around the coast near Kavieng. New Ireland and adjacent islands, including Lavongai, Tabar, Litui, Tanga, Feni, Mussau and Emirau Groups have an area of 3,800 square miles.

The Admiralty Islands are the most important of the small groups. The chief island is Manus, sometimes called Great Admiralty Island. The chief town is Lorengau (population, including district, about 40) on the north-east coast. The native population of the group in 1930 was 14,067. Coconuts are the chief article of cultivation, and there are valuable pearl and other shell fisheries.

3. **Solomon Islands.**—The portion of the Solomon Islands within the area of the territory of New Guinea consists of the islands of Bougainville, Buka, and adjacent islands, including Nuguria, Nissan, Kilinailau, Tanu (Mortlock), and Nukumanu (Tasman) Islands. Bougainville has an area of 3,880 square miles, and a native population (of areas patrolled in 1930) of 29,103, and Buka an area of 190 square miles, and a native population, including adjacent islands, 1930, 9,784. Smaller islands in this group have a total area of 30 square miles and a native population in 1930 of 2,224. The islands are very mountainous. Of the several volcanic cones, Bagana (in the Crown Prince range) is the only active volcano. The highest mountain is the dormant volcano Mount Balbi (in the Emperor range), 10,170 feet high, situated in the centre of the island. The principal harbour is Kieta, situated on the east coast of Bougainville, where there is a Government station. Other good harbours are: Rawa and Tinputz on the north-east coast of Bougainville. There is a good harbour on the west side of Buka, named Carola Hafen. Missionary work amongst the natives is carried on by the Marist Brothers of the Roman Catholic Mission. As the plantations are new there is comparatively little export trade. The natives grow bananas, coconuts, taro, and sweet potatoes. The non-indigenous population is 190.

## TERRITORY OF WESTERN SAMOA.

The former German Samoan Islands, now the Territory of Western Samoa, include Savaii and Upolu, the largest of the Samoan or Navigators' Islands. Samoa is a group of islands in the Western Pacific, lying in  $13\frac{1}{2}$  deg. to  $14\frac{1}{2}$  deg. S. lat., and 168 deg. to 173 deg. W. long. The islands are some 130 miles N. of Tonga and between 400 and 500 miles N.E. of Fiji. The group consists of nine islands, in addition to rocks and islets. They are all, with the exception of Rose Island, of volcanic formation, and are, for the most part, surrounded with coral reefs. The four largest islands are Savaii, Upolu, Tutuila and Tau, in the Manu'a Group. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savaii, Upolu, Apolima and Manono, and in favour of the United States as regards Tutuila and other islands.

On August 29, 1914, the British occupied German Samoa. By the Treaty of Peace, 1919, Germany surrendered her possessions abroad, and Samoa is assigned under a mandate dated December 17, 1920, from the League of Nations to His Majesty the King in right of his Dominion of New Zealand, which has been empowered to govern Western Samoa. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established.

The civil administration was inaugurated on May 1, 1920. There is a Legislative Council, consisting of six official members, two elected European unofficial members, and two nominated native members representing the Samoan race. The Administrator is entitled to preside over every meeting of the Council. No person is qualified for appointment to the Legislative Council unless he is either a natural-born British subject or was born in Samoa. There is also a Native Council which advises the Administrator in native affairs.

Savaii has an area of about 700 square miles; Upolu has an area of approximately 430 square miles. Both islands are mountainous, fertile, and well watered. Several adjacent islets were included in the German dependency. The port of Apia is in Upolu. The inhabitants of the islands are Polynesians, professing Christianity (Protestants, Catholics, and Mormons). Population of Western Samoa, as recorded at December 31, 1930, was:—Europeans and half-castes, 1,815; Samoan natives, 41,668; Chinese labourers under contract, 915; other islanders, 137; total, 44,535. There are four

Government schools, and also schools conducted by various Missions—the number of scholars recorded being over 11,000. There are 60 miles of good roads. The chief products are copra, cacao, and bananas. Rubber is cultivated but not exported at present. The revenue collected in Western Samoa for the year ended March 31, 1931, was 151,385*l.*; the expenditure was 140,288*l.* Imports for 1930, 275,355*l.* (from United Kingdom, 47,183*l.*, New Zealand, 81,388*l.*, Australia, 58,653*l.*, Canada, 15,035*l.*, Fiji, 9,333*l.*, U.S.A., 54,369*l.*); exports, 284,515*l.* (to United Kingdom, 10,199*l.*, New Zealand, 47,986*l.*, U.S.A., 108,850*l.*, Germany, 1,900*l.*, European ports (exact destination unknown), 111,261*l.*). The exports are mainly copra (12,285 tons, 166,221*l.*), cacao beans (1,007 tons, 61,294*l.*), and bananas (95,867 cases, 44,259*l.*). In 1930, 113 vessels (113,462 tons, of which 93 vessels of 11,598 tons were British) entered at and cleared from the port of Apia.

There is regular steam communication from New Zealand and Fiji, and the products of the territory are transported to overseas markets by steam and oil vessels which call at Apia every few weeks. A high power wireless station is erected at Apia.

The German currency has been replaced by sterling in the form of Samoan Treasury notes issued under the authority of the New Zealand Government. A branch of the Bank of New Zealand was opened at Apia in April, 1915.

The Minister of External Affairs for New Zealand is in charge of Samoa.

## NAURU ISLAND.

The island lies 26 miles south of the Equator, in longitude 166 degrees east. Area, 5,396 acres. It is an oval shaped atoll of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide. There is no anchorage adjacent to the island. On the seaward side the reef dips abruptly into the deep waters of the Pacific. On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 200 to 800 yards and completely encircling the island. On the inner side of the fertile section there is a coral cliff which rises to a height of from 40 to 60 feet. Above the cliff there is an extensive plateau bearing phosphate of a high grade, the mining rights of which are vested in the British Phosphate Commission subject to the rights of the native landowners. It is chiefly on the fertile section of land between the sandy beach and the plateau that the natives have established themselves, and from which they obtain the necessary food for themselves and families. With the exception of a small fringe round a shallow lagoon, about one mile inland, the plateau, which contains the phosphate deposits, has few food-bearing trees and is not utilized for the purposes of native villages.

The island was annexed by Germany in October, 1888, and surrendered to the Australian forces in 1914. It is administered under a mandate, dated December 17, 1920, conferred on the British Empire and approved by the League of Nations. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established. Great Britain, Australia and New Zealand agreed in July, 1919, that Australia should appoint the first Administrator for a term of five years, and thereafter the administrator was to be appointed as the three Governments should decide. The administrator has all the powers of government, administrative, legislative and judicial. The expenses of administration are met out of local revenue.

Population, April 1, 1931: 147 Europeans, 1,426 Nauruans, 14 other Pacific islanders, and 1,105 Chinese; total, 2,692.

**Education.**—Attendance at school both for European and Native children is compulsory until children reach the age of 16 years; then, until they reach the age of 17 years, the native children are required to attend at specified periods for technical training in the case of boys and home craft training in the case of girls.

**Finance.**—The revenue and expenditure of the island have been as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1925	15,174	15,256	1928	19,903	18,267
1926	16,424	13,963	1929	19,936	17,859
1927	17,041	17,242	1930	18,992	15,532

Excess of assets over liabilities as at December 31, 1930, 21,331*l*.

Import duties are imposed on beer, spirits, wines, and tobacco, and a 15% *ad valorem* duty on practically all other goods except food supplies which are admitted free. The interests in the phosphatic deposits were purchased in 1919 from a German company by the Government of the United Kingdom, the Commonwealth of Australia and New Zealand, at a cost of 3,500,000*l*., and a Commission was appointed to ensure that the deposits were worked on business lines. The British Phosphate Commission receives exemption from Customs duties for all materials and plant used for the exploitation of phosphates, as well as for provisions required for its employees. An amount at the rate of 6*d*. per ton, in effect an export duty, is charged on phosphate exported. A Capitation Tax of 2*l*. for Europeans, 1*l*. for Chinese, 15*s*. for natives is collected from all physically fit adult males under the age of 60 years. A Royalty of 7½*d*. per ton is paid by the British Phosphate Commission for every ton of phosphate shipped, of which 4*d*. per ton is paid to the native landowner, 1½*d*. per ton is paid to the Administrator to be used solely for the benefit of the Nauruan people, and 2*d*. per ton is paid to the Administrator in trust and invested for the benefit of the landowner or his assigns, to whom the interest will be paid after the principal has been invested for a period of 20 years. The British Phosphate Commission also contributes 1,000*l*. per annum towards the cost of the Nauruan Police.

**Commerce.**—The export trade of the island consists, with the exception of a small quantity of copra, almost entirely of phosphate, shipped to Great

Britain, Australia, New Zealand and other countries. Phosphate exported (tons): 1927, 318,185; 1928, 318,845; 1929, 326,125; 1930, 271,255; copra exported (tons): 1927, 263; 1928, 181; 1929, nil.; 1930, 3.

The imports consist almost entirely of food supplies, and machinery for the British Phosphate Commission, for use in connection with their works. Value of imports: 1927, 82,649*l.*; 1928, 240,229*l.*; <sup>1</sup> 1929, 101,691*l.*; 1930, 143,416*l.*

**Shipping.**—Practically the whole of the shipping coming to the island consists of steamers under charter to the British Phosphate Commission. Numbers of vessels entered and cleared: in 1927, 75 of 321,126 gross tons; 1928, 73 of 322,551 gross tons; 1929, 64 of 288,393 gross tons; 1930, 57 of 247,422 gross tons.

**Communications.**—The outstanding feature of Nauru, apart from the phosphate operations, is the Wireless Station, erected by the German Government to link up the island with their other Pacific possessions and Tsingtau. It was opened in December 1913, and though partially dismantled shortly after the outbreak of war, was soon restored, and has been in use ever since, although rapidly becoming more or less obsolete. Constant renewals of parts have been made in recent years.

THE UNITED STATES

# UNITED STATES.

(UNITED STATES OF AMERICA.)

## Constitution and Government.

THE Declaration of Independence of the thirteen States of which the American Union then consisted was adopted by Congress July 4, 1776. On November 30, 1782, Great Britain acknowledged the independence of the United States, and on September 3, 1783, the treaty of peace was concluded.

The form of government of the United States is based on the Constitution of Sept. 17, 1787, to which ten amendments were added Dec. 15, 1791; an eleventh amendment, Jan. 8, 1798; a twelfth amendment, Sept. 25, 1804; a thirteenth amendment, Dec. 18, 1865 (slavery abolished); a fourteenth amendment, July 28, 1868; a fifteenth amendment, March 30, 1870 (equal rights for white and coloured citizens); a sixteenth amendment, February 25, 1913 (income tax authorised); a seventeenth amendment, May 31, 1913; an eighteenth amendment, January 29, 1919 (liquor prohibition amendment); and a nineteenth amendment, August 26, 1920 (woman suffrage).

By the Constitution, the government of the nation is entrusted to three separate authorities, the Executive, the Legislative, and the Judicial. The executive power is vested in a President, who holds his office during the term of four years, and is elected, together with a Vice-President chosen for the same term, in the mode prescribed as follows:—‘Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the State may be entitled in the Congress: but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.’ The practice is that in every State the electors allotted to the State are chosen by direct vote of the citizens on a general ticket, on the system known in France as *scrutin de liste*. The Constitution enacts that ‘the Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States’; and further, that ‘no person except a natural-born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States.’

The quadrennial election is held every fourth (leap) year. Electors are chosen in the several States on the Tuesday after the first Monday in November; the electors meet and, in accordance with an amendment to the Statutes adopted by the 70th Congress, give their votes at their respective State capitals on the first Wednesday in January next following their appointment; and the votes of the electors of all the States are opened and counted in the presence of both Houses of Congress on the second Wednesday in February. The presidential term begins on March 4, in the year following leap years.

The President is commander-in-chief of the army and navy, and of the militia when in the service of the Union. The Vice-President is *ex-officio* President of the Senate; and in the case of the death or resignation of the President, he becomes the President for the remainder of the term.

*President of the United States.*—Herbert Clark Hoover, of California, born in Iowa, 1874; graduated mining engineer, Leland Stanford Jr. University,

By a law which came into force Jan. 19, 1886, in case of removal, death, resignation, or inability of both the President and Vice-President, the Secretary of State, and after him, in the order of the establishment of their departments, other members of the Cabinet, shall act as President until the disability of the President is removed or a President shall be elected. On the death of a Vice-President the duties of the office shall fall to the President *pro tempore* of the Senate, who receives the salary of the Vice-President.

The administrative business of the nation is conducted by ten chief officers, or heads of departments, who form what is called the 'Cabinet.' They are chosen by the President, but must be confirmed by the Senate. Each of them presides over a separate department, and acts under the immediate authority of the President. They are, in the order prescribed by law for their succession to the Presidency, in case both the President and the Vice-President die or become unable to take office :—

1. *Secretary of State.*—Henry L. Stimson, of New York, born in New York, 1867; graduated Yale University, 1888, and Harvard Law School, 1890; U.S. District Attorney, New York City, 1906-1909; Secretary of War, 1911-1913; Special Commissioner to Nicaragua, 1927; Governor-General of Philippine Islands, 1927-1929. Present appointment, March 4, 1929.

2. *Secretary of the Treasury*.—Ogden Livingston Mills, of New York, born in Rhode Island, 1884; educated at Harvard University; lawyer; elected to State Senate, 1914 and 1916; elected to 67th Congress, 1921–23; served in American Expeditionary Force in France, 1918–19. Appointed Assistant Secretary of Treasury. Appointed by President Hoover, February 10, 1932, to succeed A. W. Mellon.

3. *Secretary of War*.—Patrick J. Hurley, of Oklahoma, born 1882. Lieut.-Colonel in American Expeditionary Force in France. Delegate to the Republican National Convention, 1924. Present appointment, December 6, 1929.

4. *Attorney-General*.—William De Witt Mitchell, of Minnesota, born in Minnesota, 1874; graduated University of Minnesota, 1895. Lawyer. Judge Advocate. 2nd Army Corps, 1898–1899; Col. 6th Minnesota Regiment, 1918. Solicitor-General of the United States, 1925–1927. Present appointment, March 4, 1929.

5. *Postmaster-General*.—Walter F. Brown, of Ohio, born in Ohio, 1869; graduated Harvard University, 1892. Lawyer; Chairman Republican Committee of Ohio. Assistant Secretary of Commerce, 1927–1929. Present appointment, March 4, 1929.

6. *Secretary of the Navy*.—Charles Francis Adams, of Massachusetts; born in Massachusetts, 1866; graduated Harvard University, 1888; lawyer and amateur yachtsman. Treasurer of Harvard University, 1899–1929. Present appointment, March 4, 1929.

7. *Secretary of the Interior*.—Ray Lyman Wilbur, of California, born in Iowa, 1875; graduated Leland Stanford University, 1896, and Cooper College of Medicine, 1899. Professor, Leland Stanford University and President since 1916. Chief of Conservation Division, U.S. Food Administration, 1917–1918. Present appointment, March 4, 1929.

8. *Secretary of Agriculture*.—Arthur M. Hyde, of Missouri, born in Missouri, 1877; graduated University of Michigan, 1899. Mayor of Princeton, Mo.; Governor of Missouri, 1921–1925. Present appointment, March 4, 1929.

9. *Secretary of Commerce*.—Robert P. Lamont, of Illinois, born in Michigan, 1867; graduated University of Michigan, 1891. Engineer; iron and steel manufacturer. Chief of division, ordnance department, U.S.A., 1917–1918. Present appointment, March 4, 1929.

10. *Secretary of Labour*.—William Nuckles Doak, of Virginia, President of the Brotherhood of Railroad Trainmen. Present appointment, November 28, 1930.

Each of the above ministers has an annual salary of 15,000 dollars, and holds office during the pleasure of the President.

The whole legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives. The Senate consists of two members from each State, chosen by popular vote for six years. Senators must be not less than thirty years of age; must have been citizens of the United States for nine years; and be residents in the States for which they are chosen. Besides its legislative functions, the Senate is entrusted with the power of ratifying or rejecting all treaties made by the President with foreign Powers, a two-thirds majority of senators present

being required for ratification. The Senate is also invested with the power of confirming or rejecting all appointments to office made by the President ; and its members constitute a High Court of Impeachment. The judgment in the latter case extends only to removal from office and disqualification. The House of Representatives has the sole power of impeachment.

The House of Representatives is composed of members elected every second year by the vote of citizens who, according to the laws of their respective States, are qualified to vote for members of the State legislature. By amendments of the Constitution, disqualification on the ground of race, colour, or sex, is forbidden. Accordingly the electorate consists practically of all citizens of both sexes over 21 years of age. But the franchise is not universal. There are requirements of residence varying in the several States as to length from three months to two years ; differing requirements as to registration ; in some States the payment of taxes is necessary to qualify for the suffrage ; in others the ability to read—in Massachusetts the ability to read English. In some Southern States they are required to give a reasonable explanation of what they read. Some of the Western States admit to the franchise unnaturalised persons who have formally declared their intention to become citizens. Several of the Southern States have adopted methods—which differ from one another—too complicated for explanation here, with the frankly avowed purpose of excluding the negroes from the franchise and yet avoiding the constitutional consequences of discriminating 'on account of race, colour, or previous condition of servitude.' Untaxed Indians are excluded from the franchise, in most States convicts, in some States duellists and fraudulent voters. Women by the 19th amendment to the Federal Constitution, passed in 1920, have the vote and eligibility for both the Federal and the State Legislatures on the same terms as men.

The number of Representatives to which each State is entitled is determined by the decennial census. By the Apportionment Act following the census of 1910 the number of representatives was 433 (one for every 210,415 inhabitants), but in 1912, with the admission of Arizona and New Mexico, it became 435, distributed as follows :—

Alabama . . . 10	Maryland . . . 6	Oregon . . . 3
Arizona . . . 1	Massachusetts . . 16	Pennsylvania . . 36
Arkansas . . . 7	Michigan . . . 13	Rhode Island . . 3
California . . . 11	Minnesota . . . 10	South Carolina . . 7
Colorado . . . 4	Mississippi . . . 8	South Dakota . . 3

Kentucky . . . 11	North Dakota . . . 3	
Louisiana . . . 8	Ohio . . . 22

		Total . 435

According to the census of 1920, the number of members of Congress should be 460, but no new apportionment has been made by Congress since

1912. The census of 1930, while leaving the total membership at 435, would alter the present representation of 36 out of the 48 States; it must, however, be ratified by Congress before becoming effective. Rural districts send 268 representatives to Congress and urban districts only 160, despite the fact that the 1930 census showed 56·2 per cent. of the population living in urban districts.

According to the terms of the Constitution, representatives must be not less than twenty-five years of age, must have been citizens of the United States for seven years, and be residents in the States from which they are chosen. In addition to the representatives from the States, the House admits a 'delegate' from each organised Territory, who has the right to speak on any subject and to make motions, but not to vote. The delegates are elected in the same manner as the representatives.

Each of the two Houses of Congress is made by the Constitution the 'judge of the elections, returns, and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member.

The Congress of the United States has the power to propose alterations in the Constitution, by the 5th article of the same. The article orders that the Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to the Constitution, or, on the application of the Legislatures of two-thirds of all the States, shall call a convention for proposing the amendments, which in either case shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or other mode of ratification may be proposed by Congress.

The salary of a senator, representative, or delegate in Congress is 10,000 dollars per annum, with an allowance, based on distance, for travelling expenses. The salary of the Speaker of the House of Representatives is 12,000 dollars per annum.

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the United States which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the United States can be a member of either House during his continuance in office. No religious test is required as a qualification to any office or public trust under the United States, or in any State.

The period usually termed 'a Congress' in legislative language continues for two years; as, for example, from noon, March 4, 1931, until noon, March 4, 1933, at which latter time the term of the representatives to the 72nd Congress will expire, and the term of the new House of Representatives will begin. The term of one-third of the Senators expires at the same time.

The 72nd Congress (1931-33), elected November, 1930, is constituted as follows: Senate, 48 Republicans, 47 Democrats, 1 Farmer Labour; House of Representatives, 218 Democrats, 214 Republicans, 1 Farmer Labour, 2 vacant.

The National Government has authority in matters of general taxation, treaties and other dealings with foreign powers, army, navy, and (to a certain extent) militia, commerce, foreign and inter-State, postal service, coinage, weights and measures, and the trial and punishment of crime against the United States.

Slavery was abolished throughout the whole of the United States by the thirteenth amendment of the Constitution, passed December 18, 1865. The vast change in the political and social organisation of the Republic made by this new fundamental law was completed by the fourteenth and fifteenth

amendments of the Constitution, passed in 1868 and 1870, which gave to the former slaves all the rights and privileges of citizenship.

#### STATE AND LOCAL GOVERNMENT.

The Union comprises 13 original States, 7 States which were admitted without having been previously organised as Territories, and 28 States which had been Territories—48 States in all. Each State has its own constitution, which must be republican in form, and each constitution derives its authority, not from Congress, but from the people of the State. Admission of States into the Union is granted by special Acts of Congress, either (1) in the form of 'enabling Acts,' providing for the drafting and ratification of a State constitution by the people, in which case the Territory becomes a State as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each State is provided with a Legislature of two Houses, a Governor, and other executive officials, and a judicial system. Both Houses of the Legislature are elective, but the Senators (having larger electoral districts) are less numerous than the members of the House of Representatives, while in some States their terms are longer and, in a few, the Senate is only partially renewed at each election. Members of both Houses are paid at the same rate, which varies from 150 to 1,500 dollars per session, or from 1 to 8 dollars per day during session. The duties of the two Houses are similar, but in many States money Bills must be introduced first in the House of Representatives. The Senate has to sit as a court for the trial of officials impeached by the other House, and, besides, has often the power to confirm or reject appointments made by the Governor. In most of the States the sessions are biennial, the Governor having power to summon an extraordinary session, but not to dissolve or adjourn. State Legislatures are competent to deal with all matters not reserved for the Federal Government by the Federal constitution, or falling within restrictions imposed by the State constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation, and other corporations, subject only to the right of Congress to regulate commerce passing from one State to another; the regulation of labour; education; charities; licensing; fisheries within State waters, and game laws. The revenues of the States are derived chiefly from a direct tax upon property, in some cases both real and personal, in others on land and buildings only. The prohibition upon Congress to levy direct taxes save in proportion to population, contained originally in the national constitution, left this source of revenue to the States exclusively until 1913, when an amendment was adopted authorising the imposition of an income tax by Congress. In 1929, cost of government of the 48 States was 2,061,016,833 dollars; revenue, 2,059,327,008 dollars; total net indebtedness, 1,661,686,056 dollars. *Per capita* cost was 10·75 dollars compared with 4·19 dollars in 1917. *Per capita* revenue receipts, 1929, were 17·06 dollars.

The Governor is chosen by direct vote of the people over the whole State. His term of office varies in the several States from 2 years to 4 years and his

salary from 3,000 to 25,000 dollars. His duty is to see to the faithful administration of the law, and he has command of the military forces of the State. His power of appointment to State offices is usually unimportant. He may recommend measures, but does not present Bills to the legislature. In some States he presents estimates. In all but two of the States the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some States by a simple majority, in others by a three-fifths or two-thirds majority.

The chief officials by whom the administration of State affairs is carried on (secretaries, treasurers, members of boards of commissioners, &c.) are usually chosen by the people at the General State elections for terms similar to those for which governors hold office.

In the Territories of Hawaii and Alaska there is a local legislature, but any of their Acts may be modified or annulled by Congress. The Governor of a Territory is appointed for 4 years by the President who also appoints the Territorial secretaries and other officials, together with the Territorial judges. Porto Rico, although not designated as a 'territory' in the technical sense, is self-governing. Its government is organised on a system almost identical with that of the Territories. The Philippine Islands are governed by a civil Governor and elected Upper and Lower Legislative Chambers.

The District of Columbia is the seat of the United States Government provided by the State of Maryland for the purposes of government in 1791. It is co-extensive with the city of Washington, and embraces an area of 62 square miles. The district has no municipal legislative body, and its citizens have no right to vote either in national or municipal concerns. By an Act of Congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

The unit of local government in the North, especially in the New England States, is the rural township, governed directly by the voters who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations, and appoint and instruct the local officials (selectmen, clerk, school-committee, &c.). Where cities exist the township government is superseded by the city government. Townships are grouped to form counties, each with its commissioners and other paid officials who have charge of public buildings, lay out highways, grant licences, and estimate and apportion the taxation necessary for county purposes. In the South the counties are themselves the units, though subdivided for educational or other special purposes. Their officials have in general additional functions, as the care of the poor and the superintendence of schools. In the Middle and North-Western States the two systems of local government are mixed. In the West all the public land is already divided into townships six miles square.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Population of the United States at each census from 1790. Residents of Hawaii, Alaska, Porto Rico, the Philippine Islands, Guam, Samoa, Virgin Islands, and Panama Canal zone, and persons in the military and naval service stationed abroad are not included in the figures of this table. The residents of Indian reservations are not included prior to 1890.

<sup>1</sup> The other races, in 1860, comprise 34,933 Chinese and 44,021 Indians; for 1870, 63,199 Chinese, 55 Japanese, and 25,731 Indians; for 1880, 105,465 Chinese, 148 Japanese, and 66,407 Indians; for 1890, 107,488 Chinese, 2,039 Japanese, and 248,253 Indians; for 1900, 89,683 Chinese, 24,326 Japanese, and 237,196 Indians; for 1910, 71,631 Chinese, 72,157 Japanese, 265,683 Indians and 3,175 other races; for 1920, 61,639 Chinese, 111,010 Japanese, 244,437 Indians, and 9,488 all others; for 1930, 1,422,533 Mexicans, 352,397 Indians, 74,954 Chinese, 188,834 Japanese and 50,978 all others. In 1930 a separate classification was provided for Mexicans who, previously, had been counted with the white population. The 1920 figure for the white population included 700,541 who would have been counted as Mexicans, and included in 'other races' in 1930.

<sup>2</sup> Enumeration in 1870 incomplete. Figures in italics represent estimated corrected population.

<sup>3</sup> Between the 1910 census (April 15, 1910) and the 1920 census (January 1, 1920), the period covered was 116½ months (less than a full decade). Adjusting for this, the exact rate of increase for the decade was 15.4 per cent. Similarly correcting for the 123 months between the 1920 and 1930 censuses, the true rate of increase was 15.7 per cent.

Total population in 1930 comprised 62,137,080 males, and 60,637,966 females; 68,954,823, or 56.2 per cent., were urban, and 53,820,223, or 43.8 per cent., rural.

In the following table of population statistics for 1920 and 1930, the dates indicate the year in which the constitution was ratified by each of the original thirteen States, the year of the admission of each of the other States into the Union, and the years of organization of Territories:—

## II. MOVEMENT OF POPULATION.

The registration area for births was established in 1915, and the birth rates are computed from returns for certain areas for which the registration of births is accepted by the Bureau of the Census as approximately complete. In 1930 these areas included the District of Columbia, Virgin Islands, and all the 48 States except South Dakota and Texas. The estimated population of this area (exclusive of the Virgin Islands) was 116,644,606, or 94·7 per cent. of the total estimated population of the Continental United States, and the number of births (exclusive of still-births) returned was 2,202,960 (provisional), or 18·9 per 1,000 population.

The annual collection of statistics for the registration area for deaths began in 1900. Death rates are computed from returns for States and cities which were admitted to the registration area for deaths on the basis of approximately complete registration. In 1930 these areas included the District of Columbia, Territory of Hawaii, Virgin Islands, and all the 48 States except Texas (8 cities in Texas are included). The estimated population for the registration area (exclusive of Hawaii and the Virgin Islands) was 118,560,800 or 96·2 per cent. of the total estimated population of Continental United States; and the number of deaths returned from this area was 1,342,486 (provisional), corresponding to a death rate of 11·3 per 1,000 population.

The number of marriages in 1930 was 1,128,280 against 1,232,559 in 1929. There were 191,591 divorces, against 201,468 in 1929.

Total number of immigrants admitted in year ending June 30, 1931, was 97,139 against 241,700 in 1930. Of the total number in 1930, 117,026 were males, and 124,674 were females.

Total alien arrivals in 1930 (June 30) was 446,214; total alien departures, 272,425, leaving surplus of 173,789.

The total number of alien immigrants from 1820 to 1930 (June 30) arriving for permanent residence was 37,762,012. In the following statement, immigrants from Canada and Mexico are included in the total:—

The total number of immigrants from China between 1820 and 1930 was 377,245; the total number from Japan, from 1861, the earliest year of record, was 275,643. In 1928, the number of Chinese admitted, from all countries, was 931; in 1929, 1,071, and in 1930, 970. In 1928 there were 522 Japanese admitted; in 1929, 716; and in 1930, 796. Of recent years, departures have far exceeded arrivals.

## Education

Each State of the Union has a system of free public schools established by law, comprising elementary schools, junior high schools and high schools, with courses covering from 11 to 13 years. In 1930 illiterates comprised 1.5 per cent. of native-born whites, 9.9 per cent. of foreign-born whites, 16.3 per cent. of Negroes, and 25 per cent. of other races; rate for entire population above 10 years of age, 4.3 per cent.

Since 1803, the United States Government, upon the organization of all new States, has set aside from the public domain for the benefit of the public schools therein from one to four 'sections' (square miles) of land in each township of six miles square. The proceeds of the sale of this land make the principal part of the permanent school funds of such States. The income of permanent school funds and unsold school lands constitutes about 1.3 per cent. of the revenue receipts of the schools of the country. Taxation and appropriations yield about 94.2 per cent. of total revenue receipts, and other sources yield about 4.5 per cent. In 1926 the amount expended on public schools of elementary and secondary grades was 2,184,336,638 dollars. In 1928 the 1,076 universities, colleges, and professional schools had an income of 496,529,309 dollars from productive funds, and from all other sources.

## Justice and Crime.

The judicial system, like the executive and legislative systems, is dual. The Federal or National Government maintains courts for the trial of crimes

against the United States and of civil suits which are brought by the Government or its officers, or which arise under the Constitution, treaties and laws of the United States. These laws relate to such subjects, among others, as Admiralty, Patents, Taxation, Banking and Bankruptcy. The Federal Courts also have jurisdiction of cases between citizens of the different States and between citizens of a State and foreign States, citizens or subjects. In this class of cases, as well as in cases arising under the Constitution, treaties and laws of the United States, the amount in controversy must exceed 3,000 dollars, besides interest and costs. The State Courts have jurisdiction over all civil and criminal cases arising under State laws; the decisions of the Courts of last resort of the States as to the validity of treaties or of laws of the United States, or on various questions arising under the Constitution, are subject to review by the Supreme Court of the United States. The State Courts also have jurisdiction of proceedings in probate and divorce.

In the separate States the lowest courts are usually those of Justices of the Peace, but many towns and cities have inferior courts, called by various names, with power to commit for trial in criminal matters and to hear and determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving usually not more than 300 dollars.

The highest court in each State is usually called the Supreme or Appellate Court with a Chief Justice and Associate Justices and, in some States, commissioners who hear and determine cases under assignment of the Chief Justice and the Associate Justices. The Chief Justice and Associate Justices are usually elected by the people, but sometimes are appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from 5,000 to 22,500 dollars.

The Judges of the Courts of the United States, which include the District Courts, the Court of Claims, the United States Customs Court, the Court of Customs and Patent Appeals, the Circuit Courts of Appeals, and the Supreme Court of the United States, hold office during good behaviour. They may, however, retire with full pay at the age of 70 years, if they so desire, and if they have served a period of ten years.

The United States District Courts are the lowest of the Federal Courts, being the courts of original jurisdiction. There are 88 of these, each State and territory forming one or more districts. These Courts appoint Commissioners, who have the power of Examining Magistrates, but may not finally adjudge and determine, except in the Territory of Alaska, where they have jurisdiction equivalent to that of the Justices of the Peace and Probate Courts of the counties of the States. The United States District Courts try all criminal cases arising under the laws of the United States, as indicated above, including capital offences.

The Supreme Court consists of the Chief Justice and 8 Associate Justices, appointed by the President, with the advice and consent of the Senate. The United States is divided into 10 circuits, to each of which the Chief Justice or an Associate Justice is assigned. In each circuit there is a Circuit Court of Appeals. Cases from inferior courts are taken to the Circuit Courts of Appeals by appeal or to the Supreme Court either on appeal or writ of certiorari. That Court has also original jurisdiction in cases affecting foreign Ministers and those between the different States. The salary of the Chief Justice is 20,500 dollars, and that of each of the Associate Justices, 20,000 dollars.

The Court of Claims has jurisdiction of suits based on claims against the

Government founded on the Constitution and laws of the United States or arising out of contracts entered into with the Government and not sounding in tort. The United States Customs Court (formerly the Board of General Appraisers) has jurisdiction in customs cases. The Court of Customs and Patent Appeals passes upon appeals from decisions of the United States Customs Court involving questions as to the classification of merchandise under tariff Acts and the rates of duty to which various articles are liable, as well as appeals from decisions of the Patent Office.

The District of Columbia, in which the seat of the National Government is located, has a Juvenile Court, a Municipal Court, a Police Court, a Supreme Court with a general jurisdiction which includes that of a United States District Court, and a Court of Appeals.

Most of the more important territorial and insular possessions of the United States, except the Philippines, have two systems of Courts, one corresponding to the Courts of the States to adjudicate cases arising under laws enacted by the territorial or insular legislatures, and the other, the United States Courts, to pass on cases involving Federal Law. The Philippine Islands have no Federal District Court.

## Finance.

### FEDERAL.

The following table gives what the Treasury terms 'Ordinary receipts' and 'expenditures chargeable against ordinary receipts.' 'Ordinary receipts' include receipts from customs, internal revenue, and 'Miscellaneous,' but do not include receipts from loans, premiums, or Treasury notes, or revenues of Post-Office Department. 'Ordinary expenses' include disbursements for War, Navy, Indians, pensions, payments for interest, and 'Miscellaneous,' but do not include principal of public debt, or disbursements for postal service paid from revenues thereof. 'Expenditures chargeable against ordinary receipts' include 'ordinary expenditures' and retirements of the public debt from the sinking fund and from certain special receipts.

On June 10, 1921, the President approved an Act to provide a National Budget System and an independent Audit of Government Accounts. This provided for an annual budget system for the first time in the history of the United States.

The gross debt on June 30, 1931, was made up as follows :—Debt bearing no interest, 230,073,658 dollars ; matured debt on which interest has ceased, 51,822,845 dollars ; and interest-bearing debt (between 2 and 4½ per cent.), 16,519,588,640 dollars. The net debt, including matured interest obligations, etc.—that is, what remains after deducting the cash in the Treasury from the gross debt plus matured interest obligations, etc., was 16,481,024,526 dollars.

#### STATE FINANCE.

The revenues required for the administration of the separate States are derived from direct taxation, chiefly in the form of a tax on property, real and personal ; and the greater part of such revenue is collected and expended by the local authorities, county, township, or school district.

For details see the separate States.

### Defence.

#### I. ARMY.

The Army of the United States, as authorised under the Act of Congress of June 4, 1920, consists of the Regular Army, the National Guard while in the service of the United States, and the Organised Reserves, including the Officers' Reserve Corps and the Enlisted Reserve Corps.

Original or first enlistments in the Regular Army are for one or three years at the option of the soldier, but all re-enlistments are for three-year periods. Enlisted men are classified in seven grades. The pay of the lowest grade, or private, is 21 dollars per month (about 4 shillings a day at normal exchange rates), and that of the highest grade, or master sergeant, is 126 dollars per month. In addition enlisted men receive an increase of 5 per cent. of their base pay for each 4 years of service in the army, the total increase not to exceed 25 per cent. Certain enlisted men also receive additional pay as specialists, the maximum addition under this head being 30 dollars per month.

The strength of the Regular Army, as authorised by Congress for the year 1931, was 12,402 officers and 118,750 enlisted men exclusive of Philippine Scouts for whom the appropriations allow of 6,445. The authorised number of warrant officers is 1,028.

The actual strength at the end of June, 1931, was 138,817 all ranks.

The war organisation and establishments of the Regular Army on mobilisation are as follows :—

Army Corps . . .	88,102	Infantry Brigade . .	6,116
Infantry Division . .	21,435	Artillery Brigade . .	5,642
Cavalry Division . .	9,762		

For plans of mobilisation, war and demobilisation the United States is divided into 3 Army areas, which for administration and training are subdivided into 9 Corps areas.

At the end of June, 1931, the United States Army troops stationed abroad were as follows :—

Philippines . . . . .	11,152	Alaska . . . . .	308
Hawaii . . . . .	14,843	Nicaragua . . . . .	146 <sup>1</sup>

<sup>1</sup> Includes batteries, troops, sections, and similar separate units, and hospitals.

<sup>2</sup> Includes units which are partially inactive.

The Officers' Reserve Corps consists of officers of all grades, including general officers, organised into sections corresponding to the various branches of the Regular Army. In the higher grades it is at present composed principally of men who served as officers during the World War, and on June 30, 1931, had a strength of 120,550. These officers may be called for training not exceeding 15 days each year, and with their own consent may be ordered to active service at any time and for any period, provided that the appropriations for the purpose are not exceeded.

The Reserve Officers' Training Corps, maintained for the purpose of keeping up the strength of the Officers' Reserve Corps, is organised into units at civil educational establishments. It is divided into a Senior Division, formed mainly at the universities, and a Junior Division, formed mainly at the secondary schools. On June 30, 1931, 117,423 students were enrolled in the Reserve Officers' Training Corps, of whom 75,786 were enrolled in senior units and 41,637 in junior units. Students of the Reserve Officers' Training Corps before being commissioned in the Officers' Reserve Corps must complete the four years' military training prescribed, which includes one summer training camp of a period of six weeks each.

The Enlisted Reserve Corps consists of men voluntarily enlisted therein who have qualifications making them eligible for enlistment in the Regular

Army. On June 30, 1931, the Enlisted Reserve Corps had a strength of 4,837. Provided the appropriations for the purpose are not exceeded, enlisted reservists may be called up for training not exceeding fifteen days each year, and with their own consent may be ordered to active service at any time and for any period.

The National Guard, or organised militia, is maintained by the several States and Territories (including the District of Columbia, the Hawaiian Islands and Porto Rico) with the aid of grants from the Federal Government. It is organised into the same arms of the service as the Regular Army, and is supplied by the Federal Government with uniforms, arms, and equipment of the same type as issued to the Regular Army. Service in the National Guard is purely voluntary. When Congress shall have authorised the use of the armed land forces of the United States for any purpose requiring the use of troops in excess of those of the Regular Army, the President may draft into the military service of the United States any or all members of the National Guard, to serve for the period of the war or emergency. In certain emergencies the President may also call forth the National Guard, for service within the continental limits of the United States, without reference to Congress. The strength of the National Guard as authorised by law in enlisted men is 800 men for each Senator and Representative in Congress with such strength as the President may decide for the District of Columbia, the Territories of Porto Rico and Hawaii, Alaska and the Canal Zone. The maximum strength of the National Guard for the present as fixed by the Secretary of War is 190,188 officers, warrant officers, and enlisted men. The actual strength on June 30, 1931, was 13,051 officers, 198 warrant officers, and 174,137 enlisted men. Enlistment is for three years, with re-enlistments for one year or three years. Minimum training required includes 48 drill periods yearly, each of not less than one and one-half hours' duration, in addition to fifteen days' training in encampments or manoeuvres. Pay is provided for the 15 days' training in encampments at the same rate as for the Regular Army, while each drill period is considered approximately equal to a day's service for pay purposes.

Citizens' military training camps are operated during the summer months, at which thousands of young men acquire military training each year, without cost to themselves. Four courses are provided, the highest of which has as its object the training of non-commissioned officers and specialists of the Regular Army, National Guard, and Organised Reserves with a view to qualifying them for service as officers in the Officers' Reserve Corps. Civilians attending the highest course must have had prior military training equal to that obtainable in the three lower courses.

The President is Commander-in-Chief of both the Army and the Navy. The Secretary of War controls the Army with the aid of two Assistant Secretaries and a Chief of Staff. The former have supervision of the procurement of all military supplies, and are charged with the mobilisation of industrial establishments for wartime needs, while the latter is entrusted with the general supervision of the Army.

Although the infantry during the war were chiefly armed with a modified Enfield rifle, the Springfield rifle, of American design, remains the standard small arm. The approved calibres of mobile artillery are as follows:—

for the light . . . .	75 mm. gun and 105 mm. howitzer
for the medium . . . .	4·7 inch gun and 155 mm. howitzer
for the heavy . . . .	155 mm. gun and 8 inch howitzer.

The 155 mm. howitzer is now issued in lieu of the 105 mm. howitzer for the light mobile artillery, pending the development and production of a satis-

factory 105 mm. howitzer. The most powerful mobile gun is a 14-inch gun on railway carriage. The most powerful gun is a 16-inch gun on barbette carriage.

In the Budget for 1931-32, 334,675,965 dollars were voted for the army including 81,715,740 dollars for the air corps.

## II. NAVY.

As provided under the terms of the Washington Treaty of August 17, 1923, and the London Treaty of October 29, 1930, the United States will have 15 capital ships. The replacement tonnage allowed for capital ships is the same as for the British Navy, viz. 525,000 tons. As authorised by Congress, the Navy Department has completed important alterations to the seven oldest battleships, and has begun modernising three more. These alterations consist of, first, the installation of additional protection against submarine attack; second, the installation of anti-aircraft deck protection; third, the substitution of tripod masts for the cage type; and various other improvements of less importance. Increased angle of elevation has been given to the last four battleships modernised, and is proposed for the five next in age. No increase in elevation has been made in the case of the three oldest battleships of the 15 retained on the effective list. Eight 10,000-ton cruisers have been completed, and seven more are in process of construction. An aircraft carrier of 13,800 tons is in progress, the cost of which will approach 20,000,000 dollars.

The Air Service is an integral part of the Fleet. For the fiscal year 1930-31 a sum of 32,033,211 dollars is devoted to it. This sum is exclusive of personnel and certain establishment charges. In addition, authority was given to enter into certain contracts which will involve the expenditure of 10,000,000 dollars in future years. Appropriations, 1931-32, 31,145,000 dollars.

The gross naval expenditures have recently been as follows: 1928-29, 364,233,362 dollars; 1929-30, 366,060,389 dollars. For the fiscal year 1930-31, the naval appropriation, including deficiency bills, is 382,505,193 dollars, which provides for continuing the construction of seven cruisers (Nos. 32-38), one aircraft carrier, and three submarines; and for the fiscal year 1931-32, 360,106,593 dollars. Three additional cruisers are authorized by Congress, but no funds appropriated; their building is restricted as to date of commencement by Art. 18 of the London Treaty.

The total number of enlisted men, according to the current appropriation, was 79,700. Naval officers number 9,260. The Marine Corps, which is largely employed as an expeditionary force, consists of 1,194 officers and 17,584 men.

The American Navy is administered by the Secretary of the Navy, as the head of the executive department, known as the Department of the Navy. The Secretary has an Advisory Council, the most important Naval member of which is the Chief of Operations, who is charged by law with the operations of the Fleet and with the preparations and readiness of plans for its use in war. The other members of the Council are the 2 Assistant Secretaries (one for Aviation) of the Navy; the Chief of the Bureau of Navigation, handling principally the officer and enlisted personnel of the Navy and the Chiefs of the following bureaux: Construction and Repair; Engineering; Aeronautics (constituted 1921-22); Supplies and Accounts; Yards and Docks; Ordnance; and Medicine and Surgery; also the Commandant of the Marine Corps and the Judge Advocate-General. The Chief of Operations is also President of the Naval General Board, which is an advisory body of senior officers, and is

consulted on important questions of policy, including the number, types and characteristics of ships that should constitute the Fleet.

The Government navy yards are at Portsmouth, N.H.; Boston, Mass.; Brooklyn, N.Y.; Philadelphia, Pa.; Washington, D.C.; Norfolk, Va.; Charleston, S.C.; Mare Island, Cal.; Puget Sound, Wash.; and Pearl Harbour, Hawaii, all of which yards are equipped for certain types of new construction as well as for handling repairs to units of the fleet. In addition there are naval stations at Newport, R.I.; New London, Conn.; Key West, Fla.; Pensacola, Fla.; New Orleans, La.; San Diego, Cal.; Guantanamo, Cuba; Tutuila, Samoa; Cavite, P.I.; Guam; St. Thomas, W.I.; Balboa, C.Z. The naval training stations are at Hampton Roads, Va.; San Diego, Cal.; Newport, R.I.; and Great Lakes, Ill. A 20-year development programme for navy yards and naval bases has been approved by the Secretary, but no considerable appropriations have been granted to further the programme.

The Atlantic and Pacific Fleets have been united in a single command as the 'United States Fleet.'

The following is a classified statement of the strength of the United States Navy on October 31, 1929 and 1930, based on data furnished by the U.S. Navy Department:—

	As at October 31.	
	1929	1930
Battleships . . . . .	18	18
Aircraft carriers . . . . .	8	3

In 1930 there were 6,288,648 farms, of which 3,568,394 were operated by owners, 55,889 by managers, and 2,664,365 by tenants; farm population on January 1, 1931, was estimated at 27,430,000; 1930, 27,222,000; 1929, 27,491,000.

Gross income from farm production, 1931, was estimated at 6,920,000,000 dollars; in 1930, at 9,847,000,000 dollars; in 1929, 11,911,000,000 dollars. The estimated gross value at farm of all crops was, in 1931, 4,123,000,000 dollars; in 1930, 6,274,824,000 dollars; in 1929, 8,675,420,000 dollars. Of animals and products, gross value in 1929 was 6,426,014,000 dollars; in 1928, 6,205,420,000 dollars.

The areas and produce of the principal cereal crops for three years are shown in the subjoined tables.

In 1931 output of tame hay was estimated at 64,233,000 tons from 53,449,000 acres; of alfalfa, 20,914,000 tons from 11,602,000 acres; and of wild hay, 8,133,000 tons from 11,977,000 acres.

The output of cane sugar in 1928-29 amounted to 264,106,804 pounds; in 1929-30, 400,000,000 pounds; and in 1930-31, 367,386,000 pounds. All these figures are for Louisiana only. The beet sugar production in 1928-29 amounted to 2,122,000,000 pounds; in 1929-30, 2,036,000,000 pounds; and in 1930-31, 2,416,000,000 pounds.

Cotton acreage and production (excluding 'linters'), for the last six years were:—

Years	Acres harvested	Bales (500 lbs. gross)	Years	Acres harvested	Bales (500 lbs. gross)
1926	47,087,000	17,977,874	1929	45,793,000	14,824,861

1928	45,326,000	14,477,874	1931	40,495,000	10,918,000

The cotton production in 1931 was grown in the following States (in bales, 500 lbs. gross): Texas, 5,270,000; Mississippi, 1,725,000; Alabama, 1,430,000; Georgia, 1,395,000; Oklahoma, 1,220,000; Arkansas, 1,855,000; North Carolina, 775,000; South Carolina, 1,015,000; Louisiana, 865,000; Tennessee, 605,000; Missouri, 270,000; Arizona, 119,000; California, 181,000; New Mexico, 98,000; Virginia, 43,000; Florida, 43,000; all other, 9,000.

In 1931 there were under tobacco 2,019,600 acres (2,101,100 acres in 1930). Output of the chief tobacco-growing States were:—

Total estimated value of all farm animals on farms in the United States on January 1 was, for 1930, 5,994,970,000 dollars; for 1931, 4,450,708,000 dollars; and for 1932, 3,195,748,000 dollars.

In 1930, 1,594,826,000 lbs. of butter, 512,319,000 lbs. of cheese, and 2,114,448,000 lbs. of condensed and evaporated milk were produced.

In 1929 the estimated production of wool was 310,561,000 pounds from 40,670,000 sheep; in 1930, 336,007,000 pounds from 42,784,000 sheep.

The census reports for 1930 show that the value of canned vegetables and soups was 321,004,289 dollars: of canned fruits, 136,265,894 dollars; of dried fruits, 75,176,173 dollars. The total value of canned fruit and vegetable products, in 1930, was 709,361,875 dollars.

## II. FORESTS AND FORESTRY.

The United States forests cover 469,500,000 acres, or about one-fifth of the whole country. The classification is as follows:—Virgin timber, 138,100,000 acres; second growth of saw timber size, 113,800,000 acres; second growth of cordwood size or smaller, 136,400,000 acres; non-producing and idle land, 81,200,000 acres. Ownership of forest land is distributed as follows: Federal Government, 89,100,000 acres; States, 10,500,000 acres; local bodies, 700,000 acres; large private owners, 182,200,000 acres; small owners, 187,000,000 acres.

The net area of the 151 national forests administered by the U.S. Forest Service was on July 1, 1931, 160,787,687 acres.

It is estimated that 1,080,000,000 cubic feet of timber is destroyed annually by fire in the forests of the United States, while 1,800,000,000 cubic feet is destroyed by insects, disease, and windfall.

### III. MINING.

The following are the statistics of the metallic products of the United States in 1929, and 1930 (long tons, 2,240 lbs. ; short tons, 2,000 lbs.). The values are : For iron, at point of production ; for nickel and platinum, the values at New York City ; for copper, lead and zinc, the values are those of sales ; for quicksilver, the value at New York.

The approximate total value of the mineral products in 1929 was 5,887,300,000 dollars ; in 1930, 4,810,400,000 dollars.

Oil production in 1930 included 896,265,000 barrels of crude petroleum, 52,681,000 barrels of natural gasoline, and 2,689,000 barrels of benzol. Total value at wells of crude petroleum was 1,046,400,000 dollars ; average price, 1.17 dollars. Number of new oil wells, 1930, was 11,640 ; number of old wells abandoned, 8,770 ; number of producing wells, December 31, 1930, 331,070, a gain of 2,870 over 1929. Refinery consumption in 1930 totalled

927,447,000 barrels, of which 866,615,000 barrels were domestic crude, and 60,832,000 barrels were foreign crude petroleum. Production of motor fuel in 1930 was 18,510,576,000 gallons or 440,728,000 barrels. Output of natural gas, 1930, was 1,943,421 *M* cubic feet; domestic consumption, 1,941,644 *M* cubic feet, of which 80 per cent. was for industrial purposes.

The precious metals in 1930 were mined mainly in California, Alaska, South Dakota, Colorado and Utah for gold, and Idaho, Montana, Arizona, Colorado, and Nevada for silver. The production of gold and silver in the United States from 1792 to 1930 was as follows:—

Precious stones are found in considerable varieties in the United States, including sapphires (in Montana), turquoise, tourmaline, garnets, beryl, agates, amethyst, ruby, topaz, &c.

#### IV. MANUFACTURES.

The following table shows the condition of manufacturing industries in the United States as reported at each census from 1904 to 1929. All figures for 1904 and 1909 and those for wages and horse-power for 1914 and 1919 include data for all establishments reporting products valued at 500 dollars or more, whereas at the censuses for 1921 and subsequent years the corresponding limit was 5,000 dollars. The change affects very slightly the statistics except for the number of establishments; this class in 1919 (65,485 establishments with products valued at less than 5,000 dollars), while representing 22.6 per cent. of the total number of establishments, reported only five-tenths of one per cent. of the total number of wage earners and three-tenths of one per cent. of the total value of products.

<sup>1</sup> Includes containers for products, fuel, purchased electric energy, and, for 1927 but not for 1929, mill or shop supplies.

<sup>2</sup> Rated horse-power capacity of prime movers plus that of electric motors driven by purchased energy.

NOTE.—Due to changes in the classification of a number of industries, figures for several of the groups for 1927 differ from those previously published.

The following table shows the relative importance of industries with products valued at 1,000,000,000 dollars or over in 1929:—

Industry	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, containers for products, fuel, and purchased electric energy	Value of products

<sup>1</sup> Embraces the manufacture of products of boiler shops, foundries, and machine shops, exclusive of products of establishments specialising in specific classes of products such as locomotives, stoves and furnaces, cast-iron pipe, engines and power pumps, machine tools, and textile machinery, which are placed in other classifications.

<sup>2</sup> Does not include millinery, gloves, footwear, knit underwear, and corsets.

<sup>3</sup> Embraces logging camps, cooperage-stock mills, veneer mills, merchant sawmills, and planing mills operated in conjunction with sawmills.

In certain textile industries the average number of active spindles and looms in the years 1925 to 1930 was as follows: <sup>1</sup>

Year	Spindles in operation			Wool looms in operation		
	Cotton	Woollen	Worsted	Wide	Narrow	Carpet and Rugs
1925	32,642,000	1,812,925	1,805,582	41,858	12,500	7,246

Woollen and worsted goods . . . . .	817,978,000	827,006,000

Output of motor vehicles in 1930 comprised 2,910,187 passenger vehicles valued at 1,722,644,000 dollars, and 599,991 motor trucks valued at 406,148,000 dollars. Automotive products (automobiles, parts, accessories, tyres, service appliances and fire-engines) exported in 1930 were valued at 316,391,000 dollars; in 1929, 587,740,000 dollars.

The development of the iron and steel industries since 1923 is shown by the following figures, supplied by the American Iron and Steel Institute :—

The production of tin plates and terne plates was, in 1920, 1,445,545 gross tons; in 1926, 1,782,306 gross tons; in 1928, 1,839,205 gross tons; in 1929, 1,968,280 gross tons; and in 1930, 1,763,443 gross tons.

According to the Bureau of the Census, there were in 1929 273 blast furnaces (in active plants) with a daily capacity of 148,274 gross tons; in 1927, 292 blast furnaces with a daily capacity of 142,016 tons. In 1929 the output of pig-iron was 42,486,758 gross tons, value 744,588,193 dollars; and in 1927, 36,230,420 tons, value 688,641,808 dollars. Active Bessemer, or modified Bessemer, steel plants in 1929, had 76 converters with a total daily capacity (24 hours) of 43,007 gross tons of ingots or direct steel castings; in 1927, 95 converters with total daily capacity (24 hours) of 46,417 gross tons of ingots or direct steel castings. Active open-hearth steel plants in 1929 had 1,140 basic and acid furnaces with daily capacity (24 hours) 172,338 gross tons; in 1927, 1,150 basic and acid furnaces with daily capacity (24 hours) of 159,908 gross tons. The crucible steel furnaces in active steel plants in 1929 were 46 of 288 gross tons daily capacity (24 hours); in 1927, 55 of 296 gross tons daily capacity (24 hours); and the electric steel furnaces numbered 265 of 6,572 tons in 1929, and 219 of 5,357 tons in 1927.

The total value of products of the steel works and rolling mills in 1929 was 3,365,788,805 dollars, compared with 2,779,840,238 dollars in 1927, and in 1925, 2,946,068,000 dollars. The values of the principal products, excluding the values of amounts consumed in the same works, were for 1927 and 1929 as follows:—

In the United States the values are fixed not according to average prices, but according to invoices or shipping papers, which the importers and exporters have to produce. For imports the invoices are signed by an American Consul; for exports the shipping papers are signed by the exporter or agents at the port of shipment. The quantities and values are determined by declarations.

The 'most favoured nation' treatment in commerce between Great Britain and the United States was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1827.

### Internal Communications.

On January 1, 1931, the road mileage, including State Highway Systems, was 3,009,066, of which 693,559 miles were surfaced roads, and 2,315,507 earth roads, non-surfaced.

Railway history in the United States commenced in the year 1828. According to Poor's Railway Manual, the extent of railways in operation in 1830 was 23 miles ; it rose to 52,922 miles in 1870 ; to 167,191 miles in 1890. According to the Interstate Commerce Commission's corresponding mileage, it was (on June 30) in 1900, 198,964 ; 1910, 249,992 ; 1920, 263,821 ; 1925, 261,871 ; and 1930, 262,215. The ordinary gauge is 4 ft. 8½ in.

Loading of revenue freight cars in 1931 totalled 37,272,371 cars ; in 1930, 45,887,413 cars ; in 1929, 52,827,925 cars.

The following table, based on the figures of the Interstate Commerce Commission, shows some railway statistics for 5 years:—

The total expenditure of the Postal Service during the year 1930-31 was 802,484,840 dollars; total receipts, 656,463,383 dollars; excess of expenditures over revenues, 146,021,457 dollars; losses by fire, burglary, bad debts, &c., 44,733 dollars, making the total deficiency in postal revenues, 146,066,190 dollars.

Money orders issued during 1930-31 were as follows: domestic, 189,873,641, amounting to 1,559,549,224 dollars; international, 3,704,802, amounting to 62,227,939; total, 193,578,443, amounting to 1,621,777,163 dollars.

For the year ending June 30, 1931, mails were transported by rail on a length of 216,291 miles. The total number of employees in the railway mail service was 21,943. During the year there were 16,875,549,860 distributions and redistributions of pieces of mail, exclusive of registered mail, by railway postal clerks; registered pieces, 84,951,637. Air mail was carried on 23 routes (23,488 miles).

On December 31, 1931, the postal savings deposits amounted to 595,663,821 dollars, an increase of 350,284,424 dollars as compared with the previous year.

### Currency and Credit.

The monetary system has been monometallic since 1878, gold being the standard. There are a number of different types of currency in circulation, the issuance of which are governed by various laws. Gold coin, gold certificates, silver dollars, Treasury notes of 1890, and United States notes are legal tender to any amount. Subsidiary silver coins are legal tender to an amount of Ten Dollars in one payment.

Gold certificates and silver certificates are always backed dollar for dollar by gold or silver, respectively, held in the Treasury. They are receivable for all public dues and may be held by banks as lawful reserve. Treasury notes of 1890 are redeemable in either gold coin or silver dollars. They are being cancelled when received by the Treasury of the United States and are being replaced by silver certificates. United States notes are legal tender for all debts, public and private, except duties on imports and interest on public debt. Federal Reserve Notes, though not legal tender, are receivable by the government for all public dues and are receivable on all accounts by all

Federal Reserve Banks, National Banks, and other member banks of the Federal Reserve System. They are redeemable in gold coin at the Treasury, and in gold or lawful money at any Federal Reserve Bank. National bank notes and Federal Reserve Bank notes are also not legal tender but are receivable for all public dues except duties on imports, and may be used by the Government in all payments except interest on a public debt. They are redeemable in lawful money at the Treasury and at the various banks of issue.

The following statement shows the stock of United States money, including paper currency in circulation in foreign countries and the amount held by the Cuban agency of the Federal reserve banks, on September 30, 1931 :—

## Banking.

The banking system of the United States includes : (1) National banks supervised by the Federal Government, under the National Bank Act of 1863 and subsequent amendments ; (2) State-chartered banking institutions, State banks, trust companies and savings banks organised under the banking

laws of the various States, and private banks; (3) Federal Reserve banks operating under the general supervision of the Federal Reserve Board as provided in the Federal Reserve Act of December 23, 1913; and (4) banks for extending agricultural credits operating under supervision of the Federal Farm Loan Board.

National banks are required to have a minimum capital of 25,000 dollars. Under certain limitations they are permitted to establish branches within the cities in which they are located. They are authorized to issue circulating notes not in excess of paid-in capital, secured by United States bonds of certain issues deposited with the Treasurer of the United States. The effective limit upon the note circulation of National banks is the amount of bonds eligible as security. On June 30, 1931, 674,625,630 dollars of such bonds were outstanding and 665,591,438 dollars of these were on deposit with the Treasurer to secure circulation. National banks (including those in Alaska and Hawaii) on June 29, 1931, numbered 6,805, and reported resources and liabilities as follows:—

Resources	Thousands of dollars	Liabilities	Thousands of dollars
Loans and discounts (including rediscounts and overdrafts) . . . . .	13,185,275	Capital stock paid in . . .	1,687,663

<sup>1</sup> Including items with Federal reserve banks in process of collection, exchanges for clearing, and other checks on local banks.

<sup>2</sup> Excludes reserves for dividends, contingencies, etc., and for interest and other expenses accrued and unpaid.

<sup>3</sup> Includes certified and cashiers' checks, and cash letters of credit and travellers' checks outstanding.

For State-chartered banking institutions, minimum capital and other requirements imposed by state banking codes vary from state to state. These institutions (including mutual and stock savings banks and all private banks under state supervision) numbered 15,103 on June 30, 1931, and reported loans of 22,221,840,000 dollars, investments of 11,974,733,000 dollars, deposits of 32,363,675,000 dollars, and rediscounts and bills payable of 286,911,000 dollars.

Of the 25,480 bank offices open on June 30, 1931, 21,107 were single-office banks, 796 were head offices of banks operating with one or more branches, and 3,577 were branch offices.

There is no central bank in the United States. The Federal reserve system, established by Act of December 23, 1913, comprises the Federal Reserve Board of eight members sitting in Washington, and 12 Federal Reserve banks located one in each of the Federal Reserve districts into which the country is divided. Of the Board members, six are appointed for ten-year terms by the President, who designates one to serve as Governor and one as Vice-Governor

of the Board. The Secretary of the Treasury and Controller of the Currency are members *ex-officio* and the Secretary of the Treasury serves *ex-officio* as Chairman of the Board. This Board prescribes administrative regulations and exercises general supervisory powers. In each Federal Reserve district the capital of the reserve bank is subscribed by member banks of the district in proportion to their capital and surplus. Member banks include all National banks, except in Hawaii and Alaska, since these banks are required by law to join the system, and such eligible state banks and trust companies as elect to accept the conditions of membership. On June 30, 1931, the number of state members was 982. Total resources of member banks—national and state—amounted on this date to 45,288,588,000 dollars, being equal approximately to two-thirds of the resources of all banks in the country. Member banks are required to deposit their reserves in the reserve banks and only deposit credits in the reserve banks count as legal reserve for the member banks. The reserve banks are authorized to issue Federal Reserve notes secured by gold or eligible paper, with a minimum gold reserve of 40 per cent.; to discount eligible paper for member banks; to fix the rate of discount on advances to member banks subject to review and determination of the Federal Reserve Board; to engage in certain open market operations, principally to buy and sell U.S. securities and bankers' acceptances; to function as collection agencies and clearing houses for member banks; and to act as fiscal agents of the United States Government. These banks make no loans to individuals and carry no deposits, except for other banks and for governments. On September 30, 1931, the capital funds and total resources of these banks were as follows:

Banks operating under the supervision of the Federal Farm Loan Board include the Federal Land Banks (12 in number) and the Joint-Stock Land Banks (49 in number) which extend to farmers' mortgage loans for terms of 5 to 40 years; and the Federal Intermediate Credit Banks (12 in number) which extend agricultural credits for periods of not more than 3 years. Loans outstanding of the Federal and Joint-Stock Land Banks amounted on September 30, 1931, to 1,718,732,000 dollars, and of the Federal Intermediate Credit Banks to 128,403,000 dollars.

Savings banks and trust companies reported for the fiscal year-ending June 30, 1931, total savings deposits of 28,214,907,000 dollars belonging to 51,399,446 depositors, a decrease of 270,085,000 dollars and 1,369,729 depositors from the previous year. Actual total number of depositors is somewhat larger, as in three states saving depositors in state banks and trust companies are not separately reported.

### Money, Weights, and Measures.

The *dollar* of 100 cents is of the par value of 49.32d., or 4.8665 dollars to the pound sterling.

The monetary unit, in accordance with the monetary law of March 14, 1900, is the gold dollar of 25.8 grains (or 1.6718 gramme) .900 fine. The Government undertakes to maintain parity between gold and silver coin, and in 1890 established a fund of 150,000,000 dollars in gold for the repayment of United States notes and Treasury notes in gold at sight. This fund has been increased to 156,039,000 dollars.

Gold coins are 20, 10, 5 and 2½-dollar pieces called *double eagles*, *eagles*, *half-eagles*, and *quarter-eagles*. The eagle weighs 258 grains or 16.71818 grammes .900 fine, and therefore contains 232.2 grains or 15.0464 grammes of fine gold.

The silver dollar weighs 412·5 grains or 26·780 grammes ·900 fine, and therefore contains 371·25 grains or 24·057 grammes of fine silver. Subsidiary silver coins contain 347·22 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). There is a 5-cent piece of nickel and a one cent piece of bronze.

Seven kinds of Notes are in circulation in the United States. (1) United States Notes, in denominations of 1, 2, 5, 10, 20, 50, 100, 500, 1,000 and 10,000 dollars (so-called 'Greenbacks') which are covered by a gold reserve of 156 million dollars in the Treasury. (2) Gold Certificates, in denominations of 10, 20, 50, 100, 500, 1,000, 5,000, and 10,000 dollars. (3) Silver Certificates in denominations of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars. (4) Treasury Notes of 1890. (5) Federal Reserve notes in denominations of 5, 10, 20, 50, 100, 500, 1,000, 5,000 and 10,000 dollars. (6) National Bank Notes in denominations of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars. (7) Federal Reserve Bank Notes. Of the note issues only United States Notes, Treasury Notes of 1890, and gold certificates are legal tender. The Treasury notes of 1890 and the Federal reserve bank notes, of which about 4,000,000 dollars were outstanding on September 30, 1931, are being withdrawn from circulation.

British weights and measures are usually employed, but the old Winchester gallon and bushel are used instead of the new or imperial standards. They are:—

*Wine Gallon* = 0·83267 gallon.

*Bushel* . = 0·9689 imperial bushel.

Instead of the British cwt. a *Cental*, of 100 pounds, is used; the *short ton* contains 2,000 lbs.; the *long ton*, 2,240 lbs.

## CALIFORNIA.

**Constitution and Government.**—California, first settled in 1769, was from its discovery down to 1846 politically associated with Mexico. On July 5, 1846, the American flag was hoisted at Monterey, and a proclamation was issued declaring California to be a portion of the United States, and on February 2, 1848, by the treaty of Guadalupe-Hidalgo, the territory was formally ceded by Mexico to the United States, and was admitted to the Union September 9, 1850.

The Senate is composed of 40 members elected for four years—half being elected each two years—and the Assembly, of 80 members, elected for two years. Regular sessions are held biennially. The State capital is Sacramento.

California is represented in Congress by 2 Senators and 11 Representatives.

*Governor.*—James Rolph, Jr., 1931-35 (10,000 dollars).

*Secretary of State.*—F. C. Jordan.

California is divided into fifty-eight counties, one of which—San Francisco—has a combined county and city government. The legislative authority is vested in a board of 15 supervisors elected from the city and county at large. Each of the other counties is governed by a board of 5 supervisors elected from districts.

**Area and Population.**—Area, 158,297 square miles (2,645 square miles being water). Public lands, unappropriated on June 30, 1930, totalled 16,623,488 acres.

## CONNECTICUT.

**Government.**—Connecticut was first settled in 1635 and has been an organised commonwealth since 1637. In 1639 a written constitution was adopted which, it is claimed, was the first in the history of the world formed by a social compact. This Constitution was confirmed by a charter from Charles II. in 1662, and replaced in 1818 by a State Constitution, framed that year by a constitutional convention. Connecticut was one of the original thirteen States of the Union.

The General Assembly consists of a Senate and a House of Representatives. All citizens (with necessary exceptions) 21 years of age, resident in the State for a year and in the town for six months preceding the election, have the right of suffrage provided that they can read the Constitution in English. The Senate consists of 35 members, the House of Representatives of 253 members. Members of each House are elected for the term of two years; salary, 300 dollars and mileage. Legislative sessions are biennial. The State Capital is Hartford.

*Governor.*—Wilbur L. Cross, 1931–33 (5,000 dollars).

*Secretary of State.*—William M. Higgins, M.D.

The State is represented in the Federal Congress by two Senators and five Representatives. For local administration the State is divided into eight counties which are subdivided into towns within which are cities and boroughs.

**Area and Population.**—Area, 4,965 square miles (145 square miles being water). Census population on April 1, 1930, 1,606,903, an increase of 226,272 or 16·4 per cent. over that of 1920. Population in four census years was as follows :—

Years	White <sup>1</sup>	Negro	Total	Per Sq. Mile

**DISTRICT OF COLUMBIA.**

**Government.**—The District of Columbia, first settled in 1790, is the seat of Government of the United States, and consists of an area of approximately sixty-nine and one-quarter square miles, which was ceded by the State of Maryland to the United States as a site for the National Capital. It was established under Acts of Congress in 1790 and 1791, which were passed to give effect to a clause in the Constitution of the United States providing for the seat of the Government. Congress first met in it in 1800 and Federal authority over it became vested in 1801.

The present form of local government, which dates from July 1, 1878, is a municipal corporation administered by a board of three Commissioners. Two of these are appointed from civil life by the President of the United States, and confirmed by the Senate, for a term of three years each. The other Commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone has authority to enact legislation and appropriate money for the municipal expenses.

*Secretary to the Board of Commissioners.*—Daniel E. Garges.

**Area and Population.**—The area of the District of Columbia is 69·245 square miles, approximately 62 of which are land.

The population at the Federal Census of 1930 was 486,869, including 353,914 white, 887 Chinese, Japanese, Filipinos, Mexicans, and Indians, the remainder (132,068) Negroes; population in 1920, 437,571, including 326,860 whites and 109,966 Negroes.

In 1930, 27·1 per cent. of the total population was Negro or of Negro descent; 50·1 per cent. of the population (154,882 men and 88,977 women) were gainfully employed. Of the foreign-born white population, representing 6·1 per cent. of the total population, 9·5 per cent. were English, 11·7 per cent. Irish, 11·4 per cent. German, 16·4 per cent. Russian, 14·5 per cent. Italian, and 5·6 per cent. Canadian.

In 1930, 1,808 men and 2,992 women were reported divorced.

A portion of the District of Columbia embracing 6,654 acres is known in law as the City of Washington, 'The Federal Capital.' But that name is a geographical distinction only, as the territory it includes is not a municipal government separate from the rest of the District of Columbia, but is subject to the same national and municipal control in every respect.

**Religion and Education.**—The most numerous religious bodies are: Roman Catholic with 67,348 adherents (1926), Negro Baptists (41,262), Protestant Episcopal (28,347), Methodist, Presbyterian, and Lutheran. Total membership, all denominations, 238,871.

In 1930, illiterates 10 years of age or older numbered 6,611 (4,591 Negroes), which was 1·6 per cent. of the total in that age group; 74 per cent. (83,701) of the persons between the ages of 5 and 20 were attending school. The 170 public school buildings of the District in 1930 housed 1,873 white teachers and 54,142 white pupils, and 897 coloured teachers and 27,439 coloured pupils. In addition, night schools accommodated 5,838 white and 3,505 coloured students. There were, included in the above, junior high schools with 422 teachers and 10,268 pupils; senior high schools with 524 teachers and 12,797 students; 2 normal schools with 33 teachers and 616 pupils. There were also 3,100 students in private and parochial schools in 1930. Total expenditure on public education (1930), 9,989,400 dollars.

Superior education is given in Georgetown University, an institution under the management of the Jesuit Order, founded in 1795; it has 367 professors

and 2,873 students; the George Washington University, non-sectarian, founded in 1821, has 420 professors and instructors, and 5,829 students; the Howard University, principally engaged in the higher education of coloured students, was founded in 1867, and has 247 professors and 2,473 students; the Catholic University of America, a post-graduate institution, was founded in 1864, and has 135 professors and 952 students; the American University has 80 professors and 500 students.

**Finance and Defence.**—The revenues of the District are derived from a general real and personal property tax, taxes on corporations and companies, licences for conducting various businesses, and from appropriations out of the Treasury of the United States.

In 1929-30 the finance of the District of Columbia was as follows:—

	Dollars

The assessed valuation of real and personal property in 1929 was 3,728,707,730 dollars.

The National Guard on June 30, 1931, consisted of 245 officers, 4 warrant officers and 2,947 enlisted men.

**Production and Industry.**—Kansas is pre-eminently agricultural, but sometimes suffers from lack of rainfall in the west. In 1930 there were 166,042 farms, with an area of farmland of 46,975,647 acres, of which 26,535,000 acres were cropland. The total value of farm lands and buildings in 1930 was 2,281,102,000 dollars. The chief crops are maize (118,838,000 bushels in 1931), wheat (239,868,000 bushels, leading all states), and hay. Oats, barley, rye, potatoes and flax are also grown. The production of Kaffir corn is

mostly confined to this State; 5,000 tons in 1931. Various orchard fruits are cultivated. The State has an extensive live-stock industry comprising, on January 1, 1930, 677,000 horses, 155,000 mules, 747,000 milch cows, 3,042,000 all cattle, 741,000 sheep, and 2,713,000 swine. Wool clip (1930), 3,270,000 pounds from 440,000 sheep.

Kansas has coal-fields with an area of about 15,000 square miles, from which 2,429,929 short tons were mined in 1930. There are also important oil fields. Yield of petroleum in 1930 was 41,617,000 barrels, and of natural gasoline or petrol, 32,300,000 gallons. Other mineral products in 1930 were: natural gas, 37,630,000 *M.* cubic feet; lead, 26,596 short tons (1929); zinc, 13,682 short tons; Portland cement, 6,012,360 barrels. The State also produces salt, which is important both for live-stock and dead-meat industries. Total value of mineral products (1929), 124,472,480 dollars.

In the manufacturing industries in 1929 there were 1,918 establishments with 46,906 wage-earners earning 72,628,477 dollars, using materials, fuel and power costing 544,010,255 dollars; output was valued at 734,919,439 dollars. The slaughtering and milling industries are the most important; in 1927 their products were valued, respectively, at 249,465,685 dollars and 133,625,683 dollars.

Kansas, traversed by numerous rivers and six important trunk railways, has abundant transport facilities. There were 9,342 miles of steam railway line in 1929, and 570 miles of electric railway track within the State. The State maintains 8,691 miles of highway, of which 3,464 miles are surfaced.

On June 30, 1931, Kansas had 237 national banks with capital of 17,262,000 dollars and resources of 246,105,000 dollars; 738 State banks and trust companies had capital of 20,623,000 dollars and total resources of 207,728,000 dollars.

Most of the white population are descended from the early French settlers. In 1930 the foreign-born whites (1·7 per cent. of the total) numbered 34,910, of whom 13,526 (38·7 per cent.) were Italian, 3,616 (10·4 per cent.) German, 2,935 French, 1,204 Irish, and 1,512 English. Of the total population in 1930, 39·7 per cent. were urban, 36·9 per cent. Negro, and 38·8 per cent. (623,787 males and 191,938 females) gainfully employed. In 1930, 6,121 men and 10,142 women were reported divorced. The largest city in the State is New Orleans with a census population of 458,762 in 1930. Other cities are Shreveport, 76,655; Baton Rouge (Capital), 30,729.

Most of the Southern States are strenuously Protestant, but over 56 per cent. of the church membership of Louisiana are Roman Catholic. Latter had 587,946 adherents in 1926. Of Protestants in the State, Baptists (Negro Baptists, 132,743, and Southern Baptists, 117,220), and Methodists are the most numerous. Total, all denominations, 1,087,008.

In 1930, illiterates 10 years of age or older numbered 219,750 (13·5 per cent. of the total in that age group), of whom 69,288 were native whites and 139,393 were Negroes; of persons between the ages of 5 and 20, 465,064 (63·2 per cent.) were attending school. Attendance in elementary schools is compulsory. In 1930–31, there were 1,331 public elementary schools for white children with 282,337 pupils and 9,216 teachers; 1,593 negro schools

with 154,772 pupils and 3,071 negro teachers. The 363 high schools for white pupils had 2,479 teachers and 51,541 pupils. There were 4 negro high schools employing 73 teachers and having 2,661 pupils. The 2 Normal Colleges had (1928-29) 136 instructors and 1,920 students. Total expenditure on education (1930-31), 34,094,047 dollars. Superior instruction is given in the Louisiana State University (1877), with, 1931, 177 professors and 2,452 students. Tulane University (founded in 1834) in New Orleans has 436 professors and 3,286 students. This university has State support to the extent of the remission of certain taxes. The Roman Catholics have Loyola University (founded 1904) at New Orleans with 179 professors and 600 students. The New Orleans University (established 1874) and the Straight University are for coloured persons.

**Finance and Defence.**—For the year 1929, the receipts and the disbursements were :—

	Dollars

On June 30, 1931, the National Guard consisted of 135 officers, 2 warrant officers and 1,861 enlisted men. There is also a naval militia.

**Production and Industry.**—The State is divided into two parts, the uplands and the alluvial and swamp regions of the coast. A delta occupies about one-third of the total area. Louisiana surpasses the other States in extent of navigable waterways—3,782 miles. The Gulf coast-line is 1,250 miles in length. Agriculture is the leading industry. In 1930, the State had 161,445 farms, with an area of 9,355,437 acres, of which 4,741,000 acres were crop land. The total value of farm land and buildings in 1930 was 418,192,000 dollars. Louisiana leads in the production of cane sugar (166,000 short tons in 1931), of sugar cane syrup, 5,045,000 gallons, of strawberries, 1,870,000 crates, and of rice (17,192,000 bushels). Other crops in 1931 were corn, 20,592,000 bushels; sweet potatoes, 5,400,000 bushels. For 1931, the cotton area was 1,920,000 acres, and the yield 865,000 bales. On January 1, 1931, the State contained 92,000 horses, 171,000 mules, 118,000 sheep, 394,000 swine, 613,000 other cattle, and 212,000 milch cows.

Louisiana has valuable fisheries. The area suitable to planting and growing oysters is over 7,000 sq. miles. The State ranks third as a lumber producer, though nine-tenths of its original forest area of 22,000,000 acres has been cut over at least once.

Rich sulphur mines are found in Louisiana, and wells for the extraction of sulphur by means of hot water and compressed air are in operation. The yield of crude petroleum in 1930 was 23,107,000 barrels; of natural gasoline or petrol, 70,200,000 gallons. Output of natural gas (1930) was 278,341,000 M. cubic feet. The State has four of the largest salt mines in the world; output in 1930 was 535,250 tons, valued at 2,164,365 dollars. Total mineral output in 1929 was valued at 62,725,997 dollars.

The manufacturing industries are chiefly those associated with the products of the State: sugar, lumber, cotton-seed, rice. In 1929, there were 1,926 manufacturing establishments which employed 87,511 wage-earners, who earned 83,990,368 dollars. The material, fuel and power used cost 441,979,590 dollars, and the output was valued at 684,885,999 dollars.

A large international trade is carried on through the port of New Orleans, where in the fiscal year ending June 30, 1931, the imports amounted to 113,420,522 dollars, and the exports to 206,350,844 dollars.

The State has ample facilities for traffic, having, besides 24,900 miles of public roads (9,113 miles maintained by the State), the Mississippi and other waterways, with 4,794 miles of navigable water. In 1929, the steam railways in the State had a length of 4,763 miles, besides 316 miles of electric railway track.

On June 30, 1931, Louisiana had 29 national banks with capital of 8,725,000 dollars and resources of 140,642,000 dollars and 177 State banks and trust companies with capital of 23,336,000 dollars and total resources of 372,516,000 dollars.

## MASSACHUSETTS.

**Constitution and Government.**—In 1615 the Plymouth Company undertook exploring expeditions to New England, and in 1620 obtained a Royal Charter granting sovereign powers over the region lying to the north of Virginia. The first permanent settlement within the borders of the present state was made at Plymouth in December, 1620, by the Pilgrims from Holland, who were separatists from the English Church. This was the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, and from that beginning the Massachusetts Bay Colony was formed. In 1630 Boston was settled. In 1629 the whole region called New England was formed into a province. By a special Charter the Government was divided between the colony of Plymouth and that of Massachusetts Bay, but in 1692 they were re-united, and thenceforward acted together both in peace and war. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and became one of the thirteen original States of the Union.

The legislative body, consisting of a Senate and a House of Representatives, is styled the General Court of Massachusetts. The Senate consists of 40 members elected biennially by popular vote. The House of Representatives consists of 240 members, elected in 159 districts, each of which returns one, two, or three representatives according to the number of legal voters. There is an annual session of the Legislature.

All citizens of the United States, 21 years of age and over, who can read and write the English language may vote in all State, city or town elections, provided they are not paupers or under guardianship, and provided they have lived one year in the State and six months in the city or town.

The State sends 2 Senators and 16 Representatives to the Federal Congress.

*Governor.*—Joseph P. Ely, 1931-33 (salary, 10,000 dollars).

*Secretary of State.*—Frederic W. Cook.

There are 14 counties in the State, 39 cities and 316 towns. The State Capital is Boston.

## MICHIGAN.

**Government.**—Michigan, first settled in 1650, was admitted into the Union on January 26, 1837. The Senate consists of 32 members and the House of Representatives of 100 members. Electors are all citizens over 21 years of age resident in the State for 6 months next preceding the election. The State is represented in Congress by 2 Senators and 13 Representatives.

**Governor.**—Wilbur M. Brucker, 1931-33 (5,000 dollars).

**Secretary of State.**—Frank D. Fitzgerald.

For local government the State is organised in counties, cities, townships, and villages. There are 83 counties, each of which has a Board of Supervisors as its administrative authority. Cities (131 in 1930) must have each a population of not less than 3,000, but a few which have been long incorporated have a smaller population. Villages in the legal sense have a population of at least 300 within an area of a square mile. The State Capital is Lansing.

**Area, Population, Education.**—Area, 57,980 square miles, of which 500 square miles are water. This is exclusive of 16,653 square miles of Lake Superior, 12,922 square miles of Lake Michigan, 9,925 square miles of Lake Huron, and 460 square miles of Lakes St. Clair and Erie. The total length of Michigan coast line is 1,620 miles. Population 1930 census, 4,842,325, an increase of 1,173,913, or 32 per cent., since 1920.

## NEW MEXICO.

**Constitution and Government.**—New Mexico from the time of its discovery by Europeans was politically associated with Mexico. Its first settlement dates from 1664. When the war with Mexico was concluded on February 2, 1848, New Mexico was recognised as belonging to the United States, and on September 9, 1850, it was made a Territory. Part of the Territory was assigned to Texas. Later Utah was formed into a separate Territory ; in 1861 part of New Mexico was transferred to Colorado, and in 1863 Arizona was disjoined, leaving to New Mexico its present area. In January, 1912, New Mexico was admitted to Statehood. It sends to the National Congress two Senators and one Representative.

The State legislature consists of 24 members of the Senate and 49 members of the House of Representatives, meeting biennially.

*Governor.*—Arthur Seligman, 1931-33 (5,000 dollars).

*Secretary of State.*—Mrs. Marguerite Pendaries Baca.

## NEW YORK STATE.

**Constitution and Government.**—From 1609 to 1664, the region now called New York was under the sway of the Dutch; then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. Between July 9, 1776, and April 20, 1777, a Convention framed a Constitution under which New York was transformed into an independent State, afterwards, in 1788, entering the Union as one of the 13 original States.

The Senate consists of 51 members elected every two years, and the Assembly of 150 members elected annually. The State capital is Albany.

The right of suffrage resides in every citizen 21 years of age, who has been a citizen for 90 days, and has resided for a year in the State, four months in the county, and 30 days in the election district preceding election.

The question whether there shall be a Convention to revise the Constitution has to be submitted to the people every 20 years, beginning with 1916, 'and also at such times as the Legislature may by law provide.'

The State is represented in Congress by 2 Senators and 43 Representatives.

**Governor.**—Franklin D. Roosevelt, 1929–33 (25,000 dollars).

**Secretary of State.**—Edward J. Flynn.

For local government the State is divided into 62 counties.

Cities are in 3 classes, the first class having each over 175,000 inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in a board of Aldermen, elected for 2 years. Its members are the President, elected by the city; the presidents of the 5 city boroughs (Bronx, Manhattan, Brooklyn, Queens, and Richmond); 67 aldermen, one elected in each of the 67 districts; constituting a board of 73 members. The chief executive officer is the Mayor, elected for 4 years; he appoints all the heads of departments, except the Comptroller, who is elected by the city.

**Area, Population.**—Area, 49,204 square miles (1,550 square miles being water). Census population April 1, 1930, 12,588,066, an increase of 2,202,839 or 21.2 per cent. over that of 1920. Population in census years:—

**Production, Industry, Commerce.**—New York has large agricultural interests. In 1930 (census), it had 159,806 farms, with a total area of 17,979,633 acres—59 per cent. of total land area of the state. About 8,984,943 acres of this is in woods and pastures, and 450,000 acres in orchards and vineyards. Total area of harvested crops (1929) was 6,958,936 acres. In 1931, 3,976,000 acres were in hay crops and 1,283,000 acres in grain for feeding live-stock. In 1930, the crops of the State had a farm value of 260,187,000 dollars, and furnished a gross income of 146,601,000 dollars; live-stock and products thereof furnished a farm income of 252,864,000 dollars.

The agriculture of New York is dominated by the demands of the large urban population. The State is noted for the production of fruit and vegetables; dairying is, however, the leading type of farming. In 1930, the production of milk was 7,342,810,000 pounds. In 1931, the crops comprised corn, 22,074,000 bushels; wheat, 5,311,000 bushels; oats, 24,596,000 bushels. New York leads in production of tame hay; output, 1931, 5,330,000 tons. The farm animals on January 1, 1931, comprised approximately 363,000 horses, 6,000 mules, 1,424,000 milch cows, 438,000 sheep, and 195,000 swine. The wool-clip in 1930 yielded 2,815,000 pounds of wool from 391,000 sheep.

Other productive industries are mining and quarrying. In 1930, shipments of iron ore were 760,196 long tons, valued at 3,691,506 dollars; pig iron, 1,638,823 long tons valued at 29,160,894 dollars; gypsum, 912,070 tons, valued at 7,059,108 dollars; salt, 14,352,000 barrels, valued at 5,837,108 dollars; Portland cement, 10,372,748 barrels. Quarry products of granite, trap rock, sandstone, marble limestone and lime were valued

at 18,884,143 dollars; brick, tile, and pottery were (1929) valued at 17,661,711 dollars. Yield of crude petroleum (1930) was 3,802,000 barrels, valued at 10,300,000 dollars; output of natural gas was 9,624,000 *M.* cubic feet. The total value of mineral output in 1929 was estimated at 109,361,349 dollars.

In 1929 the manufacturing establishments numbered 39,360, employing 1,106,976 wage-earners who earned 1,651,133,696 dollars, utilized materials, fuel and power valued at 5,018,231,694 dollars, and turned out products, including certain duplications, valued at 9,979,958,958 dollars. In 1930, 696,000 active cotton spindles consumed 101,000 bales.

In 1930, there were 2,207 publications, &c., of which 192 dailies, 900 weekly, 19 semi-weekly, 5 tri-weekly, 863 monthly, 37 semi-monthly, 24 for nightly, were published in English; of the foreign languages there were 19 in Spanish, 82 in Italian, 19 in German, 15 in Yiddish, 3 in Hungarian, 15 in Polish, 8 in French, 5 in Czecho-Slovak, 6 in Arabic, 8 in Greek, 4 in Swedish 5 in Portuguese, 7 in Jugo-Slovak, 8 in Chinese, 2 in Finnish, 1 in Hebrew, 2 in Japanese, 2 in Welsh, 1 in Armenian, 8 in Danish-Norwegian, 3 in Lithuanian, 1 in Estonian, 4 in Russian, 1 in Ukrainian.

New York City now claims to be the first shipping port of the world. The imports of merchandise during the fiscal year ending June 30, 1931, amounted to the value of 1,170,683,071 dollars, and the exports to the value of 1,072,287,536 dollars.

In New York State there were on December 31, 1930, 8,269 miles of steam railroads and 1,415 miles of electric railroads. **Production and Industry.**—Agriculture is the chief pursuit of the North Dakota population. In 1930, there were 77,975 farms, with an area of 38,657,894 acres, of which 24,528,000 acres were crop land. The value of farm lands and buildings in 1930 was 951,225,000 dollars. The area to be irrigated within the State under the Federal Reclamation Act extends to 40,000 acres. North Dakota leads, usually, in the production of spring wheat (21,590,000 bushels in 1931), of durum wheat (11,127,000 bushels) and of flax seed (3,521,000 bushels). Other important products are potatoes (8,486,000 bushels); wild hay (809,000 tons); oats (18,276,000 bushels); barley (18,482,000 bushels); and corn (21,442,000 bushels). The State has also an active live-stock industry, chiefly horse and cattle raising. On January 1, 1931, the farm animals were: 570,000 horses, 526,000 milch cows, 1,347,000 all cattle, 814,000 sheep, and 708,000 swine. The wool-clip yielded 5,330,000 pounds of wool in 1930 from 650,000 sheep.

The mineral resources of North Dakota are inconsiderable. Cement is made and there are coal-mines (output 1930, 1,700,157 short tons).

In the State in 1929 there were 374 manufacturing establishments, employing 4,033 wage-earners, who earned 5,688,303 dollars, using raw materials, fuel and power costing 39,692,399 dollars, and giving an output valued at 55,346,976 dollars. The most important of these industries was flour and grist milling.

In 1929, there were 5,275 miles of steam railway in the State, and 19 miles of electric railway. The State maintains 7,396 miles of highway of which 2,823 miles are surfaced.

North Dakota had on June 30, 1931, 98 national banks with capital of 5,070,000 dollars, and total resources of 77,787,000 dollars; 204 State banks and trust companies had capital of 3,740,000 dollars and total resources of 35,095,000 dollars.

## OREGON.

**Government.**—Oregon, first settled in 1838 and organized as a Territory in 1848, was admitted into the Union on February 14, 1859. The Legislative Assembly consists of a Senate of 30 members, chosen for four years (half their number retiring every two years), and a House of 60 Representatives, elected for two years.

The Constitution was amended in 1902, to reserve to the voters the power to propose laws and amendments to the Constitution and to enact or reject the same at the polls independently of the Legislative Assembly, and also to give them the power at their own option to approve or reject at the polls any Act of the Legislative Assembly. This is known as the initiative and referendum. The Legislature in 1927 adopted an official State song entitled 'My Oregon.'

At the General Election held November, 1912, suffrage was extended to women and 'every citizen of the United States of the age of 21 years and upwards who shall have resided in the State during the 6 months immediately preceding such election shall be entitled to vote.'

The State is represented in Congress by two Senators and three Representatives.

The foreign-born whites in 1930 numbered 105,475 (11·1 per cent. of total population), of whom 17,916 (17·0 per cent.) were Canadian, 12,913 (12·2 per cent.) German, 11,032 (10·5 per cent.) Swedish, 8,077 (7·7 per cent.) English, 7,450 Norwegian, 6,278 Russian, 5,507 Finns, and 4,723 Italian. Of the total population in 1930, 51·3 per cent. were urban, 0·2 per cent. Negro, and 43·0 per cent. (328,359 males and 81,321 females) were gainfully employed. In 1930, 10,126 men and 8,783 women were reported divorced.

The Indian reservations in 1930 comprised 1,756 square miles with a population of 4,139 Indians.

The largest towns, according to the 1930 census, are Portland, with a population of 301,815; Salem, 26,266; Eugene, 18,901; Klamath Falls, 16,093; Medford, 11,007; Astoria, 10,349.

The chief religious bodies in the State are (in order of strength) Catholic (55,574 members in 1926), Methodist (32,135), Presbyterian (21,545), Disciples of Christ, Baptist, and Jewish. Total membership, all denominations, 232,731. Marriages in 1930, 7,678; divorces, 2,830; annulments, 25.

In 1930, illiterates 10 years of age or older numbered 7,814 (1·0 per cent. of that age group), of whom 3,743 were foreign-born whites; of persons between the ages of 5 and 20, 197,719 (75 per cent.) were attending school. School attendance is compulsory for all children from 8 to 16 years of age; children between the ages of 16 and 18 years, if legally employed, must attend part-time or evening schools unless they have already acquired the ordinary branches of learning. For school year ending June 30, 1930 the 2,237 public elementary schools had 5,657 teachers and 154,908 enrolled pupils; 275 four-year high schools had 1,967 teachers and 47,827 pupils; and the three Normal Schools at Monmouth, Ashland, and La Grande had (1930-31) 132 teachers and 2,404 students. Total expenditure on education (1929-30), 18,529,305 dollars. The Oregon State Agricultural College at Corvallis, has an agricultural experiment station, with eight branch stations, an engineering experimental station, an extension service in agriculture and home economics, and 10 schools of instruction. In 1931 the staff numbered

638, with 324 engaged in instruction, and the student enrolment, 5,570, of whom 3,694 were in regular full-year degree courses. The University of Oregon, organized at Eugene in 1878, had in 1930-31, 317 professors and 10,801 students (including 8,008 extension and summer school students). There are also Methodist, Presbyterian, Catholic, Congregational, and Baptist Colleges.

**Finance and Defence.**—The receipts and disbursements of the General Fund of the State, for the year ending December 31, 1930 :—

Balance, January 1, 1930 . . . . .	366,318
Receipts, 1930 . . . . .	23,987,544
<b>Total</b> . . . . .	<b>24,353,862</b>
Disbursements, 1930 . . . . .	24,885,302
<b>Balance, overdrawn January 1, 1931 . . . . .</b>	<b>531,440</b>

On January 1, 1931, the amount of the State bonded indebtedness was 60,339,510 dollars. In 1930 the assessed value of real and personal property was 1,125,160,592 dollars.

On June 30, 1931, the National Guard of the State of Oregon consisted of 205 officers, 3 warrant officers and 2,850 men.

**Production and Industry.**—Oregon is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown. East of the Range lack of rainfall has been to some extent compensated for by irrigation by private companies as well as by State and Federal enterprise. Stock raising is the principal industry of eastern Oregon. With a stand of 400 billion feet Oregon has now one-fifth of the standing timber of the United States; about four billion feet are cut annually. In 1929, the forest area was 24,000,000 acres. National forest lands on June 30, 1931, amounted to 13,297,938 acres.

In 1930 there were 55,153 farms with an acreage of 16,548,678; total value, land and buildings, was 630,847,927 dollars. In 1930 only 4,172,519 acres out of total area of 61,118,480 acres were devoted to general farm crops; 13,227,141 acres of Government land are still open to entry. Oregon leads in the production of hops (16,430,000 pounds in 1931) and of fresh prunes (21,500 tons). Leading crops are wheat (17,662,000 bushels in 1931); oats (7,136,000 bushels); hay (1,727,000 tons), and potatoes (5,460,000 bushels). Rye, barley, flax-seed, and hops are important crops. Field crop valuation for 1931, 44,694,000 dollars. Fruits are grown, especially plums, apples, pears, peaches, strawberries, cherries, and loganberries. Dairying is an important industry, and there is an active live-stock industry. Horses on January 1, 1931, numbered 170,000; milch cows, 215,000; all cattle, 450,000; sheep, 2,560,000; swine, 240,000. Range land for grazing cattle and sheep, 45,000,000 acres. In 1930 the wool-clip yielded 21,375,000 pounds from 2,375,000 sheep; mohair, 456,000 pounds from 120,000 goats. The salmon, sturgeon, halibut, and oyster fisheries are abundant. During 1930 the fish caught in the Columbia river—of which two-thirds was canned on the Oregon side—totalled 429,505 cases. The total canned salmon pack on the Oregon coast, 1930, was 12,233 cases.

Oregon's mineral resources are extraordinarily varied in character, including gold, silver, mercury and platinum as well as useful earths, but output is

not large. Output of mercury leads in value (3,700 flasks in 1930, valued at 400,000 dollars). Output of gold in 1930 was 14,300 ounces, valued at 295,600 dollars; silver, 9,816 ounces; and copper, 229,753 pounds. Value of mineral products, 1929, was 6,876,703 dollars.

In 1929 Oregon had 2,466 industrial establishments employing 65,521 wage-earners who received in wages 86,865,165 dollars; the cost of the materials, fuel and power used was 205,547,630 dollars, and the value of the product 412,330,623 dollars.

Oregon has good water facilities in the Pacific Ocean, and the Columbia, Willamette, and Snake rivers. The Dalles and Celilo Canal, completed in 1915, opens the Columbia and Snake rivers to navigation to a length of 570 miles from the ocean. Large ocean-going vessels can navigate the Columbia and Willamette rivers to Portland, 100 miles inland, through a channel 35 feet in depth. The State had (1930) a total steam railway mileage of 4,974 besides 550 miles of electric railway track. The State maintains 4,444 miles of highways, of which 3,660 are surfaced; the counties maintain 43,037 miles of highway of which 10,328 miles are surfaced.

On June 30, 1931, there were 90 National banks in the State, with capital of 13,665,000 dollars and total resources of 234,027,000 dollars; there were 125 State banks with capital of 7,511,000 dollars and total resources of 76,816,000 dollars.

## PENNSYLVANIA.

**Government.**—Pennsylvania, first settled in 1682, is one of the thirteen original States in the Union. The General Assembly consists of a Senate and a House of Representatives. Every citizen 21 years of age, resident in the State for one year, and in the election district for two months preceding the election, is entitled to vote, provided that he has paid a State or County tax within two years and at least one month before the election. The Senate consists of 50 members chosen for four years, 25 Senators being elected at each General Assembly election bi-annually. The House of Representatives consists of 208 members chosen for two years. The State is represented in Congress by two Senators and 34 Representatives.

*Governor.*—Gifford Pinchot. 1931–1935 (18,000 dollars).

*Secretary of State.*—Richard J. Beamish.

For local administration the State is organised in counties, cities, boroughs, townships, and school districts. There are 67 counties. The State Capital is Harrisburg.

**Area, Population, Education.**—Area, 45,126 square miles, of which 294 square miles are water area (excluding 891 square miles of Lake Erie).

Census population April 1, 1930, 9,631,350, an increase of 911,333, or 10.5 per cent., since 1920. Population at various Federal censuses :

**Finance and Defence.**—For the biennium ending May 31, 1931, the statement on finance, including general and special funds, is as follows:—

	Dollars
Balance in Treasury, June 1, 1929 . . . . .	75,504,102
Receipts, all funds, June 1, 1929, to May 31, 1931 . . . . .	398,184,839
<b>Total . . . . .</b>	<b>473,638,941</b>
Expenditures, all funds, June 1, 1929, to May 31, 1931 . . . . .	392,483,289

Balance in Treasury, May 31, 1931 . . . . . 80,795,653

On May 31, 1931, the outstanding bonds of the State amounted to 89,362,320 dollars. The assessed value of taxable real property in 1929 amounted to 9,865,418,071 dollars, and of personal property to 3,279,432,186 dollars.

The National Guard on June 30, 1931, consisted of 840 officers, 12 warrant officers and 11,094 men.

**Production and Industry.**—Agriculture, market-gardening, fruit-growing, horticulture and forestry are pursued within the State. In 1930, there were 172,419 farms; the farm area was 15,309,485 acres, of which 7,818,826 were crop land and 4,576,192 pasture land, the remainder being woodland. The total value of farm land and buildings in 1930 was 1,203,017,645 dollars; implements and machinery, 154,756,206 dollars. Pennsylvania leads in the production of buckwheat (3,483,000 bushels in 1931). In 1931, production of winter wheat was 19,756,000 bushels; rye, 2,025,000 bushels; oats, 28,143,000 bushels; corn, 66,766,000 bushels; potatoes, 26,549,000 bushels; tobacco, 58,487,000 pounds; tame hay, 3,154,000 tons; total crop of apples, 14,000,000 bushels; commercial apples, 1,838,000 barrels; peaches, 2,720,000 bushels; pears, 448,000 bushels; and grapes, 33,950 tons. On January 1, 1931, farm animals in Pennsylvania were: 336,000 horses, 49,000 mules, 916,000 dairy cows two year old and over, 1,411,000 all cattle, 481,000 sheep, 578,000 swine. wool clip, 1930, was 3,192,000 pounds from 420,000 sheep. National forest lands total 317,333 acres; State forests, 1,429,133 acres.

Pennsylvania so far exceeds all the rest of the States in the value of its mineral products as to stand almost alone. This is due principally to the State's leadership in the production of coal. Mineral products in 1929 reached a value of 892,918,833 dollars, of which 73,828,195 tons of anthracite

coal represented 885,642,751 dollars and 143,516,241 short tons of bituminous, 258,607,000 dollars, the two accounting for 72 per cent. of the total. In 1930 anthracite coal output reached 69,384,837 tons and bituminous, 122,459,000 tons. Other minerals that year were petroleum (12,797,000 barrels), natural gas (88,706 million cubic feet), natural gasoline or petrol (15,900,000 gallons), iron ore (magnetite and hematite, 894,039 long tons), and pig-iron, 9,734,591 long tons. Pennsylvania has important quarries, cement works, and brick and tile works. The output of coke in 1930 was 14,540,579 short tons; cement, 37,843,662 barrels.

The Pennsylvania Department of Internal Affairs, 1930, reports 20,065 industrial establishments, with an aggregate capital of 5,498,843,100 dollars, employing 165,728 salaried officials and 1,191,983 wage-earners; salaries amounted to 425,822,400 dollars, and the wages to 1,462,942,200 dollars. The value of the output was 6,531,113,200 dollars. Metals and metal products had the largest value, 2,701,954,800 dollars. Then come textiles, 986,756,000 dollars; mines and quarries, 605,336,200 dollars; food products, 627,222,200 dollars; chemicals, 425,915,800 dollars; paper and printing, 380,248,700 dollars; clay, glass and stone products, 188,089,500 dollars; leather and rubber products 175,454,800 dollars; lumber products, 102,219,600 dollars; tobacco products, 93,200,900 dollars. Pennsylvania has 34.5 per cent. of the country's blast furnace capacity, 36.4 per cent. of its iron and steel manufactures, 40.9 per cent of its silk manufactures. In 1929 Federal census showed 16,870 manufacturing establishments employing 1,006,946 (wages, 1,390,782,260 dollars), using raw materials, fuel and power valued at 4,000,673,484 dollars, and with output valued at 7,387,856,808 dollars.

The total value of imports at the port of Philadelphia for the fiscal year ending June 30, 1931, was 133,475,356 dollars, and of exports, 87,150,568 dollars. In 1930, the aggregate length of steam railroads within the State was 12,749 miles, and the total of all tracks operated by electric railways, 3,621 miles.

*Roads.* The State road system, not including township, city and borough roads and streets, has a mileage of 13,384 miles of which 10,270 miles have been hard-surfaced.

On June 31, 1931, 808 national banks had capital of 164,384,000 dollars and total resources of 3,261,522,000 dollars; 644 State banks and trust companies had capital of 203,088,000 dollars and total resources of 3,629,143,000 dollars.

## RHODE ISLAND.

**Constitution and Government.**—The earliest settlers in the region which now forms the State of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non-acceptance of the prevailing religious beliefs. The first of the settlements was made in 1636, and their numbers and importance quickly increased, settlers of every creed being welcomed. In 1647, a patent was granted for the government of the settlements, and on July 8, 1663, a charter was executed recognising the settlers as forming a body corporate and politic by the name of the English Colony of Rhode Island and Providence Plantations. On May 29, 1790, the State accepted the Federal Constitution and entered the Union as one of the 13 original States. The General Assembly consists of a Senate and a House of Representatives. The Senate has 42 members, besides the Lieutenant-Governor who is *ex officio* President of the Senate. The House of Representatives consists of 100 members. Every citizen, 21 years of age, who has resided in the State for 2 years, and is duly registered, is qualified to vote.

*Governor.*—Norman S. Case, 1931-33 (8,000 dollars).

*Secretary of State.*—Ernest L. Sprague.

The State is represented in the Federal Congress by 2 Senators and 3 Representatives.

The State is divided into 5 counties and 39 cities and towns. The State Capital is Providence.

**Area, Population, Education.**—Area, 1,300 square miles, of which nearly 246.9 square miles are water. Population according to Federal Census, April 1, 1930, 687,497, an increase of 83,100, or 13.7 per cent. since 1920. Population of census years :—

The bonded debt, August 31, 1929, amounted to 4,002,200 dollars. In 1930 the total assessed value of all property was 4,328,212,712 dollars.

The National Guard on July 31, 1931, consisted of 582 officers, 9 warrant officers and 7,473 enlisted men.

**Production and Industry.**—Texas is one of the most important agricultural States of the Union. In 1930, it had 495,489 farms covering 124,707,130 acres; value of farm lands and buildings was 3,597,407,000 dollars. There are 1,567,642 acres of irrigable lands in Texas, of which 797,695 acres are irrigated. Texas leads in the production of cotton (5,270,000 bales from 15,421,000 acres in 1931), of grain sorghum (60,000,000 bushels), of onions (3,944,000 bushels) and of pecans (32,000,000 pounds). Other important crops in 1931 were (in bushels) maize, 94,248,000; wheat, 57,433,000; oats, 59,976,000; rice, 10,441,000; potatoes, 4,891,000; sweet potatoes, 4,968,000. Other products are peanuts (85,333,000 pounds), vegetables, and fruits (especially peaches, oranges, and grape-fruit). The State has a very great livestock industry, leading in the number of all cattle (5,563,000 on January 1, 1931), of sheep (6,050,000), and of mules (951,000); it also had on that date 602,000 horses, 1,003,000 milch cows, and 884,000 swine. It leads in wool and mohair production, the clip in 1930 amounting to 50,092,573 pounds of wool from 5,073,000 sheep and of 15,645,371 pounds of mohair from 3,140,000 goats.

The chief mineral products are petroleum, sulphur, natural gas, cement, and quicksilver. In 1930, 289,965,000 barrels of petroleum were produced (in 1929, 298,441,000 barrels); natural gasoline or petrol, 489,700,000 gallons. Some quicksilver is produced. Texas leads in production of petroleum (with California a close second) and in natural gas; output in 1930, 517,880 million cubic feet. Output in 1930, coal, 833,872 short tons; cement, 7,083,572 barrels. Salt, sulphur (2,435,483 tons in 1929), gypsum, granite, sandstone, and limestone are also produced. Western Texas has extensive undeveloped potash fields. Total value of mineral products in 1929, 495,819,500 dollars.

In 1929, there were in the State 5,187 manufacturing establishments with 131,503 wage-earners earning 147,888,053 dollars. The cost of material, fuel and power used was 997,932,276 dollars, and the value of the output was 1,449,801,916 dollars.

A large trade passes through the port of Galveston, which is by far the most important outlet for the cotton grown in the United States, and as a commercial port is now second only to New York. Imports in the fiscal year ending June 30, 1931, 16,636,344 dollars; exports, 322,945,560 dollars. A permanent causeway over 2 miles in length now connects Galveston with the mainland. The steam railways in the State (January 1, 1929) have a total mileage of 16,727 miles (main lines). There are 518 miles of electric inter-urban railway in active operation in Texas. The State maintains 18,034 miles of highways, of which 10,896 miles are surfaced.

There are 1,047 miles of navigable water in the rivers of Texas. The long coast-line with its good harbour facilitates traffic by sea. The Houston Ship Channel (50 miles long), connecting Houston with the Gulf of Mexico, makes that city the largest inland cotton market of the world.

Texas had on June 30, 1931, 537 national banks with capital of 76,478,000 dollars and total resources of 982,573,000 dollars; 644 State banks and trust companies had capital of 32,699,000 dollars and total resources of 282,699 dollars.

## UTAH.

**Constitution and Government.**—Utah, which had been acquired by the United States during the Mexican war, was, in 1847, settled by Mormons, and on Sept. 9, 1850, organised as a Territory. It was admitted as a State into the Union on Jan. 4, 1896.

The Legislature consists of a Senate and a House of Representatives; the Constitution provides for the initiative and referendum.

The Senate (in part renewed every two years) consists of 20 members, elected for four years; the House of Representatives has 55 members elected for two years. Qualified as electors are all citizens, male or female,

who, not being idiots, insane or criminals, have resided one year in the State, four months in the county, and 60 days in the precinct preceding the election.

*Governor.*—Geo. H. Dern, 1931-33 (6,000 dollars).

*Secretary of State.*—Milton H. Welling.

There are 29 counties in the State. The Capital is Salt Lake City.

**Area and Population.**—Area, 84,990 square miles, of which 2,806 square miles are water. The area of the Indian reservations in 1930 was 531 square miles, and the population, 2,869 Indians.

Census population on April 1, 1930, 507,847, an increase of 58,451, or 13 per cent. since 1920.

## VERMONT.

**Constitution and Government.**—Vermont, first settled in 1724, was admitted into the Union as a State on February 18, 1791. The first Constitution was established by Convention at Windsor, July 2, 1777; in 1793 a new Constitution was adopted which, with amendments, is still in force. Amendments are proposed by two-thirds vote of the Senate each decennium, and must be accepted by two sessions of the Legislature before being submitted to popular vote. The State Legislature, consisting of a Senate of 30 members and a House of Representatives of 248 members, meets in January in odd numbered years. Electors are all citizens of the United States who possess certain residential qualifications and have taken the freeman's oath set forth in the Constitution. The Capital is Montpelier (7,837, Census of 1930). The State is divided into fourteen counties, and 248 towns and cities. The State sends two Senators and two Representatives to the United States Congress.

*Governor.*—Stanley C. Wilson, 1931–33 (5,000 dollars).

*Secretary of State.*—Rawson C. Myrick.

**Area and Population.**—Area, 9,564 square miles, of which 440 square miles are water. Census population on April 1, 1930, 359,611, an increase of 7,183, or 2 per cent. since 1920. Population at four census years was as follows.

## VIRGINIA.

**Constitution and Government.**—The first English Charter for settlements in America was that granted by James I. in 1606 for the planting of colonies in Virginia. The State was one of the thirteen original States in the Union. On the outbreak of the civil war in 1861, Virginia, after long hesitation, decided to join the seceding States, a course objected to by some in the western portion of the State, who set up a separate government which in 1863 was admitted into the Union as West Virginia.

The General Assembly consists of a Senate of 40 members elected for 4 years and a House of Delegates of 100 members, elected for 2 years. Qualified as electors are (with few exceptions) all citizens 21 years of age,

fulfilling certain residential qualifications who have paid their State poll-taxes and registered. The State Capital is Richmond. The State sends to the Federal Congress 2 Senators and 10 Representatives.

*Governor.*—John G. Pollard, 1930–34 (5,000 dollars).

*Secretary of the Commonwealth.*—M. A. Hutchinson.

## WEST VIRGINIA.

**Government.**—In 1862, after the State of Virginia had seceded from the Union, the electors of the western portion ratified an ordinance providing for the formation of a new State, which was admitted into the Union on December 31, 1862, under the name of West Virginia, and whose first government began on June 20, 1863.

The Legislature consists of the Senate and the House of Delegates. The Senate is composed of 30 members elected for a term of four years in such a manner that half the Senate is renewed biennially. The House of Delegates consists of 94 members elected biennially. The right to vote is given to every citizen (with necessary exceptions) 21 years of age and meeting certain residential requirements.

*Governor.*—William G. Conley, 1929–33 (10,000 dollars).

*Secretary of State.*—George W. Sharp.

The State sends to the Federal Congress two Senators and six Representatives. For local administration the State is divided into 55 counties. The State Capital is Charleston.

**Area and Population.**—Area, 24,282 square miles, of which 260 square miles are water area. The population, according to the census of April 1, 1930, is 1,729,205, an increase of 265,504, or 18·1 per cent. since 1920. Population in four Federal census years:—

Year	White <sup>1</sup>	Negro	Total	Per Sq. mile	Year	White <sup>1</sup>	Negro	Total	Per Sq. mile
1900	915,301	43,499	958,800	39·9	1920	1,377,856	86,345	1,463,701	60·9
1910	1,156,946	64,173	1,221,119	50·8	1930	1,614,312	114,893	1,729,205	72·0

<sup>1</sup> Including Mexicans, Asiatics and Indians.

In 1930 the population by sex and race was:—

	White	Negro	Asiatic	Mexican	Indian	Total

### ALASKA.

**Government.**—Alaska was purchased by the United States from Russia under the treaty of March 30, 1867, for 7,200,000 dollars. The Governor is appointed by the President of the United States for 4 years.

By Act of Congress approved August 24, 1912, Alaska became a Territory.

with a legislative assembly consisting of 8 senators and 16 representatives. Congress reserved to itself the right to legislate on certain subjects, so that the Territory is now governed conjointly by Congress at Washington and by its local legislative assembly. Regular sessions are held biennially and last for 60 days. Special sessions may be called by the Governor. The latter is appointed for four years by the President.

To facilitate administration, Congress in 1927 authorized the appointment of 3 ex-officio Commissioners who enjoy large powers.

*Governor*—Geo. A. Parks, 1929–33 (7,000 dollars).

*Secretary of Alaska*—Karl Theile.

**Area and Population.**—The gross area (land and water) of the territory is 586,400 square miles. The census population from 1900 to 1930 is shown as follows:—

Year	Population	Per Sq. Mile	Year	Population	Per Sq. Mile
1900	68,592	0.1	1920	55,086	0.1
1910	64,356	0.1	1930	59,278	0.1

Of the population in 1930, 35,764 were males and 23,514 females; 28,640 were whites and 29,983 were Indians, 26 Chinese, 278 Japanese, and 136 Negroes. About 20,000 people, employed in mines, canneries, and railway construction, spend a few months a year in Alaska, but these are not included in the enumeration; of the 28,640 whites, 10,180 are foreign-born.

The largest town is Juneau, the seat of Government, which had (census of 1930) a population of 4,037; the second largest is Ketchikan with a population of 3,786; other towns are Anchorage, 2,276; Fairbanks, 2,099; Petersburg, 1,249; Nome, 1,213; Sitka, 1,053; Cordova, 979; Wrangell, 916; Seward, 832; and Douglas, 593. There are altogether 18 incorporated towns.

**Education, Justice.**—In Alaska many religious missions are at work, representing very diverse denominations: Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist, Baptist, Congregational and others.

In 1930 there were 89 territorial white schools with 5,066 enrolled pupils and 253 teachers; 15 four-year high schools are maintained. Total cost of instruction, 594,662 dollars. The Bureau of Education of the Federal government handles the education, hospitalisation and general care of the native population. There are 93 native schools in operation and 7 hospitals. For the administration of justice the territory is a judicial district with 4 subdivisions and 4 courts.

**Finance.**—Federal receipts and expenditures in the territory, administered by the various Federal Departments in Washington in recent years, have been as follows, in dollars:—

	Receipts	Expenditure		Receipts	Expenditure
1927	4,523,405	10,884,513	1929	5,474,888	11,433,967
1928	4,226,832	11,147,773	1930	4,846,276	12,331,647

Territorial receipts (largely from licences to conduct businesses) and expenditures for two bienniums are: 1929–30 (actual), receipts, 2,415,893

dollars; expenditures, 2,468,659 dollars: 1931-32 (estimated), receipts, 1,890,390 dollars; expenditures, 2,572,451 dollars.

The Territory has no funded debt.

**Production and Industry.**—In some parts of the territory the climate during the brief summer is not unsuitable for agricultural operations. There are agricultural experimental stations which are giving valuable demonstrations. In 1920, there were 364 farms with a total area of 90,652 acres, of which 5,736 acres was improved land. Total value of all farm property in 1920 was 1,808,641 dollars. In Northern and Western Alaska are 200,000 square miles of treeless region worthless for agriculture but capable of furnishing pasturage for 4,000,000 reindeer. About 1,280 reindeer have been introduced from Siberia, and the industry is thriving. There were (in 1930) approximately 600,000 reindeer in the country distributed in 78 herds and valued at 8,750,000 dollars. During 1930-31, 1,566,585 pounds of reindeer, valued at 157,933 dollars, were shipped from Alaska. The Government-owned fur-seal herd of the Pribilof Islands, administered by the Department of Commerce, comprises about 85 per cent. of the fur seals of the world. This herd contains 970,000 animals; number of skins taken, 1930-31, 43,316. About 275 blue fox ranches, stocked with 36,000 blue foxes, represent an investment of 6,850,000 dollars. Value of furs and fur skins (including seal skins) shipped in 1930-31, 3,193,061 dollars.
